(†) Wall thermostat must be used in conjunction with heat recovery thermostat. A heat recovery thermostat controls fan only to move stratified warm air. Heaters cannot accomodate two built-in controls. If built-in heat recovery thermostat is used, the control thermostat must be a wall mounted type.

# ELECTRIC CABINET AND OIL-FIRED UNIT HEATERS

## ELECTRIC CABINET UNIT HEATERS

E21609

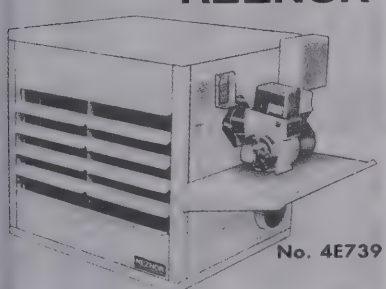
Replacement Parts Available
1-800-323-0620

No. 3UF52

QMARK
A Division of Marley Electric Heating

- 8 air inlet/discharge configurations easily field altered
- Neutral Gray baked enamel, 16-gauge steel cabinet
- Built-in thermostat and relays operated by internal 24 volt transformer
- Permanently lubricated, PSC motor, resiliently mounted
- Electrical leads easily accessed
- Tamper-resistant control compartment door lock
- May be controlled by field supplied thermostat
- May be field wired for load management control with external dry switch
- Disposable filter supplied
- Summer fan switch
- Hi/Lo heat settings on 208 and 240V models
- Easily accessible control panel

Quiet, controlled heat distributed with centrifugal blowers and a variety of air inlet and discharge arrangements. Designed for recessed, semi-recessed or surface mounting on walls, ceilings or floors. The high capacity and wide range of voltage/phase and control systems provide application versatility to meet most installation requirements. Built-in temperature controls minimize system design and installation time.



Particularly suited for use in lobbies, schools, offices, stores and other public buildings. QMark brand.

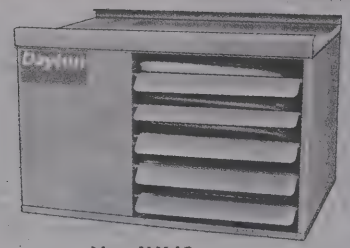
## HIGH EFFICIENCY OIL-FIRED UNIT HEATERS

MP3007

FREE DELIVERY on orders of $900 or more
See Freight Policy



- Suspended heating unit for stores, factories, warehouses, service garages and similar areas
- Durable, easy access combustion chamber and heat exchanger
- No. 2 fuel oil only
- Single-Stage pump
- 115V/60 Hz
- Pressure atomizing, gun type oil burner with electric spark ignition
- Fan and limit control
- Heavy-gauge, corrosion-resistant cabinet
- Adjustable louvers
- Must be mounted 8 to 12 ft. above floor
- Minimum clearance required: 2" top, 6" bottom, 48" front, 24" rear, 18" to combustibles around flue

# GAS FIRED UNIT HEATERS

No. 4LX48

Dayton®

New

No. 4LX56

## DAYTON® TUBULAR GAS-FIRED UNIT HEATERS

- Power vented
- Inshot burner design
- Tubular style heat exchanger
- Hot surface pilot ignition system
- 20 gauge steel jacket and baked enamel finish
- 120/1/60 supply voltage
- 120/24 volt control transformer
- Isolated control panel
- Single stage gas valve
- 120/1/60 volt fan motor with internal overload protection
- Individually adjustable and removable louvers
- Two point suspension

## Residential Unit Heaters

Low profile design for installation in low clearance applications. Available in sizes ranging from 30 to 90 MBH, these two point suspension heaters are approved for installations in residential garage applications. Power vented, propeller type unit heaters include the latest tubular heat exchanger and inshot burner technology. Hot surface pilot ignition system assures positive and reliable burner ignition. Unit is AGA/CGA certified in accordance with both categories I and III venting requirements enabling the installer to utilize single or double wall vent pipe when venting vertically or single wall pipe when venting horizontally. 120/1/60 supply voltage, 120/24 volt control transformer, and 120/1/60 volt fan motor with internal overload protection.

## Commercial Gas-Fired Unit Heaters

Available in sizes ranging from 100 to 400 MBH, these tubular gas-fired units are a great alternative to the traditional clam shell designed unit. These power vented, propeller type unit heaters include the latest tubular heat exchanger and inshot burner technology with the quality and reliability you have come to depend on. A state-of-the-art hot surface pilot ignition system assures positive and reliable burner ignition. AGA/CGA certified in accordance with both categories I and III venting requirements enabling the installer to utilize single or double wall bent pipe when venting vertically or single wall pipe when venting horizontally. 120/1/60 supply voltage, 120/24 volt control transformer, and 120/1/60 volt fan motor with internal overload protection. Two point suspension with 20 gauge steel jacket and baked enamel finish for durability and strength.

## RESIDENTIAL

# GAS FIRED UNIT HEATERS

Replacement Parts Available
1-800-323-0620

Dayton®

No 3E229

DAYTON LIMITED WARRANTY

**10 years on heat exchanger draft diverter nd burners. 1 year on other components. This warranty does not cover loss due to corrosion by chemicals precipitated in the air, such as chlorine or halogenated hydrocarbon vapors. Text of warranty available on request. See Manufacturer's Warranties* on pages opposite back cover.**

- **Standing pilot**
- **Heat exchanger and burner design achieve over 80% thermal efficiency**
- **Comply with ANSI Standard Z83.8 unit heaters**
- **Install 8 to 20 ft. from floor**
- **Do not use with air duct**
- **Optional drafter kit available for sidewall venting/improved efficiency; not listed in catalog, to order call 1-800-323-0620**
- **For applications in altitudes above 2000 ft., the burner orifices need to be derated. For correct sizing by altitude call 1-800-323-0620.**

Economical, safe, clean. Removable access door for easy cleaning and servicing. Heater comes with all internal controls and wiring installed.

Uses 24-volt thermostat (not included, sold on pages 3228 to 3230) to eliminate expensive conduit installation. AGA and CGA Certified for natural or propane gas.

NOT FOR SALE IN CALIFORNIA.

## DAYTON AND DAYTON FUEL TRIMMER FAN-TYPE UNIT HEATER FEATURES

**A. Heat exchanger:** Designed to achieve over 80% thermal efficiency. 20-gauge aluminized steel tubes: two vertical seams. Heat exchanger tubes welded to heat exchanger top and bottom header panels. Headers of 18 gauge aluminized steel.

**B. Draft diverter:** Corrosion resistant aluminized steel.

**C. Housing:** 20-gauge galvanized steel with gray enamel finish.

**D. Louvers:** Independently adjustable for best air distribution. Stops prevent closure of louvers.

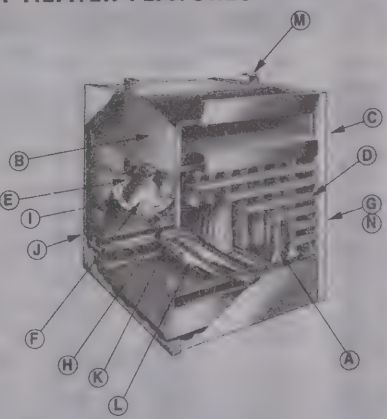
**E. Motors:** Shaded pole (SP) motor—sizes 30,000 to 125,000 BtuH. Permanent Split Capacitor (PSC) motor—sizes 150,000 to 400,000 BtuH. Automatic reset thermal protection. 115V, 60HZ.

**F. Fan:** Dynamically balanced, aluminum air foil blade assures quiet, efficient operation, while providing max. heat throw.

**G. Fan switch:** Has built-in heat anticipator to assure positive fan delay (not shown).

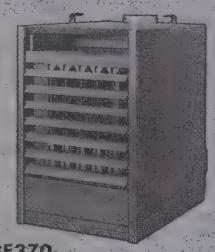
**H. Limit switch:** Prevents excessive outlet air temperature.

**I. Motor support:** Exclusive vibration isolators between fan and heater assure quiet operation. Motor and fan guard.



**J. Automatic gas valve:** 24VAC with 100% safety shut off.

**K. Air shutters:** Models have individually adjustable, friction locked, manually rotated air shutter adjustment.



**L. Burners:** Stamped aluminized steel with stainless steel port protectors.

**M. Hangers:** Two point suspension bolted directly to heat exchanger with 9/16" dia. hanging holes provided at the top of the unit.

**N. Control Transformer:** 24VAC (not shown).

# ENERGY SAVING GAS-FIRED UNIT HEATERS

No. 3E370

Replacement Parts Available 1-800-323-0620

- **Heat exchanger and burner design achieve over 80% thermal efficiency**
- **Conversion kit for LP to natural gas only available. To order call 1-800-323-0620**
- **Optional drafter kit available for sidewall venting. To order call 1-800-323-0620**
- **Uses 24V thermostat, not included**
- **For applications in altitudes above 2000 feet, the burner orifices need to be derated. For correct sizing by altitude call 1-800-323-0620**

Same construction and operating features as Dayton gas unit heaters on page 3401, but with gas-saving automatic spark ignition system. This system reduces fuel consumption compared to standing pilot operation with constant-burning pilot flam because it allows fuel use only during peri ods when heating system thermostat call for heat. When heat is called for, solid state igniter generates spark at pilot burn er. When flame sensor proves that flam exists, spark ceases and main gas valv opens. When demand for heat ends, mai and pilot valves are de-energized, thereb shutting off the gas supply to the mai burners and pilot burner until the nex heating cycle. AGA and CGA Certifiec Dayton brand.

### DAYTON LIMITED WARRANTY

**10-years on heat exchanger, draft diverter and burners. 1-ye on other components. This warranty does not cover loss du to corrosion by chemicals precipitated in the air, such a chlorinated or halogenated hydrocarbon vapors. Text of wa ranty available upon request. # POWER VENTED GAS-FIRED UNIT HEATERS

Dayton®
Fuel-trimmer Plus

Air Switch provides safe venting before gas valve opens

Power Venter improves efficiency and reduces installation costs

No. 4E456

**DAYTON FUEL-TRIMMER PLUS LIMITED WARRANTY**

10-years on heat exchanger, draft diverter and burners. 1-year on other components. This warranty does not cover loss due to corrosion from chemicals precipitated in the air, such as chlorinated or halogenated hydrocarbon vapors. Text of warranty available upon request. See "Manufacturers' Warranties" on page opposite inside back cover.

Replacement Parts Available 1-800-323-0620

ENERGY RIGHT®

**Power vented for higher seasonal efficiency**

**Available in LP or Natural Gas operation**

**Allows for sidewall venting equivalent to 50-ft.**

**For applications in altitudes above 2000 ft., the burner orifices need to be derated. For correct sizing by altitude call 1-800-323-0620**

**Units cannot be converted to alternative fuel source**

**Uses 24V thermostat, not included**

**Dayton Fuel-Trimmer Plus Unit Heaters** are similar to Dayton unit heaters found on page 3330, but these have gas-saving automatic spark ignition system, power vent and sealed flue collector. Fuel costs are further reduced by eliminating loss of heated air through draft diverter during off-cycles.

**Horizontal power vent allows use** of smaller, single wall vent pipe, reducing heat loss. Power venter provides mechanical venting of all waste combustion products. A pressure switch within the power venter assembly operates the electric gas valve. AGA and CGA Certified. Dayton brand.

# BLOWER-TYPE AUTOMATIC GAS UNIT HEATERS

No. 3E391

## DAYTON LIMITED WARRANTY

10-years on heat exchanger, draft diverter, and burners. 1-year on other components. This warranty does not cover loss due to corrosion by chemicals precipitated in the air, such as chlorinated or halogenated hydrocarbon vapors. Text of warranty available upon request. See "Manufacturers' Warranties" on page opposite back cover.

**Replacement Parts Available**
**1-800-323-0620**

- **Heat exchanger and burner design achieve over 80% thermal efficiency**
- **Optional drafter kit available for sidewall venting and improved efficiency; not listed in catalog; to order call 1-800-323-0620**
- **Refer To Terminology And Technical Data Section for determining heat requirement**
- **For applications in altitudes above 2000 feet, the burner orifices need to be derated. For correct sizing by altitude call 1-800-323-0620**

Natural gas-fired blower-heater units f suspension mounting. Designed for u with standard louvers or with short du runs. Max. external static pressure, 0. W.C. Units include belt-driven, permanen ly lubricated, centrifugal blower, prop motor, and variable-pitch drive facto preset at min. RPM; increase blower RP depending on amount of duct work adde to heater.

Motors are 115V, 60 Hz, single-phas Removable access door for easy servicin All internal controls and wiring installed **Use 24-volt thermostat, not included.**

Long-life aluminized steel heat exchan ers. Aluminized steel burners with stai less steel port protectors. Gray high-te perature enamel finish.

Four-point suspension with 9/16" hangir holes provided at top of unit; two additio al stabilizing points with 9/16" dia. hol provided on blower housin Recommended mounting height is at lea 8 feet from floor to bottom of unit.

AGA and CGA Certified for installatio with natural gas. Comply with ANS Standard Z83.8 unit heaters.

### DAYTON MODELS (Not for sale in CA.)

Combination 24-volt gas valve whic includes manual shutoff valve, pilot safet valve and pressure regulator. Standin pilot ignition system.

### DAYTON FUEL-TRIMMER MODELS FOR NATURAL GAS ONLY; UNITS CANNOT BE CONVERTED FOR USE WITH LP GAS

Features "Automatic Spark Ignitio System which reduces fuel consumptio compared to standing pilot operation wit constant-burning pilot flame because allows fuel use only during periods whe heating system thermostat calls for hea When heat is called for, solid state ignito generates spark to pilot burner. Whe flame sensor proves that flame exists spark ceases and main gas valve opens When demand for heat ends, main an pilot valves are de-energized, thereby shut ting off the gas supply to the main burner and pilot burner until the next heatin cycle.

# SEPARATED COMBUSTION HEATERS

No. 4DG06
Blower Type

Ratings from 100,000 to 400,000 BtuH LP or Natural Gas

No. 4DG26
Propeller Type

**ayton Separated Combustion Unit Heaters** are milar to Dayton unit heaters, but these ffer increased fuel savings by using utside air for combustion. This type of nit is designed to overcome slight nega- ve pressures found in industrial work laces near exhaust fans and paint booths.

**pecial environments** can be effectively heat- d since these heaters isolate the burner om dust, humidity, and chemicals. Ideal or non-explosive contaminated areas, reenhouses, truck garages, and industrial pace with wood or textile dust. Not for se in areas requiring explosion-proof ppliances.

.GA and CGA Certified. Dayton brand.

**BLOWER TYPE HEATERS FEATURE:**

- **Blower unit designed to overcome up to .2" ESP**
- **Designed for space heating in dusty, dirty or mildly hostile environments**
- **Higher seasonal efficiency by using outside air for combustion**
- **Allows for venting lengths of 50 equivalent feet**
- **Overcomes problem areas with slight negative pressure**
- **115V, 60 Hz standard motor**

**PROPELLER TYPE HEATERS FEATURE:**

- **Designed for space heating in dusty, dirty or mildly hostile environments**
- **Higher seasonal efficiency by using outside air for combustion**
- **Allows for venting lengths of 50 equivalent feet**
- **Overcomes problem areas with slight negative pressure**
- **115V, 60 Hz standard motor**

- **CSA Certified (30747 Standard)**

## HORIZONTAL DELIVERY UNIT HEATERS

**Heat transfer element.** Single or double pass serpentine design uses .030" wall seamless copper tubing as a primary surface and wide spaced, heavy-gauge aluminum fins as the secondary surface. Wide fin spacing simplifies cleaning and prevents clogging from dirt, lint, and other airborne substances. The copper tubes are expanded mechanically for a tight bond between the tubes and the fins. Design allows the element to withstand severe temperature cycling conditions under continuous service.

**Inlet/Outlet** fittings are made of copper using a closely machined female thread to accept standard threaded fittings. Fittings are brazed to serpentine coil to insure integrity of the coil at the most critical point of fabrication. Inlet and outlet are located on side(s) to save headroom.

**Enclosure** is two-piece, front and rear halves, and finished with baked on enamel paint. A venturi type air inlet provides efficien air delivery across the heating element.

**All units are leak tested** and rated for operation up to 150 PSI with temperatures to 375°F.

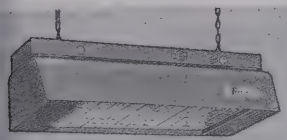
## VERTICAL DELIVERY UNIT HEATERS

**Heat transfer element.** Parallel tube design uses 0.028" wall seam less copper tubing as a primary surface and aluminum fins as the secondary surface. The copper tubes are expanded mechanically for a tight bond between the tubes and the fins.

**Headers** are steel construction and use male thread which accepts standard fittings. Headers are brazed to parallel tube coil.

**Enclosure** is of two-piece, die formed construction. The top cover incorporates a cooling cone which shields the motor from the heat of the hot coil when the fan is not operating.

**All units are individually tested** and rated to 150 PSI with tempera tures to 375°F.



**Units are especially suited** for buildings with high ceilings.

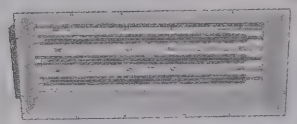
# ELECTRIC INFRARED HEATERS

No. 2V342



No. 5H374

No. 4E525

No. 3E431

No. 3E545

Replacement Parts Available 1-800-323-0620

**l Sun-Mite electric infrared heaters provide safe,** efficient electric frared heat without fumes, vapors or gases. Widely used in rm buildings, garages, factories, and store rooms. All models onsume up to 40-50% less energy than conventional forced-air stems, and feature gold anodized aluminum reflectors for maxnum reflectivity and precision heat patterns. Fostoria Sun-Mite rand.

## STANDARD UNITS

- **Quartz tubes rated for 5000 hr. life expectancy**
- **Mounting provisions with raised slots or tabs for chain suspension**
- **Two 4-ft. chains and four "S" hooks provided**

**o. 5H374 uses one 550W/120V quartz tube.** Protective chrome-lated steel wire-guard. Mount 2 to 6 ft. above area to be heated. ft., 3-wire grounded cordset with molded plug. Gold anodized uminum housing. UL Listed (E154519).

**o. 2V342 includes two 450W/120V quartz tubes.** Features separate witches for single or dual tube operation. Protective chrome-lated steel wire-guard. Mount 4 to 6 ft. above area to be heated. ft., 3-wire grounded cordset with molded plug. Steel housing ith high temperature baked-on brown enamel finish. UL Listed 2154519).

**os. 3E431 and 3E432:** No. 3E431 uses one 1500W/120V quartz ıbe; No. 3E432 uses one 3000W/240V quartz tube and NEMA 6-15P plug. Mount 7 to 10 ft. above area to be heated. 6 ft., 3-wire grounded cordset with molded plug. Steel housing with high temperature baked-on brown enamel finish. UL Listed (E32304).

**Nos. 4E525 and 4E526:** No. 4E525 uses two 1000W/120V quartz tubes with separate switches for single or dual tube operation; No. 4E526 uses four 1425W/240V quartz tubes with separate switches for either two tube or four tube operation. Protective chrome-plated steel wire-guards. No. 4E525 has 15 ft., 3-wire cordset with NEMA 5-20P molded plug; No. 4E526 has 15ft., 3-wire cordset with NEMA L6-30P twist-lock plug. UL Listed (E154519) for permanently installed or suspended applications only.

## HEAVY-DUTY UNITS

- **For high vibration and high abuse applications**
- **6000, 13,500, and 27,000 watts, 3-PH.**

**All Heavy Duty Models** have a 0.040" gold anodized aluminum housing with reinforced front and corner construction. Extruded aluminum reflector with bright aluminum insert. Rugged U-shaped metal sheath heating elements with high-temperature silicon lead wires for easy connection to supply wiring. May be suspended by 14- or 16-gauge hardware chain or by rigid mounting with angle iron. Must be mounted 36" apart; 36" from a vertical surface and 24" from ceiling. Integral hanger brackets. UL Listed (E32304); CSA Certified (LR62141); 27.0 models UL Listed only.

*) 240V unit will operate on 208V, with 25% decrease in BtuH output. (†) Units can be field converted for single phase operation.

# 3-ELEMENT STAINLESS STEEL INDOOR/OUTDOOR INFRARED HEATERS

fostoria®
Quality Since 1917

No. 3UD60

UL® c UL®

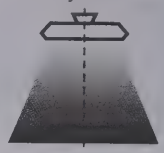
E32304

Replacement Parts Available
1-800-323-0620™

## REFLECTOR BEAM PATTERNS AVAILABLE

**Indoor Mounting Heights of 10 ft. and Above**

30° Symmetric



30° Asymmetric

**Indoor Mounting Heights of 8 ft. to 18 ft.**

60° Symmetric

60° Asymmetric

**Indoor Mounting Heights of 8 ft. to 10 ft.**

90° Asymmetric

Outdoor—Use 30° patterns at 7 ft. to 10 ft. mounting heights. Asymmetric patterns can be achieved by tilting fixture. Use optional mounting bracket No. 4E231 see page 3337.

- **UL and C-UL Listed for suspended, totally exposed outdoor and indoor applications**
- **Three reflectors for maximum pattern control**
- **Stainless steel housing, hardware, and brackets**
- **No ferrous metals used in the unit**
- **Gold anodized aluminum reflectors and end caps**
- **High temperature lead wires**
- **Single or three phase wiring**
- **Optional mounting bracket, No. 4E231, sold on page 3409**
- **Knockouts for 1/2" conduit on both ends and centered on top of the wiring channel**
- **Optional recessed mounting improves the appearance of indoor drop ceiling applications (see Recessed Mounting Frames on page 3UD75)**
- **Optional Ruby Red Vycor® sleeves filter out bright light**

The 3-element (lamp) Mul-T-Mount Series Infrared Heater has all of the features of the 2-lamp models, but also provides 50% more watt density for a given reflector pattern. They provide for a balanced 3-phase load when wiring to a 3-phase system. Can be used for indoor or outdoor industri and commercial applications.

For easy installation, a "T" tab on the to of the heater suspends it from its mountir bracket/wiring channel while it is beir wired—so only one person is needed t install heater. Wiring channels are the fu length of the unit to help when formir continuous rows of heaters. Fixtu should be mounted a minimum of 3" fro ceiling, 24" from vertical surface, and 3 apart. Any combustible surface or objec excluding people, should be a minimu 62" from direct radiation of the heater.

(*) These 3-element heaters provide for a balanced 3-phase load when wired to a 3 phase system. Can be wired for single phase operation also.

# INDOOR/OUTDOOR ELECTRIC INFRARED HEATERS

Replacement Parts Available
1-800-323-0620

E32304 LR62141

**REFLECTOR (BEAM) PATTERNS AVAILABLE**

| For Mounting Heights of 10′ and Above (Indoor) | | For Mounting Heights of 8′ to 18′ (Indoor) | | For Mounting Heights of 8′ to 10′ (Indoor) |
|---|---|---|---|---|
| 30° Symmetric | 30° Asymmetric | 60° Symmetric | 60° Asymmetric | 90° Asymmetric |

**OUTDOOR—Use 30° patterns at 7′ to 10′ mounting heights. Asymmetric patterns can be achieved by tilting fixture. Use Optional Mounting Bracket, No. 4E231, sold below.**

**ul-T-Mount series of electric infrared heaters** delivers 3200 (10,922 tu) or 7300 watts (24,915 Btu) of high efficiency electric ıfrared heat. **Can be used for indoor or outdoor** industrial or com-ıercial applications, such as: production or assembly areas, ›orting arenas, hangars, driveways, ice and snow melting at dewalks, or public entranceways.

**ll models are equipped with two clear quartz infrared lamps** (ele-ıents) which provide the highest infrared efficiency of any radi-nt heat source. Lamps deliver 94% of the installed load in the ›rm of direct infrared energy, directed toward the work area or ırface by gold-anodized aluminum reflectors. Optional red ycor® sleeves filter out light (to order sleeves, call 1-800-323-620.) Select from either a 30° symmetric, 60° symmetric, or 90° ymmetric beam pattern. Fixtures can be tilted to achieve any symmetric pattern, for wall mounted applications—see line rawings above. Can be individually staged to provide full On, 1/2 n, or full Off control.

**xture housing constructed of 20-gauge** corrosion-resistant steel. pecially designed T-tab wire channel enables "one-man" fixture ıstallation. Four high temperature lead wires provided for single r two-stage wiring, and for single or three phase heating sys-ems. Knockouts on both ends and centered on wire channel for rigid mounting; or heater can be chain suspended. 3" stand off mounting brackets included. For achieving 30° or 60° asymmetric pattern, use optional mounting bracket listed below. Fixture should be mounted a minimum 3" from ceiling, 24" from a vertical surface, and 36" apart. Any combustible surface or object should be a minimum 54" from direct radiation of the heater. All 3.2 kw heaters are UL and CSA Listed. Nos. 4E219 and 4E220 are UL Listed for operation at a max. of 7300W/600V and CSA Certified for operation at a max. of 6000W/480V. Fostoria brand.

These heaters are also available in 304 Stainless Steel, No. 3 Finish (grainline type), for any outdoor and many indoor applications. The entire housing is constructed of stainless steel. The hardware is stainless steel or aluminum. The reflectors and end caps are fabricated from highest quality gold anodized aluminum. These fixtures will not rust or corrode in damp or chemical laden atmospheres. Note: Recessing frames are available in Stainless Steel. (See Recessed Mounting Frames on page 3410). UL Listed.

## FOSTORIA® SUN-MITE® LIMITED WARRANTY

**Elements are warranted for 4-years, 5000 hour life expectancy. 1-year on all other parts. See "Mfrs.' Warranties" on page opposite inside back cover.**

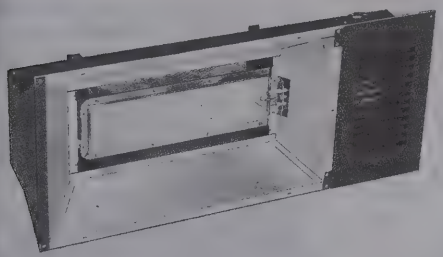
# RECESSED MOUNTING FRAMES

fostoria® Quality Since 1917

c UL E32304

No. 3UD75

The RMF Series recessing frames, fo indoor/outdoor infrared heaters, ar designed to mount the indoor/outdoor Mu T-Mount Heater when the application call for recessing heaters in overhead struc tures such as ceilings and canopies. Al heaters are C-UL Listed for recesse mounting. Frame holds and supports th heater in the ceiling and serves also t conceal the edges of the cut-out, for clean and attractive appearance. Frame are available to match painted or stainles steel 2- or 3-lamp models. Sturdy, steel o stainless steel one piece construction. T select the appropriate frame to match th heater being recessed, see below.



## RECESSED MOUNTING FRAME SELECTION GUIDE

# JNVENTED GAS-FIRED INFRARED HEATERS

No. 4E207

No. 3E602

PERFECTION-SCHWANK LIMITED WARRANTY

**15-Years on ceramics, steel burners; 1-Year on all other parts. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

No. 3E604

**Replacement Parts Available**
**1-800-323-0620**

- **Natural and LP gas-fired infrared heaters**
- **Can be controlled by optional 24V thermostat**
- **No blowers required**

**ese natural and LP gas-fired infrared heaters** are used for spot, ea, and total heating applications. Ideal for loading docks, arehouses, shops, garages, factories, churches, and auto show oms, which require an attractive, enclosed heating system. nits heat people and objects, not air; save up to 50% in heating sts compared to conventional air warming heaters. Use for w, high ceiling installations, or upgrading existing heating sysms where better quality, longer life, and higher heating ficiencies are required.

**eassembled units** come ready to mount with easy installation and erating instructions.

**ounted horizontally** or up to a 30° angle from horizontal, for applition flexibility.

**or to heater distances,** ventilation requirements, and minimum earances to combustibles must be maintained.

**n be controlled by remote thermostat.** Use No. 2E156 or equivalent.

**quire no blowers,** venting or ductwork; however, must be used in ell-ventilated area.

**Heated area requires 4 CFM of exhaust ventilation** for every 1000 BtuH input for natural gas and 4.6 CFM for LP gas.

**Exclusive Schwank "effect" ceramic tile and stainless steel burner housing** used in all models. Provides high efficiency conversion of gas-air mixture to usable radiant energy. High temperature surface of ceramic tiles provides warming rays of heat.

**Highly polished aluminum reflectors** direct radiant heat to people and objects below.

**Solid state direct spark ignition system** provides positive ignition every time and 100% safety, through automatic gas shut-off control and pressure regulator.

**Gas and electric connections** are in convenient locations. Can use existing 1/2" NPT line for supply. **24VAC, 20VA, 60 Hz power required** (use No. 4X744 or equivalent transformer).

**Baked enamel steel cabinet** in chestnut brown color. Perfection-Schwank brand.

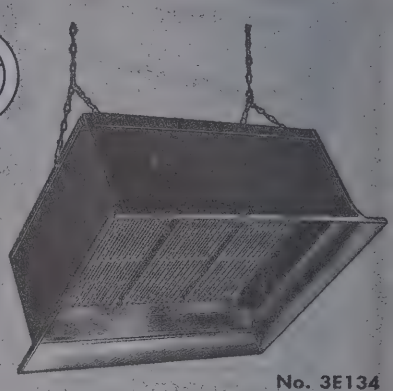
# UNVENTED GAS-FIRED INFRARED HEATERS

Dayton



Replacement Parts Available
1-800-323-0620

No. 3E132

No. 3E133

No. 3E134

**DAYTON LIMITED WARRANTY**

10-Years on burners; 1-Year on all other parts. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- **NOT FOR RESIDENTIAL USE**
- **Superior ceramic grid**
- **Stainless steel radiating rods**
- **Noncorrosive materials throughout**
- **1/2" NPT gas inlet, 120V, 60 Hz power required**
- **Highly polished aluminum reflector**
- **Totally assembled; ready to hang**
- **Chain hanging set included**
- **Direct spark ignition**
- **Low maintenance; no moving parts**
- **Can be thermostatically controlled**

**These highly efficient infrared heaters are widely used for total or spot heating** in factories, warehouses, service garages, foundries, etc. 30-50% fuel savings over conventional systems. No warm up time needed. Impart instant, uniform heat directly to people and objects, which then heat surrounding air. Ideal for areas with large heat losses.

**Installation costs are low because units are preassembled** and ready to suspend on chains or steel brackets hung from ceilings, walls or beams. Gas and electrical connections are in convenient locations.

**All units acceptable** by Factory Insurance Association (FIA) and Factory Mutual (FM) insurance agencies. AGA Certified. 1/2" NPT gas line and 120V, 60 Hz power required.

**For high ceiling applications.** Gas-air mixture passes through a perforated ceramic refractory and ignites on its surface. This causes the ceramic material to heat to approximately 1780°F (high intensity) and generate large amounts of infrared radiation that is directed to the floor. Not recommended for car wash applications; see infrared tube heaters on page 3341.

**Aluminized and stainless steel construction** used throughout. Bright aluminum reflector. Equipped with 100% automatic gas shut-off control and pressure regulator. No blowers, venting or ductwork needed. Electronic ignition assures reliable operation. Can be controlled by remote thermostat, No. 2E347. Dayton brand.

**AREA HEATED**

| BtuH Input | Radiant Suface Square Inches | Typical Floor Coverage Dia. (Ft.) @ Mtg. Ht. (Ft.) | |
|---|---|---|---|
| 30,000 | 85 | 17-21 | 11-14 |
| 60,000 | 170 | 21-26 | 14-17 |
| 90,000 | 255 | 27-32 | 18-21 |

**Installation information**—Heated area requires 4 CFM of exhaust ventilation for every 1,000 BtuH of infrared heat (e.g. 120 CFM for a 30,000 BtuH heater, 240 CFM for a 60,000 BtuH heater, and 360 CFM for a 90,000 BtuH heater). Heaters must be mounted at a 20 to 35° angle from horizontal, preferably facing inward around the perimeter of heated area. See clearance to combustibles chart below.

# GAS-FIRED INFRARED TUBE HEATERS

**HOW INFRA-RED WORKS:**

**An infra-red heater's tube and reflector heat the surface below. These surfaces warm up and return heat to the surrounding space.**

**Convert Single Tube Heaters into U-Tube or L-Shaped Heaters with 180° or 90° Bend Fittings, Nos. 3F835 & 3TZ71, sold separately below.**

- **100% Hot surface ignition provides reliability under adverse conditions**
- **4" Dia. interlocking tubes**
- **4" Dia. aluminized alloy combustion/heat exchangers enable high temperature and corrosion resistance—meet 500 hr. MIL salt spray tests**
- **Dual differential safety pressure switches**
- **Includes 24" stainless steel flex connector**
- **120V, 60 Hz power**
- **Ignition current amps, 4.8; running current amps, 1.1**
- **Chain mounting sets included**

**These infrared tube heaters** are an efficient way to heat factories, warehouses, service garages, car washes, and foundries—30-50% fuel savings over conventional systems. Units deliver low intensity heat and may be vented or unvented. For ceiling applications 12- to 40-ft. above finished floor. Compact blower/burner combination propels baffled hot gases through a 4" diameter, heavy-duty black-coated aluminized steel tube. Tube temperature reaches approximately 900°F (low intensity) and will radiate heat in the direction that the mirror polished aluminum reflector directs (adjustable 0° to 45°).

**Installation**—Heaters can be vented through a 4" flue or used unvented (see 3F839) which requires 4 CFM of mechanical ventilation per 1,000 btus of heater input capacity to indirectly vent the units. In a dusty, humid, or contaminated area, outside combustion air is highly recommended and can be supplied by using the standard 4" diameter intake collar. Sidewall venting requires a side wall venting kit, No. 2C448, sold below. Common vented units must be controlled by a single thermostat and must use a dual exhaust assembly, No. 3F817. 6" side wall venting kit, No. 2F211, sold separately below. Complete installation instructions included with each heater. AGA Design Certified. Dayton brand.

**DAYTON LIMITED WARRANTY**
**Five years on combustion and radiant exchangers. One year on all other components. Text available upon request. See "Manufacturers' Warranties on page opposite inside back cover.**

* Floor coverage based on total building heating. Spot heating coverage will vary.

## INFRARED TUBE HEATER ACCESSORIES

**ual Exhaust Assembly.** "Y"-shaped fitting used when common venting two heaters. Constructed of 16-gauge aluminized steel, black oated. Fitting is 4 x 4 x 6". Must be used when two units are eing common vented.

**o. 3F817.** Shpg. wt. 16.0 lbs. List $152.25. Each ..... **$138.50**

**" Side Wall Venting Kit.** Includes a 4" side wall vent cap, 4" wall himble, 18" "B" vent, and "B" to "C" adapter. Required for venting single units through a side wall.

**o. 2C448.** Shpg. wt. 8.0 lbs. List $78.75. Each ..... **$65.05**

**" Side Wall Venting Kit.** Includes a 6-in. side wall vent cap, 6-in. all thimble, 18-in. "B" vent, and "B" to "C" adapter. Required or common venting two units through a side wall.

**lo. 2F211.** Shpg. wt. 9.0 lbs. List $102.90. Each ..... **$96.55**

Unvented Outlet Cap. 4-in. OD with flapper. Required for use when installing a single tube heater unvented, insuring proper safety switch operation.

**lo. 3F839.** Shpg. wt. 2.0 lbs. List $26.33. Each ..... **$22.09**

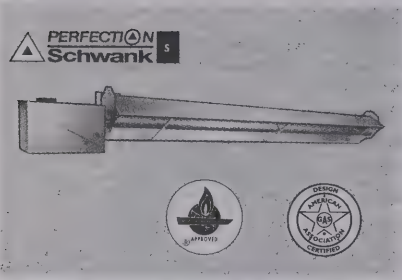
**90° Elbow Pipe Fitting.** 90° L-shape Bend, 16-gauge aluminized steel elbow with black coating. Detroit Radiant brand (E-6).

**No. 3TZ71.** Shpg. wt. 7.0 lbs. List $73.00. Each ..... **$63.10**

**180° "U" Bend Fitting.** Used to turn a straight tube heater into a "U" configuration. Preferable for spot heating or when a wider heat floor coverage pattern is required. Constructed of 16-gauge aluminized steel, black coated tube, 4" diameter fitting with tube clamp and mounting materials included. Dayton brand.

**No. 3F835.** Shpg. wt. 18.0 lbs. List $94.50. Each ..... **$81.80**

**Outside Combustion Air Inlet Cap.** 4" OD with bird screen designed for connecting outside combustion air to a single unit with PVC or other suitable material. Mounts to the side wall of the building..



**No. 3F837.** Shpg. wt. 2.0 lbs. List $26.25. Each ..... **$15.95**

10-Ft. Tube & Reflector Extension. One of these extensions may be added to any of the above tube heaters. DO NOT use more than one per unit. Includes 10-ft. tube with black coating, reflector, tube clamp, and two wire hangers.

**No. 3VH27.** Shpg. wt. 45.0 lbs. List $209.00. Each ..... **$186.75**

# GAS INFRARED TUBE HEATERS

## INFRARED HEATERS

- **Positive pressure system**
- **Direct spark ignition with 100% shutoff for safety**
- **Easy service access through opening door to dust-free cabinet**
- **Approved for use in aircraft hangers and garages when installed in accordance with NFPA-54**
- **AGA/CGA Design Certified for natural or LP gas**

**Gas infrared tube systems** provide an energy efficient alternative to old outmoded boilers and hot air systems. Approved for vented, unvented, and sealed system applications. Infrared heats the floor slab and the machinery first, then the air. Personnel working in the "comfort zone" are blanketed by direct infrared from above, secondary infrared from below, and warm air rising from the floor. Gas infrared heating may be used in most commercial/industrial buildings—from low roof warehouses to high bay manufacturing areas. Realize 30-50% fuel savings over conventional type heating systems when applying infrared heat to your workspace. 120V, 60Hz, 1 amps required.

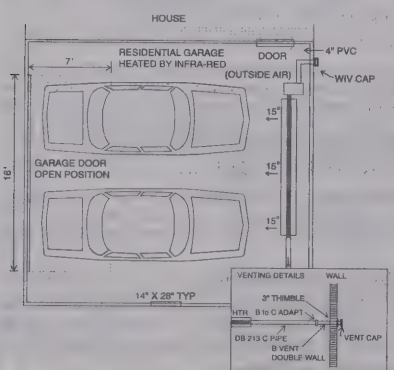
## RESIDENTIAL GARAGE INFRARED TUBE HEATERS



### DAYTON LIMITED WARRANTY

**Three years on combustion/heat exchanger. One year on all other parts. Text available upon request. See "Manufacturers' Warranties on page opposite inside back cover.**

- **Glo-Bar™ ignition system for reliability**
- **Dual safety pressure switches**
- **3' Dia. interlocking radiant tube with high emissive black coating**
- **Adjustable polished aluminum reflector directs heat**
- **Stainless steel internal baffle adds efficiency**
- **24" Stainless steel gas flexible connector included**
- **Sidewall or roof vented — sidewall vent package available below**
- **Up to 2 units may be common vented — order dual exhaust fitting below**

**These residential garage tube heaters ar** approved for attached garages, solariums enclosed patios, swimming pool areas farm shops, work shops, etc. They provid efficient infrared heat where and whe needed. Units come equipped to accep outside combustion air. 120VAC, 60 Hz.

# ENCLOSED & RADIANT FRONT VENTED GAS CONSOLE HEATERS

COZY

**Replacement Parts Available**
**1-800-323-0620**

Venting—These heaters are designed to be vented in accordance with National Fuel Gas Code ANSI-Z223.1 and must therefore be connected to a gas vent, chimney or single-wall metal pipe venting system that is engineered and constructed to develop a positive flow adequate to remove flue gases to the outside atmosphere.

- **Top Operated Controls**
- **Thermostat sensing bulb**
- **100% Safety Pilot/Built-in Pressure Regulator**
- **Built-In Draft Diverter**
- **Cast-iron, slotted port burner**
- **Side access door**
- **Multi-louvered top/lower casing front—Assures maximum heat transer. Directs warm air evenly throughout the area**
- **Continuous-seam welded combustion chamber—durably constructed of heavy-duty steel for maximum, rapid heat transer**
- **Matchless spark ignition for lighting pilot light**
- **Vent spill safety switch automatically shuts unit off in the event of flue blockage or incorrect vent installation**

Vented console heaters are available in closed front (20M, 35M, 50M, and 70M BtuH) offering high styling and circulating warmth, or radiant front (35M, 50M, and 70M BtuH) with radiating and circulating warmth.

**Infinite speed thermostatic blower** is optional for 35M and 50M BtuH units and is standard on 50M BtuH radiant and all 70M BtuH units. Blower tubes are built between legs on all units (except 20M BtuH). Air moves through unit casing, heated and distributed at floor level (counterflow action) for warm floor effect. Controls mount at unit upper left rear. Positive "Off", infinite-speed, 115V, 60Hz with 6' three-prong cord set.

**No. 3VJ31.** Shpg. wt. 6.0 lbs. List .....$241.28
Each .....**$169.50**

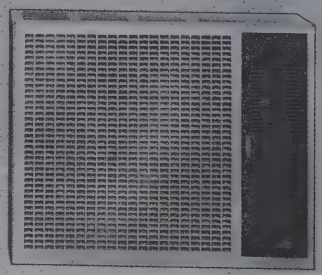
# DIRECT VENT CONSOLE THRU-THE-WALL FURNACES

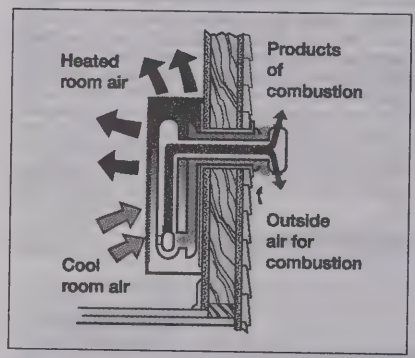
No. 3VJ20

COZY



Replacement Parts Available
1-800-323-0620

DESIGN AMERICAN GAS ASSOCIATION CERTIFIED



APPROVED

**COZY LIMITED WARRANTY**

10-Yrs non-pro rated on heat exchanger, 1-year on other components. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

No. 3VJ22

- Vent assembly included
- Cast-iron slotted port burner
- Matchless piezo ignition system for lighting pilot light
- 100% safety pilot and pressure regulator
- Bee and varmint-proof vent cap
- Burner observation glass and front access burner assembly removal
- 750 millivolt stat. included

Replacement Parts Available
1-800-323-0620

The sealed combustion direct vent mount on any outside wall and uses no room ai for combustion, making them safe t install in sleeping quarters. Standard ven telescopes to fit 5"-9" wall.

All units require 9" wall opening an include mounting template.

**VARIABLE SPEED CONTROL BLOWER No. 3VJ32 FOR MODEL Nos. 3VJ22, 3VJ23, 3VJ24, AND 3VJ25**

Blower enhances warm-air circulation an minimizes air stratification. Infinite speed control minimizes noise. 1500 RPM motor 115V, 60Hz with 6-ft., three-prong cord. No blower available for Nos. 3JV20 and 3JV21

**No. 3VJ32.** Shpg. wt. 7.0 lbs. List .....$166.27
Each.....**$116.50**

# VENT-FREE GAS SPACE HEATERS

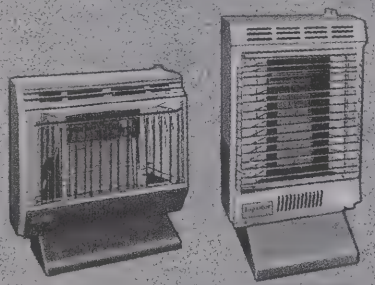
Rinnai

No. 3UD35

## SILENT SERVANT VENT-FREE CONVECTION HEATER

- Child safety lock
- Energy saving mode
- Filter indicator lamp
- No visible flame
- Oxygen depletion sensor
- Drafts are elminated by keeping heat at floor level with vents at base
- Super quiet operation
- Automatically modulates down to 5,000 Btu's (Constant burner flame)
- Nos. 3UD37 and 3UD38 include dual on/off timer and a remote control

**THREE-YEAR RINNAI LIMITED WARRANTY**



See "Manufacturer's Warranties" on page opposite inside back cover

## INFRARED GAS-FIRED HEATERS

**Vent-free heaters** deliver radiant and convection heat simultaneously for maximum comfort while preventing heat-loss through flues. Effective in hard to heat areas. No electricity needed—they work even when power fails. Can be wall or floor mounted with optional bases sold below. An oxygen depletion sensor shuts heater down if ventilation or oxygen levels become inadequate. A 100% fail-safe valve cuts off gas supply should the flame or pilot light become extinguished. Safety grill helps keep objects away from the burner plates. Top-mounted controls. Automatic piezo ignition. Heaters are slim-line designed and housed in champagne-beige colored cabinets that remain cool to the touch. AGA design certified. Rinnai brand.

**The Equator** heats small rooms like bathrooms and workrooms. 3-Year Warranty.

**The Bantam** heats mid to large size living areas. Available with a nonelectric thermostat that stays working even if the power fails. 3-Year Warranty

**The Glo-Ray** is suitable for supplemental heat in family room, basements and new additions. Complete with a built-in manually controlled, 2-speed fan. Base included for floor or wall mounting. 5-year warranty.

**The Tropic** heats mid-size rooms, a large living area, or even a small home with ease. Optional whisper quiet fan (not included see below). 3-position heat control LO/MED/HI. 4-year warranty.

**Prices on these items are subject to change without notice. Contact local branch for current pricing.**

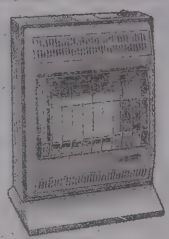
# VENT-FREE GAS WALL HEATERS



Comfort Glow

New

Not recommended for altitudes above 4500 ft.

Radiant Heater
No. 3ZK36

Blue Flame Heater
No. 2E782
with Optional Floor Base

- **The 99% heating efficient designs require no outside venting**
- **Provides easy economical installation**
- **With no vent or chimney required, and a built in regulator, installation is an easy job. Professional installation recommended**
- **No electricity needed**
- **Ideal for emergency heat during a power outage**
- **Startup is easy just push the piezo ignitor**
- **Clean quiet odorless operation**
- **Natural Gas and Propane Gas Models Available**

**Comfort Glow Vent-Free Gas Space Heaters** burner designs require no outside venting, to eliminate heat loss and provide 99.9% efficient heating.

**Infrared Plaque Heaters** direct heat from the radiant plaques, heating objects in the room before heating the air. They also perform well within nationally recognized guidelines for indoor air quality. The dual-purpose safety pilot system protects against oxygen depletion and any interruption in the fuel supply. If either occurs, gas flow to the burner is shut off.

**Blue Flame Convection Heaters** work much like a central heating system, heating the air first then objects.

**All Comfort Glow heaters** can be mounted to the wall with the hardware kit (included). Also, the 3ZK series heaters can be mounted to the floor (built in base). The 2E and 3E series heaters can be floor mounted with the optional 4E series bases (see below for matching base). The 4E086 Blower maximizes heat distribution (fits 2E and 3E heaters only). Inlet fitting size is 3/8" NPT. Operation above 4500 ft. altitude may cause nuisance pilot outages.

**TWO-YEAR COMFORT GLOW LIMITED WARRANTY**

**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

**DIANT HEAT UNITS BLUE FLAME UNITS**—Blue Flame convection works like a central heating system. These models warm the air first, en people and objects. Thermostat cycles heat "On" and "Off" for added comfort. Models have tempered, tinted glass.Direct heat om radiant plaques quickly warm people and objects in the room before heating the air. Plaques cast a warm, bright orange glow.

# GAS AND ELECTRIC WALL FURNACES

## COZY GAS WALL FURNACES

No. 3E588

**Cozy wall furnaces** permit individual temperature control in virtually any "hard-to-heat" area. They are available with either a built-in snap bulb thermostat, or a wall thermostat control. Circulated air rises through the furnace and into the room again, while the louvered front grill delivers radiated warmth. Minimum opening required: 65¾H x 14¼"W. Furnaces vent vertically using 4" oval vent B/W pipe No. 4E059, available below.

**Single wall models** can be installed on any inside or outside wall, with standard 16" center, 2 x 4" stud space.

**Dual wall models** install in standard stud space between any two adjoining rooms allowing one unit to do the work of two.

**Features cast iron, slotted-port burners** factory installed pressure regulator, 100% safety pilot, energy efficient low-BtuH pilot, 20-gauge aluminized combustion chamber, ½" gas connection and 4" venting. All units feature vent safety shutoff device which automatically shuts unit off in event of flue blockage or incorrect installation. High temperature, neutral bone color baked-enamel finish. Finished dimensions: 16½W, 68H, 6½"D. Cozy brand.

(*)Ratings shown are for elevations to 2000 ft. For elevations above 2000 ft., ratings should be reduced by 4% for each additional 1000 ft. above sea level. ❷ These products are covered by California Proposition 65. California purchases or shipments, see first page of Grainger Branch Listing or call any California branch. (†)Wall mount thermostat included.

**COZY LIMITED WARRANTY**

**10-years on combustion chamber, 1-year on other components. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

**Replacement Parts Available**
**1-800-323-0620**

**Rear Register Kit.** Used on single wall models to circulate warm air into an adjoining room. Adjustable vent controls air flow. Knockout plate on rear of furnace body is provided for easy installation. Cozy brand (40542A).

**No. 4E161.** Shpg. wt. 5.0 lbs. List $53.53. Each.....**$43.50**

**Free Standing Kit.** For use with single wall models to eliminate need for cutting into wall. Ideal for masonry wall applications. Vent pipe not included. Adds 5" to depth of heater. Max. ceiling height: 8'6". Cozy brand (FSKA).

**No. 3E596.** Shpg. wt. 24.0 lbs. List $158.74. Each.....**$128.75**

**Fan Kit.** For installation at top of each furnace to incrase warm air circulation. Adds only 10½" to height of furnace and fits flush against wall. 115V operation. Cozy brand (WFF81B).

**No. 4E162.** Shpg. wt. 10.0 lbs. List $165.62. Each.....**$134.00**

**Night Setback Thermostat.** Energy-saving multivoltage thermostat provides automatic control of selected Heat-On/Off time periods in place of standard wall thermostat (for use on Nos. 3E588-3E954 only). Cozy brand (XL110).

**No. 4E163.** Shpg. wt. 0.5 lbs. List $84.21. Each**$70.30**

**4" Oval Vent Kit.** Contains two 24" long sections of double wall oval vent pipe, one 4" oval to round adapter, a holddown plate to maintain proper clearance, and two ceiling plate spacers. UL Listed. Cozy brand (40VK).

**No. 4E059.** Shpg. wt. 9.0 lbs. List $130.00. Each.....**$60.80**

## COUNTERFLOW ELECTRIC WALL FURNACE

E35660

No. 3E365

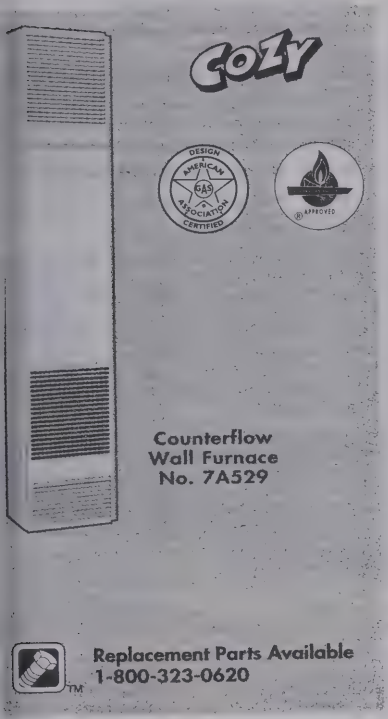
**Replacement Parts Available**
**1-800-323-0620**

**Provides counterflow circulation of warm air.** Large return air blower at top of furnace pushes air down over heating element and quietly delivers heated air. This type of warm air flow reduces operating costs because the heated air circulates at floor level.

**Powerful, lint-free blower features self-cleaning air scoop;** no filter required. Heavy-duty motor is equipped with self-aligning porous bearings. Both blower and motor have vibration-free mountings.

**Delivers 31,400 BtuH at 240V;** 24 volt thermostat has low differential to prevent excessive swings in temperature. Automatic safety limit switches protect against overheating. 9.2 KW input. 40 amps, 375 CFM. 80°F rise at 240V. Wiring controls are easily accessible from front of unit.

**Can be installed against wall or recessed** (maximum depth of recess 5⅜"). When recessed, furnace fits between standard wall studs; requires 75½ x 14⅜" opening. Steel cabinet with electrostatic powder coating of light almond. 72½H x 14⅛W x 7"D. UL Listed (E35660). Williams brand.



**No. 3E365.** Shpg. wt. 59.0 lbs. List $768.75. Each.....**$447.25**

**Optional Rear Outlet Package.** Directs some of the heated air to an adjoining room. Installs in wall behind furnace. Adjustable boot fits walls up to 10" thick.

**No. 2E667.** Shpg. wt. 6.5 lbs. List $80.00. Each.....**$57.55**

# COUNTERFLOW GAS WALL FURNACES

## TOP VENT & DIRECT VENT COUNTERFLOW FURNACES

**Replacement Parts Available**
**1-800-323-0620**

- **Wall thermostat standard**
- **Thermostatically controlled blower**
- **Standing pilot or electronic ignition control option (24VAC system)**
- **Optional side and rear heat outlet kits**
- **Stainless steel burner assembly**
- **Top vent and direct vent furnaces**
- **AGA/CGA Certified**

**Eliminate costly duct work.** Counterflow wall furnaces offer the answer to retrofit, remodeling or new construction zone heating needs. Counterflow wall furnaces combine contemporary styling, fan-forced efficiency and counter flow heat delivery. Cooler air is drawn into the top of the unit, heated and delivered at floor level where heat is needed most. Counterflow action provides uniform room temperatures and economic operation. Optional side and rear outlet (Top-Vent models only) kits are available to disperse air to unit sides and into adjacent rooms.

**Powerful, thermostatically controlled blower** delivers warm air evenly throughout the heated area. Vibration free mounting brackets minimize noise.

**Aluminized steel combustion chamber** maximizes heat transfer and is warranted for 10 years.

**Standard 24 volt wall thermostat** provides uniform comfort at the touch of a finger.

### TOP VENT COUNTERFLOW

Allows inside or outside wall installation and may be recessed on standard 16" center stud space up to 9¼" deep — wall thickness permitting. Unit is vented vertically, utilizing 4" oval BW vent (see item 4E059). No. 3VJ28 is equipped with an intermittent ignition device for even more efficiency. All top vent models feature a blocked flue safety device in the drafthood to safely extinguish unit in the event of flue blockage.

### DIRECT VENT COUNTERFLOW

May be recessed up to 10" on standard 16" center stud space. Direct vent counterflows mount on any outside wall and are perfect for multi-story, room addition, garage apartment, and vacation housing applications. Sealed combustion means they draw combustion air from outside and exhaust combustion products to the outside, making safety paramount and allowing installation in sleeping quarters. All units feature piezo matchless ignition for more convenient use. No. 7A531 and No. 3VJ28 feature an intermittent ignition device.

### COZY LIMITED WARRANTY

**10 Years non-prorated on heat exchanger and burner. 1-Year on other components. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

# FLOOR FURNACES AND GAS LOG HEATERS

## VENTED NATURAL GAS FLOOR FURNACES

COZY

No. 4E488

**COZY LIMITED WARRANTY**

10-years on combustion chamber, 1-year on other components. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- Piezo ignition eliminates need for matches or lighting tool
- Factory-mounted control with built-in pressure regulator
- Safety limit control; 100% safety pilo
- All millivoltage controls require no electricity; no need to worry about losing heat during power failure
- Easily installed between floor joists
- Wall thermostat included
- AGA Certified

**Cozy gas-fired floor furnaces provide warm even heat** through the natural convection of circulating warm air. This design assures high volume air exchange (as much as three to five times each hour), for uniform temperatures from floor to ceiling. Wall thermostat provides maximum comfort and convenience. **Note:** Drafthood for each unit included.

**Occupies no room space and easily installed between floor joists.** Four models available to fit virtually any application (see chart below). Heavy-duty steel baked enamel floor register blends perfectly with any flooring composition. Cozy brand.

## VENT-FREE GAS LOG HEATERS

Comfort Flame

**Vent-Free Gas Log Heaters** are not only designed with the texture and aesthetics of real wood, but also with a high tech ceramic fiber that is more durable than ordinary artificial fireplace logs. And unlike real wood, the gas log heaters are clean burning, environmentally safe and 99% fuel efficient. Plus heating with vent-free gas logs means you'll never again be left in the cold with wet logs or without heat during an electrical power outage. Install in any masonry or UL Listed solid fuel burning fireplace or AGA Certified vent-free fire box. Convenient installation kit and operation and care video are supplied with each unit. Easy manual controls allow you to control the variable flame settings. Matchless Piezo ignition system for convenient starting. Available sizes of 18-, 24- and 30-in. for a variety of fireplaces. All log heaters come in natural gas and propane models. A hood, sold separately below, may be required to deflect heat away from the mantel shelf.

### COMFORT FLAME VENT-FREE GAS LOG HEATERS

(✓) Denotes energy efficient product.

### FIREPLACE HOODS

Fit fireplace openings from 24- to 48-in. wide. Installs easily with glass doors or to the lentil of the fireplace opening. Log sets require a hood accessory if: 1. The underside of the mantel shelf is 14" or less above the top of the fireplace opening for 18" log sets (20" or less for 24 and 30" log sets);

2. The heat resistant material (i.e. brick, stone, etc.) surrounding the fireplace is less than 8" high for 18" log sets (less than 12" high for 24 and 30" log sets).

# VENT-FREE GAS FIREPLACE SYSTEMS

## CLASSIC HEARTH VENT-FREE GAS FIREPLACE SYSTEMS

Comfort Flame

**Vent-Free Gas Fireplace Systems** offer you an economical and convenient way to add the beauty and comfort of a fireplace to places you never thought possible. Install in hotel lobbies, office building reception areas, condos, and homes for instant heat and atmosphere. The Classic Hearth gives you the attractiveness of a real wood burning fireplace with the heating efficiency and warmth of vent-free gas space heating. All this for only a fraction of the cost of installing a wood burning fireplace. The Classic Hearth can heat up to 1,000 square feet with its maximum 28,000 BtuH of clean, quiet, odorless heat. Classic Hearth is 99% efficient due to its unique burner design. Unit requires no outside vent, the safety pilot system protects against oxygen depletion and any interruption in the fuel supply. If either occurs, the gas is shut off to the burner, turning the unit off. The vent free operation eliminates heat loss and cold air drafts. Heaters are design certified by the American Gas Association (AGA) and meet or exceed all government safety performance standards. Thermostat-controlled. User-friendly heater and blower controls concealed behind lower louvered door panel. Matchless Piezo ignition. Comfort Flame brand.

**Gas Log Heaters are sold separately on page 3422.**

# CAST IRON OIL-FIRED BOILERS

**The HydroTherm CORPORATION**

I=B=R No. 6E772

FREE DELIVERY on orders of $900 or more
See Freight Policy

Replacement Parts Available 1-800-323-0620

- Packaged cast iron, oil-fired boilers with burners for use with hot water or steam heating systems
- Optional tankless domestic water heaters are listed below
- Combustion chamber service hatch
- Convenient side cleanouts
- Heavy gauge steel cabinet with 1" fiberglass insulation
- Beckett AFG flame retention burner with nozzle & cad cell relay
- Pre-formed high density fiber refractory target wall
- Cast iron smokehood with 6" collar (7" on PB-200 and PB-235)
- Hi-limit controls for water or steam
- Shipped with ASME relief valve (15 PSI steam/30 PSI water)
- Mounted on wooden skid in wooden crate
- I=B=R rated and approved
- Aquastat relay, No. 2E860, not included

**Proven wet base, cast iron design** assures years of reliable service. High AFUE rating offers economical operation. Gray hammertone finish resists dents and scratches. Boiler supplied with ASME pressure relief valve, temperature/pressure indicator, and controls. Hydronics Institute (I=B=R) rated & approved. Meets or exceeds National Appliance Energy Compliance Act (NAECA) standards.

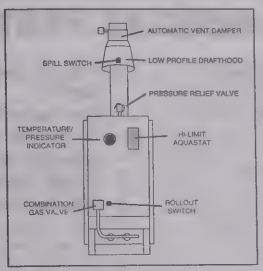
(†) Based on 300 ft. pipe circuit. (‡) This is a rough estimate. Expansion tank should be sized on total capacity of a system. Contractor will have to determine size. Boilers are sized by (I=B=R) net rating. This rating is based on piping and pickup allowances of 1.15. D.O.E. heating capacity—boiler output excluding heat losses from interconnecting piping. Maximum pressure: Gas boilers—100 PSI; oil-fired water boilers—30 PSI; oil-fired steam boilers—15 PSI.

# CAST IRON HOT WATER AND POWER VENTED BOILERS

The HydroTherm CORPORATION



FREE DELIVERY on orders of $900 or more
See Freight Policy

DESIGN AMERICAN GAS ASSOCIATION CERTIFIED

I=B=R

Replacement Parts Available 1-800-323-0620

RATINGS from 65,000 to 165,000 BtuH Input

- Combination gas valve and 24-volt transformer
- Meets and exceeds 80% AFUE standard
- Lifetime Limited Warranty
- Requires AQUASTAT relay, 2E861 not Included

- Packaged cast iron, natural gas-fired boilers for use with hot water heating systems
- Intermittent pilot on Nos. 6E783-6E788 for maximum fuel savings
- Approved for closet (HC) installation
- Fully assembled, steel push nipple sectional design
- Heavy gauge steel cabinet with 1" fiberglass insulation
- Low water content heats quickly, reduces losses
- Up to 100 PSI ASME maximum allowable working pressure
- Pre-wired plug-in vent damper and drafthood supplied with boiler

**ın be used in new systems or as replacement** for old cast iron or eel boilers. Packaged design minimizes installation expense. oilers fit through standard 30" doorways. Cast iron heat rchanger and dome assure years of reliable service. Gray hamertone finish resists dents and scratches.

Boiler supplied with ASME pressure relief valve, temperature/pressure indicator, and controls. Use with baseboard radiation, convectors, or radiant panels. Hydronics Institute (I=B=R) rated & approved. Meets or exceeds National Appliance Energy Compliance Act (NAECA) standards.

DESIGN AMERICAN GAS ASSOCIATION CERTIFIED

FREE DELIVERY on orders of $900 or more
See Freight Policy

Replacement Parts Available 1-800-323-0620

- Vents through chimney or sidewall
- Full assembled, sectional design
- Steel cabinet with 1" fiberglass insulation
- Fits through standard 30" doorways
- Low water content heats quickly
- Lifetime Limited Warranty
- I=B=R (Hydronics Inst.) rated & approved

**Power Vented** for flexible installation. This more efficient draft system allows placement in closets or alcoves. Sidewall venting facilitates conversion from electric heat. Smaller vent piping saves installation costs and fuel. Air prove switch assures complete boiler ventilation.

For use with single walled stainless steel vent pipe with proper vent termination. NOT FOR USE WITH PVC, CPVC, or other low temperature vent systems. Vent termination hood, No. 4C845, available. See page 3636.

# BASEBOARD HEATER

HEATRIM AMERICAN

No. 2E953

**Note: One set of joining pieces included with 5, 6, and 8 ft. baseboard heaters only.**

Replacement Parts Available 1-800-323-0620

**For use in hot water heating systems** with hot water boilers. Modern, low-silhouette appearance designed for fast, low cost installation. Stands 7 3/8" high, extends 2 11/16" into room when flush against wall. Back panels, filler and joining pieces can be positioned and fastened easily. Brackets, dampers, front panels and accessories snap on. IBR approved (Institute of Boiler and Radiator Manufacturers). Heatrim American brand.

**Enclosure top and back panel** is one piece steel construction. Lower portion extends 3/4" out from wall to cover openings between wall and finished flooring; panel stands unaided during installation.

**Snap-in brackets** are die-formed of one-piece heavy gauge steel to support front panel and element; can be located at any point along back panel.

**Enclosure front panel** is flat, dent-resisting steel. Snaps firmly onto brackets and is easily removed for cleaning.

**Air intake space** allows unrestricted circulation for maximum heating efficiency.

**Pivot-mounted damper** allows fingertip control for easy opening and closing; set in any position to regulate heat flow.

**High output heating element** is 3/4" with heat-reflecting interlocked aluminum fins bonded to seamless copper tubing.

**Element slide cradle** of heat resistant nylon material which provides sound insulation and allows smooth element expansion motion.

**White semi-gloss finish** with gray prime coat enclosure interior. Exterior can be repainted with an alkyd base paint to match room decor.

# RESIDENTIAL HIGH-EFFICIENCY GAS FURNACES

## 92+% AFUE DELUXE HIGH-EFFICIENCY NATURAL GAS FURNACES

- Spark ignition
- Heat exchanger is constructed of all stainless steel for maximum corrosion resistance and thermal fatigue reliability. Lifetime warranty
- Integrated control board manages all operational functions and provides hookups for humidifier and electronic air cleaner
- An insulated blower compartment, a slow opening gas valve and a specially designed inducer system make it one of the quietest furnaces on the market today
- Pre-paint galvanized steel cabinet
- Molded permanent filters
- Transformer and control fuse protection
- Control board diagnostics
- Schedule 40 pvc venting

**UPFLOW FURNACES FEATURE:**

- Left or right side gas, return plenum, electric, and condensate drainage connections
- Optional indoor or outdoor combustion air. In addition, combustion air may be piped to either the top or side of the cabinet on all upflow models. A special molded fitting is provided to ease installation

**DOWNFLOW/HORIZONTAL FURNACES FEATURE:**

- Top electrical connections, left or right gas and condensate drainage connections on downflow models
- Condensate drain for horizontal application provided

Upflow Natural Gas Furnace No. 3UH56

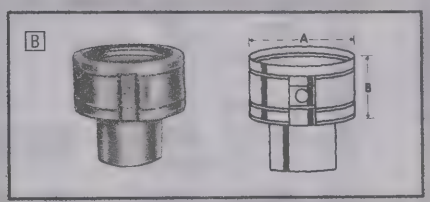
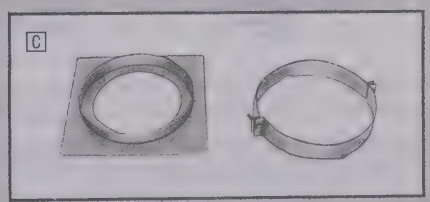
# TYPE B GAS VENT SYSTEMS



**Accepted by: AGA, NFPA, HUD, NBC, UBC**



- **Requires only 1" clearance to combustible materials**
- **Snap-lock joints speed installations**

**AMERI-VENT** Type B Gas Vents — UL MH5102

**Type B designation is assigned to gas vent systems** meeting the erwriters Laboratories, Inc. safety requirements for forming ntinuous passageway from an approved gas appliance to ter- ıation of the vent above the roof of a structure.

**ri-Vent all-metal, double-wall gas vent is listed as Type B** by erwriters Laboratories, Inc. and is approved for such resi- ial and commercial applications as water heater, boiler, fur- e, space or wall heater venting.

**ri-Vent Type B gas vent uses a double wall of metal pipe.** The inner of reflecting aluminum heats quickly, containing the warm gases inside. Air space between the inner and outer pipes ides insulation against heat loss to keep the warmer flue s on rise. The outer pipe of corrosion-resistant galvanized l ensures strength, safety and durability. American Metal ducts brand.

**erial:**

er pipe is aluminum alloy 1100, 3003, or 3105.

er pipe is galvanized steel.

**al Thickness:**

| Pipe Size | Inner Pipe | Outer Pipe |
|---|---|---|
| , 4, 5, and 6" Round | 0.012" | 28 Gauge |

## A ADJUSTABLE 90° "L"

structed of 4 sections for smoother bends and less resis- ce. Adjusts from 0 to 90° easily to clear rafters or ceiling ts. Ameri-Vent brand.

| e | A | B | C | D | Ameri-Vent Model | Stock No. | List | Each | Shpg. Wt. |

## B AMERI-CAP VENT CAPS

- **Universal replacement cap for all type vents**
- **For use as ventilation cap as well as Type B gas vent termination**
- **Patented design of ports/baffles keeps rain and debris out of vent**
- **Permit termination of vents at minimum height necessary above roof**

Ameri-Cap is the first engineered vent cap to gain recognition across the country for its performance. Millions are installed on homes and business structures to protect against wind conditions that cause waste gases to spill back into structure through appliance draft hood. UL Listed (MH5102). Ameri-Vent brand.

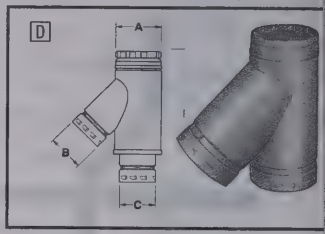
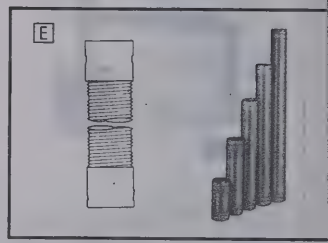
# SINGLE WALL FLEXIBLE GAS VENT SYSTEM





AMERI-VENT
Type B Gas Vents

The Ameri-Flex single wall connector system is UL Listed as a vent connector for installation as specified in the National Fuel Gas Code (ANSI Z 223.1, NFPA 54), NFPA 211, and other model codes such as Uniform Mechanical Code, National Mechanical Code, and Southern Mechanical Code.

Single wall flexible vent connector for connecting one or more appliances to double wall Type B Gas Vent. For listed gas appliances with a drafthood or other gas appliances listed for use with Type B Gas Vent.

**Material:**

**Flexible Pipe:** 0.012" Aluminum Alloy 3003.

**Single Wall Pipe Ends:** 0.018" Aluminum-zinc coated steel.

**Rigid Components:** 0.018" Aluminum-zinc coated steel.

**Clearance:**

1" to combustibles. Do not enclose. Do not pass through walls, floors, or ceilings.

## A SINGLE WALL APPLIANCE CONNECTOR

Sized to fit outlet. Use sheet metal screws for code approved appliance connection. Ameri-Flex brand.

| Dia. (In.) | Dimensions (In.) A | B | Ameri-Flex Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 3 | 3½ | 3 | 3FC-AC | **4E855** | $9.55 | **$7.98** | 1.0 |
| 4 | 4½ | 4 | 4FC-AC | **4E861** | 9.97 | **8.36** | 0.8 |

## B SINGLE WALL UNIVERSAL ADAPTOR

Short slip connection with Ameri-Flex single wall snaplock base. Ameri-Flex brand.

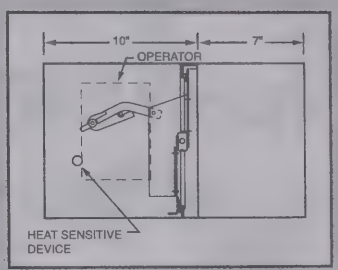
COMPLETE INDEX AT BACK OF CATALOG WILL HELP YOU QUICKLY LOCATE YOUR NEEDS

# FIRE/SMOKE DAMPERS



## COMBINATION FIRE/SMOKE DAMPERS

Electric Actuator

Pneumatic Actuator

- For use where HVAC ducts penetrate partitions with a fire resistance rating of less than 3 hours and are also to serve as a smoke barrier
- For use in low pressure HVAC systems (4 in. wg max. pressure)
- Fire rated for 1½ hours per UL Standard 555 and leakage rated as Class II (10 CFM @ 1 in. wg) per UL Standard 555S
- Temperature rated at 250°F per UL Standard 555S
- California State Fire Marshall (CSFM) Listed
- Integral sleeve/frame design of 20 ga. galvanized steel by 17-in. long as well as a single blade to provide maximum free area and lower pressure drop
- Dual direction airflow
- Externally mounted, factory installed actuator in electric (50/60 Hz - 115 VAC) or pneumatic (25 PSI supply)

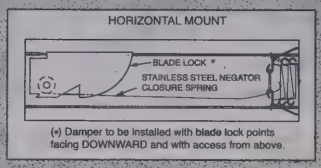
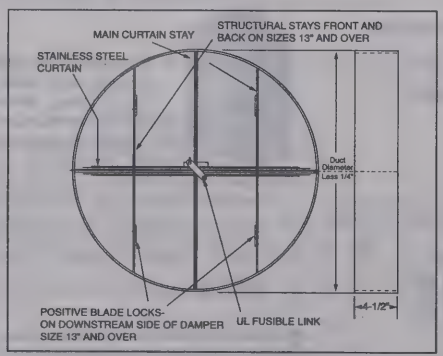
# FIRE DAMPERS



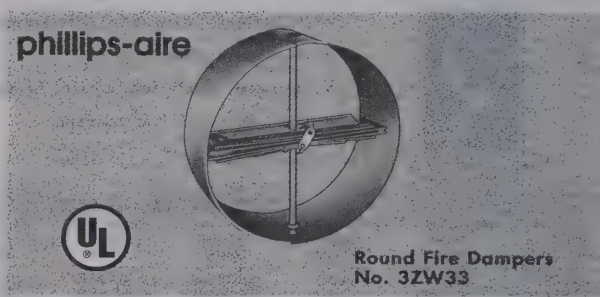
Vertical Mount Fire Dampers No. 3ZV97

Horizontal Mount Fire Dampers No. 3ZV81

**Fire Dampers Feature:**



- For use where square, rectangular, and round HVAC ducts penetrate partitions with a fire resistance rating of less than 3 hours
- For use in low pressure HVAC systems (2 in. wg maximum pressure)
- Classified by UL as a 1½ hour fire protection rated fire damper, in accordance with UL Standard 555 and NFPA-90A
- California State Fire Marshall (CSFM) Listed
- Damper closes automatically upon elevated temperatures
- 165°F fusible link provided as standard
- Sleeves and perimeter mounting angles to be provided by others



**Square and Rectangular Units Feature:**

- One-piece rolled 22-ga. galvanized steel frame
- 22-Ga. galvanized steel curtain-style blade
- Vertical and horizontal models for both wall and floor applications
- Horizontal models have a stainless steel negator spring to assist in closure

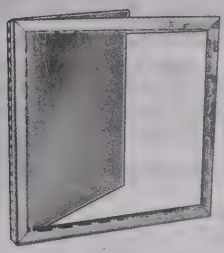
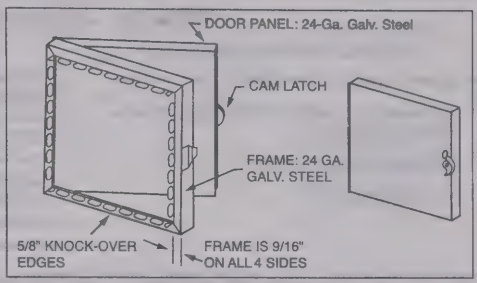
## DUCT ACCESS DOORS

**For use in HVAC ducts adjacent to each fire damper, smoke damper, combination fire/smoke damper and smoke detector to permit maintenance and resetting of the device**



**For use in low pressure HVAC systems (2 in. wg maximum pressure)**



**Doors are 1" thick and insulated**

**Doors can be positively locked with the cam latch**

**Classified as to fire rating by UL**

**Carries UL 1½ HR B-Label (250°F Rating)**

### DUCT ACCESS DOORS ORDERING DATA

| Nominal Frame Size | Actual Door Size | Phillips-Aire Model | Stock No. | List | Each | Shpg. Wt. |

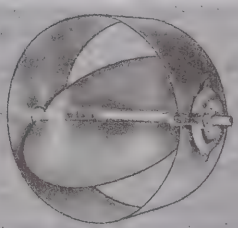
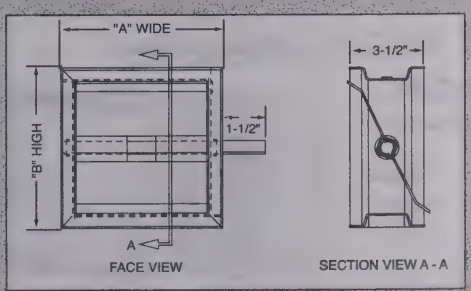
## BALANCING DAMPERS

**For use in low velocity (1500 FPM max.) and low differential pressure (1-in. wg max.) applications for both commercial and residential systems**

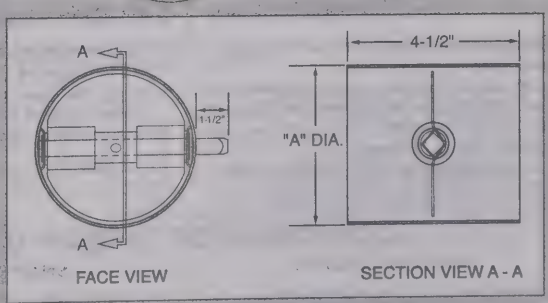


**Primary function is to balance a system and not intended to control airflow. This damper is not recommended for motorized applications**

- **Actuator shall be a 3/8" square manual locking quadrant, shipped loose for field mounting**



- **Damper frame is 3½" deep x ⅝" x 16-ga. galvanized steel with 20-ga. blades**



phillips-aire

- **Damper frame is 4½" deep x 20-ga. galvanized steel with 22-ga. blades**

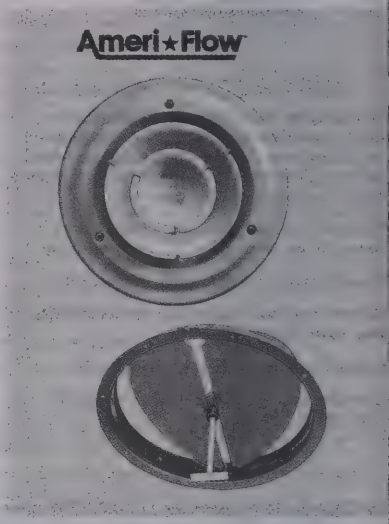
# DIFFUSERS AND DAMPERS



## ROUND CEILING DIFFUSERS AND BUTTERFLY DAMPERS

### ROUND CEILING DIFFUSERS

- Overlapping step-down ring design
- Compatible with Butterfly Dampers (listed below)
- All steel construction
- White finish

### ROUND BUTTERFLY DAMPERS

- Removable handle adjusts butterfly valve through the center hole of the Round Ceiling Diffuser (listed below)
- 2½ turns to full open or closed position
- Controls air volume through the diffuser
- All steel construction
- Brown finish

## HIGH VOLUME T-BAR DIFFUSER

- Diffusers designed for T-bar suspended drop ceilings
- 360° air diffuser pattern
- One-piece stamped steel fins with welded support frame
- Outer cone covered with fiberglass insulation and aluminum foil vapor barrier
- One size fits 6 to 14" diameter duct collars
- White enamel finish
- 23⅞" square x 2⁵⁄₁₆"H
- Requires positive-lock snap-on duct collar (listed below)
- Ameri-Flow Model 6400W 24 x 24

**No. 3CC53.** Shpg. wt. 8.8 lbs. List.....$83.04.
Each.....**$40.55**

High Volume Diffuser

## PERFORATED T-BAR DIFFUSER

- Fiberglass plenum with perforated steel face
- 360° air diffusion pattern created by four adjustable air control deflectors
- Designed for installation in T-bar suspended drop ceilings
- One size fits 6 to 14" diameter duct collar
- White enamel finish
- 23¾" square
- Requires positive-lock snap-on duct collar (listed below)
- Ameri-Flow Model 6000W 24 x 24

**No. 3CC54.** Shpg. wt. 5.0 lbs. List.....$62.37.
Each.....**$28.05**

# FLEXIBLE DUCTS

## INSULATED FLEXIBLE DUCT

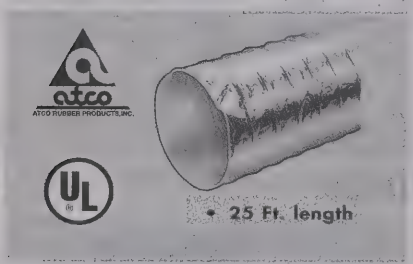
**Rated Positive Pressure:** 10" w.g. per UL 181.

**Recommended Operating Pressure:** 6" w.g. pos., 4-12" dia., 4" w.g. pos., 14-18" dia.: 3/4" w.g. neg., all dia.

**Velocity:** 5,000 FPM

**Standard Diameters:** 4-18"

**Flame Spread / Smoke Developed:** Less than 25 / Less than 50



**Standard Lengths:** 25 ft.

**Maximum Operating Temperatures:** -20 to 140°F Continuous (@ maximum pressure).

-20 to 180°F Continuous (@ 2" pos. w.g. max.)

-20 to 250°F Intermittent (@ 1/2" pos. w.g. max.)

## UNINSULATED FLEXIBLE DUCT

An uninsulated, UL 181, Class 1 Air Connector constructed of a triple lamination of metalized polyester, aluminum foil and polyester film, encapsulating a steel wire helix.

**Rated Positive Pressure:** 10" w.g. per UL 181.

**Recommended Operating Pressures:** 6" w.g. pos., all dia.: 3/4" neg., all dia.

**Velocity:** 5,000 FPM

**Standard Diameters:** 3-18".

**Flame Spread / Smoke Developed:** Less than 25 / Less than 50

### CODE COMPLIANCE

UL 181, NFPA 90A & 90B, SBCC, ICBO, BOCA, HUD 515-2.1(b), Cities of Chicago, New York, San Francisco, County of Dade (Florida).

**Check with the local code body having jurisdiction in your area to determine applicable codes.**

## UV EXPOSURE

**Atco Flexible Duct is intended for indoor use only. Do not install product where exposure to direct or indirect sunlight can occur. Installations where sunlight enters through turbine vents, skylights, canopy windows, etc. should be avoided.**

# DUCT TAPE & CLOTH TAPE

Nashua

[A] **An excellent general purpose tape** for light duty applications. Conforms well to irregular surfaces.

[B] **Easy to apply tape** used in heating, ventilating, and air conditioning applications to seal aluminum backed insulated ducts and thermal insulation to maintain a vapor barrier. Ideal for permanently flexible seals. Conforms to pattern of any duct board when squeegeed down. 7.4 mils thick overall with 2-mil dead soft aluminum foil and permanent high tack adhesive. UL Std. 723 classified.

[C] **High strength printed aluminum foil duct** **ard tape** has an acrylic adhesive system that meets UL 181A-P quirement. Approved for bonding joints and seams on fiber- ass ductwork. Ideal for permanently flexible seals.

] **Economical polyethylene film-backed cloth tape** for a wide variety industrial grade applications. Highly conformable. Gauge 11 ils.

] **Highly durable professional grade duct tape** recommended for aling both metal and fibrous air handling system connections. so suitable for general contractor use. Gauge 12 mils.

] **High-strength premium grade duct tape** seals seams airtight at ints and overlaps in air handling systems for durable, consistent osures. Extremely high tack adhesive makes it suitable for use as a waterproof packaging tape and for holding and tabbing applications. Clean release, will not delaminate. Gauge 13 mils.

[G] **Foil, fiberglass scrim, and Kraft laminate** in a diamond pattern with high tack adhesive. Conforms readily to irregular surfaces. Used as fiberglass duct wrap where high tensile strength is required. Ideal for patching scrim-reinforced duct insulation. 10.5 mils thick. Backing is UL Std. 723 classified.

[H] **Scrim reinforced all service jacket (ASJ) tape** for pipe insulation closure. High tack, acrylic based adhesive provides immediate bonding. Flame resistant, vapor barrier jacketing is ideal where ASJ facings are used and for sealing seams. Thickness 14.5 mils. Backing material is white Kraft-laminated fiberglass scrim foil and UL Std. 723 classified.

[I] **Metallic duct tape** applies easily as a cloth tape. High tack rubber adhesive seals flexible duct work and insulation board. 11 mils thick.

[J] **Water-resistant tape** of high thread count, vinyl-impregnated cloth to resist ultraviolet rays and severe weather conditions. For use outdoors to seal exterior duct and insulated pipe systems; in film industry as gaffer's tape; and in packaging. 13 mils thick.

[K] **Double-face cloth tape** has adhesive on both sides. One side is faced with a silicone coated release liner that facilitates easy unwind. Features a high tack adhesive with exceptional holding strength. Excellent for mounting, holding, laying carpets and hanging polyethylene. 13 mils thick.

## CONDENSING UNITS FEATURE:

- 208/230V, 60 Hz, 1 Phase
- Attractive, wrap around louvered jacket protects the coil from yard hazards and weather extremes. Top grille is steel reinforced for extra strength
- Air is discharged upward away from bushes and shrubs. The discharge pattern of the top grille provides minimum air restriction, resulting in quiet fan operation
- Exclusive Combination Grille/Motor Mount secures the motor to the underside of the discharge grille. The grille protects the motor windings and bearings from rain and snow
- All controls are accessible by removing one service panel. Removable top grille provides access to the condenser fan motor, compressor and condenser coil
- Single speed motor designed for low speed, quiet, energy-saving operatio
- Copeland® Compliant Scroll® Compressors , feature low sound an vibration characteristics and tolerate small amounts of liquid flood back and system contaminations
- UL and C-UL Listed; ARI Certified

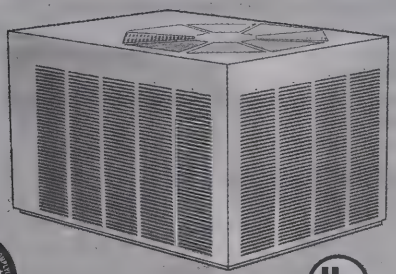
## LOW AMBIENT KIT — 0°F



| Use With | Description | Dayton Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 10- & 12-SEER Units | Cycles outdoor fan to maintain adequate condensing pressures, assuring liquid refrigerant flow to the coil. | MXAD-A04 | 3UJ65 | $92.00 | $64.25 | 1.0 |

# RESIDENTIAL HEAT PUMPS

## 1.5 TO 5 TON REMOTE HEAT PUMPS

Dayton®

Replacement Parts Available 1-800-323-0620

SA10592

**HEAT PUMPS FEATURE:**

- 10 SEER
- 208/230V, 60 Hz, 1-Phase
- Reversing valve energized in heat mode
- Full wrap-around powder-painted louvered grille protects the coil from yard hazards and weather extremes
- Air is discharged upward away from bushes and shrubs. The discharge pattern of the top grille provides minimum air restriction, resulting in quiet fan operation
- Condenser coil is constructed with copper tubes and aluminum fins mechanically bonded for maximum heat transfer
- Suction line accumulator standard to prevent compressor slugging
- Hot gas muffler, service valves, and high pressure control are standard
- Copeland® Compliant Scroll® compressors

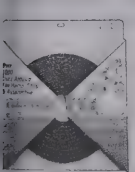
## LOW AMBIENT CONTROL

ow Ambient control allows low temperature operation in the ooling cycle down to 0°F outdoor temperature. Recommended or cooling installations at outdoor temperatures under 65°F.

**lo. 3UK06.** Low Ambient Control. Dayton brand (MXPZ-C01). Shpg. wt. .0 lbs. List $115.00. Each ..... $80.65



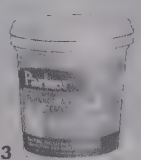
## METAL FIN COMB

Adjusts to fit all fin spacings. Rubber grip provides a sure hold. 1 3/16" wide tip, 1 3/4" maximum depth. Ma-Line brand.

**No. 5E265.** Shpg. wt. 0.2 lbs. List $12.51. Each ..... $9.79

## SPONGE RUBBER SEAL STRIP

ENERGY RIGHT®



**Used for weather stripping,** cushioning, insulating, silencing, dustproofing, sealing, mounting, spacing and gap-filling on panels, covers, doors, windows, trailers, air conditioners, heating equipment, control boxes, freezers, packing boxes and office lab equipment. Easy-to-apply adhesive backing bonds well to metal, glass, wood and other smooth surfaces.

Open-cell seal strip is ade from flexible, resilient cellular mate- ial with individual cells interconnected. sed indoors. Max. temperature 200°F. ndividually cartoned, 25L x 3/4W x 7/16"D olls. Black color. Permatite brand (7625).

**No. 2X595.** Shpg. wt. 2.4 lbs. List $26.01. ach ..... $17.30

✓ Denotes energy efficient product.

## FURNACE CEMENT

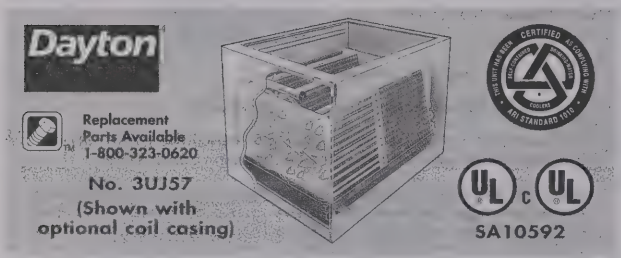
Parker

Furnace Cement No. 5E263

- Refractory and retort cement for mortar facing, caulking, coating, etc.
- Seals metal to metal, joints on furnaces, boilers, stoves, incinerators, etc.
- Gray color, asbestos free, low shrinkage
- For temperatures up to 3000°F
- Parker Products brand (01354)

**No. 5E263.** Shpg. wt 4.7 lbs. List $7.50. Each ..... $5.35

## INSULATING CEMENT



Insulating Cement No. 5E264

- Asbestos free
- Insulating cement for 0 to 1800°F applications
- Use on hot or cold surfaces
- Just mix with water and apply with trowel
- Covers 15 sq. feet at 3/8" thickness
- Parker Products brand (01525)

**No. 5E264.** Shpg. wt. 10.0 lbs. List $16.50. Each ..... $12.35

# RESIDENTIAL EVAPORATOR COILS AND AIR HANDLERS

## INDOOR EVAPORATOR COILS

- Constructed of aluminum fins bonded to inner grooved copper tubing
- Primary condensate drain connections are 3/4" F.N.P.T.
- Condensate drain pan is constructed of a high grade, hea resistant, corrosion-free polymer material
- Optional coil casing offers double-wall construction for sturdiness along with dead air space insulation and soun attenuation
- Horizontal applications require coil drain pan. Order separately below.

## AIR HANDLERS

- Versatile 3-way field convertible design for upflow, down flow and horizontal
- Sturdy double wall construction with .5 inches of dead air space provides thermal and sound insulation
- 208/240V, 60Hz, 1 Phase
- No. 3UH44 features watt restrictors that stage supplemen tal heat so only the necessary amount is engaged to main tain comfort in the conditioned space
- Circuit breaker meets UL and CSA requirements for servic disconnect

**No. 3UJ66. Combustible Floor Base.** Downflow only. Allows air handlers sold above to be installed on combustible flooring. Shpg. wt. 5.0 lbs. List $59.00. Each.....**$41.05**

***New*No. 4MC07. Horizontal Drain Pan for Evaporator.** Recommended when air handlers are mounted horizontally. 35L x 22¾W x 3¼"D. Rheem brand. (MXBD-CA). Shpg. wt. 5.0 lbs. List $73.50. Each.....**$44.**

***New*No. 4MC08. Horizontal Evaporator Drain Pan for use with all gas furnace** Rheem brand (MXBD-DA). Shpg. wt. 5.0 lbs. List $83.40. Each.....**$50.**

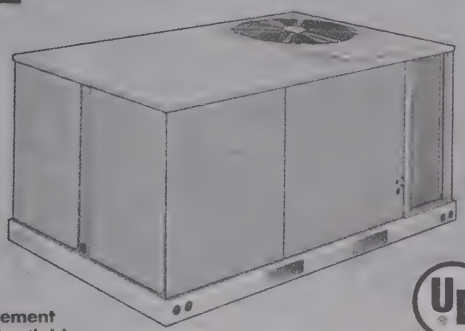
# SELF-CONTAINED AIR CONDITIONERS

All models feature Copeland® Compliant Scroll® compressors offering maximum reliability, efficiency, and quiet operation

One-piece top over the indoor section with drip lip, drawn painted base pan, and 1" raised flanges for supply/return air connections

Convertible horizontal and vertical airflow design allows maximum field flexibility and minimizes inventory requirements. Shipped vertical discharge

Standard full perimeter forkable baserail with lifting holes for easier maneuvering and installations



Factory installed one-inch throw away filter with provisions for two-inch filter

Easily removable filter, direct-drive blower, electric heat, and compressor/control access panels enable easy service

Belt drive units available. Call your local branch

## HEATING & COOLING MATCHING GUIDE.

Check out pages 3440 and 3441 and see how easy it is to create a complete Dayton heating and cooling system.

# 3-5 TON GAS HEAT/ELECTRIC COOLING PACKAGE UNITS

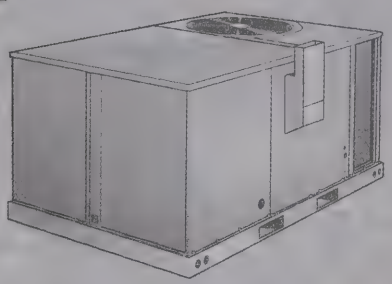
All models feature Copeland® Compliant Scroll® compressors offering maximum reliability, efficiency, and quiet operation

Aluminized steel heat exchanger with in-shot burners helps eliminate corrosion

Integrated blower/burner control board with built-in diagnostic capability permits on-site trouble shooting

One-piece top over the indoor section with drip lip, drawn painted base pan, and 1" raised flanges for supply/return air connections

Convertible horizontal and vertical airflow design allows maximum field flexibility and minimizes inventory requirements



Standard full perimeter forkable baserail with lifting holes for easier maneuvering and installations

Factory installed one-inch throw away filter with provisions for two-inch filter

Direct or belt drive options to accommodate a wide range of design conditions as high as 1.0 inches of external static pressure. Direct drive models listed in catalog only. Call your local branch for belt drive units

Dayton®

Replacement Parts Available 1-800-323-0620

No. 3UH86

FREE DELIVERY on orders of $900 or more

See Freight Policy

SA10592

- Easily removable filter, blower, electric heat, and compressor/control access panels facilitate service
- Number and color coded wiring helps facilitate service and maintenance
- Standard freezestat control offers evaporator coil freeze protection
- Externally mounted refrigerant gauge ports for easy service diagnostics
- Side and base electric power entry helps minimize roof penetrations
- Optional quick assembly common roof curbs help save field labor and maximize size flexibility (see below)
- Quality powder paint finish offers long lasting protection against extreme weather conditions
- UL and C-UL Listed (SA10592); ARI Certified

# COMMERCIAL COOLING/GAS HEATING & COOLING ONLY PACKAGE UNITS

No. 3UJ50
7.5 Ton Package Unit

Replacement Parts Available 1-800-323-0620

No. 3UJ53
10 Ton Package Unit

**7.5 & 10 TON UNITS FEATURE:**

- Powder coat painted cabinet and condenser base pan, capable of withstanding a 1000-HR Salt Spray Test per ASTM B 117
- Louvered inlet panels protecting condenser coils are standard
- Removable panels provide service access to control box, compressor, and refrigerant controls
- Condenser coil is constructed with copper tubes and aluminum fins mechanically bonded for maximum heat transfer
- Gas Heat: Natural Gas; Aluminized steel tubular heat exchangers; In-shot burners with induced draft combustion air have spark ignition (100% Lockout) system; Two stage heating/cooling
- Nos. 3UJ50, 3UJ52, 3UJ53 and 3UJ55 are UL and C-UL Listed (MH19582)
- Nos. 3UJ43, 3UJ44, 3UJ46 and 3UJ47 are UL and C-UL Listed (SA10592)
- ARI Certified

**10 TON UNITS FEATURE:**

- Standard high and low pressure controls

## 7.5/10 TON BELT DRIVE AIR HANDLERS

- Powder coat painted cabinet. Matching discharge plenums and decorative supply and return air grilles are available for use when units are to be installed within conditioned space
- Inherently protected motors are mounted inside of insulated cabinet to reduce motor noise and provide a neat looking installation. A choice of motor horsepowers and drive combinations are available
- Low profile design allows for horizontal installation in most standard drop ceiling applications and the movement of units through most standard doorways for remodeling or replacement work
- Two circuit, interlaced raw evaporator coils are constructed with copper tubes and aluminum fins mechanically bonded to the tubes for maximum heat transfer. All coil assemblies are leak tested up to 450 PSIG (3100kPa) internal pressure prior to installation into units
- Field piping refrigerant connections are made through a fixed post between two side access panels on either side of unit. Allows flexibility to meet most field conditions as well as full accessibility after the installation is complete
- The galvanized steel drain pan is designed to trap condensate in either vertical or horizontal installations. Condensate drain connections are located on both sides of the unit allowing complete flexibility to meet most field conditions
- Two removable panels on top and each side of the unit are easily removed for service access to motors, blowers, sheaves and filters
- All models are designed for either horizontal or vertical application and can be installed in either position supplied from the factory
- All units are run tested at the factory prior to shipment. Units are shipped with a holding charge of nitrogen
- Heat pump, No. 3UH73, has factory installed check valves and adjustable TEX valves to allow for either straight cooling or heat pump applications
- UL Listed and C-UL Listed (E175255)

No. 3UH71

E175255

## COMMERCIAL OUTDOOR CONDENSING UNITS

- Louver panels provide 100% condenser coil protection
- Powder coat paint finish withstands 1000-Hr. Salt Spray Test per ASTM - B117
- Removable panel provides service access to control box, compressor, and refrigerant controls
- Condenser coil is constructed with copper tubes and aluminum fins mechanically bonded for maximum heat transfer
- Vaporline muffler, low ambient control, high pressure control, low pressure control, and liquid line service valve are standard
- Energy Efficiency Ratings (EER's) to 9.5
- UL and C-UL Listed (SA10591)

No. 3UH35

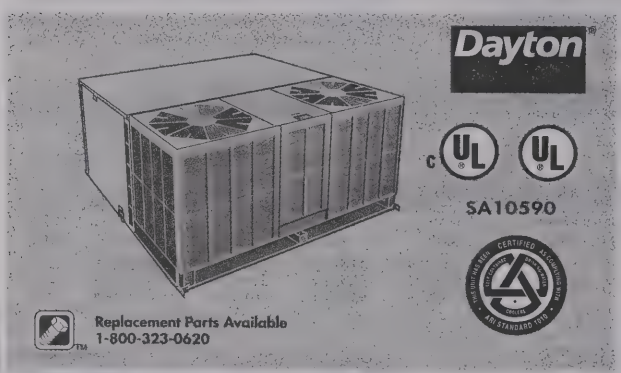
# COMMERCIAL HEAT PUMPS

## COMMERCIAL HIGH EFFICIENCY REMOTE HEAT PUMPS



- The condenser section front and sides are formed with stamped louvers to provide protection for the condenser coils
- Powder coat paint finish withstands 1000-Hr. Salt Spray Test per ASTM - B117
- Removable panels provide service access to control box, compressor, and refrigerant controls
- Condenser coil is constructed with copper tubes and aluminum fins mechanically bonded for maximum heat transfer
- COP ratings up to 3.0
- EER ratings up to 9.6
- Suction line accumulator standard to prevent compressor slugging
- High pressure control, low pressure control and liquid line filter drier are standard
- 208/230V, 60Hz, 3-Phase
- UL and C-UL Listed (SA10592); ARI Certified

**No. 3UK05.** Low Ambient Kit. Shpg. wt 10.0 lbs. List.....$169.

## 7.5 & 10 TON COMMERCIAL PACKAGE HEAT PUMPS

- Condenser coil is constructed with copper tubes and aluminum fins mechanically bonded for maximum heat transfer
- Suction line accumulator standard to prevent compressor slugging
- Crankcase heaters, high pressure controls, discharge temperature limit control, filter drier, reversing valve and suction line accumulator are standard
- UL and C-UL Listed (SA10590); ARI Certified
- Accessories are UL and C-UL Listed (SA10589)
- EER ratings up to 9.0; COP ratings up to 3.0

- The condenser section front and sides are formed with stamped louvers to provide protection for the condenser coils
- Powder coat paint finish withstands 1000-Hr. Salt Spray Test per ASTM - B117
- Removable panels provide service access to control box, compressor, and refrigerant controls

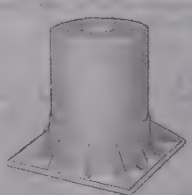
## ULTRALITE™ MOUNTING PADS

- A concrete pad at the weight of plastic (approximately 3 lbs. per square foot)
- Extremely impact and breakage resistant with excellent flexing qualities and strength
- Unaffected by UV, temperature extremes, and all other weather conditions unlike plastics
- Textured surface prevents unit slide and promotes moisture drainage
- Engineered EPS core is unaffected by soil conditions—will not support mold or fungus growth
- Solid EPS bottom dampens vibration and easily conforms to uneven ground conditions
- Solid bottom—larger bearing surface than hollow pads—resists settling
- DiversiTech brand

DIVERSITECH CORPORATION

No. 4E875



### MOUNTING PAD ORDERING DATA

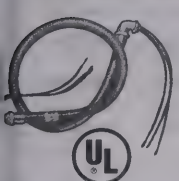
## PUMP-UP™ ELEVATION UNIT



- Elevate heat pumps and air handling units
- Easy-to-install
- Outdoors: designed to allow maximum defrosting capability
- Allows better condensate draining
- Helps prevent corrosion of metal base
- Made of corrosion-resistant plastic
- Works best when used with mounting pads above
- Polymeric mastic included with each unit
- Absorbs vibration and noise

BRAMEC

**3F317.** 6" Height. Bramec brand (4008). Shpg. wt. 0.5 lbs. List $8.95. Each.....$6.05

## ASSEMBLED FLEXIBLE ELECTRICAL CONNECTORS

- Flexible non-metallic conduit
- For wiring condensing units, outdoor lighting, RV's, and irrigation pumps
- Color coded, stranded copper wire
- Metallic liquid-tight connectors
- Straight end and removable 90° elbow
- 12" leads
- Used in many outdoor applications
- Made in USA
- UL Listed

Building codes vary by area. Check your local codes for correct requirements.

## INSULATED COPPER TUBE KITS

- 1/2" insulation on suction line
- Straight end and 90° bend on suction line

These copper tube kits are insulated with insulation for split-system air conditioning and heat pumps. Refrigeration quality tubing is manufactured to ASTM B 280 standards. Sweat fitting with straight end and 90° bend. Shipped with holding charge and sealed with sulphur-free rubber plugs.

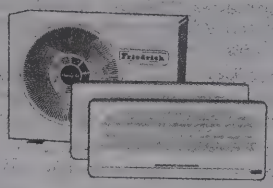
# DUCTLESS SPLIT SYSTEMS A/C AND HEAT PUMP



Friedrich AIR CONDITIONING

Floating Air

Replacement Parts Available 1-800-323-0620

Wall Mount Unit
No. 3ZG51

Wall Mount Dual-Zone Unit
No. 3ZG55

T-Bar Ceiling Mount Unit
No. 3ZG50

- **Contemporary styling, compact size, and quiet operation**
- **Easy installation, no costly ductwork required**
- **Ultra-quiet operation**
- **Sold as outdoor and indoor units only; Complete system requires lineset, sold below**

### FRIEDRICH LIMITED WARRANTY

**1-Year on all parts. 5-Years on sealed system.Text of warranty available upon request. See "Manufacturers' Warranties" on page opposite inside back cover.**

**When ductwork is impossible** or too costly to install, ductless split systems solve the problem. Exceptionally quiet, the slim compact indoor unit can be located virtually anywhere, making it suitable for any room configuration.

**Set room comfort conditions easily.** The wireless remote on all wall models enables complete control from chair, bed, desk—anywhere up to 20-ft. away. Outdoor condensing units are for areas where noise and space requirements must be kept to a minimum. The pre-charged outdoor unit's small footprint means it can be located out of sight and out of the way. Friedrich brand.

# PACKAGED TERMINAL AIR CONDITIONERS AND HEAT PUMPS

ZONELINE®
Packaged Terminal Units

**General Electric Zoneline Packaged Terminal Air Conditioners (PTAC's) and Heat Pumps (PTHP's)** are commonly used in hotels, motels, conference rooms, offices, institutions, schools, hospitals, and nursing homes. All units provide individual room heating and cooling functions.

**PTAC's and PTHP's** are offered in a Value Line (electromechanical controls/single fan) and Premium Line (microprocessor controls/dual fan). **Units require wall case, exterior grilles, and power connection kit—sold separately below.** Remote wall thermostats for heat pumps and electric heat and 30 amp permanent power connection kit available, to order call 1-800-323-0620.

**Heat pump models** operate in outdoor temperatures as low as 25°F.

**G.E. FULL 1-YEAR WARRANTY**

**1st year all parts and labor. 2nd thru 5th years sealed system parts and labor. See "Manufacturers' Warranties" on page opposite inside back cover**

(*) Resistance heat values are determined by 15A, 20A or 30A power connection kit sold below. (†) Coefficient of Performance (COP) refers to relative efficiency of reverse cycle operation vs. resistance heat. A COP rating of 3.0 produces 3 times as much heat at rating point of 47°F outdoor temperature as the same input wattage used for resistance heat.
(‡) GE Model numbers ending in "C" are special corrosion resistant units.

## ACCESSORIES AND POWER CONNECTION KITS* PTAC/PTHP UNITS

**WALL CASE.** Wall case measures 42⅛W x 13⅞D x 16¼"H. Minimum wall opening is 1/4" larger than case dimensions. General Electric brand (RAB77A).

**No. 3EC13.** General Electric Wall Case. Shpg. wt. 27.0 lbs. List....$143.00. Each.....**$87.40**

**EXTERIOR GRILLES.** Protects coils, fan and other components while blending architectural finish to building's outside appearance. General Electric brand.

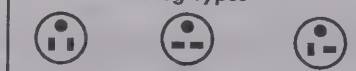
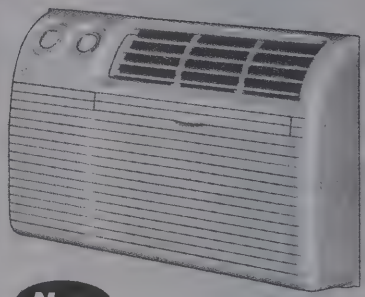
# ROOM AIR CONDITIONERS



- High EER ratings for energy efficiency
- Solid-sided wall case
- Adjustable thermostat control
- Energy Saver switch
- 4-Way air direction
- Up front washable air filter
- 2 Fan speeds for cooling
- Heat pump units feature backup electric heat below 45°F outdoor ambient
- Fan-only setting for air circulation
- Units measure 26W x 15⅝H x 16⅞D inches with wall case
- AHAM Certified
- UL Listed

**Cool, Heat/Cool, and Heat Pump room air units** include attractive room-side grille of high-impact polystyrene. For installation, each unit requires a solid sided wall case and exterior grille, sold separately below. New installations only need No. 4DC67. General Electric brand.



### GENERAL ELECTRIC LIMITED WARRANTY

**5-Year warranty on sealed system. 1-Year on all other parts. Text of warranty available upon request. See "Manufacturers' Warranties" on page opposite inside back cover.**

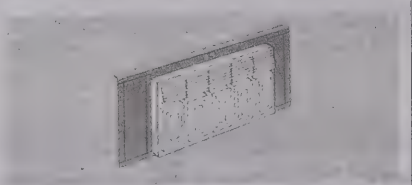
## OPTIONAL ACCESSORIES FOR WHITE-WESTINGHOUSE THROUGH-THE-WALL MODELS

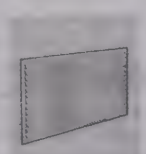
### THROUGH-THE-WALL SLEEVE



**Simplifies installation** of White-Westinghouse thru-the-wall room equipment. **Use with through-the-wall design models only.** Provides weather-tight seal, with or without unit installed. For finished walls up to 17¾" thick. Includes outside panel, sleeve, inside panel, construction support, weather seals and mounting hardware. Galvanized steel with epoxy primer and melamine finish coat; withstands 1000 hour salt spray test. 18" deep.

Recommended wall opening when mounting brackets are used is 26W x 15¾"H. Wall sleeve must be installed at a minimum of 3½" above floor and at a minimum of 7½" above top of baseboard heater if used. White-Westinghouse brand (EA90T).

**No. 4TP48.** Shpg. wt. 29.0 lbs. List .....$93.50.
Each .....**$77.15**



### WINDOW-MOUNT FRAME

**Adapts thru-the-wall models** for use with most double hung windows. Requires 30 to 40" wide opening with minimum height of 17½". Plastic frame with expandable vinyl panels, sash-seal and hardware. White-Westinghouse brand (EA74T).

**No. 5H879.** Shpg. wt. 7.0 lbs. List .....$46.25.
Each .....**$35.95**

### OUTDOOR ALUMINUM GRILLE

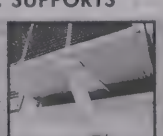
**Use with thru-the-wall sleeve No. 4TP48.** Provides permanent appearance with air conditioner in or out. 15H x 25½W x 1½"D. White-Westinghouse brand (EA73T).

**No. 5H443.** Grille. Shpg. wt. 4.9 lbs. List..$51.15.
Each .....**$39.00**

### INSIDE AIR CONDITIONING COVER

Chill STOP'R

- Antique White Color



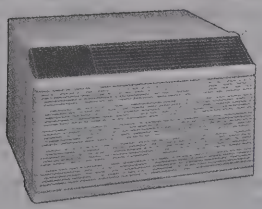
Measures 30L x 21H x 6½" Depth. Chill STOP'R brand. (1212-06)

**No. 5E169.** Shpg. wt. 5.3 lbs. List .....$54.50.
Each .....**$36.50**

### WINDOW A/C SUPPORTS

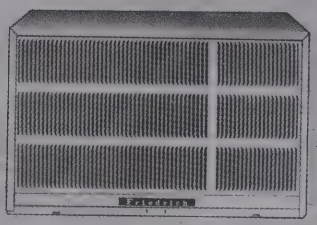
New

No. 4MH72



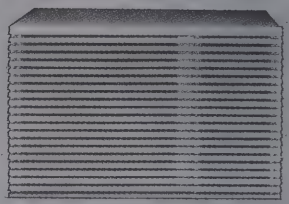
Adjustable bracket for any room air conditioner installation with wall thickness ranging from 4" to 11". Built-in level helps install unit at proper angle. No. 4MH72 for units up to 80 lbs. No. 4MH73 for units up to 160 lbs. Outland Engineering brand (AC-080) and (AC-169).

***New* No. 4MH72.** Shpg. wt. 2.3 lbs. List $54.70.
Each .....**$32.80**



***New* No. 4MH73.** Shpg. wt. 3.6 lbs. List $75.16.
Each .....**$45.05**

# ROOM AIR CONDITIONERS



**Friedrich** AIR CONDITIONING

No. 3UF11

No. 3UF15

No. 3UD86

Designed for quiet, energy saving operation in any application—new construction, remodeling or replacement of existing units.

- **Ultra-quiet operation**
- **Ideal replacement for Fedders and other built-in units, measures only 27W x 16¾"D**
- **3-Speed fan**
- **Top mount controls**
- **Mounts flush with exterior wall**
- **Sleeve, No. 3UF15, is required for all units. See listing below**

## ACCESSORIES FOR THRU-THE-WALL AIR CONDITIONERS

**No. 3UF15.** WSC Sleeve-For All "W" models. Shipped with weather panel and standard grille.. Shpg. wt. 38.0 lbs. List $131.00. Each ..... **$99.95**

**No. 3UD86.** AG88-Architectural Grille-Optional enhanced appearance grille.. Shpg. wt. 5.0 lbs. List $102.00. Each..... **$61.25**

**No. 3UD93.** IDK-Interior Drain Kit-Designed for new construction application, normally used with heat pump units that are to be drained within the wall structure.. Shpg. wt. 1.0 lbs. List $35.00. Each..... **$26.90**

**No. 3UF03.** SB-Sub Base for the unit when it is desired to place the cord and receptacle within the installation, or as a base when unit is mounted in the wall.. Shpg. wt. 1.0 lbs. List $86.00. Each..... **$54.75**

## ROOM A / C SIZE SELECTION GUIDE

Find the amount of space you want to cool by calculating square footage of rooms (length x width). If room is to be occupied by more than 2 people, add 600 BtuH per person. Add multiple rooms together to determine total BtuH needed. The total BtuH of two small units will provide better cold air circulation than one large unit.

| Square Footage | BtuH Required | Square Footage | BtuH Required |
|---|---|---|---|
| 100 | 5,000 | 600 | 12,000 |
| 200 | 6,000 | 1100 | 18,000 |
| 300 | 8,000 | 1300 | 21,000 |
| 400 | 9,000 | 1500 | 23,000 |
| 500 | 10,000 | 2000 | 29,000 |

**NEMA Plug Types**

# ROOM AIR CONDITIONERS

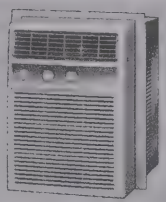
## HEAVY-DUTY & SLIDER CASEMENT ROOM AIR CONDITIONERS

No. 4TP74 A



White-Westinghouse

New

No. 4TP75 B

SA2130

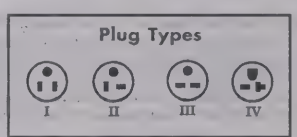
ENERGY RIGHT®

C

### A & B CUSTOM HEAVY-DUTY UNITS FEATURE:

- Large cooling capacity to cover larger applications
- Heat/Cool unit, No. 4TP75, offers all-season comfort.
- Units fit 32-43½" wide windows with 20½" minimum opening height.
- Removable beige front panel
- Rigid mesh slide-out filter
- Variable air directions
- Exhaust/Fresh air vent
- Modular slide-out chassis
- Pleated quick mount kit included

### C SLIDER/CASEMENT UNITS FEATURE:



- Unique design combines high capacity and efficiency in an attractive air conditioner
- Fit slider/casement window openings from 21½ to 40" high, 15½" minimum opening width
- Beige front panel
- Variable air directions
- Vertical quick-mount kit

## HAZARDOUS LOCATION ROOM AIR CONDITIONERS

Designed to cool work areas and other enclosures in hazardous locations where specific volatile flammable liquids or flammable gases are handled or used within enclosed containers or systems.

Hazardgard® room air conditioners are designed to meet the National Electrical Code, Article 500 requirements for Class 1, Division 2, Group A, B, C, D hazardous locations and are the only room air conditioners UL Listed for this application.

- Totally enclosed fan motor has stainless steel shaft to resist corrosion; a hermetically sealed overload and electronic switch to prevent arcing
- Solid-state printed circuit board insulated against corrosion on conductor paths. Contains transient voltage suppressors to protect controls against transient voltage spikes
- High capacity compressor with internal hermetically sealed overload and solid state switch to prevent arcing
- Hot gas bypass low ambient control to permit operation without freezing up at outdoor ambient temperatures as low as-45°F
- Slide-out chassis design
- Accommodates direct wiring only

**MOVINCOOL® LIMITED WARRANTY**

Movincool® warrants all parts and labor for 1 year; 3 years on compressor. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Self-contained portable air conditioning** effectively spot cools heat-sensitive equipment, production processes, and people. Use to cool computers, telephone switching equipment, medical equipment, automotive service bays, temporary work stations, loading docks, tent events, athletic teams, production lines, restaurant kitchens, aircraft maintenance, and emergency back-up applications.

**Easy installation and operation.** All models simply plug in and start cooling right away. Accessories tailor each unit for a variety of uses. An optional condenser duct removes waste heat. Cold air hose extensions cool specific areas. Requires no plumbing. Locking casters provide mobility. All models have unique resin-treated coils to resist corrosion and extend life.

**Nos. 6E868, 5E352, & 5E353 FEATURE:**
- Automatic tank shut-off when condensate collection tank is full
- Return air and anti-freezing thermostat
- Auto restart
- Compressor short-cycle and overload protection
- Fan mode selector switch with fan motor protection
- Optional condensate pump kit (replaces tank to run directly to floor drain)
- Optional make-up air plenum available

**Nos. 5E354 and 3TZ38 FEATURE:**
- Compressor overload protection
- High pressure switch
- Fan motor protection
- Anti-freezing thermostat

**No. 4TM51 FEATURES:**
- Digital temperature control
- Automatic tank shut-off when condensate collection tank is full
- 2-speed fan

**No. 4TM52 FEATURES:**
- Programmable digital time and temperature control
- After hours and weekend operations
- Automatic tank shut-off when condensate collection tank is full
- 2-speed fan

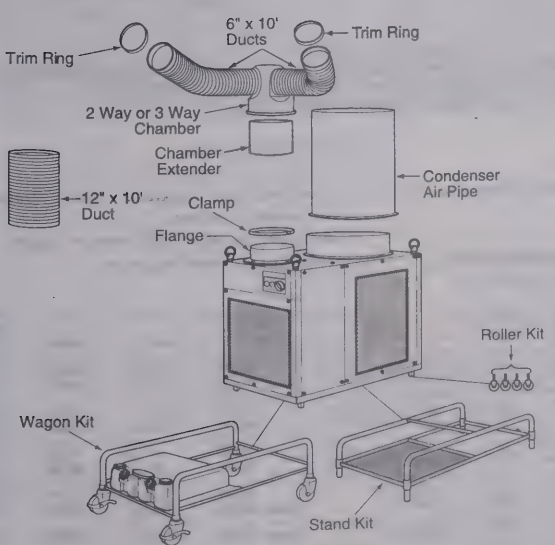
# PORTABLE AIR CONDITIONER ACCESSORIES

## ACCESSORIES FOR A, B, C, F & G

All units are easily field customized with a variety of accessories. 10-Ft. extension duct increases standard cold air ducts and reaches directly to remote areas that need cooling. (Extension duct flange is sold seperately.) A trim ring prevents the extension duct from unraveling and improves appearance. Dual duct converts cold air into two directions for more even distribution.

Warm exhaust air can be vented into auxiliary space or outdoors and away from cooled area by installing a 12" flange and clamp and one or more 12" x 10 ft. ducts. Air plenum kits are used to feed outside air to condenser, preventing negative air pressure in enclosed areas. (12" x 10 ft. duct attaches to top of air plenum kit and is sold seperately.)



A condensate pump kit (not shown) can be direct wired to unit, allowing condensation to be pumped to a remote drain.

MOVINCOOL

New

## ACCESSORIES FOR D & E

Rugged accessories enable unit to perform a variety of industrial applications. Cold air can be moved to desired area using a 2-way or 3-way chamber which diverts into many directions by using 6" x 10 ft. ducts. Chamber extender, with 10" flange and clamp, raises chamber an additional 16" to improve air throw. Trim rings improve appearance and keep ducts from unraveling. Can also use a 12" flange and clamp and 12" x 10 ft. duct as a cold air feed to remote, multi-duct outlets. Condenser air pipe directs warm exhaust 3 feet above and away from cooled area. Unit can be mounted permanently off of ground on stand kits (without condensate tanks) or made portable with roller kit (set of 4 casters w/wrench). A wagon kit allows for portable, self-contained operation with two 5.3 gallon condensate tanks. A remote control kit (not shown) can be field installed where placement of unit makes controls manually inaccessible. No. 5E374 not for use with No. 3TZ38.

# REFRIGERATORS AND COMBINATION UNITS

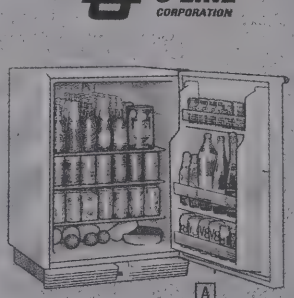
- Field reversible door hinges for left or right hand opening
- Can be freestanding or built-in under counter. No clearance required
- Door accepts 1/4" thick custom made panel to match decor
- Adjustable temperatures control
- 5 ft. power cord with 3-pronged polarized plug
- Commercial units include door lock (right hand hinged, non-reversible)
- Made in USA, 115V, 60Hz

## A REFRIGERATOR

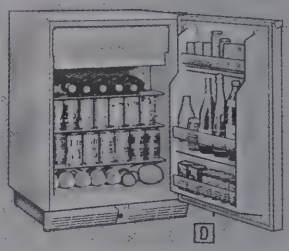
- 6.0 cu.-ft. capacity
- 3 adjustable, tempered glass shelves
- Automatic defrost
- In-door storage and interior light
- Adjustable leveling legs

## B ICE MAKER/REFRIGERATOR

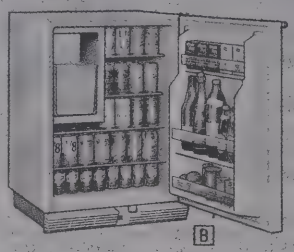
- No drain needed, 1½" clearance for water-line connection on back of unit
- No. 4E833 is manual defrost and produces up to 22 lbs. of ice a day
- No. 4CZ81 is Frost-free and produces up to 8 lbs. of ice a day
- 13 lbs. storage with removable ice bucket
- 4 adjustable, tempered glass shelves
- 4.2 cu.-ft. refrigerator
- In-door storage and interior light
- Adjustable leveling legs



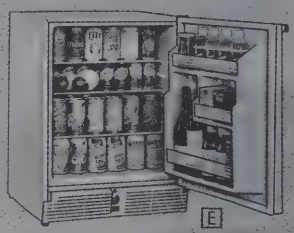
## C ICE MAKER/REFRIGERATOR



- No drain needed, 1½" clearance for water-line connection on back of unit
- No. 4E834 is manual defrost and produces up to 22 lbs. of ice a day
- No. 4CZ80 is FROST-FREE and produces up to 8 lbs. of ice a day
- 13 lbs. storage with removable ice bucket
- 2 adjustable, tempered glass shelves
- 2.1 cu.-ft. refrigerator
- In-door storage



## D REFRIGERATOR/FREEZER



- Combines 5.0 cu.-ft. refrigerator with 1.0 cu.-ft. freezer. 2 full size ice trays included
- 3 adjustable, tempered glass shelves
- Frost-free
- In-door storage and interior light
- Adjustable leveling legs

# ICE MAKERS

**ODELS SHOWN FEATURE:**

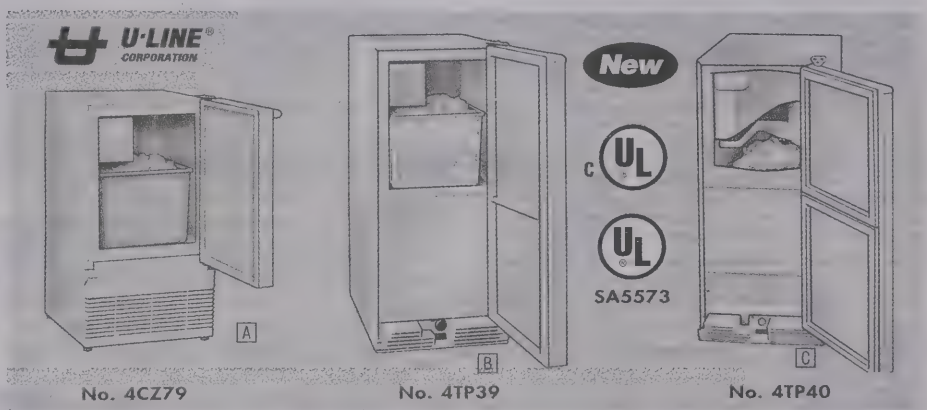
- **Field reversible door hinges for left or right hand opening**
- **Can be freestanding or built-in under counter. No clearance required**
- **Door accepts 1/4" thick custom made panel to match decor**
- **White textured vinyl finish**
- **Adjustable temperature control**
- **115V, 60Hz**
- **5 ft. power cord with 3-prong grounded plug**
- **UL and C-UL Listed (SA5573)**
- **Made in USA**

stallation of all ice making nits requires a cold water inlet 1/4" OD copper tubing, shut-f valve.

he CLR-60 does require a ain. A gravity drain can be sed where the pitch is at least 4" per foot of run to the drain. the drain is above that level ie installation of the P60 rain Pump is needed.

**LINE LIMITED WARRANTY**
**Line Corporation warrants all parts and labor for 1 year, th the additional 4 years on compressor. Text of warranty ailable on request. See. "Manufacturer's Warranties" on ge opposite inside back cover.**

**A ICE MAKER**



- **NO DRAIN needed**
- **Easy to install. Only requires a 1/4" water line connection**
- **Manual defrost**
- **Removable ice bucket**
- **High daily ice production and conserves on water**

**B ICE MAKER**

- **NO DRAIN needed**
- **Easy to install. Only requires a 1/4" water line connection**
- **Manual defrost**
- **Adjustable leveling legs**
- **High daily ice production and conserves on water**

**C CLEAR ICE MAKER**

- **Automatic electronic control module ensures maximum daily ice production**
- **FROST-FREE**
- **Durable ice scoop**
- **Adjustable leveling legs**
- **Easy self-cleaning process**

No. 4CZ79 No. 4TP39 No. 4TP40

## P60 DRAIN PUMP

- **Fully submersible and permanently sealed, lubricated and maintenance free.**
- **Sealed pump deters water overflow in the event of a power failure or restriction in the water line and is fully integrated with the automatic shut-off feature**

***New!*** **No. 4TP41.** Shpg. wt. 6.5 lbs. List $354.18. Each ..... **$283.50**

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

# EVAPORATIVE COOLING SYSTEMS

ESSICK AIR the cool one

**RUGGED BLOWER MOTOR.** Moisture-protected, energy efficient motor designed for long, reliable life.

**BLOWER HOUSING.** Welded to cooler for unitized construction; provides smooth, quiet operation.

**LOW SILHOUETTE CABINET.** Easily converts from down to side discharge.

**NONRUSTING PVC PLASTIC RESERVOIR.**

**ROTO-BELT® SYSTEM REPLACES PUMP.** Pump and water distribution tube problems are eliminated.

**ROTO-BELT® PAD.** Durable, constant density polyester pad keeps its shape and thickness for superior water evaporation and air filtration.

**NONRUSTING PVC AIR LOUVERS.**

**Roto-Belt® evaporative coolers** are designed for long lasting service. All water contact parts such as water reservoirs, louvers, and louver frames are constructed of "rustfree" PVC plastic. Evaporative cooling is used where mechanical air conditioning is too expensive to use or where cooled air cannot be recirculated as in factories, dry cleaners, laundries, and restaurant kitchens. Also used in homes, apartments, garages, shops and green houses. Approximately 80% more economical than air conditioning.

**Units replace all existing evaporative cooling systems.** Roto-Belt evaporative coolers are used in place of aspen-type coolers where rust and corrosion of such products are undesirable.

**Motor-driven blower draws hot outside air** through "twin" rotating polyester filters in PVC plastic frames which turn through two PVC plastic water reservoirs that cannot rust. Cooler can be converted to down discharge or side discharge in minutes. (Switch and grille not included.) 1/4" copper line feed and garden hose drain connection.

**Evaporative cooling in residential use is restricted** to states where relative humidity is not over 50%. It is however, used in practically every state in commercial applications, industrial uses and make-up air in restaurant kitchens. Galvanized steel housing with neutral sand color baked enamel finish. UL Listed. Essick brand.

## MOBILE HOME GRILLE KIT

Includes grille assembly and 6-position switch for mobile home installations. Essick brand (ERC MH).

**No. 4C693.** Shpg. wt. 10.0 lbs. List $157.43. Each ..... **$101.95**

# PORTABLE EVAPORATIVE COOLER

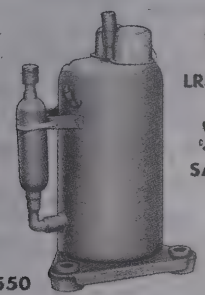
ESSICK AIR the cool one

ENERGY RIGHT®

- **Powerful 1/15 HP motor and separate water pump**
- **Three speed control for maximum cooling or ventilation**
- **Filters and cools the air at the same time**
- **Economical—approx. 2¢ per hour to operate**

**Designed for use as "spot cooling"** or small area cooling. Used in workshops, garages, homes, green houses, and a multitude of uses where portable, small area cooling is desired.

**Unit produces 415 actual CFM** of air cooling, with 1/15 HP motor and a separate water pump which pumps water from a plastic, nonrusting 3¼ gallon reservoir. Hot dry air is drawn in through a large 400 sq.-in. double thick filter which cools the air. Not recommended for use in high humidity climates.



**Overall Dimensions:** 23¼H x 22W x 11¾"D. UL Listed. Essick brand (BFC-2000). 115 volts, 3.3 amps.

**✓No. 3EC17.** Shpg. wt. 31.0 lbs. List $216.38. Each ..... **$133.25**

(✓) Denotes energy efficient product

# ROTARY COMPRESSORS FOR R-22

**MATSUSHITA**

No. 4Z550

LR46130

SA4615

- Universal replacement
- Compact and hermetically sealed
- High efficiency with low sound level
- Dehydrated, completely oil charged
- Suction accumulators on all models
- 115, 208/230 and 265 volt
- UL Recognized (SA4615)

For replacement use in air conditioning and small systems using Refrigerant-22.

**Compact size** results in approximately 1/3 less weight than piston type compressors. Can be used in very tight installations.

**Units feature** very high efficiencies for energy saving applications. Pressure lubricated bearings. Designed for ±15% voltage variation from nominal.

**Conventional suction and discharge connections.** All units test run after assembly. Installation instructions, motor protector and mounting parts included. All units are CSA Certified (LR46130). Matsushita brand.

**HELPFUL GUIDES TO TERMINOLOGY AND TECHNICAL DATA ARE PROVIDED FOR MANY OF OUR PRODUCTS. SEE PAGES IN REAR OF CATALOG**

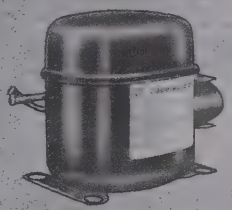
# REFRIGERATION COMPRESSORS

**COPELAND 1-YEAR LIMITED WARRANTY**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Copeland
New
R-12 High Temp

- **Dehydrated, completely oil charged**
- **Quiet; internal suspension system eliminates vibration**
- **Compact, lightweight construction**
- **All copper tubing**



Compressors replace other leading manufacturers' models Commonly used in small refrigerators, freezers, salad bars, flora displays, water coolers, ice machines, and beverage vendin machines. All compressors include mounting parts, termina cover, relay, protector, and bale strap. (Start capacitor is includ ed for compressors where "IAA" is shown in the Copeland mode number).. Copeland brand.

(††) Rotolock connection with flare connection. (‡) Flare connection with suction service valve welded directly on compressor. (*) 90S model.
(##) 958 model has a rotolock includes a rotolock valve. (**) 208/230 volts

# R-22 COMPRESSORS FOR AIR CONDITIONING AND HEAT PUMPS

Copeland

"J" Series
No. 4D685

"CR" Series
No. 4D650

- Dehydrated, completely oil charged
- Functional replacements for many leading brands
- Found in most OEM A/C equipment
- Quiet operation, low vibration
- For Refrigerant-22 (R-22) only
- Compact design
- 3/4 HP through 12 HP

## COMPRESSOR SPECIFICATIONS DATA

# REFRIGERATION CONDENSING UNITS

Copeland New

COPELAND LIMITED WARRANTY
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- Completely oil charged
- Lightweight compressor construction
- Accessible electricals and fittings
- Drop-in replacement for common competitive models

Three variations of these condensing units facilitate replacement of other leading manufacturer's models in most existing applications. Commonly used in small refrigerators, freezers, salad bars, floral displays, water coolers, ice machines, and beverage vending machines. Copeland brand.

(*) SAA suffixed models are low starting torque, not recommended for TXV systemss; IAA models are high starting torque. Use BOM (Bill of Materials) listed above for additional product.

# CONDENSING UNITS OUTDOOR HOOD

## COPELAND OUTDOOR HOOD

No. 4VM80

- Hoods "knockdown" for easy shipment
- 18 guage steel
- Slotted fasteners for easy access
- All hardware included
- Designed specifically for Copeland units
- Allows indoor condensing units to be used outdoors
- Will house all condensing units offered in this catalog

| Copeland Model | Dimensions (In.) L | H | W | New! Stock No. | List | Each | Shpg. Wt. | Cross Reference Kool-Star | RDM |
|---|---|---|---|---|---|---|---|---|---|
| 005-0882-00 CHO-10 | 27 (External) 26 (Internal) | 20 (External) 20 (Internal) | 20 (External) 16 (Internal) | 4VM80 | $393.70 | $235.75 | 41.0 | TC-150LH | PSE-181D |

No. 5E759

## COPELAND OILS

Ultra 20 alkylbenzene oil has been tested and approved by Copeland for use with both HCFC and CFC refrigerants. Also compatible with mineral oil and polyol ester lubricants. Ultra 200 provides improved efficiency and longer system life.

Polyol Ester Oils (POE's) are fully compatible with HFC refrigerants (such as 134A), MP/HP blends (such as MP-39) and properly retrofitted HCFC systems. Approved by Copeland and many other compressor manufacturers. For correct retrofit procedures, contact the equipment manufacturer.

| Item | Container Size | Copeland Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Ultra 200 | 1 Gallon | 998-ab52-01 | New 4VM82 | $267.20 | $160.00 | 25.0 |

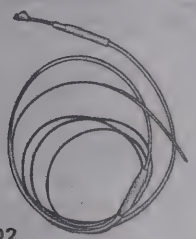
| EAL-ARCTIC-22CC | 1 Gallon | 998-E022-01 | 5E760 ❸ | 86.32 | 45.55 | 9.7 |

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

## DON'T FORGET THE BACK OF THE BOOK!



### MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

# ROTALOCK VALVES, CRANKCASE HEATERS & VIBRATION ABSORBERS

## SELF-REGULATING CRANKCASE HEATER

New

No. 4MC02

- **Fits any unit up to 5 HP and 40" circumference**
- **Reliable self-regulating performance**
- **No thermostat required**

FreezGard® self-regulating crankcase heater prolongs refrigeration compressor life and increases efficiency. This one size fits all, moisture-proof heater 4-ft. heater provides reliable peak heating during critical cold periods and reduces its heating once the compressor starts or the air temperature rises. It will not overheat and can be overlapped without damage. Includes flexible lockstrap and prestripped 28" wire-leads for easy connection and hard-wiring. Use only with refrigeration compressors in nonhazardous areas. UL Recognized.

### SPECIFICATIONS AND ORDERING DATA

| Power At | Minimum Watts | Volts (AC) | Raychem Model | New! Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| 0°F | 60 | 120 | CCH-1C | 4MC02* | $38.61 | $35.15 | 0.9 |
| 50°F | 32 | 208-277 | CCH-2C | 4MC05* | 38.61 | 35.15 | 0.9 |

(*) Power at these temperatures will equal the minimum watts

## COMPRESSOR CRANKCASE HEATERS

No. 2E532

- **Reduce common compressor damage**
- **Keep compressor oil up to 30°F warmer than system temperature**
- **UL Recognized; CSA Certified**

Moisture-proof units have stainless steel outer jacket with high-temp silicone rubber element and 30" insulated leads for electrical connection. Easy to install with screw toggle clamp included. UL Recognized, CSA Certified. Instructions included, Tutco brand.

### SPECIFICATIONS AND ORDERING DATA

| Girth Dimensions (In.) Min. | Max. | Volts (AC) | Watts | Tutco Model | Stock No. | List | Each | Shpg. Wt. |

## ROTALOCK VALVES

No. 3X730

Compressors 3Z817, 3Z818, 3Z819 and 5Z076, are furnished with connections for use with screw-type Rotalock valves. Steel valves can be closed to allow changes without evacuating or recharging the system. 1/4" SAE fitting for use at high or low pressure controls, service manifolds, etc.

### SPECIFICATIONS AND ORDERING DATA

| Valve Usage | Outside Diam. (In.) | Inside Diam. (In.) | Threads Per Inch | Approx. Size (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| Discharge | 1¼ | 7/8 | 12 | 6 x 3 x 2 | 3X730 | $63.53 | $43.30 | 1.3 |
| Suction | 1¾ | 1⅛ | 12 | 8 x 3½ x 2½ | 3X731 | 147.58 | 101.40 | 2.3 |

## VIBRATION ABSORBERS

**Flexible Metal Connectors for Refrigeration and Air Conditioning Tubing**

No. 1A888

SA2575 LR46775

- **Help prevent refrigerant leaking**
- **Resist fatigue under constant flexing**
- **Resist vibration**
- **Flexible, bronze tubing**

Designed to reduce transmission of vibration and gas pulsation from the compressor or condensing unit to other parts of the system. Connectors also help compensate for tubing misalignment, intermittent pipe travel due to thermal expansion and contraction, and help prevent refrigerant leakage due to tubing failure.

**Fabricated from flexible continuous helically corrugated bronze tubing;** covered by bronze braid for additional strength. Copper fittings are brazed in place for high pressure usage. Highly resistant to fatigue under constant flexing and vibration. UL Recognized (SA2575) and CSA Certified (LR46775). Packless brand.

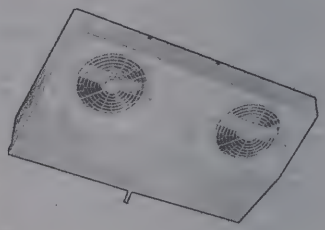
# REACH-IN UNIT COOLERS

CLIMATE CONTROL™



Replacement Parts Available
1-800-323-0620

No. 6D328
V-Profile Unit Cooler

No. 6D333
High Profile Unit Cooler

No. 6D295
Thin Profile Unit Cooler

## ALL REACH-IN UNIT COOLERS FEATURE:

- Double flare on coil inlet gives positive seating of expansion valve
- Attractive grained aluminum cabinet
- Molded Lexan® guard
- Stainless steel screws prevent rust streaks
- Motors are life-lubricated and thermally protected
- Internal junction box for electrical connection
- Plate type aluminum fins with full collars-copper tubes
- Dehydrated and sealed coils
- Easy to install and maintain

## LOW TEMPERATURE UNIT COOLERS FEATURE:

- Electric defrost insures positive heat source
- Built-in fan delay allows coil to be chilled before returning to the normal cooling cycle
- Defrost terminates on coil temperature to eliminate excessive defrost period

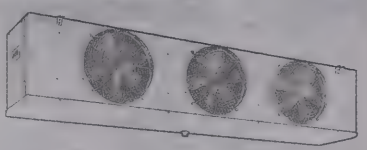
# WALK-IN UNIT COOLERS



**ALL WALK-IN UNITS FEATURE:**

- Computer selected, staggered copper tube, aluminum fin coils circuited to maximize capacity, performance and efficiency
- Nozzles supplied for HCFC-22, CFC-502, R-404A, and R-507
- PVC-coated steel wire fan guards
- Thermally protected fan motors
- Motor wiring uses plug-in type connectors for ease of service
- Heavy-gauge patterned aluminum case for long life
- Slotted hangers simplify installation
- Hanger design allows flush ceiling mounting, which minimizes caulking
- End panels are designed for maximum accessibility, simplifying service
- Unit housing accommodates expansion valve
- Drain pan with hinge/screw arrangement, built-in slope with oversized drain fitting centrally located for fast condensate removal

**LOW TEMPERATURE UNITS FEATURE:**

- Drain pan with electrical heating element that allows for free drainage of condensate
- Deep fin slots are contoured for tight fit around defrost heaters, which results in an efficient defrost system
- Defrost heaters, located on air-entering side, require no extra space between units for service
- Factory-wired terminal board markings are coordinated with defrost timer terminals
- Temperature defrost termination/fan-delay switch monitors defrost length, saves energy and delays the fan operation after defrost termination, to avoid room temperature fluctuations and moisture carryover

# REFRIGERANT

**Prices on these items are subject to change without notice. Contact your local branch for current market price.**

Forane® **Genetron®**

## HCFC REFRIGERANTS

- **R-22—Widely used in residential and commercial air conditioning, industrial cooling, heat pumps and frozen food storage**

Refrigerants come in disposable cylinders with tamper-evident protection on the valve. Forane and Genetron brand.

**NOTE:** The Federal Clean Air Act restricts the sale and use of CFC and HCFC refrigerants to technicians certified by an EPA-approved testing organization.

### HCFC REFRIGERANT ORDERING DATA*

| Type | Size | Stock No. ❸ * | Shpg. Wt. | Size | Stock No. ❸ | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **R-22** | 30 lb. Cylinder | **2W198** | 37.0 | 50 lb. Cylinder | **2W199** | 62.0 |

(*) Government regulated product; includes chorofluorocarbon (CFC) excise tax.

## ALTERNATIVE REFRIGERANTS

**Top-quality alternative refrigerants** in lightweight, disposable cylinders. Factory-filled to assure maximum dryness and purity. Cylinders have sturdy carrying handle/stand and Zytel nylon hand valve. All have pressure relief device.

**IMPORTANT:** Alternative refrigerants are not "drop-in" replacements for the CFC type refrigerants. System retrofits and changes are necessary for these refrigerants to be compatible with existing equipment. Contact the equipment OEM for retrofit guidelines.

**NOTE:** The Federal Clean Air Act restricts the sale and use of CFC and HCFC refrigerants to technicians certified by an EPA-approved testing organization.

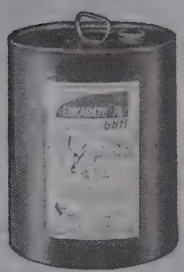
Alkyl Benzene Lubricants No. 1K495



## VIRGINIA® AB ALKYL BENZENE LUBRICANTS

- Improved solubility in refrigerants
- Better oil return
- Low floc points
- Improved thermal stability
- Excellent foaming characteristics

**Alkyl benzene lubricants** are recommended by refrigerant producers and compressor manufacturers for use with the interim HCFCs, as well as with CFCs and ammonia. Virginia KMP brand.

Polyol Ester Lubricants No. 1K461

## EMKARATE™ RL POLYOL ESTER LUBRICANTS

- Superior low temp performance
- No wax content
- OEM approvals and acceptance for use with long term HFCs, interim HCFCs and traditional CFC refrigerants
- Quality assurance registered to BS5750 and ISO9002

**EMKARATE™ RL Polyol Ester lubricants** are specially formulated for use with HFC, HCFC and CFC refrigerants. Virginia KMP brand.

Compressor Oils No. 2W278

## SUNISO COMPRESSOR OILS

- OEM Approved
- High chemical and thermal stability
- Low wax content

**Suniso Type GS oils** meet rigid requirements for refrigeration and air conditioning compressors. Follow equipment manufacturer's recommendations.

| Suniso Type Oil | Container Size | Viscosity, SSU* at 100°F | Floc† Point °F | Pour Test °F | Cap Color | Stock No. ❸ | List | Each | Shpg. Wt. |

# REFRIGERANT RECOVERY & RECYCLING

## REFRIGERANT RECOVERY & RECYCLING SYSTEMS

- **Quiet running, heavy-duty oil-less compressor allows for fast and thorough recovery of refrigerants**
- **Enviro-Guard hoses with ball valves feature a material to prevent refrigerant permeation and still allow maximum flow capacity**
- **Tank overfill and high pressure protection provide safe operation**
- **Multi refrigerant capability possible through self-clearing loop allowing operator to work on a variety of systems without worrying about cross contamination**

**No. 1Z861 is a lightweight, portable, recovery-only unit** for use on any A/C-R system (except automotive) using medium or high pressure refrigerants. ARI Certified for use with R-401A, R-401B, R-12, R-22, R-500, R-502, R-410A, and R-134a/ester oil systems. Features direct drive oil-less compressor which automatically switches between liquid and vapor refrigerant to enable faster recovery speeds without changing hose configuration. Requires one 30 lb. or 50 lb. D.O.T. approved cylinder and liquid level sensor sold separately.

**ROBINAIR**

No. 1Z861

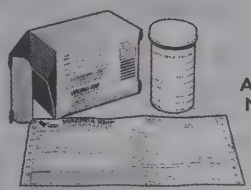
Oil Pump No. 4E848

Vacuum Pump Oil No. 4E849

## OIL PUMP



Piston type high pressure pump designed to operate at pressures to 250 PSI. Mount on 1 gallon can of refrigeration oil and pump directly into refrigeration compressors without pumping them down. 1.6 oz. per stroke. Virginia KMP brand (OP1).

**No. 4E848.** Shpg. wt. 1.5 lbs. List $222.95. Each ..... $146.55

## VACUUM PUMP OIL

Fortified with additives which keep pumps clean as it lubricates and seals. Outstanding flushing oil for cleaning vacuum pumps. 1 quart size. Virginia KMP brand (L-340).

**No. 4E849.** Shpg. wt. 1.9 lbs. List $12.95. Each..... $7.55

Oil Analysis Kit No. 4E850

## REFRIGERATION OIL ANALYSIS KIT

Place oil sample into container and mail for complete spectrographic and chemical oil analysis. Virginia KMP brand (OA-1).

**No. 4E850.** Shpg. wt. 0.1 lbs. List $146.95. Each ..... $86.45

Oil Acid Test Kit No. 5W198

## REFRIGERATION OIL ACID TEST KIT

- **Detects acid in mineral or alkylbenzene compressor lubricants**
- **Fast, easy testing**
- **Just one step, add oil and shake—if color changes to yellow, oil is acidic**

Acidic oil must be changed to prevent deterioration of motor windings. Ultra sensitive color guarantees an accurate test. Color changes at neutralization number of 0.04 to 0.06. TKO brand from Virginia KMP brand (L-365).

**Caution: Liquid is flammable.**

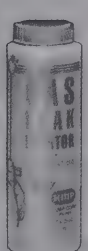
**No. 5W198.** ❸ Shpg. wt. 0.3 lbs. List ..... $15.95. Each ..... $8.50

Retrofit Test Kit No. 3VJ62

## ETK™ ACID TEST KIT

- **Fast, easy testing**
- **Just one step, add oil and shake—if color changes to yellow, oil is acidic**

For use with polyol ester lubricants. Ultra-sensitive color change guarantees an accurate test. Virginia KMP brand (ETK.)



**No. 3VJ59.** ❸ Shpg. wt. 0.3 lbs. List ..... $15.75. Each ..... $8.54

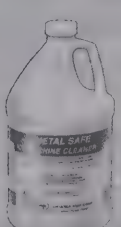
## RTK™ RETROFIT TEST KIT

For use with polyol ester lubricants to analyze residual mineral oil content during retrofit. Percentage of mineral oil is indicated by a change in the appearance of the solution.

Virginia KMP brand (RTK).

**No. 3VJ62.** ❸ Shpg. wt. 0.8 lbs.. List ..... $38.00. Each ..... $20.59

KMP INTERNATIONAL



Gas Leak Locator No. 4E845

## GAS LEAK LOCATOR

- **Non-freezing**
- **High viscosity formulation**
- **Fluorescent dye enhances leak detection**

Designed specifically to detect leaks in refrigeration and air conditioning equipment lines. 8 oz. container. Virginia KMP brand (GL6).

**No. 4E845.** Shpg. wt. 0.7 lbs. List..... $10.95. Each ..... $5.65

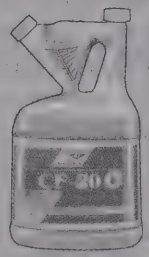
Metal-Safe Ice Machine Cleaner No. 3VJ61

## ICE MACHINE CLEANER

- **Used in automatic ice machines with water drains; Nos. 3VJ60 and 3VJ61 are metal safe for nickel- and tin-plated evaporators**
- **USDA Approved**

Can be used for descaling commercial dishwashers. Authorized by USDA for use in federally inspected meat and poultry plants. Virginia KMP brand.

**No. 4E310.** ● 8 oz. container (H418). Shpg. wt. 0.9 lbs. List..... $6.95. Each ..... $4.23



**No. 4E838.** ❸ 1 Gallon container (H419). Shpg. wt. 12.0 lbs. List..... $102.95. Each ..... $57.00

**No. 3VJ60.** ● 8 oz. container (H420). Shpg. wt. 0.7 lbs. List $8.25. Each ..... $4.96

**No. 3VJ61.** ● 1 Gallon container (H421). Shpg. wt. 11.0 lbs. List..... $104.00. Each ..... $62.80

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# COIL CLEANERS

Coil Cleaner & Acid Remover No. 3XL13

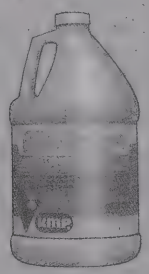
## INTERNAL COIL SYSTEM CLEANER & ACID REMOVER

- Cleans away carbon deposits, tar, sludge, oil, and grease
- Neutralizes any acid in the system
- CFC Free
- Non-flammable
- Will not contaminate oil or refrigerant
- Phased evaporation rate
- Non-chlorinated
- Low VOC

Specifically formulated to clean interior of coil lines in refrigeration or air conditioning systems after a compressor failure or burnout. Aftermarket Specialties brand.

| Size | Mfr. Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1-Gal. | CF2004 | 3XL13 | $65.50 | $36.95▲ | 9.0 |
| 5-Gal. | CF2005 | 3XL14 | 329.77 | 176.50▲ | 45.0 |

(▲) Net prices, not subject to discounts.



Acid-Base Condenser Coil Cleaner No. 5W197

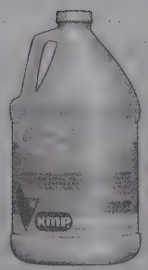
## ACID BASE CONDENSER COIL CLEANER

- For air cooled condenser coils; effective on spine fin coils
- Foams away hard-to-clean deposits from air cooled condensers
- Excellent aluminum brightener
- Improves heat transfer, increases system capacity, and reduces head pressure

Apply with a low pressure sprayer. Rinses away easily with water. Cleaner contains acid; it MUST be used with protective clothing and eye glasses. Acti-Brite brand from Virginia KMP.

| Size | Mfr. Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1 Gal. | AB-1 | 5W197* | $28.95 | $15.15 | 9.5 |
| 5 Gal. | AB-5 | 4E841 | 130.95 | 68.40 | 50.0 |

Non-Acid Base Condenser Coil Cleaner No. 5W403



## NON-ACID BASE CONDENSER COIL CLEANER

- For air cooled condenser coils
- Heavy foaming action concentrate
- Alternative to acid cleaners
- Reduces head pressure
- Decreases power consumption
- Especially effective in removing grease accumulations from secondary sources that have contaminated condensers

Cleaner is a formula of alkaline plus surfactants. Protective clothing and eye glasses recommended while using. Alki-Foam brand from Virginia KMP.

| Size | Mfr. Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1 Gal. | AKF-1 | 5W403* | $27.95 | $13.25 | 2.8 |
| 5 Gal. | AKF-5 | 4E839 | 116.95 | 59.85 | 56.0 |

KMP INTERNATIONAL

Non-Acid Base Evaporator Coil Cleaner No. 5W402

## NON-ACID BASE EVAPORATOR COIL CLEANER

- Self rinsing; system condensate rinses dirt and detergent away
- Helps maintain maximum efficiency
- Fast acting, nonacid, nontoxic, deodorizing, nonflammable, biodegradable
- Removes dirt, oil, grease, lint, smoke film, and slime accumulations
- USDA approved

Extremely effective for cleaning dirty evaporator coils, especially when used periodically as a preventive maintenance program. Apply with sprayer to the intake side of the coil. Acti-Klean brand from Virginia KMP.

| Size | Mfr. Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1 Gal. | AK-1 | 5W402 | $25.95 | $13.25 | 9.0 |
| 5 Gal. | AK-5 | 4E840 | 116.95 | 59.85 | 46.0 |

Blast-a-Coil Coil Cleaner No. 4E844

## BLAST-A-COIL COIL CLEANER

- High pressure nozzle, dries instantly
- No mess to clean up
- Nonconductive, nonflammable

For air conditioning and refrigeration condensers. High pressure blast cuts thru grease on dirty coils. Leaves no oily film. Lemon fragrance. **Not for use on polystyrene room A/C units.**

| Size | Mfr. Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 22-Oz. can | BAC20 | 4E844 | $16.95 | $8.50 | 1.5 |

## CDC ANTI-CLOG TABLETS

Biocide tablets for air conditioning drain pan maintenance and health protection. New design prevents skin contact with biocide, allows metered chemical release, and improves wicking action of filter pad.

| Size | Mfr. Model | Stock No. ❸ | List | Each † | Shpg. Wt. |
|---|---|---|---|---|---|
| Up to 5 tons | FT/C | 6E798 | $11.95 | $6.79 | 0.1 |
| 5 to 15 tons | AT/C | 6E797 | 31.95 | 17.58 | 0.2 |

(†) Priced per tablet.

**Protective Clothing & Eyewear Available. See Index for page numbers.**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.
(*) DOT regulated product—shipped in full ship pack only.

# MASTICS, INSULATIONS, DESCALER, AND PIPE ANTI-FREEZE

## THERMAL BLOCK

Protective heat-sink compound effectively absorbs surface heat from welding, brazing, or soldering zones. 11 Oz. tube. Virginia KMP brand (TB11).

**No. 4E846.** Shpg. wt. 0.8 List ..... $18.95
Each ..... **$11.35**

## PRESSTITE THERMAL MASTIC

- **Heat transmission compound**
- **Stable at all working temperatures**
- **Does not harden or lose adhesion at -50°F; will not flow at 220°F**

Heat conducting compound, increases heat transfer 4 times the rate obtained with mechanical mounting only. Use wherever rapid heat transmission is desired. 8 oz. tube. Virginia KMP brand (PM8).

**No. 4E847.** Shpg. wt. 0.6 lbs. List ..... $15.95.
Each ..... **$9.45**

## FOAM INSULATION TAPE

- **Temperature range: -20 to 160°F**
- **Reduces condensation**
- **Reduces heat loss on pipes**
- **Ozone resistant**
- **Low water absorbency**

This tape prevents pipe sweating, and is easy to mold around fittings and valves. Adheres to clean metal surfaces and itself. 1/8" thick x 2" wide x 30 ft. Virginia KMP brand (K501).

**No. 4E309.** Shpg. wt. 0.8 lbs. List ..... $15.95.
Each ..... **$9.83**

## CORK INSULATION TAPE

- **Used in hot and cold applications**
- **Reduces condensation**
- **Joints are self-sealing**
- **Water and water vapor resistant**

This cork tape is easily molded to irregular shapes, and has a -20 to 158°F range. 1/8" thick x 2" wide x 30 ft. Virginia KMP brand (PT-1).

**No. 4E306.** Shpg. wt. 3.0 lbs. List ..... $19.95.
Each ..... **$12.53**

## SEALING GUM

- **Nonhardening**
- **Water-resistant**
- **Nonstaining**
- **Adheres to wood, metal, glass, and plastic**
- **-30 to 158°F Temperature range**

These convenient, ready-to-use sealing gums are available in 3/16" x 100 ft. extruded cords, and in 2 lb. blocks. Virginia KMP brand.

**No. 4E308.** 3/16" Extruded cords (PP-33).
Shpg. wt. 2.1 lbs. List ..... $18.95.
Each ..... **$11.64**

**No. 4E307.** 2 Lb. Permagum block (PP-22).
Shpg. wt. 2.1 lbs. List ..... $18.95.
Each ..... **$11.56**

## SCALE REMOVERS

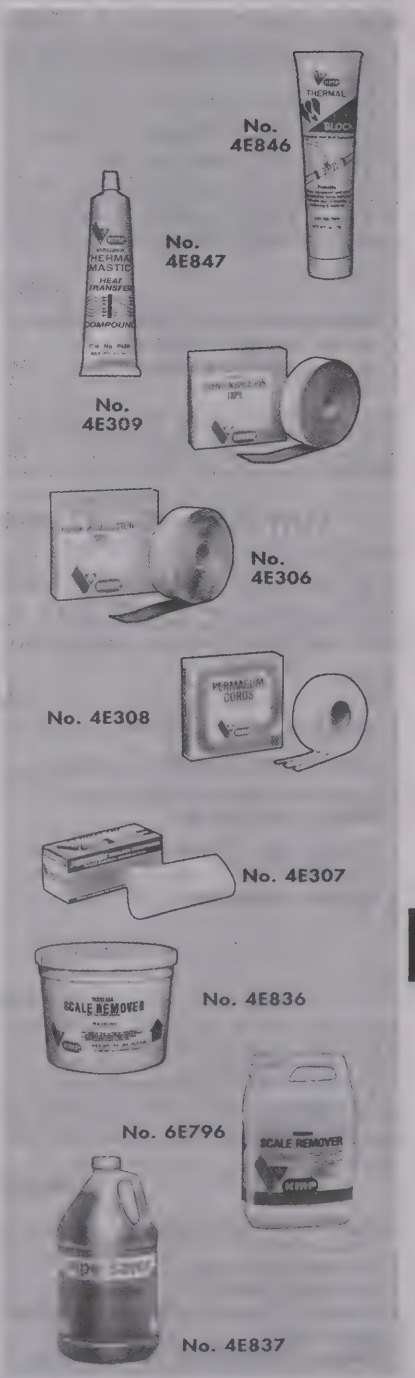
Detergent-inhibitor additives provide excellent protection for all metal parts of the equipment system. Use for descaling aluminum, stainless steel, cast iron, hot dip zinc, or galvanized equipment. (Nos. 6E796 & 6E795 are **NOT** for galvanized steel.) Designed for cleaning heavily scaled equipment and problem scales. Available in 10 lb. drum compound, and 1- and 5-gallon liquid. Virginia KMP brand.

**No. 4E836.** 10 lb. container (WS10).
Shpg. wt. 11.0 lbs. List $102.95. Each ..... **$60.80**

**No. 6E796.*** 1 gallon container (WL1).
Shpg. wt. 9.5 lbs. List $31.95. Each ..... **$17.52**

**No. 6E795.** 5 gallon container (WL5).
Shpg. wt. 47.0 lbs. List $124.95. Each ..... **$67.45**

(*) DOT regulated product—shipped in full ship pack only.



## PIPE SAVER

Propylene glycol based anti-freeze protects pipes from bursting down to -100°F. All ingredients are generally regarded as safe by the FDA. Virginia KMP brand.

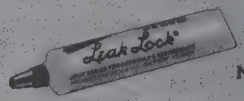
**Applications:**

- **Refrigeration systems**
- **Solar hot water and heating systems**
- **Process cooling**
- **Ground water heat pumps**
- **Hydronic systems**
- **Chillers**
- **Swimming pools**
- **Winterization of plumbing in recreational vehicles**

| Size | KMP Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 1 Gal. | PS1 | 4E837 | $35.95 | **$17.05** | 13.0 |
| 5 Gal. | PS5 | 4E851 | 178.95 | **84.55** | 50.0 |

These products are covered by OHSA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# SEALANTS AND GAS LEAK DETECTION



## LEAK LOCK®

- **Withstands temperatures from -200 to 400° F**
- **Full vacuums to 10,000 PSI**
- **Seals all refrigerants, petroleum products, natural and manufactured gases, steam, water, air, etc.**

Soft setting pipe joint compound seals threaded and flanged joints, gasket surfaces and mating surfaces. Resin-based paste remains permanently flexible, adheres to internal surfaces and fills voids. Use on metal and plastic material subject to extreme vibrations. Use alcohol as cleaning agent prior to setting.[No Data]

**No. 3TR02.** ❸ 1.3 oz. Tube. Shpg. wt. 0.1 lbs. List.....$2.79. Each.....**$2.48**

**No. 3TR03.** ❸ 4 oz. Brush Top Plastic Jar. Shpg. wt. 0.4 lbs. List.....$6.80. Each.....**$6.04**

No. 3TR02

No. 3TR03

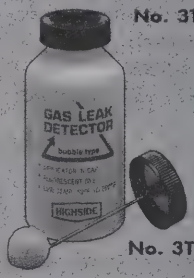
## RED EPOXY

- **Temperature range: -100° F to 300° F**
- **Tensile strengths: 6000 PSI**
- **Working pressure tested in excess of 3000 PSI**

High performance, heat cured, two part epoxy kit for patching or sealing on all metals including aluminum and most plastics. Exhibits a unique color change when it is completely heat cured. Cure with a hot air gun or an open flame. Cures within 5 minutes and equipment is serviceable immediately. Seals threaded or unthreaded pipes. Field repair aluminum evaporators, coils, radiators, pipes, tanks, etc. Kit includes two 0.5 oz. tubes.

**No. 3TR04.** ❸ Shpg. wt. 0.2 lbs. List.....$11.78. Each.....**$10.46**

HIGHSIDE CHEMICALS INC.



No. 3TR04

## LOW-TEMP NON-HAZARDOUS GAS LEAK DETECTOR

Non-toxic, non-hazardous and does not contain ethylene glycol. Non-freezing, viscous fluorescent, bubble-type gas leak detector rated to -30°F. Leaks appear as large strong bubbles which cling to the applied surface and are fluorescent under a black light. Use on hot and cold piping and equipment containing most gases such as air, natural gas, all refrigerants, ammonia, $SO^2$, etc. 8 oz. plastic dauber bottle.

**No. 3TR08.** Shpg. wt. 0.7 lbs. List.....$4.62. Each.....**$4.09**

No. 3TR08

## TRAX®

- **Temperature Range: 27°F to 200°F**
- **Detects leaks as small as 1 micron**
- **Evaporates leaving no residue, requires no clean-up**
- **Does not pit surfaces and is environmentally friendly**
- **Oxygen compatible**
- **Meets performance requirements of Military Specifications: Mil 25567 Type IA, B & C**

A clear, non-toxic, bubble-type liquid leak detector formulated to produce long lasting bubbles under "job-site" conditions.

**No. 3TR09.** ❸ 1⅓ oz. Squeeze Bottle.Shpg. wt. 0.1 lbs. List.....$2.75. Each.....**$2.44**

**No. 3TR10.** ❸ 10 oz. Plastic Squeeze Bottle with Extendible Spout. Shpg. wt. 0.9 lbs. List...$4.82. Each.....**$4.27**

No. 3TR09

## TRACE® 2

Added directly to the system is a red dye tracer type internal leak detector for use with all refrigerant lubricants and hydraulic systems. Leaks show as intense red stains. Non-volatile, will not sludge oil or deposit gum. Soluble in the lubricant and liquid refrigerant and travels with the lubricant. Oil separators will remove trace and should be bypassed. Passes through solid dryers but the color intensity may be slightly reduced.

**No. 3TR07.** ❸ 4 oz. Plastic Bottles. Shpg. wt. 0.3 lbs. List $14.71. Each.....**$9.99**

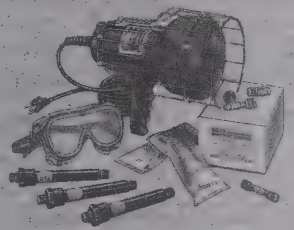
No. 3TR07

## THAWZONE®

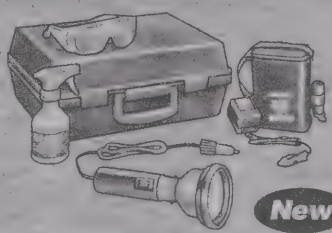
- **Frees frozen system due to moisture in 5 minutes**
- **Prevents refreezing**
- **Leaves no residue**
- **Does not contain any dissolved solids or methanol**
- **Works with or without solid dryers**

Added to the system it chemically "dries" all refrigerants, methyl chloride, methylene chloride.

**No. 3TR05.** ❸ 1 oz. Plastic Bottle. Shpg. wt. 0.1 lbs. List $3.49. Each.....**$3.10**



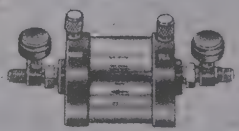
**No. 3TR06.** ❸ 4 oz. Plastic Bottle. Shpg. wt. 0.3 lbs. List $9.57. Each.....**$8.50**



No. 3TR05

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# HVAC UV FLUORESCENT LEAK DETECTION SYSTEMS



No. 6T513
(Shown without Case)

New

No. 4TL64

SPECTRONICS CORPORATION

No. 6T106
Mist Infuser

eak detection systems use UV fluorescent additives to pinpoint eaks that may go undetected with conventional leak detectors. eveal leaks as small as 1/8 oz./year or less in tubing, coils, alves, fittings, compressors, and seals around moving shafts. right yellow-green glow is found with high-intensity ultraviolet UV) lamp (included with kit). Use on all sizes of air condition- ng and refrigeration systems that circulate the oil with the efrigerant; compatible with all commonly used refrigerants—R-1, R-12, R-22, R-113, R-114, R-123, R-500, and R-502—alternative efrigerants including R-134a and others. There are two ways to nfuse AR-GLO® fluorescent additives: the GLO-STICK® capsule nd the Mist Infuser™. GLO-STICKS are disposable leak tracer apsules that are prefilled with premeasured dose of AR-GLO. he refillable Mist Infuser is for use with bottled AR-GLO addi- ives. 1/2 oz. capacity Mist Infuser included with kits; optional 2 r 16 oz. infusers available for use on larger capacity systems; rder separately below.

## SIMPLE PROCESS TO IDENTIFY LEAKS

) For Mist Infuser, pour pre-measured additive into fill port, tilt- ng to vent all air

) Connect GLO-STICK or Mist Infuser between low pressure auge and service port

) Open valve slowly to gradually let additive into system—allow nough time for additive to circulate

) Trace the system with ultraviolet lamp. All leaks will glow rightly, revealing their precise location

)After repairing leaks, additive wipes off with any water-based leaner or oil solvent.

)Additives meet ANSI/ASHRAE Standard 97; have no adverse ffect on refrigerant oils per ASHRAE Standard 86.

## LEAK DETECTION KITS INCLUDE:

ligh-intensity, lightweight, UL Listed, 115 VAC, 60 Hz UV lamp vith 8 ft. power cord and a 150 watt Built-In-Ballast™ bulb; heat uard/stand and a bottle of GLO-AWAY™ DYE Cleaner/Remover. lo. 6T104 comes with a 1/2 oz. capacity Mist Infuser, quick-dis- onnect attachment, goggles, and four 1/2 oz. bottles each of AR- LO 1, 2, and 3 additives. No. 6T513 comes with a pkg. of GLO- TICK® capsules (1 ea. GS-101, 2 ea. GS-1 and GS-2, 1 ea. GS-3), uick disconnect attachment, 2 bleed valves and goggles. Kits lso come with hard, lockable carrying case, with handle and louble latches; case measures 21L x 12W x 13"H.

**No. 6T104.** ❷ **Leak Detection Kit** with 150W Built-In-Ballast™ bulb. Spectroline® brand (HVLD-80). Shpg. wt. 16.0 lbs..Each.....$579.00

(*) 1-year limited warranty on lamp fixture; 30 day limited warranty on bulbs. Text of warranty available on request. See warranty information on page opposite inside back cover

| Additive Type | Amount of Oil In System | Additive Amount | Typical Application | Carton Qty. | Bottle Size | Spectroline Model | Stock No.❸ | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **AR-GLO 1** | Up to 1.6 Qts. | 1/2 oz | Residential# | 12 | 1/2 oz | AR-GLO 1 | **6T108** | **$50.00** | 0.8 |
| **AR-GLO 2** | 1.7 to 3.2 Qts. | 1/2 oz | Light Commercial & Large Residential# | 12 | 1/2 oz | AR-GLO 2 | **6T109** | **82.95** | 0.8 |
| **AR-GLO 3** | 3.3 Qts. to 2 Gal. | 1/2 oz | Commercial & Light Industrial# | 12 | 1/2 oz | AR-GLO 3 | **6T110** | **135.90** | 0.8 |
| **AR-GLO 4** | NA† | 1/4 oz of AR-Glo 4-per gallon of refrigeration oil | Industrial | 6 | 2 oz | AR-GLO 4 | **6T111** | **260.00** | 1.2 |
| | | | | 1 | 1 pt | AR-GLO 4-P | **6T112** | **320.00** | 1.4 |

†) When oil charge is known, calculate AR-GLO 4 dosage based on amount of refrigeration oil in system. (#) Use AR-GLO 3 with all split systems where the exact oil charge is not known, even they are used for residential applications and hold less than 10 lbs. of refrigerant.

WARNING: This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# GLO-STICK® CAPSULES, BLEED VALVES, & HALOGEN LEAK DETECTORS

## GLO-STICK® CAPSULES

| Capsule Type | Amount of Oil In System | Amount of Refrigerant | Dye Type | System Typical Application | Type of Compressor Oil | Capsule Size (Oz.) | Mfr's. Model | Stock No. | Each Pkg. / 6 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|
| **GS-101** | Up to 15 fl. oz. | Up to 2.9 lbs. | AR-GLO 101 | Small AC&R units, e.g., ice machines & auto | Mineral oil | 0.03 | GS101 | **6T515** | **$24.00** | 1.0 |
| **GS-1** | Up to 1.6 Qts. | Up to 4.9 lbs. | AR-GLO 1 | Residential* | Mineral oil | 0.5 | GS-1 | **6T516** | **41.00** | 1.0 |
| **GS-2** | 1.7 Qts. to 3.2 Qts. | 5-9.9 lbs. | AR-GLO 2 | Light commercial and large residential* | Mineral oil | 0.5 | GS-2 | **6T492** | **56.95** | 1.0 |
| **GS-3** | 3.3 Qts. to 2 Gal. | 10-25 lbs. | AR-GLO 3 | Commercial and light industrial* | Mineral oil | 0.5 | GS-3 | **6T493** | **83.00** | 1.0 |
| **GS-101/E** | Up to 15 fl. oz. | Up to 2.9 lbs. | AR-GLO 101/E | Small AC&R units, e.g., ice machines | Ester oil | 0.03 | GS-101/E | **6T494** | **27.00** | 0.4 |
| **GS-1/E** | Up to 1.6 Qts. | Up to 4.9 lbs. | AR-GLO 1/E | Residential* | Ester oil | 0.5 | GS1-E | **6T495** | **44.95** | 1.0 |
| **GS-2/E** | 1.7 Qts. to 3.2 Qts. | 5.9-9 lbs. | AR-GLO 2/E | Light commercial e.g. split & central | Ester oil | 0.5 | GS-2/E | **6T496** | **63.00** | 1.0 |
| **GS-3/E** | 3.3 Qts. to 2 Gal. | 10-25 lbs. | AR-GLO 3/E | Commercial and light industrial | Ester oil | 0.5 | GS-3/E | **6T497** | **90.95** | 1.0 |
| **GS-101/LT** | Up to 15 fl. oz. | Up to 2.9 lbs. | AR-GLO 101/LT | Small AC&R units | Alkyl benzene | 0.03 | GS-101/LT | **6T499** | **27.00** | 0.5 |
| **GS-1/LT** | Up to 1.6 Qts. | Up to 4.9 lbs. | AR-GLO 1/LT | Residential* | Alkyl benzene | 0.5 | GS-1/LT | **6T500** | **44.95** | 1.0 |
| **GS-2/LT** | 1.7 Qts. to 3.2 Qts. | 5-9.9 lbs. | AR-GLO 2/LT | Light commercial e.g. split & central | Alkyl benzene | 0.5 | GS-2/LT | **6T501** | **63.00** | 1.0 |
| **GS-3/LT** | 3.3 Qts. to 2 Gal. | 10-25 lbs. | AR-GLO 3/LT | Commercial and light industrial | Alkyl benzene | 0.5 | GS-3/LT | **6T506** | **90.95** | 1.0 |
| **GS-101/PAG** | Up to 15 oz. | Up to 2.9 lbs. | AR-GLO 101/PAG | Automotive — New R-134a | PAG oil | 0.06 | GS-101/PAG | **6T498** | **27.00** | 0.5 |

(*) Use GS-3 series with split systems, where exact oil charge in not known.

### SPECTROLINE BLEED VALVES

**No. 6T502.** Bleed Valve. Spectroline (BV-50). Shpg. wt. 0.2 lbs. Each ..... **$15.00**

**No. 6T509.** Acme Fitting Bleed Valve. Spectroline brand (BV-75). Shpg. wt. 0.2 lbs. Each ..... **$25.00**

2 bleed valves required with GLO-STICK® Capsules to facilitate purging air from lines. BV-75 bleed valves used only with the GS-101/PAG, while BV-50 Bleed Valves used with all other capsules.

### TIF LEAK DETECTORS

| Features | Stock Nos. 1T916 | 1T904 | 3X985 | 3T449 | 1TC17 |

| **3T449** | 5650A | **230.00** | 3.0 |
| **1TC17** | H10A | **230.00** | 3.5 |

(‡) No. 3T449 features visual leak size indicators, reset switch located in probe, and constant power indication.

May be used to detect most compounds containing halogens, i.e. chlorine, fluorine and bromine. SF-6, Ethylene, Perchlorethylene, and Trichlorethylene. Nos. 1T904, 3T449, 3X985, and 1TC17 have the capability to also detect all Class I and Class II substances (as defined by the Clean Air Act). HFC refrigerants (R134A, R125) and Halon gases (1211,1301, etc.). **Always consult user manual and applicable local electrical and safety codes prior to use.** Leak sensitivity exceeds 0.40 oz./year except No. 1T916 which is adjustable with a maximum of 0.50 oz./year. No calibration required (except Nos.1T916 and 1TC17). Detects leaks in contaminated atmosphere. Instant warm-up time. Continuous duty cycle. Negative corona sensor not poisoned by large refrigerant dose. Includes spare sensing tip and carrying case.

**Replacement Carrying Case** for Nos. 1T916, 1T904, 3X985 and 3T449 TIF brand (TIF447).

**No. 1T905.** Shpg. wt. 0.3 lbs. Each ..... **$14.95**

**Maintenance Kit** for use on Nos. 3X985, 3T449 and 1TC17 with TIF models 5500, 5600 and H10K. Includes 3 sensing tips and 3 sensing boots. TIF brand (TIF544).

**No. 1T912.** Shpg. wt. 0.1 lbs. Each ..... **$24.95**

**Maintenance Kit** for use on Nos. 1T916 and 1T904 with TIF Model No. 5000. Includes 3 sensing tips and 3 sensing boots. TIF brand (HLD444).

**No. 1T906.** Shpg. wt. 0.1 lbs. Each ..... **$24.95**

## [A] HALIDE LEAK DETECTOR KIT*

- Portable, lightweight
- Kit includes 14.1 oz. propane fuel cylinder, easy-to-change reaction plates, brass valve body, long lasting flexible hose and plastic case
- UL Listed
- Bernzomatic brand (TX12MA)

**No. 3X674.** Shpg. wt. 3.8 lbs.
Each ..... $34.20

(*) Dot regulated product-shipped in full ship pack only.

## [B] ELECTRONIC VACUUM SYSTEM

Performs functions necessary to properly evacuate, dehydrate, and leak check any system. May be used to evacuate and dehydrate any A/C or Refrigerant unit containing halogenated refrigerant (R12, R22, R502, R134a).

- 10-ton capacity; oil capacity 240 ml
- 115VAC, 60 Hz power supply
- Electronic LED vacuum indicator built-in; indicates levels 1-6
- Indicates if moisture is present in system
- Isolation valve
- Oil contamination sensor and warning light
- Indicates vacuum leaks
- Offset rotary vane design
- Automatic purge feature prevents rotor lock-up
- 1/4" MFL intake fitting
- Separate oil drain and fill plugs

**No. 6T368.** TIF brand (9100V). Shpg. wt. 17.0 lbs. Each ..... $380.00

## [C] AUTO PROGRAMMABLE CHARGING METER

- Automatically dispenses a preset amount of refrigerant into any system in fractions of an ounce from cylinders up to 150 lbs. (68 Kgs.)
- Operates in a "set and forget" mode; stops charging at preset level and signals audible alarm
- Microcomputer monitoring of preset charge is automatically turned off when preset is reached
- Hold function interrupts charging if cylinder empties
- Sensitive to 1/2 ounce resolution
- ±2% accuracy
- Fully automatic (120VAC required) or manual operating modes
- 5 digit liquid crystal display
- 9" square platform accepts all cylinders
- Can be used with either CFC-HCFC (R12, R22, or R502) or HFC (134a)
- Reads pounds and ounces or kilograms and grams
- Battery and line voltage operation with no warm-up time
- Includes self-contained molded case, six AA cell batteries, and a 36" adapter hose

**No. 3T008.** TIF brand (TIF9050). Shpg. wt. 16.0 lbs. Each ..... $430.00

## [C] ELECTRONIC CHARGING SCALE

- Compact "slimline" design less than 2" thick
- Dispenses refrigerant into any system in fractions of an ounce, without limit, from cylinders up to 100 Lbs. (45 Kgs).
- Eliminates need for inefficient methods of refilling charging cylinders
- Can be used as a conventional weight scale by rezeroing to weigh remaining refrigerant for another job
- LCD display, accurate to 1/2 ounce resolution
- Convenient design accepts all cylinders
- Can be used with either CFC-HCFC (R12, R22, or R502) or HFC (134a)
- ±2% accuracy
- Cordless operation and automatic temperature compensation
- Reads pounds and ounces or kilograms and grams and includes 9V battery

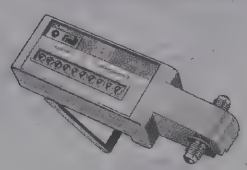
**No. 1T921.** TIF brand (TIF9010). Shpg. wt. 13.0 lbs. Each ..... $200.00

## [D] ELECTRONIC SIGHTGLASS

- Eliminates the need for an optical sightglass
- Audible and visible signals indicate fully charged refrigerant system
- Checks refrigerant floodback, detects starved evaporators
- SONAR ultrasonic operation on any metal tubing
- Monitors refrigerant charge on capillary and expansion valve systems, household/commercial refrigerators or freezers and window or room AC packaged systems
- Maximizes evaporator capacity
- Transducer clamps fit tubing from 1/8" to 1¼" diameter
- Battery operated with low battery indicator
- Includes transducer clamps, 9V battery, and carrying case

**No. 1A229.** TIF brand (TIF4000A). Shpg. wt. 1.4 lbs. Each ..... $200.00

## [E] HERMETIC COMPRESSOR ANALYZER



- Computer electronics for quick and accurate signal of difficulty
- No wire-disconnections required
- Clamp-on sensors check for starting torque, acid in refrigerant, insulation breakdown, mechanically frozen compressors, capacitor open or shorted, capacitor microfarads, open starting or run windings and open relays
- Hermetic class: minimum, 200W; maximum, 20KW
- Current range: 3-200 amps
- Includes extra current sensor, plug-in test leads, and batteries

**No. 1T977.** TIF brand (TIF8000).
Shpg. wt. 2.4 lbs. Each ..... $149.00

# VACUUM GAUGES

## ELECTRONIC VACUUM GAUGE

Supco

Used in service or installation of air conditioning or refrigeration equipment. Provides an LED readout of the level of vacuum during the system evacuation process. Assists user to know when all moisture is pumped from the system and if there are system leaks. Supco brand (VG-60).

- **Color coded, 10 segment LED display**
- **Ranges: 5000, 1500, 1000, 700, 400, 300, 200, 100, 50 microns**
- **1/4" male flare connections; in line installation**
- **9V battery operated (not supplied)**
- **Includes hanger/stand, quick caps for fittings and case**

**No. 1TC70.** Shpg. wt. 1.5 lbs. Each.....$124.30

## CHARGING AND RECOVERY SCALE

AMPROBE INSTRUMENT

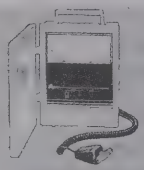
- **Dual LCD displays both pounds and kilograms**
- **100-Lb. capacity (45.4 Kg)**
- **Accuracy (TYP): 0.031 Lb. (0.0140 Kg)**

Capable of working with all refrigerants. Two-piece design allows remote monitering of refrigerant charging. Includes 9V battery, carrying case, and instructions. Amprobe brand (ADS-1).

**No. 3JH45.** Shpg. wt. 8.0 lbs. Each .....$179.00

## DIGITAL VACUUM GAUGE

AMPROBE INSTRUMENT



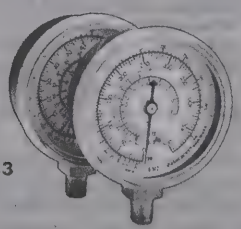
- **Displays microns, inches Hg, and psia**
- **Over protection is provided to 100 PSI**

**Digital vacuum gauge** measures a vacuum down to 50 microns. Incorporates a high precision temperature compensated pressure sensor along with an integrated programmable controller that is fully temperature, drift and gain compensated. Amprobe brand (DVG-1000A).

**No. 4JZ29.** Shpg. wt. 3.0 lbs. Each .....$190.00

## ANALOG VACUUM GAUGE

Supco



- **Large 5" Analog Meter**
- **Range 5000 to 10 microns (5 to 0.01 Torr.)**
- **Vacuum sensor is compatible with oils, refrigerants, and cleaning solutions**
- **Sensor can endure pressure up to 500 psi**

**Analog vacuum gauge** features polycarbonate case with sensor storage compartment. Coiled sensor cord allows for up to 6 feet remote sensor connection. On/Low battery light allows for constant monitoring of battery condition and replacement. Uses 9-volt battery, not included. Includes meter, 120V adapter, sensor and sensor cable, and instructions. Supco model (VG62).

**No. 4JZ62.** Shpg. Wt. 32.0 lbs. Each .....$185.00

ASHCROFT®

No. 2C543

## 2½" REFRIGERATION MANIFOLD GAUGES

- **ABS case and threaded window**
- **Bronze tube**
- **For cooling systems or service manifolds**
- **Patented silicone dampened spring suspended movement**
- **1/8" NPT male lower connection**
- **Polycarbonate window, removable**
- **Front zero set**
- **R12, R22 and R502 refrigerant scales**
- **Brass socket with restriction screw to provide dampening during pressure surges**
- **Ashcroft brand**

### GAUGE SPECIFICATIONS AND ORDERING DATA

| PSI Range | Case Color | Ashcroft Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **0-500** | Red | 25-1007PH | **2C543** | $24.00 | **$9.90** | 0.3 |
| **30-0-120/250** | Blue | 25-1007PH | **2C541** | 23.00 | **9.49** | 0.3 |

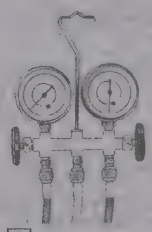
# MANIFOLD GAUGE SETS

## A IMPERIAL 2-WAY GAUGE

- 2-valve brass manifold
- Precision long-life gauges designed for resistance to shock, vibration and pulsation
- Color coded Polar Shield® hoses
- Swivel hanger

## B IMPERIAL 4-WAY GAUGES

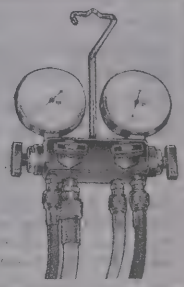
- 4-valve manifold features 3/8" vacuum port and oversized internal passages for faster evacuation
- Diaphragm-type valves close with fingertip pressure
- Swivel hanger and closure bracket
- Color-coded lines (3/8" vacuum, 1/4" low side, high side and charging lines), color coded Polar Shield® hoses
- UL Recognized



## C TIF 2-WAY GAUGES

- Piston-type valve network keeps O-rings from rotating or leaking and allows 100% shut-off
- Built-in Schrader valves enable easy hook up to vacuum gauges
- Hanging hook and holes for wall mounting
- Solid, extruded aluminum block with optical sight glass
- 1/4" flare fittings for Nos. 3A017 and 3T078. 1/2" ACME fittings for No. 6T369
- No. 3A017: 2-way dry gauge
- No. 3T078: 2-way recalibrateable glycerine-filled gauges
- No. 6T369: 2-way dry gauge for use with HFC134A for automotive applications
- Includes blue, red and yellow charging hose with anti-blowback valve to prevent venting of refrigerant

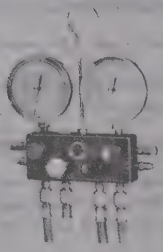
## D TIF 2-WAY DIGITAL & 4-WAY GAUGES



- Extruded aluminum manifold with optical sight glass for visual check of refrigerant
- Piston valve network keeps O-ring from rotating, or leaking and allows 100% shut-off
- Schrader valve allows for evacuating and charging without disconnecting to purge hoses
- Standard 1/4" flare fittings
- Color-coded valve handles and hoses: red—high side, blue—low side, yellow—charge, black—vacuum. No. 6T123, red, blue, and yellow only. All hoses include anti-blowback valve to prevent venting of refrigerant; not for use with R134A
- No. 3A019: glycerine-filled gauges to eliminate pointer bounce during compressor run

Leak detectors, charging meters, electronic sightglass, thermometers, and other test instruments are available. Using No. 6T375 with a Digital Multimeter is also effective in reading pressure and vacuum. See Index under "Test Instruments".

IMPERIAL



A No. 6X639

B Nos. 1A216, 3XL15

Replacement Parts Available 1-800-323-0620™

SA9440

D No. 3A019

tif

C Nos. 3A017, 3T078, 6T369

D Nos. 3A019, 6T123, 3T253

Nos. 3T253 and 6T123 have other gauge features:

- Digital readout provides ±2% accuracy, easy-to-read information, resistance to damage from overranging; 9V batteries supplied
- Low side displays vacuum or pressure
- Zero adjustment for resetting

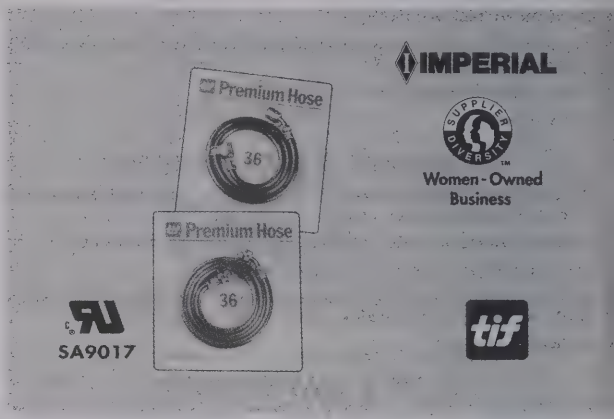
# HOSES & COUPLERS

## GAUGE SET HOSES

### A IMPERIAL POLARSHIELD™ CHARGING HOSES

- Can be used with all blends of refrigerants
- Meets all EPA requirements for strength, pressure and refrigerant permeation
- UL recognized. Meets UL 1963 and SAE 2196
- Packaged in clear plastic bags
- Adjustable brass core depressor to match valve core
- Color coded for easy identification
- 800 PSI working pressure, 4000 PSI burst pressure
- 1/4" female connectors
- 8-sided crimp for long life

### B IMPERIAL POLARSHIELD™ CHARGING HOSE SETS



- Sets of 3 charging hoses: blue, red, and yellow. Includes features of Imperial Polarshield™ Charging Hoses above, plus one end of each hose has permanently attached straight kwik-coupler shut-off connector
- Also includes 2 system adapters and 1 female coupler for use on equipment with no core valve-type fitting, such as storage tanks or vacuum pumps

### C IMPERIAL EVACUATION HOSE

- Replacement evacuation hose for Imperial manifold No. 1A216
- Large size hose (3/8") for faster evacuation
- 3/8" SAE swivel connection

### D TIF "BARRIER" CHARGING HOSES

- "Sure Seal" environmentally safe hose material
- Can be used with all blends of refrigerant
- UL recognized (SA9017); meet UL 1963 and SAE 2196 standards
- Color coded for easy identification (red, yellow, blue)
- 500 PSI working pressure, 2500 PSI burst pressure
- Flexible hose with durable eight-sided crimp ensures long life
- Anti-blowback valve prevents release of refrigerant into atmosphere
- 1/4" female connectors

### E TIF EVACUATION HOSES

- Black evacuation hoses available in 36", 60", and 72" lengths
- Used for evacuation systems only, not rated for pressure
- 1/4" female fitting

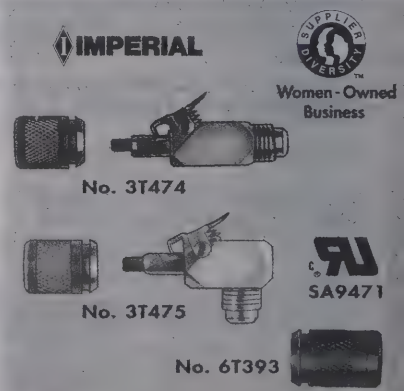
## KWIK COUPLERS



Used on refrigeration air conditioning service manifold high and low side hoses when connecting to core valve-type service fittings. UL Recognized.

- Instant connection: push to connect, pull to disconnect
- Seals perfectly without skilled manipulation
- Eliminates hazardous discharge of refrigerant when disconnecting hoses
- Simplifies charging critical amount of refrigerant in small systems
- Shutoff of hose ends permits discharging high side hose through manifold into low side

**No. 3T474. Straight Coupler (45° Flare).** 1/4" male x 1/4" female. Imperial Eastman brand (16-C). Shpg. wt. 0.1 lbs. List.....$17.81. Each.....**$14.56**

**No 3T475. 90° Elbow Coupler (45° Flare).** 1/4" male x 1/4" female. Imperial Eastman brand (17-C). Shpg. wt. 0.1 lbs. List.....$22.64 Each.....**$18.18**

**No 6T393. Female Coupler** for use with kwik-coupler at left on equipment with no core valve-type fitting, such as storage tanks or vacuum pumps. Identified by longer size and identification groove. Sold in bags of 10. Imperial Eastman brand (05951125). Shpg. wt. 0.5 lbs. List.....$51.25. Each bag.....**$41.45**

# LIQUID LINE SERVICE DRYERS AND MOISTURE INDICATORS

- Spun copper construction
- For OEM replacement and general field service work
- Solder connecting tubes can be cut, swaged, flared, pinched, or bent
- Grooved ends permit easy break off to activate dryer
- For use with R-12, R-22, R-500, R-502, R-402A, R-402B, R134A, and R-401A, R-404A, and R-507
- 100% molecular sieve desiccant beads
- Dryers do not remove Dytel from system

Parker

**90-DAY PARKER LIMITED WARRANTY**

Text of warranty available on request, see "Manufacturers' Warranties" on page opposite inside back cover.

[A] General Purpose Dryer, No. 6X525

[B] Heavy-Duty Dryer, No. 6X526

[C] Charging Valve Dryers, Nos. 6X524, 6X590

[D] Economy Dryers, No. 6X527, 6X528

[E] Economy Heavy-Duty Dryer, No. 6X591

c UL SA8570

[A] **General Purpose.** For field service work. Install on hermetic and open type units. Up to 1/3 HP with R-12, 1/2 HP with R-22. UL Recognized (SA8570). Rated per ARI Standard 720.

[B] **Heavy-Duty Dryer.** High water capacity dryer eliminates "freeze-up" hazards caused by foreign materials. Dual screen construction, single direction flow. UL Recognized (SA8570).

[C] **Charging Valve Dryers.** High capacity dryers with built-in Schraeder-type service valve for evacuating and charging sys tem. Single direction flow. Valve tube can be bent. No. 6X524 is used for residential type refrigerators and freezers. No. 6X590 is for window air conditioners. UL Recognized (SA8570).

[D] and [E] **Economy Dryers.** Used with home refrigerators, freezers, small commercial units and air conditioners. Nos. 6X528 and 6X591 are nondirectional. No. 6X527 is single direction flow. UL Recognized (SA8570).

# SIGHT GLASSES AND MOISTURE INDICATORS

UL SA4744

Parker No. 6X721

- For refrigeration and A/C systems
- Color indicator responds to moisture in R-12, R-22, R-134A, and R-502
- Solid copper extended sweat fittings permit installation without disassembly
- UL Listed for 500 PSI ultimate strength
- CSA Certified (LR46423)
- Large, easy to read viewing area
- 2-piece construction with Parker O-ring eliminates leaks
- Solid brass and copper design

Compact units install in system's liquid line, give high visibility of liquid refrigerant, and indicate moisture in system.

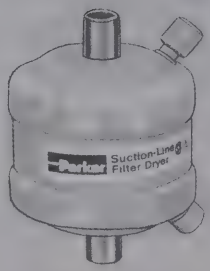
# SUCTION LINE FILTER/DRYERS



SAE Flare Connections

Parker

**90-DAY PARKER LIMITED WARRANTY**

Text of warranty available on request. See "Manufacturers Warranties" on page opposite inside back cover.

Solid Copper Solder Connections

- Short lay-in length for easy installation in cramped areas
- Dual access valve at inlet and outlet for quick and easy pressure drop readings
- UL Listed for 2500 PSIG ultimate strength
- CSA Certified
- Low pressure drop
- Large effective filter area provides maximum filtration
- Solid copper on sweat fitting models
- For use with R-12, R-22, R-500, R-502, R-402B, R-402A, R-134A, HCFC-123, R-401A, R-404A, and R-507

Parker suction line filter/dryers are designed for installation in air conditioning or refrigeration systems when replacing a burned-out compressor. They protect the new compressor from harmful contaminants which may not have been removed during system cleaning.

# HEAT PUMP FILTER/DRYERS, REPLACEABLE FILTER/DRYER SHELLS AND CORES

**90-DAY PARKER LIMITED WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## HEAT PUMP FILTER/DRYERS

- **Desiccant core provides protection from moisture, acids and solid contaminants**
- **Internal check valves provide precise bi-directional control**
- **UL Listed (SA3441); CSA Certified (LR46423)**
- **Installs in any position**
- **Corrosion resistant paint gives 500 hour salt spray protection**

Bi-flow liquid line filter dryers allow bi-directional flow on heat pump or reverse cycle applications. Filter area for Nos. 3A646-3A650 is 10.4 sq.-in.; Nos. 3A651-3A655, 14.4 sq.-in.

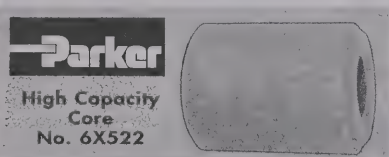
## REPLACEMENT FILTER/DRYER SHELLS



- **Use one or two dryer cores**
- **1/4" SAE pressure tap**
- **Full flow copper plated fittings**
- **Corrosion-resistant, furnace-brazed steel shell**
- **Working pressure 450 PSI**
- **Paint withstands 500 hr. salt spray**
- **Covers a wide range of applications from 7½ to 40 tons**
- **Lay-in dimensions interchangeable with other manufacturers' models**
- **Cores may be loaded individually for ease of installation in tight locations**
- **UL Listed (SA3441); CSA Certified (LR46423)**

For liquid and suction line applications with refrigerants R-12, R-22, R-500 and R-502. Can be used on either suction line for general system clean-up, or after motor burnout, or on liquid line. Nos. 4C946 and 4C947 have 66 sq.-in. filter area; Nos. 4C948 and 4C949 have 132 sq.-in. filter area.

## REPLACEABLE FILTER/DRYER CORES

- **Low pressure drop with maximum moisture and acid retention**
- **Hermetically sealed cans prevent exposure to dirt and moisture**
- **Complete with gaskets to interchange with other manufacturers' models**
- **1¾" ID, 3¾" OD, 5½" length**

For liquid and suction line filter dryers using replaceable desiccant cores. 48 cubic inch cores can be used in most 4¾" OD flanged shells.

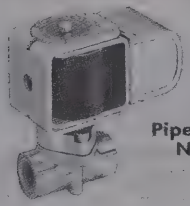
**Standard Core** for general clean-up; removes varnishes, sludge, moisture, and acid.

**No. 6X717.** Shpg. wt. 1.3 lbs. List.....$30.34.
Each.....**$12.51**

**High Capacity Core** has higher moisture and acid capacity for systems with excessive moisture due to leaks or ruptures.

**No. 6X522.** Shpg. wt. 1.9 lbs. List.....$38.99.
Each.....**$16.11**

**Charcoal Burnout Core** is formulated with charcoal to remove wax on low temperature R-22 and R-502 systems. Also removes acids, water, solids, and sludge.



**No. 4E940.** Shpg. wt. 2.1 lbs. List.....$46.52.
Each.....**$18.97**

# REFRIGERATION SOLENOID VALVES AND OPERATING COILS

Pipe Connection
No. 4X564

Flare Connection
No. 4X566

Sweat Connection
No. 4X570

- **Forged two-piece brass body**
- **Extended-end copper sweat connections for easy installation**
- **SAE flare, NPT pipe and solder connections**
- **Quiet operating stainless steel plunger and spring for corrosion-free operation in multiple positions**
- **Fully ported for low pressure drop**
- **Teflon diaphragm for lower pressure drop, efficiency, reliability, and longevity**
- **UL Listed; CSA Certified (with operating coil)**

**Pilot operated,** two-way, normally closed solenoid valves are suitable for use with refrigerants R-12, R-22, and R-502 in liquid, suction and discharge lines, on small to medium tonnage systems.

**Suitable for use with air,** water, light oils, Nos. 1 & 2 fuel oils, and other nontoxic, noncorrosive fluids up to 500 PSI. Safe working pressure. Valve body must be combined with operating coil sold separately. Parker/Jackes Evans brand.

# THERMOSTATIC EXPANSION VALVES

## PARKER THERMOSTATIC EXPANSION VALVES

**Parker Thermostatic Expansion Valves** can be applied to a wider range of refrigeration, air conditioning, and heat pump systems. Accurate control is maintained over a wide variation in evaporator load, thereby minimizing hunting flood-back and coil starving problems. Usually the need for special ambient or head pressure controls is eliminated.

**All models** have externally adjustable superheat for commercial applications, such as reach-in coolers, display cases, and other small refrigeration systems, air conditioning, and heat pump applications.

**Nos. 5A444, 5A445 and 6X241 thru 6X244 (S series)** are suited for air conditioning, heat pump applications, and refrigeration systems where solder-type connections are preferred. Parker brand.

(*) ARI standard 750-70; at 10°F liquid subcooling (subcooling is number of temperature degrees below condensing temperature for a given pressure). 1 ton = 12,000 BtuH cooling.
(†) These R22 valves have maximum operating pressure of 100 PSI for diaphragm and capillary protection if valve is located in furnace warm air plenum.
(‡) Bleed port valve percent of capacity shown. (B15 = 15% of capacity bleed for off cycle unloading.) (#) Reducing type fitting on all SAE 3/8" inlet fittings. 3/8 x 1/4" reducing flare nut may be used.
(**) SE valves 1/4" ODF; CE valves 1/4" SAE flare. (††) These are refrigeration application expansion valves with maximum operating pressure (MOP) charges of 35 MOP and 65 MOP.
Anti-hunt ballast bulb x charge is also provided with these and all R-22 100 MOP valves.

## COMPACT THERMOSTATIC EXPANSION VALVES

- **Sensing bulb mounting hardware**
- **Wide range type**
- **1/4-2 tons R-12 capacity**
- **1½-3 tons R-22 capacity**
- **Balanced port design provides control over wide variations in load and/or condensing pressure**
- **Multi-range capacity reduces valve inventory**
- **2½" long valves are compact and used where conventional size valves will not fit**

**They maintain accurate control** over a wide variation in evaporator loads. Special ambient and head pressure controls are eliminated.

**Designed for small tonnage** refrigeration systems, such as ice machines, cold drink dispensers, slush machines, and reach-in coolers. Parker brand.

**PARKER 1-YEAR LIMITED WARRANTY**

# CONSTANT PRESSURE EXPANSION VALVES

Parker No. 4X859

**1-YEAR PARKER-HANNIFIN LIMITED WARRANTY**

Text of warranty available on request. See "Manufacturers' warranties" on page opposite inside back cover.

- Can be used for refrigerants: R-12, R-22, and R-502 (not ammonia)
- Maintain constant evaporator pressure under all load conditions
- Permits use of low starting torque motors
- Automatically protect against motor overloads during system start-up
- Simple and reliable

Valves regulate liquid refrigerant flow entering evaporator at a constant outlet pressure, matching compressor capacity. Adjustment range: 5" Hg, vacuum to 90 PSIG

Use with ice cream makers, water coolers, dehumidifiers, and cold drink dispensers. Can also be used as low load protection device in hot gas bypass systems. 2¾H x 4⅛W x 4½"L. Parker brand.

# COMMERCIAL TEMPERATURE CONTROLS

RANCO

SA512

LR32079

No. 1A002

- Sturdy, NEMA 1 enclosure with non-conductive cover retained by front-access screw
- Range and differential adjustments have visible, direct reading scales and are external for easy setting
- Variety of adjustment ranges and sensing elements for maximum performance
- SPST automatic reset, snap-action switches close on rise of temperature
- Laser-welded bellows for extended life
- UL Listed (SA512); CSA Certified (LR32079)

**Ranco commercial temperature controls** are designed for operating refrigeration systems. All use a refrigerant-charged sensing element to operate an SPST close-on-rise switch. The automatic reset, snap-action switch is suitable for line or pilot duty cycling of motors, compressors or solenoid valves.

**All controls have** visible, calibrated scales which indicate range and differential in both Fahrenheit and Celsius. Compact, zinc plated, pressed steel case has a non-corrosive cover which is retained by a captive, accessible screw. Removal of the cover exposes the screw-type wiring terminals

**External range screw** changes the cut-out and cut-in settings; differential adjustment screw changes the difference between the cut-out and cut-in. Controls come with mounting bracket, mounting screws, terminal screws, adjustment knob and installation instructions. Dimensions less sensing element: 2¾H x 3½W x 2"D.

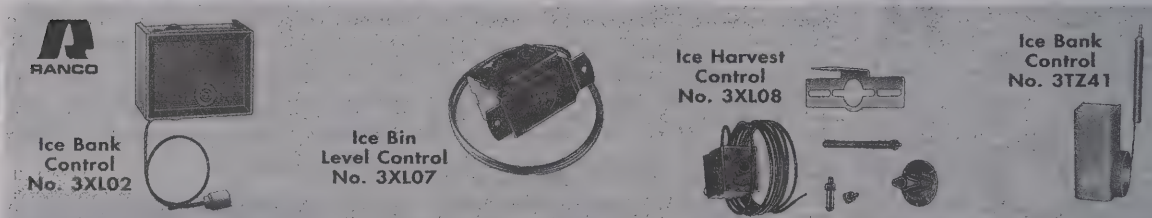
## WATER-REGULATING VALVES



- **Pressure actuated for precise control of head pressure**
- **Corrosion resistant material for longer valve life**
- **Take-apart construction allows accessibility to interior of valve**
- **Accessible range spring for easy manual flashing**
- **Pressure-balanced design maintains consistent setpoint**
- **No close fitting or sliding parts in water passages**

Valves control condenser temperature on any water-cooled refrigeration unit. May be used with standard non-corrosive refrigerants. Units can be repaired without removal from piping. Buna-N valve disc, nylon reinforced Buna-N diaphragm. 150 psig max. Made in USA.

## CONTROL ACCESSORIES

- **Controls compressor to maintain an ice bank of desired thickness**
- **Excellent for use on refrigerated cabinets where an ice bank is built as means of storing refrigeration**

**Ice Bank Control** is suitable for soft drink dispensers, drink vending machines, and ice builders for thermal storage.

Ice Bin Level Control is a direct replacement control for ice machine applications. Provides narrow differential for accurate control of bin level. Ranco brand.

Ice Harvest Control is an adaptable replacement for ice machine applications. Parts and instructions included for easy installation. Ranco brand.

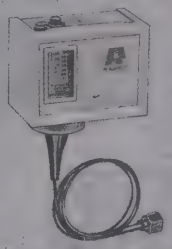
# SINGLE PRESSURE CONTROLS

**Low pressure controls** are designed to protect the compressor against loss of regrigerant in commercial regrigeration and air conditioning systems. They can also be used to cycle the compressor in commercial refrigeration applications.



**High pressure controls** are designed to protect the compressor from excessive system pressure which could be caused by condenser fan failure. Open on low units can also be used to cycle the condenser fan in low ambient applications.

- **NEMA 1 enclosures with nonconductive cover**
- **Universal mounting and compact design**
- **Suitable for use with R-12, R-22, R-134A, and R-502 refrigerants**

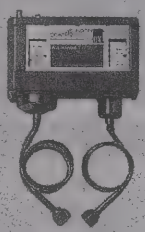
# DUAL PRESSURE AND LUBE OIL PROTECTION CONTROLS

## DUAL PRESSURE CONTROLS

No. 2E986

**Dual function pressure controls** are designed for commercial refrigeration and air conditioning applications. Combine high pressure compressor protection with low pressure, cycling, or safety functions.



**RANCO CONTROLS FEATURE:**

- NEMA 1 enclosure with nonconductive cover
- SPST switch configuration
- For use with R-12, R-22, R-134A, and R-502
- Universal mounting and compact design

- 36" Capillary with flare nut

## RANCO LUBE OIL PROTECTION CONTROLS

**Oil protection controls** guard pressure-lubricated refrigeration compressors against major damage due to loss of oil pressure. If pressure is lost, the built-in time delay switch starts timing. If oil pressure doesn't return within the set period, the control unit is opened, stopping the compressor.

## BALL TYPE SHUTOFF VALVES

**Bi-directional full** flow ball valves in a compact design, allowing minimum pressure drop. With the valve in the open position, the extended ends allow silver brazing without disturbing the tested valve.

**Chromium plated ball** resists scoring and insures smooth valve action. Reinforced Teflon® seats give proven resistance to wear and corrosive elements. Only a quarter turn is required for full "On" or "Off." Teflon® seals allow valve to be used with all refrigerants.

**Maximum operating pressure** is 500 PSI. UL Listed.

(*) Coefficient of volume: the amount of water in GPM at standard conditions (60°F specific gravity = 1) which will pass through the valve with one PSI pressure drop with valve in full open position. (†) Figures expressed in tons of refrigeration. Capacity based on 2 PSI pressure drop. 1 ton = 12,000 BtuH. 1 ton = 4.07 lb. per min. flow R-12 at 40° evaporator. 1 ton = 3.02 lb. per min. flow R-22 at 40° evaporator.

## LINE PIERCING & CHARGING VALVES

- **2 valves handle 5 line diameters**
- **Install on high or low side of system, on uneven and bent tubing**
- **Corrosion resistant finish**
- **1/4" SAE outlet**

Use on refrigeration and air conditioning systems which do not have factory furnished access valves. Only two inches of clearance are required to mount and operate this small (approx. 1⅛, x 1¼") die cast valve. Clamps to refrigerant line with three hex head screws (included). Three seals prevent refrigerant leaks; a high compression gasket between the valve and line; an O-ring on the valve shaft; and a rubber sealed cap for the SAE outlet. Piercing needle is precision engineered for concentricity and hardness to ensure perfect seating every time. Instructions, hex wrench and inserts for tubing diameters included. Sealed Unit Parts. Co.

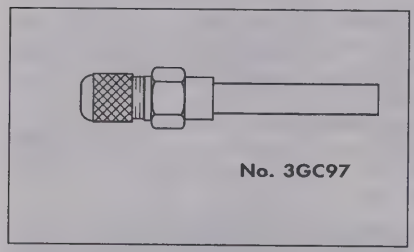
# REFRIGERATION FITTINGS

## REFRIGERATION ACCESS VALVES

**Provide low cost access ports** for refrigeration service. May be installed in any position on either high or low side for quick testing, pressure checking, purging or charging.



**Valves have** 1/4" SAE male flare access ports and are furnished with finger-tight, quick-seal caps. Caps and valve bodies are brass construction. Special corrosion resistant, stainless steel and brass refrigerant valve cores are loosely assembled in the valves at the factory. This loose assembly allows easy removal during installation and assures that solder heat does not damage the seals.

**Valve seals are compatible** with all refrigerants. Copper extended tubes on Nos. 3X727 and 3X728 valves are about two inches long and may be bent, cut, flared or swaged to meet application requirements. No. 3X729 valve is three-way solder type that can be used with 3/16" O.D. tube or 1/4" and 3/8" solder fittings. Aurora brand.

## POTENTIAL RELAYS

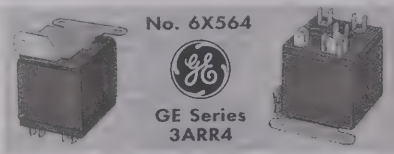
- **General Electric series 3ARR3**
- **Rated 35 amps, on 60 Hz power**

Single-pole, normally closed relays for starting single phase capacitor-type motors in air conditioning and refrigeration hermetic compressors, waste dispensers, and submersible pumps. All units have break-off-tab type mounting brackets for most replacement applications. Installer simply breaks off tabs (not required) at score marks, using pliers.

May be installed in any position. Large silver cadmium oxide contacts. Terminals are quick connect push-on type. Adapters available to convert push-on terminals to screw-type; see No. 6X578 below.

Relay coil senses the changing voltage in the start winding and disconnects the start capacitor at the proper voltage.



UL Recognized (SA639). 1¾H x 2W x 1¾"D, not including terminals or brackets.

No. 6X549

## GE 24, 120 & 240V MAGNETIC LINE RELAYS

No. 6X564

GE Series 3ARR4

**Single pole, double throw (SPDT),** snap acting relays widely used for remote control of air conditioning and heating systems. Can also be used to control fans, blowers, motors up to 1½ HP, tools and other electrical devices within ratings. All units have break-off tab mounting brackets for most replacement applications. Installer breaks off tabs (not required) at score marks, using pliers. May be installed in any position. Rugged construction for use under adverse conditions. Larger, silver-cadmium oxide contacts. Terminals are quick-connect push-on type. Adapters available to convert 6X578 listed below. UL Recognized (E27729). 1¾H x 2W x 1¾"D, not including terminals or brackets.

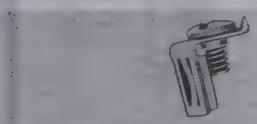
## AIR CONDITIONING RELAYS

**Designed for long operating life** in air conditioning, heating/ventilating control systems, and other applications involving motor starting, heating element operation, and power supply control.



**Relays feature** bounce-free, silver cadmium oxide contacts for minimum wear and maximum reliability. Universal mounting bracket. Mounting base and armature have zinc-chromate finish for corrosion protection. Contact arm is alloy coated and all terminals are tin plated.

**All models have screw-type line** and load terminals, except SPST models which have combination screw and push-on terminals, and a permanent jumper connecting the other side of line to the load. Coil terminals are push-on type; adapters to convert to screw-type are listed below.

**UL Recognized** (E27729). Nos. 6X566, 6X567 and 6X568 are CSA Certified. 2½H x $2^{13}/_{32}$"W. SPST are 2¼"D; DPST are $2^{19}/_{64}$"D.

**Relay selection:** Nos. 6X566, 6X567 and 6X568 replace all General Electric 3ARR8 and 3ARR9 series contactors. Nos. 6X572, 6X573 and 6X574 are designed for starting compressors or other components of central air conditioning systems where breaking of only one side of the line is required.

## 1/4" SCREW TERMINAL

Converts 1/4" push-on tab terminals of all General Electric relays and contactors listed above to screw-type terminals. Includes 6-32 screw. 23/64" long. Sold in boxes of 100.

**No. 6X578.** Shpg. wt. 0.4 lbs. List $19.47. Each **$15.59;** Lots 5 ..... **$13.22**

# REFRIGERATION & ROOM A/C CONTROLS

## BEVERAGE/REACH-IN MEDIUM TEMPERATURE CONTROLS

No. 3XL05

**Constant Cut-In feature** provides an Off-Cycle defrost function. Each time the contr cycles off, the control contacts will remain "open" until the evaporator is cleared of an frost that may have accumulated from the previous "On" Cycle. Constant Cut-In settin is between 35 and 41°F. Ranco brand.

### CONTROL SPECIFICATIONS & ORDERING DATA

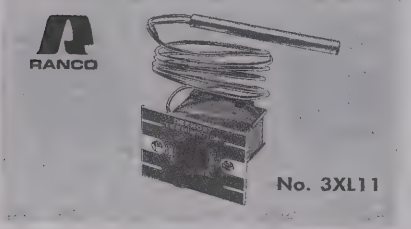
## DIRECT REPLACEMENT WATER COOLER CONTROLS

- **Small compact design**
- **Computer calibrated**
- **Laser-welded bellows for reliability**
- **Patented switch for high performance**

Replaces controls from the following manufacturer's: Ebco, Elkay, Sunroc, Halsey-Taylor, Kelvinator, and General Electric. Ranco brand.



No. 3XL12

### CONTROL SPECIFICATIONS & ORDERING DATA

## DEFROST TERMINATION/FAN DELAY CONTROL

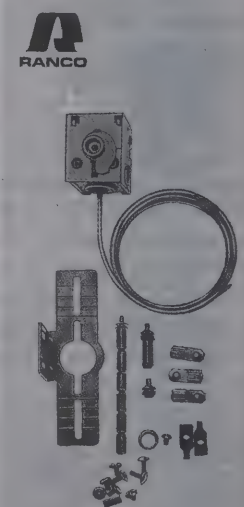
No. 3XL11

- **Prevent warm, moist air from being circulated into the refrigerated space**
- **Remote bulb sensing**
- **Factory-fixed low event for fan delay**

Control terminates defrost and delays the evaporator fan operation on electric heat hot gas and reverse cycle commercia refrigeration systems. Ranco brand.

### CONTROL SPECIFICATIONS & ORDERING DATA

| Switch Action | Fan "On" Temp. (°F) | Defrost Termination (°F) | Sensing Element | Ranco Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **SPDT** | 20 Fixed | 40 - 75 Adjustable | 60" Capillary with 3/8 x 4" cross ambient bulb | F25-107 | **3XL11** | $89.62 | **$47.20** | 0.6 |



## CONSTANT DIFFERENTIAL AND CYCLING CONTROLS

### CONSTANT DIFFERENTIAL REFRIGERATOR CONTROLS

Compact controls are adaptable to nearly all commercial refrigerators and freezers. A wide selection of temperature ranges, differential and capillary lengths are available. Break-off shaft and mounting bracket are included for fast, easy installation. All controls have Off position except No. 4E048.

### CYCLING CONTROLS FOR ROOM AIR CONDITIONERS

Adaptable controls may be used to replace OEM controls which govern the On/Off compressor function. Includes break-off shaft, dial knob, and mounting bracket for fast, easy installation.

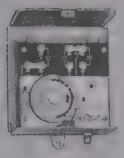
# PARAGON DEFROST CONTROLS FOR COMMERCIAL APPLICATIONS

PARAGON

A No. 5X450

B No. 5X452

UL E10597
Nos. 5X452 & 5X453



C No. 5X454

UL SA1650
CSA LR8376

D No. 5X458

E No. 5X460

- **Designed to defrost commercial frozen food cabinets, dairy, delicatessen, and vegetable display cases and walk-in coolers**
- **Methods of defrost include hot gas, electric heat, fan delay, off cycle or compressor shutdown, and water spray**

### A TIMERS FOR WATER SPRAY DEFROST CONTROL WITH PUMP DOWN DRAIN OR FAN DELAY CYCLES

**Defrost initiation:** Adjustable from 1-8 cycles per day; minimum 3 hours between successive cycles

**Delay or Pump Down Cycle:** Adjustable from 0-30 minutes; 3 minute graduation; for stopping fans, reducing refigerant pressure, or hot gas pump down cycle

**Defrost Cycle:** 3-45 minutes; 3 minute graduations

**Drain or Fan Delay Cycle:** Adjustable from 3-15 minutes; 3 minute graduations

**Enclosure:** Heavy steel gasketed case with hasp for padlocking

### B GENERAL PURPOSE TIMERS FOR DAILY PROGRAMMING OF DEFROST CYCLES

- **Manual override temporarily reverses switch operation without disturbing preset schedule**

**Defrost Cycles:** Up to 7 cycles per day, minumum 90 minutes each

**Case:** Heavy steel enclosure

### C TIME INITIATED AND TIME TERMINATED DEFROST CONTROLS

- **Choice of four contact arrangements for electric heat, hot gas, or compressor shutdown defrost**

**Frequency of Defrost Initiation:** Adjustable from 1 to 6 cycles per day; minimum of 4 hours between successive operations. Dial overlay available to change time of defrost from even to odd numbered hours

**Duration of Defrost Cycle:** Adjustable from 4 to 110 minutes in 2 minute increments

**Accuracy of Defrost Duration:** ±2 minutes

**Case:** Heavy steel enclosure with hasp for padlocking

### D TIME INITIATED, REMOTE TEMPERATURE OR PRESSURE TERMINATED DEFROST CONTROLS

- **Works with external temperature or pressure sensor**
- **Back-up mechanical defrost termination protects against sensor malfunction**
- **Choice of three contact arrangements for electric heat, compressor shutdown, or hot gas defrost**

**Frequency of Defrost:** 1 to 6 cycles per day; minumum of 4 hours between successive defrost cycles. Dial overlay available to change time of defrost from even to odd numbered hours

**Adjustable Back-Up Defrost Termination:** Adjustable from 4-110 minutes in 2 minute increments

**Case:** Heavy steel enclosure with hasp for padlocking

### E TIME INITIATED, PRESSURE TERMINATED DEFROST CONTROLS

- **Direct readout dial for cut-in pressure**
- **Wide range of cut-in pressure adjustability**
- **Back-up mechanical defrost termination protects against sensor failure**
- **Modular pressure bellows**
- **Three contact arrangements for hot gas, electric heat, or compressor shutdown defrost**

**Frequency of Defrost:** 1 to 6 cycles per day; minumum of 4 hours between successive defrost cycles. Dial overlay available to change time of defrost from even to odd numbered hours

**Back-Up Defrost Termination:** Adjustable from 4-110 minutes in 2 minute increments

**Pressure Settings:** This model has an adjustable cut-in pressure setting dial calibrated from 36 to 100 pounds for R12, R22, and R502

**Case:** Heavy steel enclosure

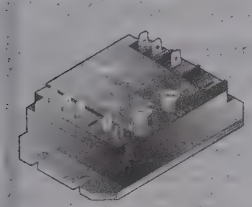
No. 4E233

**...r HVAC and refrigeration applications;** helps ...revent short cycling of compressors. ...orks with anticipator-type thermostats. ...xtended adjustable time range; solid ...ate reliability. 0.25" quick-connect termi...als; single hole mounting. Epoxy-encap...ulated circuitry. Fixed or knob-adjustable ...me delays from 0.1–600 seconds. Meets ...EE587 Categories A & B.

## TIME DELAY RELAYS



**No. 4E233 Delay On Make/Antishort Cycle Timer.** Use for compressor protection and staging. Delay period starts at beginning of cycle. Universal input voltage operation of 19-288 VAC. Jumper wire for 120/240 VAC operation. 2-wire hookup. Extended time range adjustable to 600 seconds.

**No. 4E234 Delay On Break/Antishort Cycle Timer.** Similar to No. 4E233; however, delay period starts at end of cycle. Used for compressor protection only. Minimum hold-in current: 40mA.

**No. 4E235 Delay On Break/Lockout Timer with Brownout.** Lockout delay prevents rapid short-cycling; brownout protection prevents compressor start-up due to low line voltage/power failure. Input voltage operation of 18-30 VAC. Anti-chatter circuitry.

**No. 4E890 Adjustable Post-Purge Fan Delay Timer.** Provides an off-delay to allow the circulating fan to continue running in heat pump, air conditioning and forced air systems. Increases efficiency by purging ducts of residual air at end of heating/cooling cycle. Off delay adjusts from 12 to 390 seconds. 18-30 VAC.

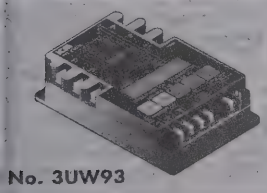
No. 3UW94



## SINGLE-PHASE LINE MONITOR

**Provides low cost single-phase motor protection.** Built-in anti-short cycle protection. Detects high/low voltage conditions. Helps prevent rapid system recycling. LED indicator—green for normal conditions. Heavy-duty SPDT, isolated relay output. Rugged and compact with integral heatsink. Interrogation delay prevents nuisance trips. **Input:** 95-270VAC. Control: 18-240VAC. **Output:** relay SPDT, normally open/normally closed, 8 amps. **Adjustable time delay range:** 6-300 seconds. ICM brand (ICM490).

**No. 3UW94.** Shpg. wt. 0.6 lbs.
List $103.00. Each ..... $90.35

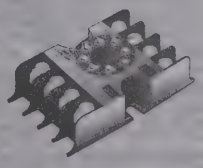
No. 3UW93

## 3-PHASE LINE VOLTAGE MONITORS

**No. 3UW93 3-Phase Line Voltage Monitor with LCD Display.** Programmable 25-fault memory storage. Independant high/low voltage settings for dual voltage compressor applications. Monitors and identifies front and back side faults. High temperature LCD to 167°F. Simultaneous voltage display, no scrolling. Programmable line voltage, manual or automatic reset, pushbutton set-up. Independently monitors voltage unbalance, high/low voltage, phase loss, reversal, incorrect sequencing, and rapid short cycling. UL Recognized Component and CSA Certified. ICM brand.



**No. 3UW89 3-Phase Line Voltage Monitor.** Similar to No. 3UW93 without LCD display. Has bright LED indicators. Knob adjustable features.

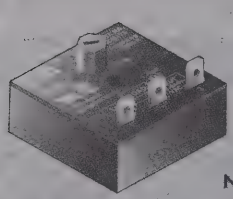
## PLUG-IN 3-PHASE MONITORS

**Plug-In Monitors provide 3-phase motor protection.** Monitor front side of system for voltage unbalance, high/low voltage, phase loss, incorrect sequence, reversal. Quick 100 millisecond response time. LED indicator glows green for normal conditions. Interrogation delay prevents nuisance trips.



**No. 3UW84 Relay Socket.** For use with plug-in 3-phase monitors Nos. 3UW90, 3UW91, and 3UW92. 8-pin octal plug-in base. 8-pin male connectors as terminations. Locating key assures proper orientation.

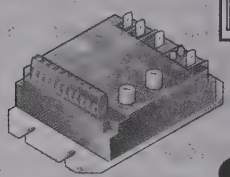
# BYPASS TIMERS, HEAD PRESSURE CONTROLS, AND START ASSIST KITS

## BYPASS TIMERS

No. 3UW85

**Delay On Interval Timer or Normally Closed Delay on Make Timer.** Designed to bypass a low pressure switch during compressor heat pump startup or oil pressure switch on startup. Ideal for low ambient startups. An integral component for "winter start" kits. Helps reduce nuisance lockouts. Universal input voltage (18-240VAC, 1 amp, 10 amp inrush. Knob adjustable delays. Epoxy encapsulated circuitry. Time delay adjusts from 10-1,000 seconds. ICM brand (ICM175).



**No. 3UW85.** Shpg. wt. 0.2 lbs. List .....$19.83.
Each .....**$17.35**

## HEAD PRESSURE CONTROLS

No. 4MG74

New

No. 4MG75

Triac-type head pressure controls vary the amount through the condensor to help prevent evaporator freezeup, low pressure cutoff and liquid slugging in low ambient conditions. All models feature low temperature cutoff, high temperature bypass, heat pump override and adjustable hard start timing and motor cutout speed. Green and yellow lights indicate full or lodulated motor voltage at a glance. 4MG74 requires separate 24 VAC source; 4MG75 and 4MG76 have built-in 24 VAC transformer to simplify wiring and reduce inistallation time. Controls use up to three 10K ohm thermistor sensors for use with multiple refrigerant circuits, responding to sensor with highest temperature. Operating ambient range -40 to +75° C. ICM brand.

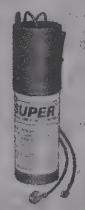
## RELAY AND START CAPACITORS

Supco

E146162

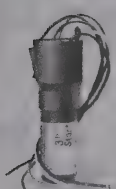


New

No. 4E239

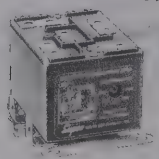
No. 4E240

No. 4E241



**For use on residential and commercial air conditioning units,** heat pumps, and room air conditioners. Not for use on refrigeration. Ideal for hard starting compressors or low voltage conditions. Install in seconds by connecting two wires to the existing run capacitor without altering the original cir cuit. Provide additional starting torque to all single phase 115 thru 288 volt units.

**Nos. 4E239 and 4E240** for use on units from 4000 to 120,000 Btu, 1/2 thru 10 HP.



**No. 4E241** for use on units from 15,000 to 120,000 Btu, 1½ thru 10 HP. Supco brand.

## START ASSIST KIT

No. 4E238

No. 4MG77

No. 4MG78

**For use on domestic and commercial refrigerators** and freezers. This all-in-one unit replaces the relay, overload and start capacitor on all capillary systems from 1/4 to 1/3 HP compressors. 115V. Provides additional boost to compressor.

**Relay is completely prewired** and installs by pushing on three female pin terminals and connecting two remaining wires to power. Supco brand (RCO-410).

**No. 4E238.** Shpg. wt. 0.5 lbs. List.....$24.37.
Each .....**$19.78**

## SUPER BOOST STARTER

- **Replaces 3-wire potential relay and capacitor**
- **For severe low voltage or hard starting compressors**
- **Recycles instantly**
- **Built-in start winding safety feature**

Combines high reliability, instant restart capability and highest starting torque available. Installation is simple; just connect the two leads across the run capacitor. For room A/C units, residential and commercial PSC A/C units, heat pumps and CSIR units. Has 4,000-60,000 BTU, 1/2 to 5 HP, 120-288 VAC. Supco brand (SPP8).

***New* No. 4MG78.** Shpg. wt. 1.0 lbs. List..$53.42.
Each .....**$32.00**

# RESIDENTIAL FURNACE HUMIDIFIERS

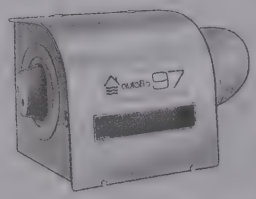
- **24V, 60 Hz, 3-Watt motor-driven, rotating media wheel Drum Bypass-type**
- **Evaporative capacities rated per ARI standard 610-82**
- **For gas, oil and electric furnaces**
- **Treated with Sylgard®, a special formation by Dow Corning, which combats fungus or bacteria growth and helps keep air cleaner**
- **Humidistat required; see page 3357**
- **115 to 24V transformer included**

**No. 2E384, 19.3-Gallon/Day.** Exclusive Convair-Cone provides maximum air flow through evaporator pad. Stainless steel snap-off cover with see-through window. Case constructed of corrosion-resistant ABS plastic. Water reservoir is high impact plastic for long-life and easy cleaning. ABS valve float. Supplied with 2 feet of flexible bypass duct, air bypass shut-off damper, collar assembly and installation hardware.

**No. 4E232, 17.0-Gallon/Day.** Media cone allows maximum air flow through and around evaporative media. Self-reversing motor, viewing port, and adjustable float control. Case is of corrosion-resistant ABS plastic construction. Supplied with installation hardware.

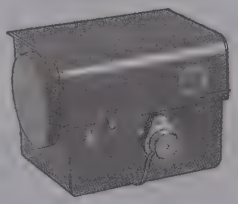
**No. 2E390, 15.0-Gallon/Day.** High capacity humidifier for hard water areas. Water runs through evaporator pad into drain tube, flushing away mineral deposits for longer pad life. Can be installed on warm or cold air plenum of upflow, downflow or horizontal furnace. Right or left bypass for 6" diameter duct.

**Operates on air pressure differential;** no fan, pump or float, just simple 24V "water saver" solenoid valve. High impact plastic case. Removable stainless steel access panel.



**Comes with 120 to 24Vac transformer,** 10 ft. polyethylene water line, saddle valve, 24 ft. length of 6" diameter flexible aluminum bypass duct, mounting hardware and instructions. 1/2" OD drain outlet.

**No. 2E463, 14.0-Gallon/Day.** Media wheel is urethane foam construction. Stainless steel case is corrosion resistant. Water float valve is polyethylene. Water reservoir is constructed of molded high temperature plastic, removable for cleaning. Media wheel is easily accessible through large removable panel for cleaning or replacement. Supplied with installation hardware.



**No. 4E061, 10.0-Gallon/Day.** Fits vertical, horizontal and counterflow furnaces. Self-reversing motor, easily removable urethane foam pad and viewing port. Case is of corrosion-resistant ABS plastic construction. Supplied with installation hardware.

# RESIDENTIAL FURNACE HUMIDIFIERS

autoFlo

Nos. 2E668 and 2E531

No. 5E294

Replacement Parts Available
1-800-323-0620

## ELECTRONIC STEAM-GENERATING TYPE

**Nos. 2E668 and 2E531.** Automatically provide humidity whether furnace is operating or not. Used in homes with electric, heat pump, oil or gas heating systems. No moving parts, no float. UL Listed.

**Install in warm or cold air ducts of plenums** and have control transformer, stainless steel reservoir indicator light and automatic water level control with low water shutoff. For residential use only.

**Operate without disrupting normal furnace operation:** A remote humidistat (not included) activates heat element to raise water temperature in reservoir. When water reaches 170°F, furnace blower turns ON distributing steam throughout the home. Once humidity level is reached, heat and blower control shut off.

Computer chip is programmed to enable heating element to expand and contract so lime flakes off and falls to bottom of reservoir for easy cleaning. Supplied with template, 1/4" compression fitting, saddle valve, instructions and 7 ft. 3-conductor cord. UL Listed Auto Flo brand.

**Steam-generating humidifiers require humidistat. See humidistat, No. 2E453, sold separately below.**

## DRAIN-TYPE

**No. 5E294.** New concept unit has no moving parts to wear out. All plastic construction. Almost no back pressure and no loss of air flow. Scoop design forces air thru media pad for efficient water evaporation. One cutout installation, no bypass required.

**Complete installation kit includes** plug-in transformer, humidistat, thermostat, water line saddle valve, drain hose and complete low voltage kit.

## HUMIDIFIER PLATES

**Universal-Type Plates Fit: AutoFlo, General, Homart, Lau (Viking), Skuttle, Wetwing**

autoFlo

Can be used in all plate-type humifiers. Rigid fiber construction assures high moisture output. AutoFlo brand (016050). Five plates packed in mailable carton. **Sold in cartons only.**

**No. 2E539.** Shpg wt. 0.3 lbs. List.....$19.41
Each.....**$12.37**

## AUTOFLO HUMIDISTAT

autoFlo

Provides precise control of central power humidifiers. Install on wall in living area of home or mount on return-air duct of furnace system. Rugged, sensitive element; 10 to 60% relative humidity range. 4 to 6% RH differential. Simple to use—recommended settings for outside temperature ranges shown on face of control. 120VAC rating: 4.4A full load. 24VAC rating: 50VA pilot duty. Neutral beige finish. 5¼H x 3⅝W x 2"D. AutoFlo brand (052000).

**No. 2E453.** Shpg. wt. 0.8 lbs. List .....$37.19.
Each.....**$26.45**

## MAINTENANCE CHEMICALS FOR HUMIDIFIERS

Water treatment and descaler chemicals come in 32 oz. containers. Vista brand.

**Solution 24® humidifier water treatment** prevents lime and mineral scale buildup on internal parts, helps control odors. Adds life to filters, belts and operating parts. For portable type humidifiers. Vista brand (00240).

**No. 5W008.** Shpg. wt. 2.4 lbs. List .....$3.68.
Each.....**$3.45**

**Solution 26® descaler** is ideal for removing the lime scale buildup and sludge deposits from all manually filled water humidifiers, filters and water belts. Vista brand (00260).

**No. 5W010.** Shpg. wt. 2.4 lbs. List $3.68.
Each.....**$3.45**

## BIONAIRE PORTABLE HUMIDIFIERS

**Common Features:**

- Uses a process of film boiling to generate moisture in the air except 6C506 which uses a wick
- Includes large air filter
- Attractive Eurostyling blends well with all decors
- Clean and comfortable mist—no "white dust" or bacteria emissions
- Heavy-duty 3-prong grounded plug

**No. 6C506 Console Model:**

- High efficiency 4-stage air filtration
- Multifunction control panel, includes On Light, Humidistat, Low Water Indicator, Speed Controls and Sanitizing Switch
- Directional air output louvers and casters

**Nos. 6C504 & 6C505 Table-Top Models:**

- 100% Bacteria-free moisture
- No chemicals are needed
- Slide- or lift-out design collects minerals and ends cumbersome and difficult cleaning chores
- Multifunction control panel includes On light, humidistat, low water indicator and speed controls

# DEHUMIDIFIERS & HUMIDIFIER ACCESSORIES

## WESTINGHOUSE DEHUMIDIFIERS

White-Westinghouse

New

- Help eliminate moisture caused rust, mildew, warping and surface damage
- For use at air temperatures of at least 65°F
- Operate on 115 V, 60 Hz

- **Permanently lubricated compressor and fan motor**
- **Signal light**
- **Adjustable dehumidistat**
- **Frost control shuts of dehumidifier resumes after frost has melted**
- **Water drains into 24-pint polypropylene collector bucket or may be drained off by connecting a garden hose (not included)**

**Slim-silhouette cabinet** with non-marring casters or glides. High-impact plastic grille is moisture-impervious and matches any decor. Slanted control panel for easier viewing. Automatic overflow control shuts off unit when bucket is full. 6 ft., 3-wire cord. 22¼"H, 12½"W, (17½"D with bucket). UL Listed (SA2453).

### DEHUMIDIFIER DRIP TRAY

Can be installed into dehumidifier for permanent hose connection. White Westinghouse brand (EA59T). No. 5C418.

**No. 5C418.** Drip Tray. Shpg. wt. 1.0 lbs. List $7.15. Each ..... $4.79

### WHITE-WESTINGHOUSE & GENERAL LIMITED WARRANTY

**5-Years on sealed system. 1-Year on all other parts. Text of warrranty available on request. See "Manufacturers Warranties" on page opposite back cover.**

## HUMIDIFIER CHEMICALS

### For Portable and Furnace Type Humidifiers

Easy-to-use water treatment and descaler chemicals come in 32 oz. containers. Vista brand.

**Solution 24® humidifier water treatment** prevents lime and mineral scale buildup on internal parts, helps control odors. Adds life to filters, belts and operating parts. For portable type humidifiers.

No. 5W008

**Golden Solution® humidifier water treatment.** In addition to features of Solution 24® above, this EPA Registered product inhibits the growth of odor-causing bacteria and algae in manually-filled console humidifiers.

**Solution 26® descaler** is ideal for removing the lime scale buildup and sludge deposits from manually-filled water humidifiers, filters and water belts.

| Type of Chemical | Vista Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Solution 24 | 00240 | 5W008 | $3.68 | $3.45 | 2.4 |
| Golden Sol. | 00245 | 5W009 | 4.81 | 4.48 | 2.4 |
| Solution 26 | 00260 | 5W010 | 3.68 | 3.45 | 2.4 |

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# OASIS LOW TEMPERATURE DEHUMIDIFIER

OASIS

Replacement Parts Available 1-800-323-0620

No. 3H356

SA2328

**OASIS LIMITED WARRANTY**

**1-Year parts and labor free from date of purchase with an additional 4-years on any part of the sealed refrigeration system.**

- **Helps eliminate excess moisture and mildew**
- **Automatic Dehumidistat maintains selected humidity**
- **Frost control shuts off dehumidifier, resumes after frost has melted**
- **Can be used in enclosed areas with temperatures as low as 40°F**
- **Can be used in enclosed areas with temperatures as low as 40°F**
- **115V, 60Hz**

**Helps prevent humidity and moisture damage** in enclosed areas with temperatures as low as 40°F. Designed for problem industrial applications such as sewage lift stations, telephone relay rooms, fire and flood cleanup where ambient temperatures do not exceed 75°F.

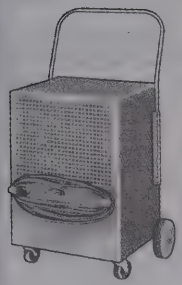
**When ice forms on the evaporator coil,** a temperature sensing thermostat diverts the hot refrigerant gas through the evaporator coil until the ice has melted. Normal dehumidifying resumes when the evaporator coil has been defrosted. Being a commercial unit, higher noise levels are produced than residential models (should not be operated in noise sensitive areas). Sound level rating is below 65 decibels.

**Greystone vinyl-on-steel laminate cabinet** with impact-resistant polystyrene grille. Three point suspension. Concealed rollers. Adjustable dehumidistat automatically turns unit on and off at preselected moisture levels. Off and continuous run positions are indicated. To prevent overflow, unit shuts off automatically when moisture container is full and activates red signal light.

Ten quart water container has hand grips on both sides. For continuous moisture removal to a floor drain, coil drip tray has garden hose connection fitting.

Comes with 3-wire service cord and polarized plug. 21¾H x 15W x 14½"D. 115 volts, 60 Hz, 7.7 amps, 265 CFM. UL Listed (SA2338).Oasis brand (OD 3800HG)

**No. 3H356.** Shpg. wt. 58.0 lbs. List .....$670.00.
Each .....**$446.50**



**CAPACITY PINTS PER 24 HOURS**

| Room Temp. (°F) | % Relative Humidity 60 | 70 | 80 |

| 65 | 21 | 25 | 28 |
| 60 | 13 | 18 | 22 |
| 55 | 8 | 13 | 17 |

# OASIS COMMERCIAL DEHUMIDIFIERS

OASIS

Replacement Parts Available 1-800-323-0620

SA2328

No. 5E822

**OASIS LIMITED WARRANTY**

**1-Year parts and labor free from date of purchase.**

- **Ambient range 40-75 °F**
- **Heavy-duty 16-gauge cabinet**
- **Convenient cord wrap brackets**
- **Furnished with 3-wire service cord and polarized plug**
- **Cleanable foam filter keeps evaporator coils and condenser free from lint and dust**
- **Metal grill protects evaporator coils from damage**
- **Automatic Dehumidistat control located inside cabinet**
- **Built-in condensate pump for continuous moisture removal. Maximum lift is twenty feet**
- **20 ft. plastic hose included**
- **Automatic evaporator defrost**

**Dehumidifiers** help prevent humidity and moisture damage in enclosed areas with temperatures as low as 40°F. Designed for problem industrial applications such as sewage, lift stations, telephone relay room, fire and flood cleanup.

**When frost forms on the evaporator coil,** a temperature-sensing thermostat activates a timer. Frost will continue to accumulate for one hour. Timer will then shut-off the compressor, but the fan will continue to operate and move warm air over the coil until it is defrosted. Compressor starts again and the cycle repeats.

No. 5E821 dehumidifier has 2 wheels and handle for easy portability; No. 5E822 dehumidifier has 4 wheels and handle for easy portability. Oasis brand.

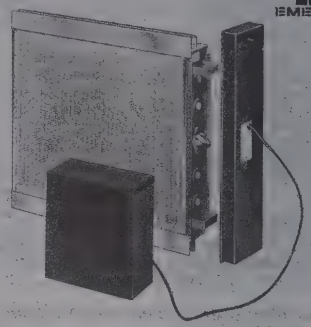
# FURNACE AND DUCT-MOUNTED ELECTRONIC AIR CLEANERS

electro-air

No. 3C567



E25968

Replacement Parts Available
1-800-323-0620

LR31684

EMERSON

No. 3C616

- Removes up to 98% of all contaminants in the air down to 0.01 micron in size (0.02 for Nos. 3C616, 3C617, and 3C618) per ASHRAE Standard 52-1
- Simple periodic cleaning with hot water and detergent, or cell cleaner (No. 4W319) keep units operating at peak performance levels
- Nos. 3F311, 3C567, and 3C568 have twin 5" deep, high-capacity collection cells which are easily removed for cleaning
- Nos. 3C616, 3C617, and 3C618 offer easy installation, and utilize a 2 13/16" particulate collection cell
- Nos. 3F311, 3C567, and 3C568 may require additional sheet metal work, and need to be hard wired to a 120V source
- Built-in air flow switch operates unit only when system fan is running
- Green LED operating indicator light—flickers to indicate need for cell cleaning

For residential and light commercial forced air heating and/or cooling systems. Units handle most central forced air furnace installations.

Integral air flow monitor activates unit when blower is operating. Eliminates need for sail switch. Power is automatically disconnected when access door is opened. 120V, 60 Hz.

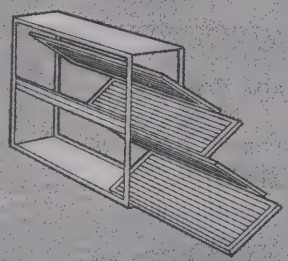
# RESIDENTIAL FURNACE MEDIA AIR CLEANER AND REPLACEMENT FILTERS

## RESIDENTIAL FURNACE MEDIA AIR CLEANER



Air Handler®

CLASSIFIED UL

R13458

No. 4E434

Filter cartridge slides out for easy replacement.

No. 4E435

- High efficiency
- Easy maintenance and economical operation
- 96 sq.-ft. of active media area
- New cartridge media (included) just slides in —no assembly required
- High arrestance rate of 98%
- Case adaptable to most furnaces

| CFM | Initial Resistance In W.G. |
|---|---|
| 1200 | 0.16 |
| 1600 | 0.23 |
| 2200 | 0.31 |

This complete air cleaner package is designed for residential and light commercial forced-air heating and/or cooling systems. Units handle most central forced air furnace installations. Media filter is wet layered micro fiberglass paper; no electrical connections necessary, no electricity consumed and no ozone produced.

High efficiency filtration media removes up to 98% of the dust, dirt, smoke, pollen, bacteria, and other contaminants. Removes up to 80% of particles in the air down to 1.0 microns in size. Large dust holding capacity has 96 sq.-ft. of air filter media. Filter's low pressure drop makes it ideal even for heat pump applications.

Easy to install. Built-in flanges simplify installation in furnaces. For duct size 20 x 22½".

Quick, easy, clean maintenance. Slide out dirty cartridge and replace with new one. Filter media cartridge (included) is completely factory assembled. Filter cartridge eliminates potential for media damage that can occur when replacing media in conventional air cleaners.

Attractive beige steel housing. UL Classified as to flammability only. Class 2 (R13458). Air Handler brand.

# PORTABLE ROOM AIR CLEANERS

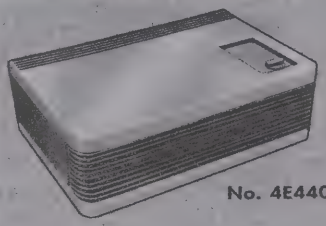
## TABLETOP AIR CLEANER

- **Removes up to 95% of common airborne particles**
- **Whisper-Quiet operation**
- **Clean air indicator light shows proper operation**
- **Helps remove odors with activated charcoal after filter**
- **Negative ion generator freshens stale air**
- **UL and C-UL Listed; AHAM Certified**
- **Made in USA**

**Replacement Parts Available 1-800-323-0620**

Attractive style and streamlined design enables it to be placed anywhere in the home or office. This powerful table top model is capable of filtering up to 95% of tobacco smoke, pollen, mold spores, dust, dirt, lint and other airborne pollutants.

The Super Clean II™ is a true electronic air cleaner that utilizes 5 separate cleaning stages to clean the air. Has permanent pre-filter and charcoal after-filter.



Unit is a black/gray color. 6 ft. cord length. UL and C-UL Listed; AHAM Certified. Trion brand.

### REPLACEMENT FILTERS FOR TABLETOP AIR CLEANER

Replacement charcoal after-filter for No. 4E440. Package of two.

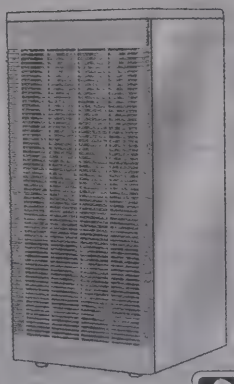
## CONSOLE AIR CLEANER

- **Removes up to 99.97% of common airborne particulates**
- **Whisper-Quiet operation**
- **Activated charcoal after-filter helps remove odors**
- **Clean air indicator light**
- **Front intake and exhaust grille allows corner or wall placement**
- **UL and C-UL Listed; AHAM Certified**
- **Made in the USA**

**Removes pollutants** such as tobacco smoke, pollen, mold spores, dust, dirt, animal dander, and lint. High tech design, easy maintenance and high efficiency make these floor model air cleaners ideal for home or office. Units are capable of cleaning the air in one large room or several small rooms.

**The Console HEPA** utilizes a High Efficiency Particulate Arrestance filter (HEPA) to remove up to 99.97% of the particles passing through the filter from the air. Filter removes easily for periodic replacement.

**The Console 250** is a true electronic air cleaner that actually harnesses the power of electricity to "Deep-Clean" the air of up to 95% of airborne particles. Permanent prefilter and collector cells remove easily for routine cleaning.



Both units have a dark gray cabinet finish. 120V, 60 Hz. Trion brand.

## HIGH EFFICIENCY AIR CLEANER

No. 4E532 Air Cleaner is a self-contained nonelectronic extended surface, mechanical-type unit. Provides ozone free clean air. Ideal for single rooms in homes, offices, and waiting rooms. Utilizes 4 filtering principles: straining, impingement, diffusion, and interception to trap particles. 21 Pleat, deep-fold design of media provides more than 10.8 sq.-ft. of filtering surface. Removes pollutants like tobacco smoke, dust, pollens, and spores in 16 x 16 ft. room 4 times per hour. Quiet 2-speed fan moves up to 140 cu.-ft. of air per minute.

No filter washing or cleanup. Simply replace filter approximately twice a year (depending on usage). Attractive, woodgrain finish. UL Listed (E71311), Research Products brand.

No. 4E532

E71311

BIONAIRE®

No. 4E417

E76739

No. 4E416

## AIR CLEANERS

**NO. 4E417 FEATURES:**

- **Three-speed fan controls the air cleaning rate for maximum efficiency and whisper-quiet operation**
- **Air deflection control changes the airflow upwards or downwards as desired**

**NO. 4E416 FEATURES:**

- **Four-speed fan controls the air cleaning rate for maximum efficiency and whisper-quiet operation**
- **Joystick air deflection control changes the airflow upwards or downwards and side to side as desired**
- **Variable fragrance control allows a pleasant scent to be added to the purified air**

**BOTH AIR CLEANERS FEATURE:**

- **Multi-stage electrostatically charged micro-filter**
- **Independently controlled ionizer**
- **Filter condition monitor indicates when filter needs to be replaced**
- **Modern compact L-shaped design maximizes air movement while allowing for placement**

These portable air purifiers utilize an electrostatically charged filter and independently controlled ionizer to remove particulate pollutants. Ideal for improving air quality in offices, hospitals, institutions, homes, and stores. On/Off switch for negative ion source helps to revitalize the air by electrostatic precipitation of small airborne particles. Clean, fresh air exits horizontally from front adjustable grille. Filter monitor indicates when to change dirty filters. Units are for tabletop or wall mounting. UL Listed. Bionaire brand©.

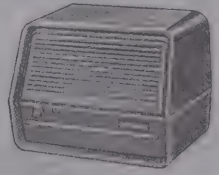
## AIR CLEANER SYSTEMS



No. 5H567
Two Speed
Control

ECOLOGIZER®
CA 90 AIR TREATMENT SYSTEM

E91624

No. 5H568
Three Speed
Control

Ecologizer CA/90 is a patented air filtering system that removes tobacco smoke odors, dust and pollen. A ductless fan pulls air through a triple layer of replaceable filtering elements: The first layer is activated charcoal to remove dust and pollen particles. The second layer is CA/90, a patented formula with odor-killing properties. The third layer serves as a final filter before recirculating fresh, clean air into the environment. Average life of replaceable filter is 90 days.

Models feature a washable prefilter. Can be used on flat surfaces or wall mounted. 120V, 60 Hz. 6 foot insulated cord with three-prong plug. UL Listed. Two-tone gray finish. Ecologizer brand by Waterbury.

No. 5H567 has two-speed control. 7¼" deep, 11⁷⁄₆₄" wide, 7¾" high. Uses one **replaceable filter, No. 1R403.**

No. 5H568 has three-speed control to adjust fan speed for changing air problems. 10" deep, 12½" wide, 10½" high. Uses two **replaceable filters, No. 1R403.**

**REPLACEMENT FILTER FOR ECOLOGIZER SYSTEMS**

Replacement filters for Nos. 5H567 and 5H568 units. Ecologizer brand (96011).

**No. 1R403.** Replacement Filters. Priced and sold in pkgs. of 2.

No. 3GD10 Features:

- 95% D.O.P. efficient hospital grade filter
- Surface mounted for any ceiling style and construction
- Low profile—only 9.75 inches
- Filters dust, smoke, bacteria, pollen, any particulate
- Absorbs gases, V.O.C. vapors, and odors through CPZ canister
- Multi-directional discharge

No. 3GD21 Features:

- 95% D.O.P. efficient hospital grade filter
- Unique CPZ™ Sorbent modules hold 43 lbs. of odor and gas collecting media
- Bi-directional air flow pattern complements and enhances cooling and heating better than ceiling fans
- Fits neatly into 2' x 4' T-bar ceiling or may be suspended from any ceiling
- Access door equipped with sound baffles and absorbers for quiet operation
- Swing down hinged door and drop-out disposable filters—no tools, cleaning solutions or special skills needed
- Whisper quiet operation. Max 58 dBA

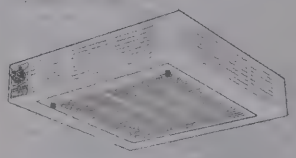
# EMERSON COMMERCIAL ELECTRONIC AIR CLEANERS

## SUSPENDED CEILING MOUNTED AIR CLEANERS

**No. 3C620:**

- Quiet, variable speed blower
- Charcoal filter for odor removal included
- Oyster white finish can be repainted to match any decor
- Semi-flush mount has 4 in. drop from ceiling surface
- Fits 2 x 2 ft. suspended ceiling panels
- Four-way air flow provides complete room air circulation

**No. 3C619:**



- Quiet, variable speed blower
- Charcoal filter for odor removal included
- Attractive aluminum grille
- Flush mounted
- Fits 2 x 4 ft. suspended ceiling panel

**These commercial-duty air cleaners** remove up to 95% of smoke, dus dirt, lint, paper dust and other common airborne pollutants four in offices, conference rooms, data processing rooms and oth commercial establishments.

**Units are ceiling mounted** and concealed in a 2 x 2 ft. or 2 x 4 ft. cei ing panel. No. 4E441 extends 3½" from ceiling; No. 4E442 is flus with ceiling. Low profile design does not require elaborate du work or expensive installation. Feature "center suction" wit multiple clean air discharge and 3-speed fan control. Polluted a is drawn through washable prefilter to remove lint and large du particles, then submicron particles are stripped from air strea by high efficiency microglass filter. Large pleated cartridge filte provides extended life and low pressure drop. Traps 10 to 10 times as many particles as standard fiber filter in forced HVA system. Filters are UL Classified as to flammability only; Class

**Cabinets** have white epoxy powder-coated appliance finish; can b field painted to blend with any decor. Mounting hardware an instructions included. Trion brand.

## HOW ELECTRONIC AIR CLEANERS WORK

Fan pulls airborne dust, smoke and other particulate into the electronic air cleaner. Larger particles are trapped by **(A) Prefilter Screen** (some models), while smaller particles pass through to the **(B) Charging Section,** where they're electrically charged by a series of tungsten wires. Charged particles are then drawn into **(C) Collection Section** where a series of positive plates repel the positive dirt and drive them forcefully onto a series of negative plates, which hold the positive dirt particles like a magnet. Pollutants are held in this section until washed away during cleaning. Cleaned air is then circulated through **(D) Charcoal Filter** where odors are absorbed. Fresher, cleaner air is then discharged through louvered grilles.

*Information generated using ASHRAE Handbook of Fundamentals, 1985; ASHRAE Guide and Data Book application, 1987; and ASHRAE Standard 62-81. Natural and Mechanical Ventilation, 1981. Use this information as a guide—use your experience and judgement in application of this data. Follow all local codes and minimum air requirements.

## SIZING A COMMERCIAL ELECTRONIC AIR CLEANER*

**EXAMPLE 1—Sizing by air changes per hour and room volume.** Restaurant needs an electronic air cleaner to remove cigarette and cigar smoke from the air. Dining area is 25 x 40 ft. with a 15 ft. ceiling. How many air cleaners will be needed?

**Solution:**

1. Calculate the volume of room, 25 x 40 x 15 ft. = 15,000 cu-ft.
2. Determine volume of air to be circulated each hour. 10 air changes per hour is used on assumption that the intent is to substantially reduce, not necessarily completely eliminate smoke.

**15,000 cu.-ft. x 10 air changes/hour = 150,000 cu.-ft./hour**

$$\frac{\text{150,000 cu.-}}{\text{60 min./hr.}} = \text{2500 cu.-ft. per minute}$$

3. Determine number of air cleaners required.

$$\frac{\text{Desired Circulation}}{\text{Air Cleaner Capacity}} = \text{Units required}$$

$$\frac{\text{2500 CFM}}{\text{1000 CFM}} = \text{2.5 (2 or 3 units)}$$

**EXAMPLE 2—Sizing by occupant load**
A cocktail lounge averages 75 occupants. Using the ASHRAE recommended minimum of 35 CFM per person.

**Solution:**

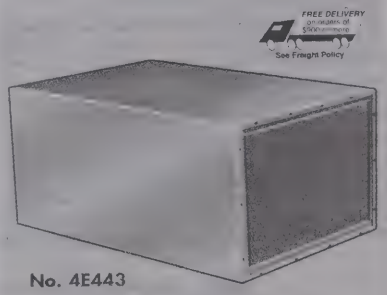
**75 people x 35 CFM per person = 2625 CFM**

$$\frac{\text{2625 CFM}}{\text{1000 CFM}} = \text{2.6 (2 or 3 units)}$$

# COMMERCIAL MEDIA AIR CLEANERS

For larger rooms or multiroom facilities like cocktail lounges, clubs, bingo halls, bowling centers, designated smoking areas or any place where people gather to work or relax. Removes up to 95% of tobacco smoke, dust, dirt, lint and other submicron particles from indoor air. (Filters tested in accordance with ASHRAE standard 52-76 Dust Spot Test Method.) Units are easy to install and feature variable speed control, high efficiency deep-pocket microglass filter, commercial-duty cabinet, and 4-way adjustable outlet grille.

Dirty, polluted air is drawn through the washable 1/2" foam prefilter to remove lint and large dust particles. The second stage microglass deep pocket filter strips smoke and other submicron particles from the air stream. Small diameter fibers in the filter intercept and retain these particles while the large surface area gives long filter life and low pressure drop. Filters have 6 pockets and are UL Classified as to flammability only; class 2.



Cleaning capacity depends on the blower speed selected (see chart below for room sizes handled by single units). Larger areas are easily accomodated by using multiple units. Horizontal air flow is reversible for right to left or left to right exhaust. Eight internal weld nuts are included (4 top, 4 bottom) for ceiling mounted applications. Epoxy coated, copper color. Trion brand.

### ADSORBER KIT

**Optional adsorber kit** contols and removes stale odors associated with alcohol and tobacco smoke and effectively reduces unpleasant odors found in hospitals, nursing homes and laboratories. Helps reduce level of most solvents used in printing processes. Contains 4 lbs. of activated carbon. Fits Nos. 4E443 and 4E444.

# COMMERCIAL AIR CLEANER

- **High efficiency**
- **Easy to install - ceiling hung or shelf-mounted**

No. 4E534 High-Efficiency Commercial Air Cleaner is a self-contained nonelectronic extended surface mechanical-type unit. Utilizes a unique filter media similar to that used in hospitals, clinics, laboratories, and clean rooms where the level of airborne particles must be kept low. Ideal for retail, commercial, and light industrial applications such as restaurants, bingo halls, cocktail lounges, bowling centers, cafeterias, retail stores, laboratories, photo labs, and offices. Emits no ozone.

3-Speed blower will handle up to 15,000 cu.-ft. of space, or install one air cleaner per every 25 smokers.

Four eye bolts for ceiling mount included. UL Listed (E71311). Research Products brand.

No. 4E534

E71311

# INDUSTRIAL AIR CLEANERS

## 2-STAGE INDUSTRIAL AIR CLEANER

**Uses a prefilter and main filter in a pre-engineered package** for economical efficient removal of airborne particles. Three speeds for general ventilation areas in body shops, printing shops, woodworking areas, vocational schools, and other areas where airborne particles are prevalent.

**Using "interception filtration" and a microglass deep pocket filter,** airborne dust particles, smoke, and submicron particles are stripped from the air. Clean, filtered air is recirculated, providing savings on exhausting costly heated or cooled air. Includes one extended surface prefilter and one primary bag-type filter. Filters are UL Classified as to flammability only; Class 2.

**For large areas** (depending on size) to be effectively cleaned, multiple units are required. (See chart below.) Horizontal air flow is reversible for right to left or left to right exhaust. Eight internal weld nuts (4 top, 4 bottom) are included for eyebolt mounting. Instructions included. Steel cabinet finished with chemical/oil resistant textured blue paint. Trion brand.

**Replacement Parts Available**
**1-800-323-0620**

## 2-STAGE HEAVY-DUTY INDUSTRIAL AIR CLEANER

**Can be used for general ventilation or ducted** to capture contaminants at their source. Removes up to 95% of welding smoke, rubber and plastic smoke, grinding dust, fumes, wood dust and other process generated contaminants. Unit can be modified for 3000CFM with optional blower kit.

**High efficiency, deep pocket, microglass filter** strips and retains submicron particles from the air, allowing conditioned comfort air to be recirculated ("interception filtration"). Clean, filtered air also helps to improve working conditions, productivity and product quality. Reduces plant and machinery maintenance costs. Includes one prefilter and one primary bag filter. Filters are UL Classified as to flammability only; Class 2.

**Forward curved squirrel cage blower** is belt-driven by a 2-HP, TEFC, ball bearing motor. Multipocket microglass filter has 105 sq.-ft. of collecting area providing long life and low pressure drop.

**For large areas, multiple units are required** (see chart). Horizontal air flow is reversible for right to left or left to right discharge. Twelve internal weld nuts (6 top, 6 bottom) for mounting. Instructions included. Cabinet constructed of 16-gauge galvanized steel with baked-on textured blue oil resistant finish. Trion brand.

# SELF-CONTAINED ELECTRONIC AIR CLEANERS

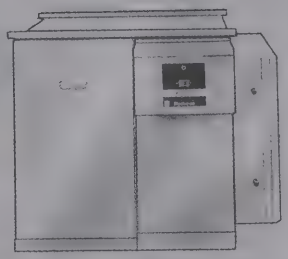
- **For use in industrial and commercial atmospheres to remove such pollutants as oil mist, weldsmoke, dust and other airborne contaminants**
- **Self-contained, fully automatic water and detergent wash system**
- **Heavy-duty, high efficiency cells**
- **Two speed blower**

Removes up to 85% of dust, dirt, smoke, pollen, bacteria, and other contaminants in the air down to 0.01 microns in size, based on ASHRAE 52-76 test method. Eliminates need to vent undesirable pollutants to outside air. Reduces amount of outside air necessary for ventilation, thereby lessening heating and cooling costs.

**Ideal for applications** such as source capture of welding smoke, grinding dust, oil mist in screw machine shops. 14⅝" deep cells allow peak operating efficiencies to be maintained between cell cleanings.

**Easily maintained** with a fully automatic water and detergent wash system. Seven day programmable timer allows cells to be cleaned during off-peak hours without supervision. Allows for up to one cleaning cycle per day.

**Operating light** indicates operation. Easy access, hinged door allows servicing of cells or wash system.



**Unit** may be suspended from ceiling to desired height using chains 3/8" all thread rod, or may be placed on a platform near source of pollutant.

**Heavy-duty pre- and after-filters** are designed to prevent large particles from being drawn into ionizing or plate sections of collecting cells.

**120VAC, 60 Hz.** Light green baked enamel finish can be repainted to match decor. Instructions included. Emerson brand.

## AIR CLEANER ORDERING DATA

| Fan CFM | Dimensions (In.) L | W | H | Emerson Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 900/1200 | 43½ | 30¼ | 18¾ | SC1200 | 5C419 | $8057.99 | $6068.00 | 400.0 |
| 1800/2400 | 44¾ | 30 | 34½ | SC2400 | 5C420 | 10830.74 | 8143.00 | 488.0 |

Sizing on most installations will require approximately 8-12 air changes per hour. Use the following formula to determine the number of units required:

$$\frac{L \times W \times H \times A/C}{60} = \text{TOTAL CFM}$$

L = length of area
W = width of area
H = height of area*
A/C = air changes/hour (60 min./hr.)
(*) This figure does not need to exceed distance from floor to top of air cleaner.

The CFM figure from the above equation will determine the unit necessary to clean the air in the given space.

$$\frac{\text{TOTAL CFM}}{\text{CFM PER UNIT}} = \text{UNITS REQUIRED}$$

**EXAMPLE:** A CFM figure of 5800 would require five (5) No. 5C419; or two (2) No. 5C420 with one (1) No. 5C419. Either option would work on applications up to 6000 CFM.

# INDUSTRIAL AIR CLEANERS

No. 4E492

No. 4E499

No. 4E504

- **Remove up to 99.97% of smoke, dust, dirt, grease, or other particulate matter from the air**
- **Multi-Stage system consists of spark and particulate trap for very large particles, replaceable prefilter for small particles, and a replaceable primary filter for smaller particles**
- **Filter efficiencies from 40 to 99.97% available**
- **Meet OSHA and EPA requirements for clean air**

These industrial air cleaners eliminate contaminants and other particulate matter from the air. Ideal for operators of equipment in work stations, or factories where welding, grinding, cutting, sanding, and soldering is done. The 3-stage system recirculates cleaned, filtered air into the work environment, thereby saving heating and cooling costs. Depending on the application, prefilters may be changed up to 6 times before the main filter needs replacement.

Do not use these units as wet or dry shop vacuums, or for the collection of toxic, carcinogenic, combustible, or other hazardous materials such as asbestos, arsenic, barium, beryllium, lead pesticides, or other health endangering materials. Not for use with reactive metals. Ace Industrial brand.

**Nos. 4E492 Horizontal and No. 4E499 Vertical Units.** Feature 1-HP totally enclosed motor, which pulls polluted air through an adjustable 10 ft. long, self-supporting, 8" dia. hose into the filtration chambers. Other features: 5" dia., locking casters for mobility, and convenience outlet for additional lights and accessories. Plug into 120VAC outlet. Require prefilters plus one primary filter **(sold separately, see below)**.

No. 4E492 has capture arm which rotates 360° for maximum versatility. Both units have a differential pressure gauge to alert operator that filters need changing.

**No. 4E504 One-man Portable Unit.** Ideal for maintenance workers or employees to move from one workstation to another. Plugs into any 120VAC outlet. Dual motors provide heavy air flow. Filter change light signals when prefilter or primary filter needs changing. Extractor nozzle can be placed within 3" of welding operations without disrupting shielding gases being used.

Unit includes 10 ft. of flexible hose, slot nozzle, 18" self supporting hose and magnetic base. Requires 1" prefilter plus one primary filter. **Filters sold separately, see below.**

All filters are UL Classified as to flammability only; Class 2. Choose the efficiency desired and number of filters needed for the specific air cleaner.

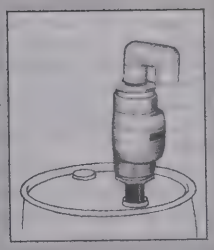
# ODOR CONTROLLERS



No. 4E423

No. 4E422

No. 4E421

No. 4E424

- **Nonwoven fabric filter (except No. 4E423 which does not have filter) captures airborne particulates as small as 10 microns, such as pollen and dust**
- **Air passes through carbon pellets eliminating odors, toxic gases and removing solvent gas**
- **Odor controller comes with filter and carbon pellets capable of collecting most gases/odors; however, specialized carbon mixtures for specific odors are also available, see below**
- **Air recirculates through units many times a day**
- **Blower powered by induction motor (No. 4E422 has 2 blowers)**
- **115VAC, 60 Hz (except No. 4E424)**
- **WARNING: Not for flammable or explosive atmospheres**

**No. 4E423 Work Surface Odor Controller.** Useful in dental labs, hospitals, circuit board manufacturers. As chemicals evaporate from the small containers, gases are removed by drawing them through the unit into a carbon bed where they are captured. Suction used to draw away evaporated gases captures gas without adding measurably to evaporation of liquid in containers.

Carbon is changed by turning unit upside down and removing two plugs in bottom, then shaking out carbon and replacing with fresh carbon and plugs. When in moderate use, carbon should be changed weekly. Six ft. power cord. Particleboard and plastic construction. White/gray color. Electrocorp brand (Mini 35).

**No. 4E422 Heavy-Duty Odor Controller.** Designed for heavy gas contamination found in hospitals, office buildings and manufacturing. Ideal for screen printers, offset printers, photo labs, and similar locations. Capable of working in 1200 sq.-ft. area. Contains 30 lbs. of carbon. These units are placed on the floor where they draw heavier than air gases through two stage filters located on each side of unit. Replacement of carbon recommended every 3 to 6 months (as soon as filters are 40% heavier than their original weight). Six ft. 7" power cord. Wood construction. Electrocorp brand (550).

**No. 4E421 Standard Odor Controller.** Useful anywhere chemicals are evaporated into the air: offices, hospitals, homes, veterinaries, and pathology labs. For best results, place in area where the input and output is not blocked, and unit is 3 feet from floor. Carbon (7 lbs.) is easy to replace and should be done every 3 to 6 months depending on level of air contamination (as soon as filter is 40% heavier than its original weight). 6 ft. power cord. Wood construction. Electrocorp brand (228).

**No. 4E424 Odor Controller and Filter for Venting Drums.** Removes gas contamination that exits bung hole of a 5 to 55 gallon drum. Ideal for industry, ranchers, turkey farms, oil solvent reclaimers, and gas stations. Drum vent is high impact PVC and screws into standard thread of drum bung. As air is displaced from drum, it passes through 9 inches (5 lbs.) of carbon bed, which absorbs gases from the air like a sponge. To replace carbon remove friction fit top ring, pour out carbon, refill, and press top ring back into the opening. Replace carbon after each drum is full. White color. Electrocorp brand (235).

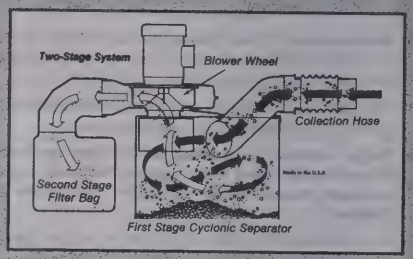
# TWO-STAGE DUST AND WASTE COLLECTORS

## INDUSTRIAL TWO-STAGE DUST COLLECTORS



- **1 and 2 HP units trap dust down to 5 microns. 1/3 and 1/2 HP units trap dust 10 microns and larger**
- **Sawdust and wood particles**
- **Small ferrous metal filings and dust**
- **Plastic shavings, paper shreds, textile lint**
- **Fiberglass sandings, rock particles**
- **Rubber particles and many others**
- **Not suitable for aluminum or other reactive dusts**

Heavy-duty, industrial quality. Two-stage system is more durable, efficient and safer than single-stage system (see inset). One third and 1/2-HP models fit 18-20" diameter open top drums, or steel garbage cans and have molded ABS plastic drum lids. One and 2-HP models fit 55-gal. drums and have heavy-duty fiberglass drum lids.

**Includes** a wire reinforced 5 ft. long rubber hose, 14-gauge steel blower, dust/filter bag, front and side intake nozzles. Self-cleaning aluminum blower wheel, 3450 RPM, ball bearing, continuous duty TEFC motor. Single phase motors have prewired 115V, 8 ft., 3-conductor cord. Dust-Master brand by Cincinnati Fan.

The **two-stage** design enables chips and heavier particles to drop to the bottom of the drum (not included) while lighter particles are trapped in the dust/filter bag. This feature eliminates rapid wear and tear to the wheel and housing. 1 and 2-HP units feature a patented, synthetic fabric filter bag that traps more fine dust, down to 5 microns, while still permitting high air flow through the bag. Base with casters not included; order No. 5W562.

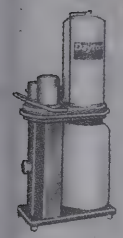
(*) Prewired to lower voltages. (‡) Decibel reading at 5 ft. with hose, elbow, and bag attached.

## TWO-STAGE CENTRAL SYSTEM DUST COLLECTORS

- **Uses 55-gallon fiber or steel collector drums (not included)**
- **Two-stage systems are more durable, efficient and safer than single-stage systems. Eliminate rapid wear and tear to the wheel and housing. Clean air returns to room**
- **Totally enclosed fan-cooled motors**
- **Compact first stage cyclone separator divides large, abrasive particles from fine dust**
- **Steel blower with self-cleaning, aluminum radial-blade blower wheel**
- **3 and 5 HP models equipped with patented fabric filter bag with extra-large 50 square feet of surface area—400% more efficient in dust removal than standard cotton bag Removes 99% of all particles 5 microns and larger**
- **7.5 HP model filter bag has 100 square feet of surface area. Removes 99% of particles 1 micron and larger**
- **All models use standard 8-inch dia. duct system connections. Easily adapted to fit other duct diameters if required**
- **NOTE: Not suitable for aluminum or other reactive dusts**



System simultaneously collects dust from 3 to 5 machines (depending on model and duct length). All models include motor/blower (not supplied factory wired), separator chamber, tripod support stand, bag suspension bracket, dust bag, drum lid, flex hose, hose clamps, and instruction manual. Maximum duct length ranges from 150 to 300 feet.

# SELF-CONTAINED DUST COLLECTORS, FUME AND SMOKE EXHAUSTERS & DUST FILLER BAG

## SELF-CONTAINED SINGLE STAGE DUST COLLECTOR

Dayton

95573

No. 6C503 E40197

Replacement Parts Available 1-800-323-0620

Compact size, portability, and excellent performance make this single-stage dust collector an ideal tool for home and maintenance shops. Filtration down to 50 microns. 1 HP motor and heavy-duty fan impeller are strong enough to pick up large chips, shavings, and harmful dust.

34H x 10L x 4" Dia. hose can attach directly to a machine. Lower cloth bag provides large, 36 gallon capacity for wood chips and shavings. Supplied with lower and upper cloth bags and a 6-ft., 16-gauge line cord; use Hose Extension Kit No. 1Z890 (listed below) for additional lengths. 7 Amp motor. 62 H x 15 W x 33"D. UL Listed and CSA Certified. Dayton brand.

**Note: Not for use with reactive metal dusts.**

| HP | Volts | Max. CFM | Chip Capacity | Noise Level | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| 1 | 115 | 650 | 36 Gallon | 65 dBA | 6C503 | $683.00 | $371.50 | 101.0 |

## INDUSTRIAL SELF-CONTAINED TWO-STAGE DUST COLLECTOR

Industrial quality two-stage system is more durable, efficient and safer than single-stage systems. Portable dust collector includes 35 gallon, aluminum foil-lined, fiber drum container (43H x 20" dia.) with casters, and 5 ft. hose. Design and accessories are identical to other two-stage units except motor is continuous-duty, ODP. Motor is pre-wired with cord set and switch for 115 volts. Use for all dust collection applications as other two stage units; **not for use for hot metal dust such as from a grinder.** Traps 10 micron and larger dust particles. **NOTE: Not suitable for aluminum or other reactive dust.** Dust-Master brand by Cincinnati Fan.

Dust Master™

No. 6C502

Made in the U.S.A.

## INDUSTRIAL FUME AND SMOKE EXHAUSTERS

**Self-contained ventilation systems** for exhausting fumes, smoke, and heat from welding, brazing, and soldering operations. Max. fume temp: 180°F. Also supply fresh air to confined work areas, tanks, or manholes.

**14-gauge steel housing,** self-cleaning cast aluminum blower wheel, 10 ft. wire reinforced rubber hose with intake nozzle and adjustable exhaust duct.

**3450 RPM, TEFC, 60 Hz, 1 or 3 phase motor.** Single phase 115V motors have 8 ft., 3-conductor cord prewired to an On-Off switch mounted on the motor.

**Steel reinforced frame** mounts to wall or workbench or bolts to hand truck or dolly. Includes two 5 ft. long hoses. Additional 5 ft. lengths of hose available (see Hose Kit below). Fume-Master by Cincinnati Fan.

(*) Prewired in lower voltage. (†) Decibel reading is at 5 ft. with air hoses and nozzle attached. (#) Parts available—Call 1-800-323-0620.

**How to Select Proper Fume Exhauster**—Place exhauster as near as practical to welder or other equipment. Should provide an air flow rate sufficient to maintain a velocity of 100 linear feet per minute in the welding zone. Use table at right to determine minimum air flow rate recommended by the American Welding Society to achieve this controlled velocity.

Select the exhauster with air flow CFM that exceeds recommended figure obtained from the table.

| Distance of Exhaust Nozzle from Arc or Torch (In.) | AWS Recommended CFM Air Flow | Nozzle Diameter (In.) |
|---|---|---|
| Up to 6 | 250 | 4 |
| 6 to 9 | 560 | 5 |
| 9 to 12 | 1000 | 8 |

## HOSE EXTENSION KIT

Extension hose can also be used as a replacement if original hose furnished with dust collector or fume exhauster becomes damaged or worn. Max. temp. 180°F. Hose kit contains one 5-foot length of wire reinforced rubber hose, 2 clamps, and 1 connector sleeve. Cincinnati Fan brand.

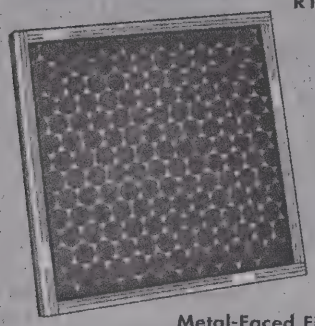
| 6 | HK-6 | 2W449 | 78.39 | 47.00 | 2.8 |

## OVERSIZE DUST FILTER BAG

Dust-Master™

Dust Filter Bag is used in applications where standard bag becomes filled too quickly, such as sanding dust or planing chip collection. Use only with 1 HP and larger 2 stage dust collectors. Bag is attached to the top of a standard 55-gallon drum (not supplied) with a web belt (included). Collected dust is deposited in the drum, keeping the air filtration surface clean. Drum provides much greater capacity for collected dust than the standard filter bag. Bag is 2 x 6 ft. and the knit polyester filter fabric retains particles 5 microns and larger. Initial installation of the oversize dust filter bag requires No. 2W449 six inch Hose Extension Kit to connect the bag to the dust collector outlet. Dust-Master brand by Cincinnati Fan.



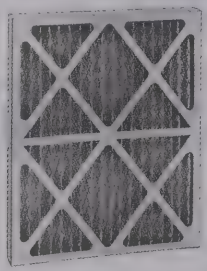
**No. 6C501.** Shpg. wt. 6.0 lbs. List $318.90. Each .....$191.25

# FIBERGLASS AND TRIM-TO-FIT AIR FILTERS

## FIBERGLASS AIR FILTERS

Air Handler®

CLASSIFIED UL R13458



Metal-Faced Filter
No. 1W097

- **Progressively layered fiberglass**
- **Heavy-duty chipboard frame**
- **Priced each. Sold in carton quantity**

**Applications:** Fiberglass air filters are recommended when basic filtration is required. Initial resistance is 0.04" W.C. for 1" and 0.08" W.C. for 2" filters at 300 FPM. Recommended final resistance of 0.5" W.C.

**Construction:** The fiberglass media is designed with progressively denser material and a tackifier to ensure maximum dust holding and efficiency. Metal facing, securely bonded to the frame provide dynamic strength. UL Classified as t flammability only; Class 2 (R13458).

## NEED MORE FROM YOUR FILTER?

Consider the advantages of Air Handler® PLEATED AIR FILTERS:

- **Improved indoor air quality**
- **2½ times more efficient than fiberglass air filters**
- **Reduces coil cleanings and equipment maintenance**
- **For greater efficiency and performance, the High Capacity Pleated Air Filters last up to 50% longer than the Standard Capacity Pleated Air Filters**

**A complete selection of Standard and High Capacity Pleated Filters can be found on pages 3532 and 3533**

**If high humidity or moisture is a problem, use 3-Ply Polyester Ring Panels.** **See page 3534**

## TRIM-TO-FIT AIR FILTERS

- **Washable or disposable**
- **Ideal for room window air conditioners**
- **Priced each. Sold only in carton quantity**

**Applications:** Trim-to-fit filters are widely used in room window air conditioners. These filters can be easily cut to size with scissors. No frame is required. Initial △P: 0.2" @ 300 FPM. Final △P: 1.0" WC

**Construction:**

**Fiberglass** media is disposable.

**Foam** media may be washed or vacuumed clean.

**Rigid foam** media is supported by a molded plastic support grid and may be washed or vacuumed clean.

**Aluminum** media is multi-layered expanded aluminum laminated together. May be washed or vacuumed clean.

| Filter Type | Size (In.) H | W | D | Carton Quantity | Stock No. | List | Each | Shpg. Wt. |

Air Handler®

*Breathe easy — we've got the air treatment products you need.*

# POLYESTER FILTER MEDIA PADS

**For most HVAC general filtration requirements.** Frequently used to replace fiberglass filters which can fragment and send fibers into the airstream. Polyester offers higher arrestance and dust holding capabilities than most fiberglass filters. Operate in temperature range of -40 to 180°F. UL Listed. (R13458). Priced each. Sold only in cartons of 24.

| Nominal Thickness (In.) | Avg. Synthetic Dust Weight Arrestance | Dust Holding Capacity (gm) | Initial Resistance | Final Resistance |
|---|---|---|---|---|
| 1/2 | 81% | 155 | 0.07 | 0.50 |
| 1 | 88 | 165 | 0.12 | 0.50 |
| 1¾ | 93 | 255 | 0.19 | 0.50 |

NOTE: Chart based on removal by 24" x 24" polyester panels at 1200 CFM and ASHRAE test standard 52-76.

# PAD HOLDING FRAMES

Air Handler®

- Reusable
- Low maintenance required
- Available in 1" and 2" thicknesses

**Permanent pad holding frames** are constructed around a 24 gauge galvanized steel frame. The downstream side is 16 gauge, 1x2" galvanized welded wire, spot welded to the frame for added support. A hinged gate makes changing the pad easy, quick, and safe.

# ELECTROSTATIC AIR FILTERS

Air Handler®

CLASSIFIED UL R13458

Electrostatic air filters require no electrical hook-up; have self-generated charge. Permanent and washable. Fit into existing filter tracks. Include four layers of polypropylene media and sturdy roll-formed galvanized frame. Feature an arrestance rate of 90%. UL Classified as to flammability only Class 2 (R13458).

No. 5W896

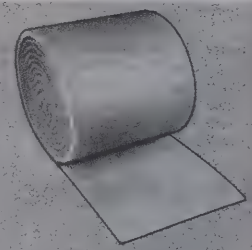
# MEDIA ROLLS

Air Handler®



CLASSIFIED UL R13458

No. 5W913
Air filter foam rolls

No. 5C431
Hog hair filter media rolls
Colored side is air entry

No. 5C440
Polyester filter media rolls
White side is air entry

## AIR FILTER FOAM ROLLS

- 30 Pores per inch (PPI)
- Wash or vacuum to clean

Can be used to replace disposable filters as a prefilter for higher efficiency electronic or media cartridge filters. Initial resistance: 0.15" W.C. @ 300 FPM. Recommended final resistance: 0.50" WC. Operating temperatures up to 350°F. UL Classified as to flammability; Class 2 (R13458).

## HOG HAIR FILTER MEDIA ROLLS

- All natural filter fibers permanently coated with a neoprene compound
- Scrim backing for rigidity
- Self-supporting, no frame required
- Washable media can replace odd size furnace filters
- Initial resistance: 0.15" W.C. @ 300 FPM
- Recommended final resistance: 0.50" W.C.
- UL Class 2 as to flammability only

## FIBERGLASS FILTER MEDIA ROLLS

Economical bulk rolls of 1" and 2" thick fiberglass filter material for replacing hammock type filters in furnaces and air conditioners. Rolls can be easily cut to required size. Recommended final resistance: 0.5" W.C. Fiberglass media is designed with a progressively denser configuration (air entry to air exit) and is coated with a tackifier to ensure maximum dust holding and filter efficiency. UL Classified as to flammability only; Class 2 (R13458).

## POLYESTER FILTER MEDIA ROLLS

Frequently used when fiberglass filters are not acceptable. Synthetic media is soft and easy to handle. Higher dust holding capacity than most fiberglass filters. Recommended final resistance: 0.5" W.C. Filter material withstands direct moisture and has an operating temperature range of -40 to 180°F. UL Classified as to flammability only; Class 2 (R13458).

## LINER PAPER/PROTECTIVE SHEETING

Air Handler®

No. 6W753

- Protective booth liner is high grade, fire retardant kraft paper
- Ideal for spray booths, welding areas, or potentially flammable operations
- Cut to desired size for walls and floors
- Meets state and local government requirements for EPA, NFPA Standard #33, OSHA Standard #1910.107

| Nominal Size | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|
| 36" x 300 ft. | 6W753 | $127.33 | $76.25 | 26.0 |
| 72 x 300 | 6W756 | 236.97 | 141.90 | 53.0 |

# EXPANDED PAPER OR FIBERGLASS PAINT COLLECTOR PADS AND ROLLS

Paint Collector Roll
No. 6B834

Paint Collector Pad
No. 6W747

**Expanded paper, standard capacity pads** have six layers of kraft media, each slit and expanded into a mesh with baffle-like surfaces. The layers with the larger baffled openings are positioned at the front of the collector. As the exhaust air passes through the collector, these larger front baffles cause the initial turbulence and surface contact removing the larger overspray particulates. The final layers incorporate smaller baffled openings which collect the vast percentage of the remaining particulates.

**Expanded paper, high capacity pads** provide excellent efficiency and very high holding capacity. The high capacity paint collector media utilizes eight layers of expanded kraft. The first three layers employ extremely large baffle openings for maximum particulate holding capacity. For use with a wide range of coatings and especially with heavier, tacky-type coatings, conventional coatings and in situations requiring extended service life.

**Expanded paper, high solid pads** employ both baffle and strainer principles and perform with high efficiency and excellent holding capacity. Pad incorporates five layers of expanded kraft media with multistage designed baffle openings and one synthetic layer. The synthetic layer provides high efficiency collection for a wider range of coatings. Excellent for use with high solids, waterborne coatings, or wherever high efficiency is required.

**Fiberglass paint collector pads** are economical to use. The 2½" thick media is progressively layered (air entering to air leaving) to enhance filter efficiency and service life. Loosely woven construction allows paint to load evenly without face loading. Pads are oversized to ensure a tight and positive seal in frame.

**Fiberglass paint collector rolls** are designed for use in all spray booth overspray applications and are especially useful in high production situations. All products meet state and local requirements for EPA, NFPA Standard #33, and OSHA Standard #1910.107.

## PAINT OVERSPRAY SELECTION GUIDE

| Coating | Standard Paper | High Capacity Paper | High Solid Paper | Fiberglass |
|---|---|---|---|---|
| Air-dry Enamels, Stains, Glazes, Fillers | Excellent | Excellent | Excellent | Good |
| Lacquers - Nitrocellulose, Sealers | Excellent | Good | Good | Excellent |
| Epoxies, Urethanes | Good | Excellent | Excellent | Poor |
| Asphalts, Fiberglass, Gel, Tar-like, Teflon, Vinyls | Good | Excellent | Good | Poor |
| Adhesives | Good | Excellent | Fair | Poor |
| Bake-dry enamels, Clear coats | Good | Good | Excellent | Good |
| Waterbornes | Good | Good | Excellent | Fair |
| High Solids Enamels | Fair | Fair | Good | Good |

NOTE: All coating types vary within product types due to viscosity, drying speed, etc. This guide is provided as a reference only.

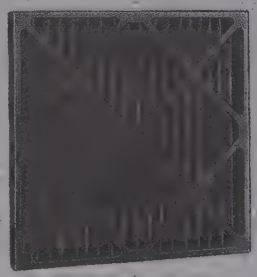
# PAINT COLLECTOR PAD HOLDING FRAME MODULES

- Holding frames, metal grids, and support rods allow proper installation of Paint Collector Pads
- Metal construction
- Holds up to 2 Paint Collector Pads per module
- Module components sold separately
- AirHandler brand
- Priced each. Sold in full cartons



| Item | Actual Size | Quantity | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|

SPRAY BOOTH MAKE-UP AIR FILTER: SEE PAGE 3534

# EXTENDED SURFACE PLEATED AIR FILTERS

## STANDARD CAPACITY PLEATED AIR FILTERS

Air Handler®

No. 5W967

CLASSIFIED UL R13458

- Average (ASHRAE 52.1-1992) Atmospheric efficiency of 20-25%
- 100% synthetic media, engineered for consistency
- Higher dust holding capacity than other industry pleats at the same nominal capacity rating
- 150°F maximum temperature
- Priced each. Sold in full cartons

**Applications:** Pleated air filters are widely used as pre-filters for higher efficiency filters or as final filters. When used as a pre-filter, these medium efficient filters will add substantially to the life of more expensive high efficiency filters. When used as a final filter, these filters will be up to 2½ times more efficient than conventional filters. The 100% synthetic pleated design offers greater dust holding capacity and longer life. Generally, the deeper the pleats, the longer the filter will last between filter changes.

**Construction:** The pleated filter pack is enclosed in a heavy-duty, moisture resistant die cut frame that will not crack, warp, or distort under normal operating conditions. The pleated media is a nonwoven 100% synthetic engineered media, reinforced with galvanized expanded metal. UL Classified as to flammability only; Class 2 (R13458).

Air Handler®

No. 6B930

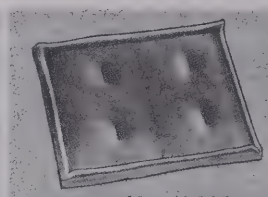
- Average (ASHRAE 52.1-1992) atmospheric efficiency of 20-25%
- 100% synthetic media, engineered for consistency
- 30-50% longer life and more media than standard capacity pleated
- Priced each. Sold in full cartons

**Application:** These high capacity pleated filters have the same filtration benefits and efficiency as standard capacity pleated. The high capacity pleated filters have more media and greater dust holding capacity, than the standard capacity pleated, when changed based on resistance.

**Construction:** The pleated filter pack is enclosed in a heavy duty, moisture resistant die-cut frame that will not crack, warp or distort under normal operating conditions. The pleat media is a nonwoven 100% synthetic engineered media, reinforced with galvanized expanded metal. UL Classified as to flammability only; Class 2 (R13458).

**LOOK FOR THE MANY NEW PRODUCTS WE HAVE ADDED!**

Check your frequently-ordered product categories for line extensions and new product offerings. Look for the "New Products" header at the top of the page and the "New" designation next to the stock number.

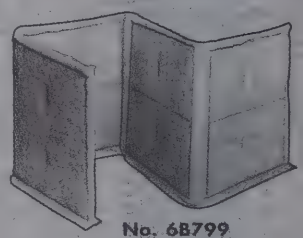


# CUBE, PANEL AND LINK AIR FILTERS

## 3-PLY RING PANELS AND LINKS

Filters utilizes three different fiber layers of 100% polyester. Each layer removes progressively smaller particles from the airstream. The second layer is treated with non-migrating tackifier to insure no dust migration downstream. A sturdy internal wire frame is heat sealed inside the polyester layers creating a self-gasketing filter. This filter was designed for high humidity applications, but performs well in all HVAC situations.

Panels are individual, single links. Link filters are a series of filters that are left connected to assure no bypass between filters in side access applications.



**Performance: Average efficiency, 25% (ASHRAE 52.1-1992). Common replacement for pleated air filters. Priced each. Sold in full cartons. UL Classified to flammability only; Class 2 (R13458).**

# ACTIVATED CARBON AIR FILTERS

## ACTIVATED CARBON HONEYCOMB DISPOSABLE FILTERS

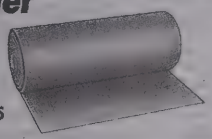
No. 6W735

Honeycomb Construction of 2" Filter

- **Dual function: absorbs odors and filters particulate**
- **Granular activated carbon**
- **Fully disposable, no refilling necessary**
- **Honeycomb construction ensures low air flow resistance**
- **Priced each. Sold in full cartons**

**Applications:** Dual purpose activated carbon disposable filters are designed to eliminate general odor and gas problems when concentrations are not heavy. Provides relief of odors created by cigarette smoke, industrial processes, vehicle exhaust, food processing copiers, and musty areas. These combination filters offer medium efficiency particulate filtration along with absorbent carbon for fume and odor removal. The granular activated carbon offers more odor removal capacity than carbon impregnated pleated air filters or rolls.

**Activated Carbon** acts like a porous sponge, collecting and retaining certain chemical compounds on its surface. The ability of activated carbon to absorb a gas or vapor is called its activity. Carbon used in these filters have a minimum carbon tetrachloride (CCL4) activity of 60%—it will absorb at least 60% of its own weight of CCL4 vapor under a standard set of test conditions. 150°F max. temperature.



**Construction: 1" Filters** are constructed using 1/2" honeycomb that contains approximately .7 pounds of activated carbon per square foot of face area. The 1/4" prefilter pad is constructed from high quality synthetic fibers.

**2" Filters** are constructed using 3/4" honeycomb that contains approximately 1 pound of activated carbon per square foot of face area. The 1" pleated prefilter offers medium efficiency and up to three times the life of conventional panel filters.

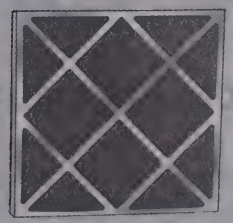
## ACTIVATED CARBON IMPREGNATED FILTER MEDIA PAD

Air Handler®



No. 5W095

**Polyester filter media impregnated** with activated carbon provides dual air cleaning functions. Media filters particulates and activated carbon absorbs odors associated with food storage, smoke, pets, or musty areas. Can be easily cut to size with scissors. Priced each. Sold in carton quantity

| Nominal Size H | W | D | Carton Quantity | Stock No. | List | Each | Shpg. Wt. |

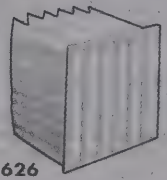
## CARBON IMPREGNATED PLEATED AIR FILTERS

Air Handler®

No. 6B899

- **Dual Purpose: Filters particulate and absorbs light odors**
- **Suitable for commercial and residential use**
- **Priced each, sold in full cartons**



**Applications:** Suited for residential and commercial use to help eliminate odors. Dual function filter offers basic particulate filtration along with an absorbent carbon for the removal of light odors created by cigarette smoke, pets, painting and musty areas.

**Construction:** The pleated media is an nonwoven cotton/synthetic impregnated with an activated carbon and reinforced with expanded metal backing. The pleated filter pack is enclosed in a heavy duty, moisture resistant die-cut frame that will not crack, warp or distort under normal operating conditions.

# SYNTHETIC AND FIBERGLASS POCKET AIR FILTERS

Air Handler®

CLASSIFIED UL R13458

No. 6B626

- Medium and high efficiency
- High dust holding capacity
- 13/16" galvanized steel header
- Available in synthetic or fiberglass media
- Priced each. Sold in cartons of 2.

**Applications:** For use in areas requiring a high degree of air cleanliness including hospitals, schools, industrial facilities and office complexes. Pocket filters excel in both dust holding capacity and filter efficiency. Greater dust holding capacity means longer service life and lower operating costs.

**SYNTHETIC MEDIA:** Replaces fiberglass pocket filters. Does not shed fibers downstream during shut-off or variable air flow. Synthetic media is stongly suggested for high humidity applications.

**FIBERGLASS MEDIA:** Ultra fine fiberglass media specifically designed for each efficiency range.

Construction: The 13/16" frame (header) is 24 gauge galvanized steel. Galvanized steel pocket dividers add significantly to overall strength of the filter as well as directing air evenly into each pocket. The media is supported on the air exit side by a reinforced backing material. Media is sewn together using an expanded string stitch to maintain uniform and accurate spacing. Each stitch is sealed with thermoplastic resin to prevent leakage. Double locked stitched edges for maximum durability and security. UL Classified as to flammability only; Class 2 (R13458). Two filters per carton.

## ACTUAL HEADER SIZE CHART

| Nominal (In.) | | | Actual (In.) | | |
|---|---|---|---|---|---|

# V-BANK MINI-PLEAT AIR FILTERS

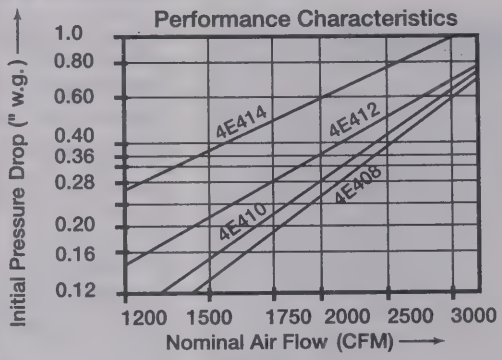
**Air Handler®**

CLASSIFIED UL R13458

No. 4E408

- **Energy saving**
- **Up to 3000 CFM**
- **Low pressure drop**
- **193 Sq.-ft. of active media area**
- **Operate in 100% relative humidity**
- **High dust holding capacity**
- **150°F maximum temperature**

**Fine dust-filters remove air contamination** such as fine dust, smoke, vapor, soot, pollen, and bacteria. Ideal for all standard filter applications, especially with increased demands regarding service life, safety, versatility, and low initial resistance.



**Maintenance-free and easy to install.** Fits all commonly used filter frames and housings; header size is 13/16", and requires only 12" depth for installation. Installation position, service side and course of air flow can be in any direction.

**Replace conventional bags and rigid filters.** Filter is especially suited for use in variable air volume systems.

**Compact size takes up less space,** yet large filter surface area (193 sq.-ft.) offers long service life and low initial resistance.

**Dust particles will not migrate** with inherently stable filter material. Mini-pleated filter captures submicron size particles. Glass microfiber paper resists moisture and does not shed fibers downstream. Self-supporting strong cellular structure has extremely high dust-holding capacity and can resist pressures up to 6" wg.

**95% D.O.P. "Hospital Grade" Filter Nos. 5W995 and 5W996** are more than 95% efficient on .3 micron size particles, new and clean. This filter is more than 8 times as efficient as a 95% ASHRAE filter when comparing penetration. The filter can be used in systems where HEPA filter performance is desired but where system limitations regarding fan capacity and air volume requirements of system do not permit use of high resistance, low volume HEPA filters. UL Classified as to flammability only; Class 2 (R13458).

## FILTER RUNNING COST CHART

This chart shows the relationship between air flow pressure drop and energy cost (Kwh) on the annual running cost. The lower the pressure drop, the lower the the running cost of an HVAC system.

| Initial Pressure Drop (In water gauge) | | 0.30 | 0.40 | 0.50 | 0.60 | 0.70 |
|---|---|---|---|---|---|---|
| Cost (Kwh) | $0.06 | $73 | $91 | $114 | $137 | $160 |
| | 0.08 | 91 | 121 | 152 | 183 | 213 |
| | 0.10 | 121 | 152 | 190 | 229 | 266 |
| | 0.12 | 146 | 183 | 229 | 274 | 320 |
| | 0.14 | 160 | 213 | 267 | 320 | 373 |

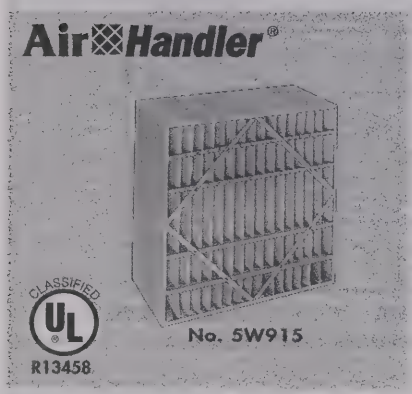
ASSUMPTION: 2000 CFM at all pressure drops running 8760 hrs. per year.

**EXAMPLE 1: Air Filter**

Clean pressure drop 0.40"wg
Cost of $0.06/kwh
Annual running cost $91

**EXAMPLE 2: Air Filter**

Clean pressure drop 0.60" wg
Cost of $0.06/kwh
Annual running cost $137



**CONCLUSION:**

| | |
|---|---|
| Filter 2 running cost | $137 |
| Less Filter 1 running cost | -91 |
| Running cost savings with Filter 1 | $46 (per filter) |

# HIGH EFFICIENCY EXTENDED SURFACE AIR FILTERS

## RIGID CELL FILTERS

- **Three efficiency ranges: 60-65%, 80-85%, 90-95%**
- **Media held in rigid format**
- **Priced each. Sold in full cartons**

**Disposable, medium and high efficiency air filters** offer long service life. Suitable for commercial buildings, schools, universities, hospitals, arenas, industrial installations.

**For upgrading current systems** as well as for new installations. Rigid, compact construction for variable air volume systems (performance is not affected by changes in air flow or by shut-down). Filter media is made of ultra fine glass fibers.

**The air exit side of the media is nylon reinforced** for media integrity. Metal support grid is bonded to the media to eliminate media fluttering while in operation. Metal grid also maintains the pleat configuration.

**Enclosure frame, or cell side is galvanized steel,** ensuring the filter a rigid and durable housing. Frame and media pack are sealed over 100% of the interior surface of the cell side. In addition, diagonal front and rear support members are attached to air entering and air leaving sides of the cell for added rigidity and protection. Media stabilizers reinforce and shape the media pleats, ensuring that configuration is maintained throughout filter life. Pleat design offers maximum media utilization and dust holding capabilities for extended filter life. UL Classified as to flammability only, Class 2 (R13458).

## CARTRIDGE FILTERS

- **Three efficiency ranges: 60-65%, 80-85%, 90-95%**
- **Priced each. Sold in full cartons**

**Designed for use in most HVAC applications:** industrial, commercial or institutional, such as hospitals, nurseries, food processing plants, pharmaceutical manufacturing, computer equipment rooms and electronic assembly areas. Filters remove bacteria, pollen, smoke, dust particles, and chemical pollutants from the air.

**Glass microfiber filter media** is an inherently stable filter material. Corrugated aluminum separators maintain even spacing between each media pleat and allows total unrestricted air flow to the entire media pack. Filter media is water resistant and can withstand intermittent exposure to water. Metal cell cartridge filters may be operated at temperatures up to 350°F.

**Filter frame cell sides and header** are of 24-gauge galvanized steel which helps eliminate handling damage and assures safe, long filter life. To protect filter against damage, the media pack is recessed from the frame edge. Header is $^{13}/_{16}$"H x $^{11}/_{16}$"D. UL Classified as to flammability only, Class I (R13458).

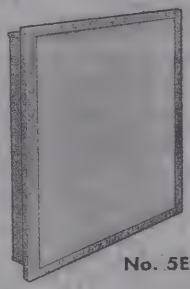
# MINI-PLEAT AIR FILTERS AND GASKETING

## 4" SLIM LINE MINI-PLEAT AIR FILTERS

- 114 sq. ft. of surface area
- High efficiency
- Compact, 4" depth
- Rugged galvanized frame
- Priced each. Sold in full cartons
- 150°F maximum temperature



**Fine dust filters** remove most airborne contaminations such as dust, smoke, soot, pollen, and bacteria. Versatile enough for all HVAC filter applications, especially those with high humidity and limited service space.

**Filters will fit in all commonly used filter frames and housings.** Header size is 13/16". Requires only 4" depth for installation.

**Replacement for conventional bag filters.** Large mini-pleat 114 sq.-ft. surface area allows easy upgrades with little or no additional pressure drop loss. Many bag filters, due to flexing of media, unload dirt in variable air volume systems. Mini-pleat filters, with stable filter material and rigid construction, are ideal for use with variable air volume systems.

**Replacement for conventional rigid filters.** Replace 12" deep rigid fiberglass wool filters and ASHRAE cell filters with this 4" deep filter. Humidification systems can ruin rigid filter by wetting the media. Mini-pleat glass microfiber withstands 100% humidity; moisture will not affect filter efficiency. 114 sq.-ft. of effective filtering media results in longer filter life and lower overall maintenance costs. UL Classified as to flammability only; Class 2 (R13458).

## 4" ECONOMY MINI-PLEAT AIR FILTERS

- For use in computer rooms
- 4" deep die-cut frame
- More efficient than 4" pleated filters
- Can operate in moderate humidity
- Priced each. Sold in full cartons

**Application:** Filters designed for applications requiring higher efficiency while having limited space. They fit in the same space as a 4" pleated filter. Ideally suited to provide secure, moisture resistant filtration for computer rooms or other controlled environments. Eliminates dust, smoke, pollen, and bacteria. Works well in most HVAC applications and offers more secure filtration than pocket filters in variable air volume systems.

**Construction:** The pleated filter pack is enclosed in a moisture-resistant, die-cut frame that will not crack, warp or distort under normal conditions. The pleated media pack is constructed of a glass microfiber filter media utilizing string separators and is sealed on all four sides to the filter frame. UL Classified as to flammability only; Class 2 (R13458).

# HEPA, BAFFLE, AND STEEL MESH AIR FILTERS

## HEPA AIR FILTERS

- **99.97% and 95% DOP efficiencies**
- **Metal construction**
- **Hospital grade**
- **For use in clean rooms**
- **Priced each. Sold in full cartons**

**Applications:** Provides high efficiency filtration for those situations that demand critical removal of particles from the airstream. Well suited for clean rooms, hospital operating suites, electronics manufacturing, and pharmaceutical production. For use in applications supplying controlled environment areas. Change filter when air flow falls below desired level.

**Construction:** Metal-galvanized frame. Media consists of a single sheet of microfiber paper available in two DOP efficiencies, 95% and 99.97%, and is supported by aluminum corrugated separators placed between each pleat of the media for maximum strength and minimum resistance. A urethane sealant is used to provide a positive seal on all four sides of the frame to eliminate potential air leaks. Standard neoprene rubber gasketing is applied to the downstream side of the filter. Each filter is individually tested. UL Classified as to flammability, Class I (R13458).

## BAFFLE GREASE FILTERS

- **Aerodynamic design**
- **Galvanized steel; self-draining; handles included**
- **Priced each. Sold in full cartons**

Applications: Permanent, easily cleaned baffle grease filters are designed for use in commercial-type kitchens found in hospitals, hotels, schools, and other institutional applications. Aerodynamic design maximizes the amount of grease captured and minimizes the amount of flame penetration. Balances air flow evenly throughout the exhaust hoods. Also used for replacement of mesh filters used in older hoods.

**Construction:** Rugged 20-gauge galvanized steel baffle design with drain holes. Includes two removable handles. Filter can be easily cleaned by soaking, spraying, or placing in dishwasher. Filter must be installed on an angle with baffles in vertical position. UL Listed to Standard AKUS.

(*) First dimension (H) indicates vertical height of baffle.

## ZINC-COATED STEEL MESH FILTERS

- **One piece frame**
- **Expanded steel mesh**
- **Rugged steel construction**
- **Priced each. Sold in full cartons**

Applications: Mesh filters are widely used as roughing filters in HVAC applications. For high velocity situations.

**Construction:** 2" thick mesh filters are constructed of steel for durability and long life. One-piece frame wraps around multiple layers of expanded corrugated mesh. Filter can be hose sprayed or run through dishwasher for cleaning. Optional handles, sold in pairs, snap on to filter flange without the use of rivets or bullets. Not recommended for applications where filters will be exposed to the outdoor elements. Not rustproof.

# TABLE AND DESK TOP FANS

## 9, 12, AND 16" OSCILLATING TABLE FANS

- **Quiet, lightweight, portable, table top oscillating fans for home, offices, hospitals, schools, and dormitories**
- **Direct air where you want it—tilting fan heads oscillate 90° or lock in non-oscillating position**

Fan bodies are impact resistant two-toned white and gray plastic. Chemical resistant polypropylene 3-wing fan blades. Bright zinc finished steel front fan guards with reinforcement rings snap into plastic back grill-no clips required. Comply with OSHA regulations.

**No. 4C523** has two-speed selection knob mounted on fan base. 120V shaded pole motor.

**Nos. 4C507 and 4C508** feature On/Off and 3-speed selection pushbuttons on front of fan base. 120V permanent split capacitor motor.

Fan blades and guards are unassembled. No tools required. 6-ft. 18/3 conductor cord with molded plug. UL Listed (E20739). Air King brand.

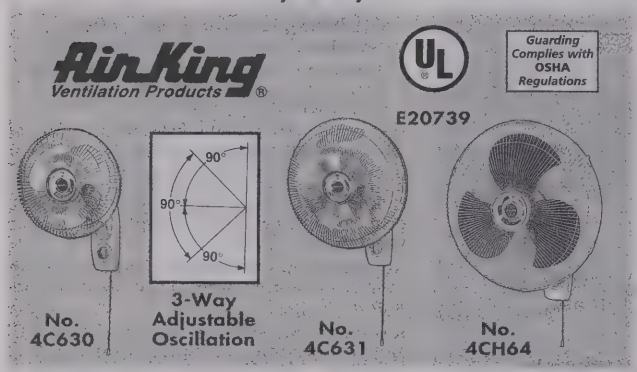
## TWO-SPEED 6" BLADE PERSONAL FAN

- **Small and portable; fits on desk or shelf**
- **Chemical-resistant polypropylene 3-wing fan blade**

**6" diameter personal fan** delivers 566 CFM on high speed; 488 CFM on low speed. Fan head tilts up and down. Two-speed rotary switch on rear motor cover.

**Fan body parts** are impact resistant white plastic. Fan guard is steel with a bright zinc finish.

**Overall dimensions:** 10⅜H x 6¼W x 8⅛"D.



**Quiet 2460 RPM shaded pole motor** provides non-distracting air flow. 120V, 60 Hz, 13 watts, 0.19 amps on high speed. 6-ft. 18/3 conductor cord with molded plug. UL Listed (E20739). Air King brand.(9146).

**No. 4C796.** Shpg. wt. 2.3 lbs. List $19.98.
Each .....$13.32

# WALL MOUNT, PEDESTAL, AND REVERSIBLE WINDOW FANS

## 12, 16, 18 AND 20" WALL MOUNTED FANS

- Powerful 3-speed motor
- Fan head oscillates 90° or locks in position; tilts to direct air flow
- 3-Way oscillation allows mounting close to corners
- Hardware included for wall mounting

Quiet fans for workshops, restaurants, health clubs, stores, classrooms, offices, and other areas where floor/table space is limited. Three position ratchet settings direct air flow into the room when fan is mounted close to a corner. White impact resistant plastic body. Three blade propeller is chemical resistant polypropylene. Front steel fan guard snap into plastic rear grill, no cups required. Complies with OSHA regulations. Three-speed control knob and pull cord. 120V permanent split capacitor motor. Six-foot, 18/3 conductor cord with molded plug. UL Listed (E20739).

**AIR KING LIMITED WARRANTY**

**Air King warrants motor three years, all other fan parts one year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

# PORTABLE BOX, FLOOR/TABLE, AND ROLLABOUT FANS

## 20" PORTABLE BOX FAN

- Quiet, high volume air mover effectively cools home, office, hospital, classroom, dormitory, and other areas
- Powerful 3-speed motor
- 20" diameter chemical resistant polypropylene five blade propeller with rounded edges
- Rounded housing corners and plastic grilles for added safety
- Rugged steel body; fan is shipped assembled

Attractively styled gray finished housing of durable steel for extended service life. White plastic fan guards front and rear comply with OSHA regulations. Easy-to-carry with top mounted carrying handle. Three-speed selection knob is top mounted for easy access. 120V, 60 Hz. Six-foot, 3-conductor cord with molded plug. UL Listed.

**ROLL-ABOUT STAND.** Fits No. 4CH71 fan listed above. Easy to assemble, adds height and portability. Powder coated gray. Rolls easily on 4" diameter rear wheels. Locking knobs secure fan during operation, allows fan head to rotate 360° to direct airflow. Stand raises fan 26 or 28" above the floor. UL Listed (E20739).

## 12, 18, 20" FLOOR/TABLE AND 18" ROLLABOUT FANS

- Powerful 3-speed motor
- 3-wing metal blade provides high volume air movement
- Fan head can be rotated 360°
- Made in U.S.A.

Fans provide multi-speed, high volume air circulation for cooling offices, homes, stores, and factories. Impact resistant black metal fan blade. 120V, 50/60 Hz, permanent split capacitor motors. Black epoxy powder coated steel fan guards comply with OSHA regulations. Three-speed rotary fan control knob is easily accessible on back of fan. 9 ft., 18/3 conductor cord with molded plug. UL Listed (E20739). AirKing Brand.

Nos. 3XJ42, 3XJ43 and 4TM62 Floor/Table Fans mounted on black epoxy powder coated tubular steel tilting base. Rubber scuff pads protect surfaces. Convenient carry handle. No assembly required.

**No. 3XK88 Rollabout Fan** is mounted on black epoxy powder coated steel rollabout stand with two height adjustments (26 or 28"H). 4" diameter rear wheels allow ease of movement. Tilting locks secure the fan during operation and allow fan head to rotate 360° to direct air flow. Fan can be used near windows for maximum ventilation. Easy to assemble.

# WHOLE HOUSE, COMPACT, DC, CLIP-ON, AND HASSOCK FANS

## 16" REVERSIBLE WINDOW FAN

AirKing Ventilation Products®

E20739

No. 4TM66 New

**AIRKING LIMITED WARRANTY**

**AIRKING warrants motor three years, all other fan parts one year. Text of warranty available on request. See "Manufacturers' Warranty" on page opposite inside back cover.**

Guarding Complies with OSHA Regulations

- **Fully adjustable thermostat with temperatures from 16° to 130°**
- **Powerful, permanently lubricated motor for quiet operation**

Fully adjustable thermostat, with manual controls provides optimal cooling comfort. The three-speed permanent split capacitor motor is electrically reversible for fresh air intake, or stale air exhaust. Easy to install, the fan can be mounted outside of window trim for shallow sill applications. Storm Guard™ feature enables fan to be mounted so that the window can be closed during inclement weather, or locked for added security. Features a convenient carrying handle for portability. White colored plastic housing. Front and rear guards comply with OSHA regulations. Three-wing impact resistant ABS fan blade. Fits windows 25¾" to 40".

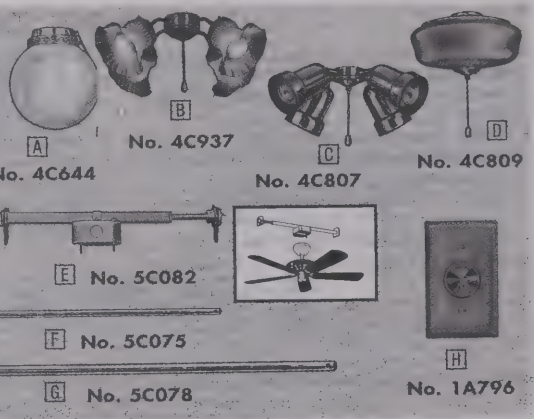
# DECORATIVE CEILING FANS AND ACCESSORIES



EMERSON

E136655

Replacement Parts Available 1-800-323-0620™

- **42" or 52" blade diameter stem-mount or flush mount snugger models available**
- **3-forward and 3-reverse speeds**
- **Reversible fan blades offer a choice of finishes**

Fans circulate cool air in summer and redirect warm air down in winter. Inductive motors with permanently lubricated ball bearings for long service life. All models are compatible with accessories listed below. Mounting hardware included. 120V, 60 Hz. UL Listed (E136655). Emerson brand.

**Stem Mount Fans.** Ball swivel hanger simplifies installation and offers wobble-free operation. For ceilings sloped up to 30°.

**Snugger Mount Fans.** For low ceiling applications where stem mount fans would not fit. Fan blades revolve only 7" down from ceiling. Switch cup projects only 7¾" down.

### EMERSON LIMITED WARRANTY

**Emerson Electric warrants fan and motor for 10 years. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## ACCESSORIES FOR DECORATIVE CEILING FANS

**ADD-ON LIGHTS FOR CEILING FANS.** Operate independently of fans. Packed separately from fans. Lamps not included. UL Listed (E136655). Emerson brand.

A **8" Globe light.** Accepts lamp up to 100 watts.

B **Victorian light.** Adds a touch of turn-of-the-century charm. Four ruffled tulip glass shades. Uses four 60 watt lamps.

C **Four spot lights.** Black bevel inserts and four-position switch.

D **Low profile light.** Gives the most floor to light kit clearance. Good for bedrooms, kitchens, and utility rooms. Emits soft, diffused light. Uses two 100 watt lamps.

E **CEILING FAN JOIST HANGER KIT.** Support residential ceiling fans where no overhead junction box exists or existing box cannot safely support 35 lbs. Also used for hanging fans between floors in multi-story buildings and in lower level of 2-story homes. Kit installs from below ceiling level. Adjusts to 16 or 24" rafter centers. Installation hardware included. Electrical junction box (included) meets building code requirements. Lasko brand.

F & G **CEILING FAN DOWN ROD KITS.** Lowers ceiling fan. Used in high ceiling entrances, solariums, cathedral ceiling rooms, and contemporary rooms with open balconies. 12 and 24" lengths. Tube steel construction. UL Listed (E136655). Emerson brand.

H **CEILING FAN SPEED CONTROL.** Capacitor type control has four speed settings. Fits standard single-gang box 2 x 4" and 1½ x 2" deep, with #14 wire. Check state and local codes for wiring requirements. Toggle face plate not included. 120V, 60 Hz, 1.5 max. amps. UL Listed (E136655). Emerson brand.

## CFM AND SONE RATINGS

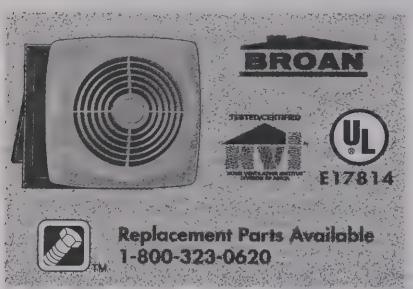
**Ratings for Broan Ducted Range Hoods and, Broan and Dayton Exhaust Fans**

**SONE** is an internationally recognized unit of loudness. Sones signify, in a single number, the total sound output of the unit being tested. One sone is approximately equal to the sound of a modern refigerator in a quiet kitchen. HVI rates home ventilating equipment in sones because sones are accurate, easy to use and compare. A 6-sone fan, for example, sounds twice as loud to the human ear as a 3-sone fan. HVI limits kitchen fans of up to 500 CFM to 9.0 sones and bathroom fans to 6.5 sones.

Multiple-speed fans must be rated for sound at top speed.

**AIR DELIVERY RATINGS** for ventilators are certified by the Home Ventilating Institute (HVI) (based on independent tests made by the Texas Engineering Experiment Station at Texas A & M University) and are rated in terms of cubic feet per minute (CFM). Ducted fans and hoods are rated at 0.1" static pressure; direct discharge wall fans are rated at 0.03" static pressure.

# WALL EXHAUST FANS



## 8 AND 10" AUTOMATIC WALL FANS

- Automatic backdraft damper with outside weather hood
- Adjustable housing fits 4½ to 9½" thick walls
- Plug-in, lifetime lubricated thermally protected 120V, 60 Hz motor
- Nos. 4C704 and 4C706 require switch (not included)
- Matte white polymeric grille can be painted to match any decor
- 8" fan, No. 4C705, includes built-in rotary On/Off switch
- UL Listed (E17814); HVI Certified
- Nos. 4C704 and 4C706 require switch (not included). Broan wall controls available. See page 3562

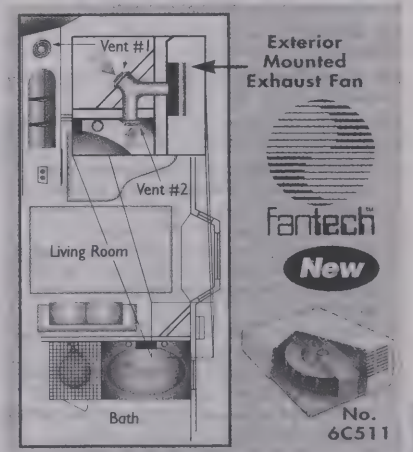
# REMOTE MOUNT EXHAUST FANS AND ACCESSORIES

## REMOTE MOUNT BATHROOM EXHAUST FANS

- **Quiet, efficient exhaust fans remove humid air from laundry rooms, bathrooms, showers and spas, and areas where spot ventilation is needed**
- **UL Listed for use in wet areas**
- **Remote mounting allows fan to be installed farther from room for quiet operation**

Aerodynamic fan housing of high impact plastic. Has a totally enclosed, 115V, 60 Hz, ball bearing motor with permanently sealed bearings and automatic reset thermal overload protection. UL Listed (E128817). CSA Certified.



**No. 6C509 and 3TJ96 Regular Exhaust Kits.** Provide one vent in one bathroom. For use with 4" (use No. 3C591) and 6" (use No. 5C201) duct (not included). Include one centrifugal fan, collar and grille, backdraft damper, fan mounting bracket, and four duct clamps.

**No. 6C510 and 3TJ95 Dual Exhaust Kits.** Provide two vents in one bathroom or one vent in two bathrooms using one fan. Attach to 6" (use No. 5C201) and 8" duct (not included). Include one centrifugal fan, two collar/grille combinations, two backdraft dampers, one fan mounting bracket, one Y-duct adapter to split duct to each grille, and eight duct clamps.

## EXTERIOR MOUNTED EXHAUST FANS

- **Remote mounted fan for residential and commercial exhausting and venting applications including bathrooms, laundry rooms, conference rooms, photographic dark rooms, kitchens, hot tubs or spas, locker rooms, and any room where ventilation is needed**
- **Dryer boosting/kitchen hood ventilation. Dryer applications are for extended dryer ventilation lengths exceeding 12 feet. Fan can operate in airstream temperatures up to 140°F**
- **Exterior mounting keeps noise away from living/working area; attaches to any side wall or gable end of roofing**
- **Requires only four or six inches of installation space for ducting—needs no roof jacks, louvered shutters or termination caps**
- **Totally enclosed, 115V, 60 Hz, motor with permanently lubricated sealed ball bearings and automatic reset thermal protection**

# BATHROOM FANS

## SINGLE-PORT AND MULTI-PORT IN-LINE VENTILATOR FANS

**Single-port fans** provide continuous, low level ventilation, improving overall indoor air quality. Remote installation combined with a quiet running, energy efficient motor.

**Multi-port fans** are efficient, versatile, and compact. Ideal for multiple unit dwellings and light commercial applications. All wiring and ductwork can be connected from outside the housing.

**All Fans Feature:**

- **High pressure, centrifugal blowers**
- **Single-Port: 6" inlet / outlet;**
- **Multi-Port: 4-4" inlet / 1-6" outlet**
- **Permanently lubricated permanent split capacitor motor for quiet operation and low power consumption**
- **Quick remove access panel for service requirements**
- **May be installed in ceiling, wall, or floor**
- **UL Listed; CSA and HVI Certified**

*However, wherever, you need to move air, we have the fans to do it.*

# SOLITAIRE® FANS, FAN/LIGHT AND NIGHT LIGHT

- Powerful, ultra quiet fans with low profile, modern styled grilles add a contemporary accent to bathrooms, small offices, conference rooms, and family rooms
- Easy to install; designed for use with 4" diameter round ductwork with tapered 4" round polymeric duct connector
- Non-yellowing white polymeric low profile grille. Nos. 5C187 and 5C188 feature torsion spring mounting
- Plug-in lifetime lubricated, low RPM motor with Neoprene anti-vibration motor mounts
- Dynamically balanced centrifugal blower wheel provides quiet, efficient performance
- Steel housing; 7⅝" height fits between 2 x 8" joists
- Adjustable mounting brackets span joists to 24" or mount directly to joist
- Nonmetallic damper reduces backdrafts without annoying clatter
- Stock No. 5C189 uses No. 5V600 100W incandescent lamp and handy No. 5V141 7W night light (lamps not included)
- No. 5C189 is Type IC rated
- All units AMCA Licensed and HVI Certified, UL Listed
- No. 5C189 fan/light/night light can be used with Nos. 5C098 brass or 5C192 chrome 3-function control; see page 3562
- UL Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit

(*) Performance shown is for models with outlet ducts, inlet grille and backdraft damper. RPM shown is nominal and the performance is based on actual speed of test. The sound ratings shown are loudness values in fan sones at 5 ft. (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type B: free inlet fan sone levels.

# SOLITAIRE® ULTRA SILENT® FANS AND FAN/LIGHT/NIGHT LIGHT

- Same as the Solitaire™ fans listed above, but with these added features:
- Non-yellowing white polymeric low profile grille. Nos. 4CK07 and 4CK09 feature torsion spring mounting
- Lower sound levels (Sones); high efficiency centrifugal blower increases air flow with virtually silent operation
- No. 4CK08 is Type IC rated; uses No. 5V600 100W incandescent lamp and handy No. 5V141 7W night light (lamps not included)
- No 4CK08 can be used with ivory color switch No. 5C999 3-function control with pilot light; see listing below
- All units are UL and UL Canada Listed; HVI Certified
- UL Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit

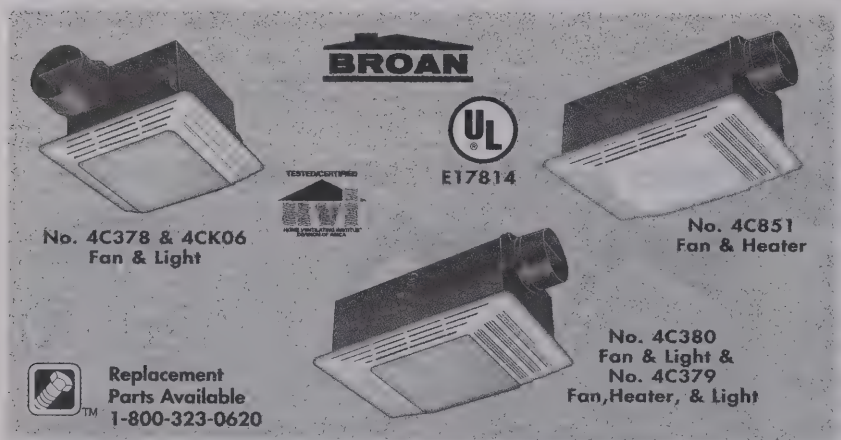
Ratings do not include the effects of duct and connection. (‡) Total connected load.

# BATHROOM FAN/LIGHTS

## SENSAIRE FANS AND FAN/LIGHTS

- Motion sensing or humidity sensing fans are useful for residential and public applications where automatic, hands-free ventilation is required
- Motion sensor turns on lights automatically upon entry; humidity sensor activates fan when it detects a rapid rise in humidity in showers or other damp environments—No. 5E829 is a combination motion/humidity sensing fan/light/night light
- Low RPM, neoprene mounted, lifetime lubricated motor
- Low profile, non-yellowing polymeric grille is 11½" square
- 4" round duct size
- Units can be adjusted to run for 5 to 60 minutes, then shut off automatically
- Type IC rated
- UL Listed, HVI Certified
- Housing size: 9¼L x 9½W x 7⅝"H
- For No. 5E829 use 3-way control switch No. 5E830, not included, see below



**3-Way Control Switch.** For use with No. 5E829 motion and humidity sensing fan/light/night light. Broan (77DW).
**No. 5E830.** Shpg. wt. 0.5 lbs. List $30.30.
Each ..... **$18.05**

(*) Uses 100W lamp and 7W night light. Lamps not included.

## COMBINATION LIGHT/FAN AND HEATER UNITS

- Light uses 100W lamp (not included)
- Snap-in plastic lens diffuses light evenly
- Plug-in heater provides 4436 BtuH of heat
- Convenient wiring junction box
- Steel mounting brackets for fast, sturdy installation
- UL Listed; HVI Certified
- Nos. 4C378, 4C380 and 4CK06 are Type IC rated and UL Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit

Engineered for high performance at low sound levels for residential bath and dressing rooms.

Nos. 4C378, and 4C380 have 2.0 amp electrical ratings and plug-in, permanently lubricated, 120V 60 Hz motor, 4CK06 1.5 Amps.

Nos. 4C379 and 4C851 have separate 120V, 60 Hz, plug-in, permanently lubricated motors for fan and heater which require 20 amp circuit and 2 or 3 rocker switches See page 3562 for wall controls.

# DESIGNER FAN/LIGHT AND NIGHT LIGHTS

- 100 CFM, 3.5 sones
- 4" round polymeric duct connector with long tapered sleeves for easy-to-install ducting
- Durable polymeric damper reduces cold backdrafts; no metallic chatter
- Spring-mounted "moonstone" glass lens gives consistent, non-yellowing lighting for bathrooms up to 95 square feet
- 100-watt lighting, 7-watt night light (bulbs not included)
- Type IC rated
- UL Listed for use over bathtubs and showers when connected to a GFCI protected branch circuit (except No. 5C097)

**Handsomely styled bathroom fans** combine a reliable exhaust fan with a bright overhead light and built-in night light. Rugged 8 x 8¼ x 5¾" steel housing with adjustable mounting brackets that span up to 24". Plug-in, thermally protected, lifetime-lubricated, 4-pole motor. Broan brand.

| Grille/Frame | Frame Dia. (In.) | Broan Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| White Painted Aluminum | 14⅝ | 712 | **5C207** | $149.68 | **$91.70** | 15.0 |

### FAN/LIGHT AND NIGHT LIGHT CONTROLS

Controls have three separate 120 volt, 60 Hz, 15 amp switches for "light," "night light", and "vent." Controls fit single gang box sized to NEC requirements. Broan brand.

**No. 5C098.** Control with polished brass wall plate and ivory control (65V). Shpg. wt. 0.5 lbs. List $28.69. Each ..... **$16.59**

**No. 5C192.** Control with polished chrome wall plate and white control (67V). Shpg. wt 0.5 lbs. List $29.72. Each ..... **$16.25**

# FLUORESCENT FAN/LIGHT

- Fluorescent lighting uses 75% less electricity than an incandescent lamp; qualifies for energy-use rebate from some local utilities
- Provides warm, pleasing light; snap-in plastic lens diffuses light evenly
- Plug-in PLC lamp is easy to replace (No. 4V302, not included)
- Plug-in lifetime lubricated, thermally protected motor
- White polymeric grille, 4" round duct; steel mounting flanges with keyhole slots for fast, sturdy installation
- HVI Certified, Type IC rated; UL Listed for use over bathtubs and showers when connected to GFCI protected branch circuit
- Broan wall controls available; see page 3562

# BULB-TYPE HEATER / VENTILATORS

Efficient instant-heat, infrared bulb-type heater fans widely used in bathrooms and dressing areas of residences, motels, and cabins. 120V, 60 Hz. Broan brand.

**No. 4C538 One-bulb Heater Fan.** UL Listed for 60°C wiring.

**No. 4C540 Two-Bulb Heater Fan.** UL Listed for 60°C wiring.

- Matte white molded plastic grille
- Bulb heater and ventilating fan operate independently or in combination (use either Nos. 1A773, 2C999, 6E899, 6E900 Multi-control or 1 or 2 separate rocker switches, available separately)
- Four-point adjustable mounting brackets span up to 24" and provide vertical and horizontal mounting adjustment
- Quiet, squirrel cage plastic blower wheel driven by plug-in permanently lubricated, shaded pole motor
- Quiet plastic damper prevents backdrafts
- 4" Round duct outlet
- 250W, R40 infrared lamp not included, see Stock No. 2V294
- UL Listed (E10687); HVI Certified

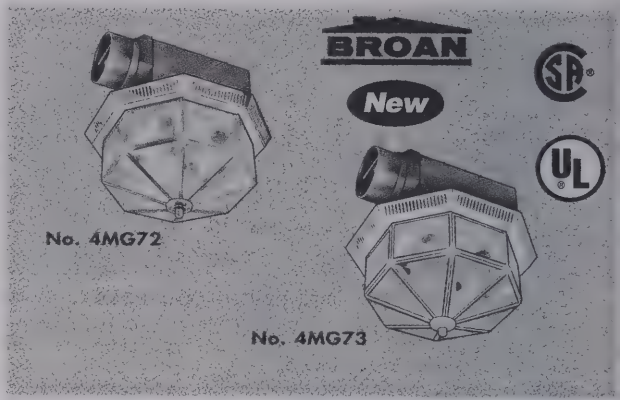
# RECOVERY FAN WALL CONTROLS, COMMERCIAL DUTY FAN AND FAN/LIGHT AND DUCT-FREE FAN



## DECORATIVE LIGHT FIXTURE/EXHAUST FAN

- **Polymeric blower wheel**
- **Rugged steel housing has corrosion resistant finish**
- **Sturdy keyholed mounting brackets for quick, accurate installation**

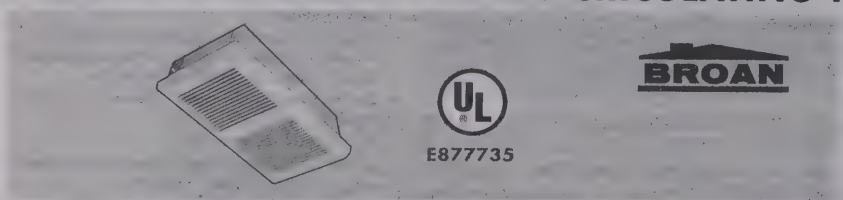
A powerful ventilating fan combined with a designer look make this light/exhaust fan the perfect choice for any bath. Features clear beveled glass panels in corrosion-resistant brilliant polished brass or gloss white. Powerful fan exhausts 70 cubic feet of air per minute via inconspicuous vent openings in fixture base. Produces 3.5 Sones. Tapered, polymeric 4" round duct fitting for easy, positive duct connection with no metallic clatter. Includes plug-in light fixture assembly and permanently lubricated motor. Uses four 25 watt candelabra base bulbs maximum (not included). UL Listed for use in insulated ceilings. Made in USA.

***New!*** **No. 4MG72.** Polished Brass. Broan brand (740BR).Shpg. wt. 16.0 lbs. List $166.34. Each ..... **$94.70**

***New!*** **No. 4MG73.** Gloss White. Broan brand (740WH). Shpg. wt. 12.0 lbs. List $164.67. Each ..... **$93.75**

## COMMERCIAL DUTY FAN AND FAN/LIGHT

- **Economical heavy-duty units designed for continuous operation in restaurants, convenience stores, gas stations, office buildings, and taverns**
- **Totally enclosed, cool running, low RPM motor with permanently lubricated bearings**
- **Rugged metal grille on fan**
- **White polymeric grille on fan/light can be painted to match decor**
- **4" diameter polymeric duct connector with built-in back-draft damper**
- **All housings 8L x 8¼W x 5¾"H**
- **Grille size: Nos 5E831 and 5E832, 10¼" Sq.; Nos. 5E833 and 5E834, 10⅝" x 11⅛"**
- **Built-in mounting bracket**
- **Pre-wired outlet box**
- **UL Listed for use over bathtubs and showers when connected for GFCI protected branch circuit**
- **Light models feature 100W lighting (lamp not included), Type IC, and plug-in receptacle for fan and light**
- **Broan wall controls available. See page 3562**



Broan Mfg. Co. certifies that the fans and fan/lights shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The sound ratings shown are loudness values in fan sones at 5 ft. (1.5M) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type B: free inlet fan sone levels.

# BROAN CEILING/WALL VENTILATORS

- Plug-in, continuous duty, lifetime lubricated, low RPM motors. 120V, 60Hz
- Eight-position mounting brackets for easy installation
- Can be field converted to in-line ventilators when In-Line Adapter kits are purchased
- 1/2" acoustic insulation for quiet operation
- Galvanized housing for corrosion resistance
- Use No. 4C964 if vibration hanging dampers are required
- Outlet duct connection includes dampers; can be converted from horizontal to vertical
- UL and cUL Listed (E17814/GPWV) and AMCA licensed
- Broan brand

Broan Mfg. Co., Inc. certifies that the ventilators shown herein are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 (and AMCA Publication 311 if sound is also certified) and comply with the requirements of the AMCA Certified Ratings Program.

The sound rating shown are loudness values in fan sones at 5 ft. (1.5M) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type B: free inlet fan sone levels.

# BROAN IN-LINE VENTILATORS

## IN-LINE VENTILATORS

- **Plug-in, continuous duty, lifetime lubricated, low RPM motors**
- **Access panel included–service or inspect unit without removing ductwork**
- **Eight-position mounting brackets for easy installation**
- **Galvanized housing for corrosion resistance**
- **Inlet and outlet duct size are same dimension**
- **cUL Listed (E17814/GPWV) and AMCA licensed**
- **Outlet duct connection includes dampers and can be converted from horizontal to vertical discharge**
- **Two-position electrical connection provides quick, simple wiring from either inside or outside of housing**
- **Nos. 4TR49 and 4TR55 are considered Cabinet Ventilators Use No. 4C964 if vibration hanging dampers are required**
- **Broan brand**

Broan Mfg. Co., Inc. certifies that the ventilators shown herein are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 (and AMCA Publication 311 if sound is also certified) and comply with the requirements of the AMCA Certified Ratings Program.

The sound rating shown are loudness values in fan sones at 5 ft. (1.5M) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type B: free inlet fan sone levels.

# BROAN ADAPTER, DAMPER AND GRILLE KITS

No. 4TR39

BROAN

New

No. 4TR40

## LOSONE IN-LINE ADAPTERS

- Allows ventilator installation in locations remote from air intake
- Galvanized metal, smooth rolled edges on all sides
- Installs quickly and easily in place of ceiling grilles

| For Use With Stock Nos. | Duct Size (in.) | Broan Model | *New!* Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **4TR42, 4TR44** | 6 | 961L | **4TP53** | $15.35 | **$10.00** | 2.0 |

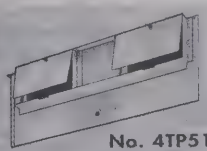
## CEILING RADIATION DAMPERS



- Conforms to National Fire Protection Association (NFPA) Standard 90A
- Rated for use in 1, 2, or 3 hour ceilings
- Quilted ceramic refractory material protects fan and duct work
- All-steel parts are galvanized for corrosion resistance
- Attaches directly to ventilator
- For horizontal mounting only
- UL Listed fusible link activates at 212°F
- UL Listed Standard 555C

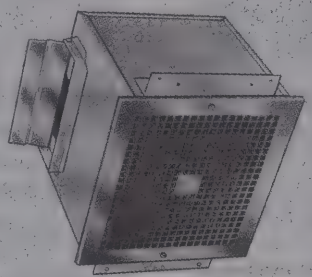
## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE



Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# EXTRA-QUIET CEILING EXHAUST OR IN-LINE VENTILATORS

A

Nos. 4C833 and 4C714

B

Acoustically Insulated Housing

Dayton®

E19455

13309

- Extra-quiet, high performance exhaust ventilators for residential, commercial, institutional, and industrial applications
- Factory assembled for right angle discharge, easily converts to horizontal or vertical discharge (except Nos. 4C833 and 4C714) for installation in ceiling and wall spaces
- All units (except Nos. 4C714 and 4C833) can be field converted to in-line ventilators with use of the Duct-Fan In-Line Adapter Kit listed on the following page
- Models with two-speed motors have wire tap leads for easy speed changes. Optional 2-speed switch No. 2X605 (not included).
- Single speed units can use variable speed controls listed below
- Molded white easy-to-clean snap-in grille has large free area and blends with any decor. Durable galvanized steel housing with integral backdraft damper
- 115V, 60 Hz motors are permanently lubricated and have overload protection and plug-in disconnects

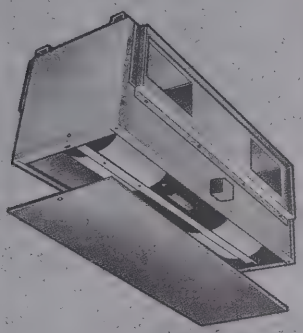
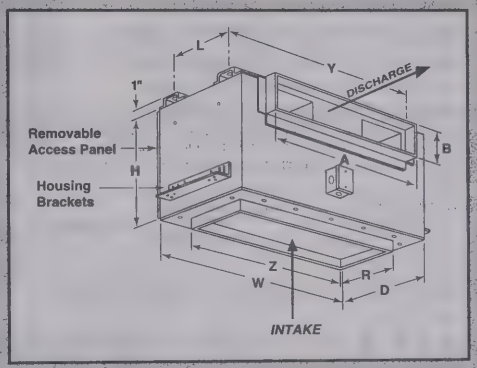
Dayton Electric Mfg. Co. certifies that all models shown herein are licensed to bear the AMCA Seal. The air performance ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211, and the sound ratings shown for all models except Nos. 4C417 and 4C883, are based on tests and procedures performed in accordance with AMCA Publication 311, and all comply with the requirements of the AMCA Certified Ratings Program. The sound ratings shown are loudness values in fan sones at 5 ft (1.5m) in a hemispherical free field calculated per AMCA Standard 301. Values shown are for installation Type B: free inlet, ducted outlet fan sone levels.

## DUCT-FAN IN-LINE ADAPTER KITS

- Kit allows simple conversion of Extra-Quiet Ceiling Exhaust Ventilators to In-Line Duct Fan right on the job site
- See complete listing on following page



*However, wherever, you need to move air, we have the fans to do it.*



# IN-LINE CABINET VENTILATORS

Dayton®

E53236

13309

Replacement Parts Available
1-800-323-0620

- Cabinet fans are designed for general exhaust or supply applications in commercial, institutional, and industrial buildings
- Twin centrifugal blowers are mounted in a 20 gauge steel housing
- Totally enclosed motors may be operated by variable speed controls (included)
- Permanent split capacitor motors are single-phase, ball bearing, permanently lubricated with automatic thermal protection
- UL Listed for Ceiling Space and Ducted Installations in accordance with UL Standard 705

Dayton Electric Mfg. Co. certifies that the in-line ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with requirements of the AMCA Certified Ratings Program. The AMCA Certified Ratings Seal applies to air performance ratings only.

# HEAT AND ENERGY RECOVERY VENTILATOR FANS

## RESIDENTIAL HEAT RECOVERY VENTILATOR FANS

- Provide fresh air during the heating season. Control excess moisture that causes window condensation and building structure damage
- Easy to install; mount to ceiling with hardware included
- Quiet operation, using a noise reduction design
- Efficient heat recovery
- Patented defrosting without negative pressure; drain included
- Built-in controls: ON/OFF/HIGH.
- Accepts optional override controls: dehumidistat No. 2E574; 60-minute timer, Nos. 5C190 and 6E902
- Integrated balancing dampers
- Easy to maintain and service with lifetime lubricated motor, washable filter, and quickly removable parts
- UL Listed, CSA and HVI Certified

**BROAN 2 YEAR LIMITED WARRANTY**

Broan Mfg. Co. offers a 2 year limited warranty on fans; 10 years on core. Text of Warranty available on Request. See "Manufacturers' Warranties" on page opposite inside back cover.

## COMMERCIAL HEAT RECOVERY VENTILATOR FANS

- Provide fresh air in light commercial applications such as smoking rooms, office spaces, garages, and fitness centers
- Compact units efficient temperature recovery with quiet operation
- Can be floor mounted, suspended with 3/8" rod, or suspended with rubber straps (included)
- Access door provided; all parts can be quickly removed for easy maintenance
- Polypropylene core; washable foam filters are 30% medium efficiency
- Permanent split capacitor, lifetime lubricated, sealed sleeve bearing motor
- Built-in controls: ON/OFF/HIGH. Accepts optional override controls: dehumidistat No. 2E574; 60-minute timer Nos. 5C190 or 6E902
- UL Listed, CSA Certified

## RESIDENTIAL ENERGY RECOVERY VENTILATOR FANS

- Provide continuous fresh air year round, help maintain proper moisture level during heating season, keep humidity outside in cooling season
- Easy to install; mount to ceiling with hardware included
- Quiet operation using inner noise reduction design
- Efficient recovery of heat and humidity; patented defrost system works without negative pressure
- Can be used with remote override controls. See Nos. 5C190 and 6E902 on page 3562
- Integrated balancing dampers
- Easy to maintain and service with lifetime lubricated motor, washable filters, and quickly removable parts
- UL Listed, CSA and HVI Certified

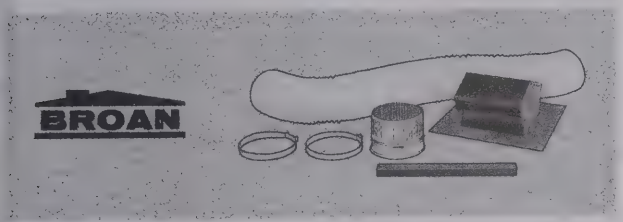
## VARIABLE SPEED CONTROLLERS



- Variable speed controller permits adjustment of air movement from 100% to approximately 50%
- Rated 120V, 60 Hz
- Can be used to operate more than one fan, if the combined total amps do not exceed the control rating
- Controls are suitable and intended only for use with specified ventilators as listed in the chart below
- UL Listed when used in combination with fan as listed
- Dayton brand

### VARIABLE SPEED CONTROLLER ORDERING DATA

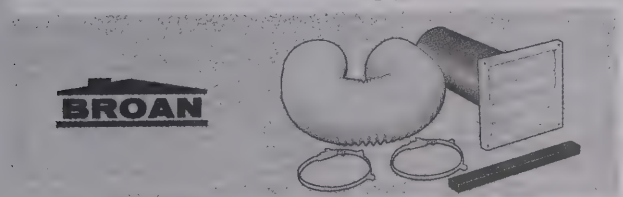
## FLEXIBLE ROOF DUCTING KIT



Kit includes the parts needed to roof-install 3 or 4" bath fans:

- Comes with Stock No. 2C905 Roof Jack for 3 and 4" ducts
- Roof Jack has built-in bird screen and backdraft damper; epoxy finish
- 4" diameter metal duct connector, two 4" clamps, 4" to 3" reducer; 8-ft. long, 4" dia. lightweight flexible ducting
- Broan brand (443)

**No. 5C105.** Shpg. wt. 3.5 lbs. List.....$36.02.
Each.....$19.71

## FLEXIBLE WALL DUCTING KIT

Kit includes the parts needed to install 3 or 4" bath fans in walls:

- Square louvered wall vent with rigid ducting on back
- Two 4" clamps, 4 to 3" foam reducer, and 5-ft. long, 4" diameter flexible ducting
- Broan brand (450)

**No. 5C106.** Shpg. wt. 1.5 lbs. List.....$20.96.
Each.....$11.45

## EXPANDABLE/FLEXIBLE ALUMINUM DUCTWORK

**One layer flexible aluminum ducting.** For use in ventilation equipment used for air and gas free of corrosive fumes or particles. Made of strong, lightweight 0.005" aluminum alloy. Bends by hand.

**Thread through open web trusses** and around obstacles. Duct can be installed within walls, wall chases, or ceilings where inaccessibility requires a duct for long term delaminating, erosion, or increased permeance.

**UL Air Duct Listed #MH12720.** Ductwork complies with NFPA Standards 90A and 90B for Class "O" fire hazard classifications. Internal temperature range up to 200°F. Continuous external temperature range up to 500°F. Stretchflex brand by Westaflex.

### EXPANDABLE/FLEXIBLE ALUMINUM DUCTWORK ORDERING DATA

# KITCHEN/BATH FAN SPEED CONTROLS AND SWITCHES

## FAN MOTOR SPEED CONTROLS*

Allows operation of kitchen and bath fans at any point between minimum and maximum fan motor speeds. Broan brand.

- **Rated 120V, 60 Hz, use only with thermally protected shaded pole or permanent split capacitor motors**
- **Nos. 4C254 and 6E898 have constant voltage lead for operating No. 4C707 Motordor fan; Nos. 4C331 and 6E897 are not recommended for No. 4C707**
- **UL listed (E104744)**

| Wall Plate Color | Max. Amps | Mfr's Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Ivory | 3 | 57V | **4C331** | $31.66 | **$16.37** | 0.4 |
| White | 3 | 57W | **6E897** | 31.66 | **16.37** | 0.2 |
| Ivory | 6 | 72V | **4C254** | 48.48 | **31.60** | 0.6 |
| White | 6 | 72W | **6E898** | 48.48 | **31.60** | 0.6 |

(*) Do not use with impedance protected motor.

## THREE FUNCTION CONTROL

- **3 Independent 120V, 15 amp rated rocker switches (20 amp total) for light, night light and fan**
- **Fits single gang box sized to NEC Requirements**
- **UL Listed (E149069) • Broan brand**

**No. 5C098.** Brass Finish Switchplate, Ivory Control (65V). Shpg. wt. 0.5. lbs. List $28.69. Each ..... **$16.59**

**No. 5C192.** Polished Chrome Finish Switchplate, White Control (67W). Shpg. wt. 0.5. List $29.72. Each ..... **$16.25**

## 3-GANG ROCKER SWITCH

Permits individual control of heater / fan / light units.

- **3 independent rocker switches each rated 15 amp at 120V (20 amp total)**
- **Fits single-gang box sized to NEC Requirements**
- **Broan brand**

**No. 2C999.** Ivory Wall Plate/Control (66V). Shpg. wt. 0.4. lbs. List $25.96. Each..... **$15.91**

**No. 6E899.** White Wall Plate/Control (66W). Shpg. wt. 0.5. lbs. List $25.96. Each..... **$15.91**

## DUAL ROCKER SWITCH

Controls two independent 120V, 15 amp circuits for On-Off operation of fan/light or heater/fan units (20 amp total).

- **Fits single-gang box sized to NEC Requirements**
- **UL Listed (E149069)**
- **Broan brand**

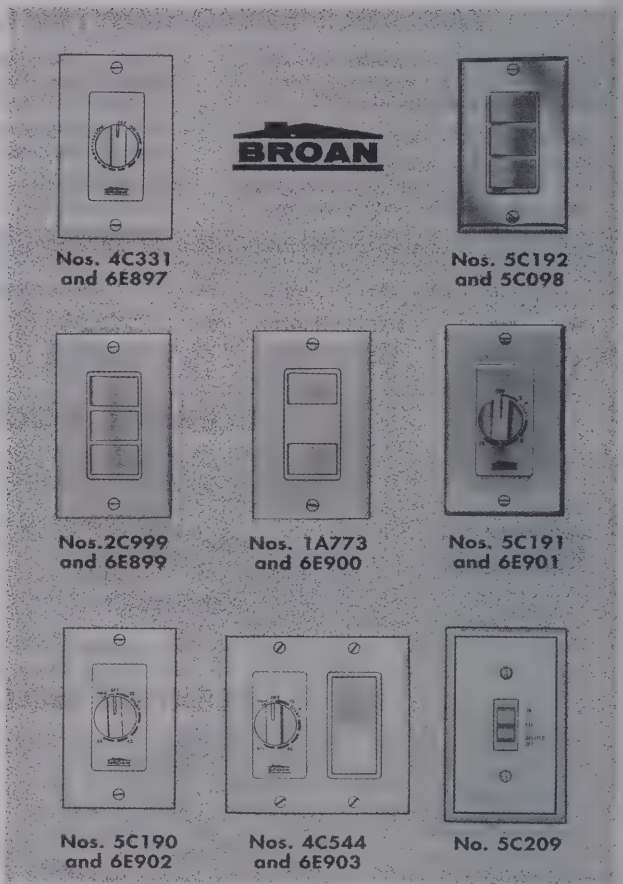
**No. 1A773.** Ivory Wall Plate/Control (68V). Shpg. wt. 0.4. lbs. List $21.72. Each..... **$12.37**

**No. 6E900.** White Wall Plate/Control (68W). Shpg. wt. 0.5. lbs. List $21.72. Each..... **$12.37**

## 15-MINUTE TIMER

- **Operates for any set period up to 15 minutes (no continuous "On" position)**
- **Fits single gang box sized to NEC Requirements**
- **Rated 12V, 20 amp, 240V, 10 amp capacity**
- **UL Listed (E104744) • Broan brand**

**No. 5C191.** Ivory Wall Plate/Control (61V). Shpg. wt. 0.5. lbs. List $41.00. Each ..... **$23.09**



**No. 6E901.** White Wall Plate/Control (61W). Shpg. wt. 0.4. lbs. List $41.00. Each..... **$23.09**

## 60-MINUTE TIMER

- **Operates continuously or for any set period up to 60 minutes; rated 120V, 20 amp**
- **Fits single gang box sized to NEC requirements**
- **UL Listed (E104744) • Broan brand**

**No. 5C190.** Ivory Wall Plate/Control (59V). Shpg. wt. 0.5. lbs. List $41.00. Each..... **$23.09**

**No. 6E902.** White Wall Plate/Control (59W). Shpg. wt. 0.4. lbs. List $41.00. Each..... **$23.09**

## TIMER WITH SWITCH

Combination 60 minute mechanical timer and On-Off rocker switch. Broan brand.

- **Fits two-gang box sized to NEC Requirements**
- **Timer has continuous "On" position**
- **120V, 20A, 240V, 10A timer/15A rocker switch**
- **UL Listed (E104744)**

**No. 4C544.** Ivory Wall Plate/Control (63V). Shpg. wt. 0.8. lbs. List $54.28. Each ..... **$33.05**

**No. 6E903.** White Wall Plate/Control (63W). Shpg. wt. 0.6. lbs. List $54.28. Each..... **$33.05**

## ADJUSTABLE TIME DELAY SWITCH

- **Fan and light operate together when control is turned on**
- **Fan continues to operate for a set time period (adjustable from 5-60 minutes) after light is turned off**
- **Center position turns fan and light off immediately**
- **Can be used with fan only**
- **Fits single gang electrical box**
- **120V, 60 Hz, 4 amp capacity for each fan circuit and light circuit**
- **Ivory color wall plate/control**
- **UL Listed (E104744) • Broan brand (64V)**

**No. 5C209.** Shpg. wt. 0.6. lbs. List..... $78.68. Each ..... **$55.60**

## WALL CAPS/ROOF JACKS FOR BROAN KITCHEN AND BATH FANS

### ROOF JACK WITH DAMPER

For use with 3¼ x 10" rectangular ducts or round ducts up to 8" diameter.

- Built-in bird screen with cushioned backdraft damper
- Opening is 10¼ x 10¾" with 14¼ x 18¾" flange
- Black epoxy finish
- Broan brand (634)

**No. 2C504.** Shpg. wt. 6.5 lbs. List.....$35.18.
Each.....$21.33

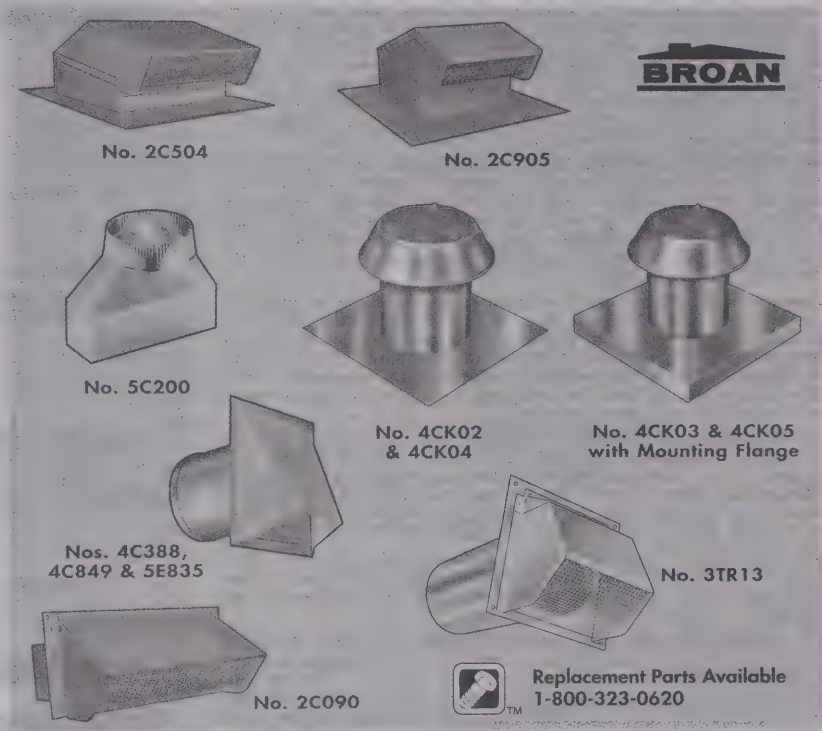
### ROOF JACK FOR 3 AND 4" DIAMETER ROUND DUCTS

- Built-in bird screen and removable damper
- Hood is 8¼ x 5¼ x 4⅜"
- Flange is 9¼ x 11"
- Black epoxy finish
- Broan brand (636)

**No. 2C905.** Shpg. wt. 2.2 lbs. List.....$20.14.
Each.....$11.60

### TRANSITION DUCTS

- Connects to 3 x 10" ventilators discharge flange
- 30-gauge galvanized steel construction



| Transition Duct Size (In.) | Broan Model | *New!* Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 3¼ x 10 to 7 Round | 412 | 4MG71 | $23.88 | $13.59 | 0.4 |
| 3¼ x 10 to 6 Round | 411 | 5C200 | 19.00 | 13.06 | 1.4 |
| 4½ x 18½ to 10 Round | 423 | 4TP55 | 54.00 | 35.30 | 11.0 |

### FLAT ROOF CAPS

For use with flat roofs or roofs with a very slight pitch.

- Rust proof aluminum construction
- Built-in bird screen
- Nos. 4CK02 and 4CK04 feature built-in flashing and long riser to keep out rain and snow
- Nos. 4CK03 and 4CK05 are similar to Nos. 4CK02 and 4CK04, but have flanges for mounting to curb

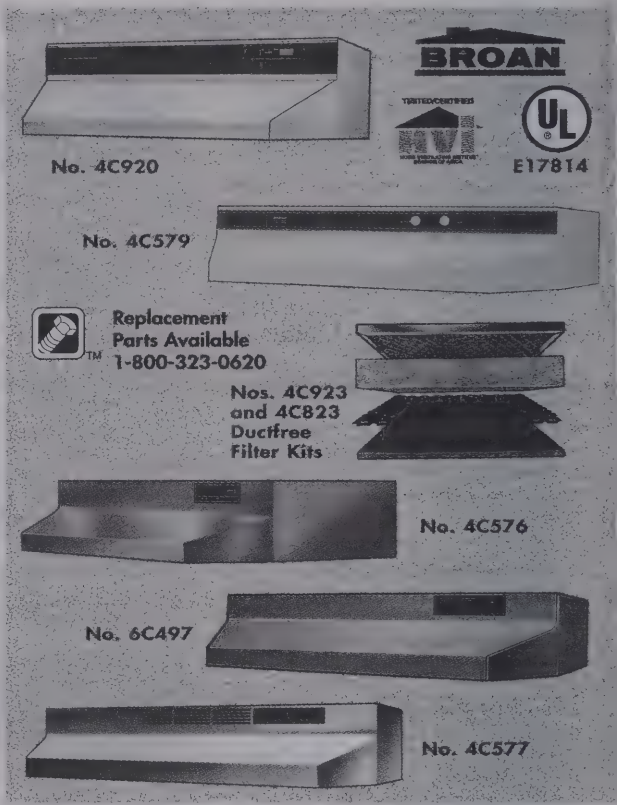
# 30" KITCHEN RANGE HOODS

**30" CONVERTIBLE IMPERIAL RANGE HOODS.** Can be installed ducted or ductfree. RHP index (59.09) is 65 times better than most ductfree hoods. Heat Sentry™ thermostat automatically turns blower on to high speed when excess cooking heat is detected. Speed slide control with solid state blower memory. Resilient motor mounts help reduce noise and vibration. Two-position light switch provides choice of bright cooktop lighting or softer, "night light" illumination. Twin 9¾ x 11½" aluminum filters trap grease for ducted installations. Duct connector with built-in damper uses 3¼ x 10" duct. UL Listed (E17814).



**30" CONVERTIBLE PRESTIGE RANGE HOODS.** Efficient dual blower with adjustable solid state speed control. Prewired, plug-in, lifetime lubricated motor. Two 11⅝ x 6⅝" washable aluminum grease filters efficiently trap grease on both sides of hood. Bright 75W light with molded high strength polymeric lens (lamp not included). Duct connector with built-in damper uses 3¼ x 10" duct. UL Listed (E17814).

**Optional Ductfree Filter Kits.** Covert range hoods above for ductfree installation. No. 4C923 for Nos. 4C920, 4C921, and 4C922. No. 4C823 Kit converts Nos. 4C578, 4C579, and 4C583. Multilayer design effectively traps kitchen pollutants down to 0.3 microns in diameter. Charcoal layer captures odor causing substances. Easy filter replacement. Includes twin sets of filters to trap airborne cooking particles. Broan brand.

**30" MEDALLION DUCTED RANGE HOODS.** Convenient rocker switches operate two-speed fan and light. 10½ x 8¾" washable aluminum grease filter. Powered by two-speed, prewired, plug-in, lifetime lubricated motor. Duct connector with built-in damper uses 3¼ x 10" duct. Bright 75W light fixture with molded polymeric lens (lamp not included). UL Listed (E17814).

**30" MEDALLION 7" ROUND DUCTED RANGE HOODS.** Washable 10½" diameter aluminum filter. Rocker switches operate two-speed fan and light. Bright 75W light fixture with molded polymeric lens (lamp not included). UL Listed (E17814).

**30" MEDALLION DUCTFREE RANGE HOODS.** Includes Microtek System I charcoal-type filter for ductfree installation. Louvered vent discharges air away from cabinet and user. Two-speed, prewired, plug-in, lifetime lubricated motor. Rocker switches operate two-speed fan and light. Bright 75W light fixture with molded polymeric lens (lamp not included). UL Listed (E17814).

# TURBINE ATTIC VENTILATORS

- **Wind powered ventilation**
- **Slightest breeze rotates turbine**
- **No electric current needed**

Turbine ventilators remove hot attic air in summer and moisture-laden air in winter. These are two causes of damage to roofs and attic insulation. Turbines rotate with a passing breeze and create a strong upward draft. Inside air is drawn out and exhausted outside. (✓) **Denotes energy efficient product.**

## 12" TURBINE VENTILATORS WITH BUILT-IN BASE

Dupont Delrin bearing system starts easier, and spins faster and longer in the slightest wind. Rust-resistant galvanized steel; ribbed blades add strength. Built-in adjustable base adapts for installation on 0/12 to 6/12 pitched roofs. 12" diameter throat. 17⅞" high. CertainTeed brand.

| Bracing | CertainTeed Model | Stock No. | List | Each | Shpg. Wt. |

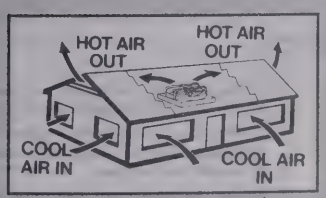
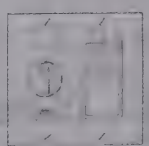
## 30 AND 36" ASSEMBLED WHOLE HOUSE FANS



No. 3C325



Dayton

E19455

Replacement Parts Available 1-800-323-0620

Includes 12-Hour Timer With 2-Speed Switch

- Fully assembled
- Air deliveries based on AMCA test standard #210
- 2-speed permanently lubricated ball bearing motor. 115V, 60 Hz, 1725/1140 RPM, Split phase, resilient mount
- Ball-bearing pillow blocks are self-aligning and prelubricated
- Quiet 5-blade steel fan propeller
- Includes two-speed switch and 12-hour timer.
- Includes wood plenum to simplify installation

**Fans remove hot, humid air** from living areas and draws in cooler outside air. Install horizontally in ceiling.

**18-gauge steel venturi panel** has welded tubular steel supports with gray enamel finish. Steel fan blade has red enamel finish. Unit comes with 1 x 6" wooden plenum and 3/4 x 7/16" adhesive-backed sponge rubber mounting strip for quiet operation. Shutter not included. UL Listed (E19455). Dayton brand.

**NOTE:** When selecting shutter, be sure that its overall dimensions will fit into the available space.

# POWER ATTIC VENTILATORS

## AUTOMATIC POWER ATTIC VENTILATORS

- **Delivers up to 1500 CFM; ventilates up to 2150 sq. ft.**
- **Low profile design is unobtrusive; blends into most roof designs**
- **Nos. 5M147 and 3C453 have 6 blades; Nos. 3C245 and 3C246 have 4 blade propeller**

Keep attic temperatures down and continually circulate air; can help extend roof and shingle life. Can also help save energy and money by reducing strain on air conditioning systems. No. 5M147 has a 25" gray plastic dome. Nos. 3C453, 3C245 and 3C246 have 25" steel domes with gray weather wood powder coat finish. Thermally protected motor is designed to prevent unit from overheating. Vents are 8¾" high with 24½" square flashing. Thermostat included. UL Listed. CertainTeed brand.

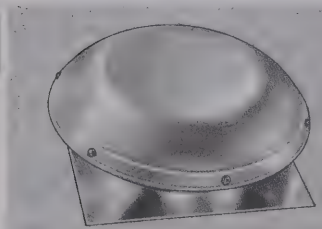
## AUTOMATIC POWER ATTIC VENTILATORS

E17814

No. 5C041

- **Removes hot, trapped air in summer and moisture laden air in winter; supplements air conditioning**
- **Automatic reset thermal protection, 120V, 60Hz lifetime lubricated motor**
- **Precision balanced 14" metal blade; maximizes air flow, minimizes sound**
- **Built-in adjustable thermostat operates automatically between 70 and 130°F**
- **Suitable for flat or slanted roof**

**Ventilator has a deep venturi** to deflect rain and snow. Mesh screen keeps out birds and large insects. Junction box prewired to motor.



**Polyvinyl chloride plastic dome** is 23¼" diameter x 8" high. Heavy gauge galvanized steel base flashing is 22¼" square. Requires 14⅜" cutout for installation. UL Listed (E17814). Broan brand.

## POWERED ATTIC VENTILATOR

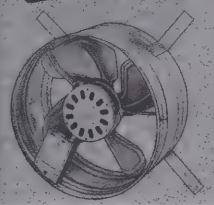
No. 4CH65

E61959 LR100550

CertainTeed VENTILATION

**CERTAINTEED 10 YEAR LIMITED WARRANTY**

CertainTeed Mfg offers a 10 year limited warranty. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.



- **Combination thermostat/humidistat control is included with ventilator**
- **Protects against damaging attic humidity in the heat of summer and the cold of winter**
- **Helps extend roof and shingle life; can also help reduce energy costs**
- **Vents are 8¾" high with 25½" square base flashing**

Features a thermally protected motor to protect against overheating. Includes a 25" steel dome with gray weather wood powder coat finish. CertainTeed brand.

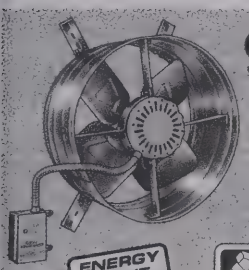
## GABLE MOUNTED ATTIC VENTILATOR

ENERGY RIGHT® BROAN UL E17814 TESTED/CERTIFIED HVI

Replacement Parts Available 1-800-323-0620



- Lowers attic temperature; reduces air conditioning cost
- Delivers 900 CFM when installed with standard HVI wood louver at 0.03"SP; 1140 CFM with Dayton automatic shutter, No. 2C520
- Thermally protected, lifetime lubricated motor
- Built-in automatic thermostat has 70 to 130°F range
- Motor and impeller easily serviced from attic

**Specially designed 14" metal blade** removes air efficiently from attic. Exhausts attic areas up to 1630 sq. ft. with the automatic shutter and up to 1285 sq. ft. with a standard wood shutter. Heavy gauge steel housing. Shaded pole, 120V, 60Hz motor. Overall dimensions: 15" diameter x 8" deep. Minimum air intake required: 1 sq. ft. per 300 CFM required. Mounting brackets included. 3.4 amp electrical rating. Broan brand (353).

**No. 4C671.** Shpg. wt. 12.00 lbs. List ..... $103.41. Each ..... **$49.90**

(✓) Denotes energy efficient product.

## GABLE MOUNTED VENTILATOR

CertainTeed VENTILATION

UL E61959 CSA LR100550

ENERGY RIGHT®

Replacement Parts Available 1-800-323-0620

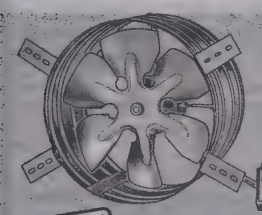
- Delivers up to 1250 CFM to ventilate up to 1800 sq. ft.
- All galvanized steel construction
- Thermally protected motor
- Includes thermostat

CERTAINTEED 5 YEAR LIMITED WARRANTY

CertainTeed Mfg. offers a 5-year limited warranty. Text of Warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Gable mounted ventilator** helps reduce air conditioning cooling costs by circulating and cooling hot air trapped in the attic. Helps extend roof and shingle life, too. Dimensions: 15" diameter x 5¾" deep.

**Galvanized steel construction.** Thermally protected motor helps prevent unit from overheating. No. 4CH66 shutter sold separately, see below. UL Listed. CSA Certified.



**AUTOMATIC GABLE SHUTTER.** Plastic shutter requires 16 x 17¾" cutout for flush installation. Uses a linkage strip for automatic open and close operation with gable mount fan. CertainTeed brand (SHT15W).

**No. 4CH66.** Shutter. Shpg. Wt. 6.0 lbs. List $55.75 Each ..... **$31.75**

## HEAVY DUTY GABLE MOUNTED VENTILATOR

CertainTeed VENTILATION

UL E61959 CSA LR100550

ENERGY RIGHT®

Replacement Parts Available 1-800-323-0620

- Industrial grade 1/6HP, 120V, 60 Hz motor
- 6-blade propeller
- Thermally protected motor
- Includes thermostat

CERTAINTEED 10 YEAR LIMITED WARRANTY

CertainTeed Mfg. offers a 10-year limited warranty. Text of Warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

**Eliminates hot air** trapped in attics, lofts, and other above ceiling areas. Reduces load on air conditioning systems for greater economy. Helps extend shingle durability and roof life.

**Ventilates areas** up to 2300 sq. ft.

**Thermally protected motor** is designed to prevent unit from overheating. Pre-wired for easy installation.

**Overall dimensions:** 15" diameter x 7¾" deep. UL Listed. CSA Certified. CertainTeed brand.

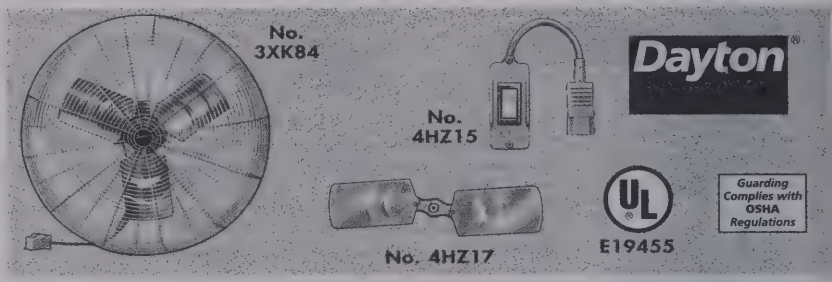
## HUMIDITY CONTROL FOR ATTIC VENTILATORS

UL E4436 CSA LR95329

**Provides automatic control** of attic ventilator to prevent humidity from exceeding selected relative humidity level. Range adjusts from 20-80% with 4-6% differential. External control has nylon element and snap action micro-switch rated 7.5 full-load amps @ 115V, 60 Hz.

**Bronze plastic cover** and metal adapter plate for vertical switch box mounting. Wiring diagram included. 4 11/16H x 2 5/16W x 1 7/8"D. UL Listed. CSA Certified. Honeywell brand (H46C100).



**No. 2E574.** Shpg. wt. 1.0 lbs. List ..... $102.57. Each ..... **$52.80**

# ASSEMBLED INDUSTRIAL DUTY AIR CIRCULATOR HEADS

## YELLOW ASSEMBLED INDUSTRIAL DUTY AIR CIRCULATOR HEADS

- Fans come completely assembled–saves labor and ensures proper and safe operation
- Yellow color in accordance with ANSI Standard Z53.1 which designates yellow for marking physical hazards
- Hinged guard allows easy maintenance
- Energy-efficient motor (low amp draw)
- Guards comply with OSHA Standard 1910.212, 1/2" max. opening requirement
- Factory wired 6-ft. power cord
- See Velocity Profiles on pages 3578-3582

**No. 3XK89.** Shpg. wt. 2.5 lbs. List.....$51.02.
Each .....**$31.40**

### REPLACEMENT PARTS AVAILABLE

**1/4 HP, 115V, 60 Hz Motor**

**No. 4HZ13.** Shpg. wt. 20.0 lbs. List.....$349.00.
Each .....**$209.25**

**Yellow Hinged Guard Set**

**No. 4HZ14.** Shpg. wt. 18.0 lbs. List.....$152.37.
Each .....**$93.55**

**2-Speed Drop Cord Rocker Switch**

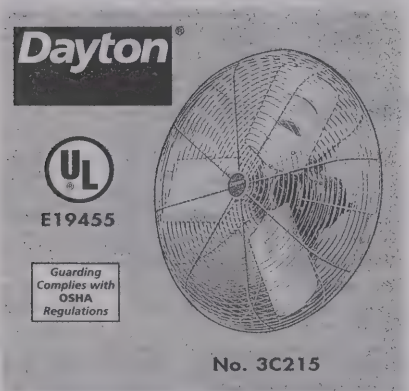
**No. 4HZ15.** Shpg. wt. 6.0 lbs. List.....$51.06.
Each .....**$31.40**

**24" 3-Blade Propeller**

**No. 4HZ16.** Shpg. wt. 3.0 lbs. List.....$58.12.
Each .....**$35.75**

**30" 2-Blade Propeller**

**No. 4HZ17.** Shpg. wt. 4.0 lbs. List.....$49.80.
Each .....**$30.60**



**Yellow Adjustable Floor Pedestal**

**No. 3XK86.** Shpg. wt. 37.0 lbs. List.....$196.77.
Each .....**$120.85**

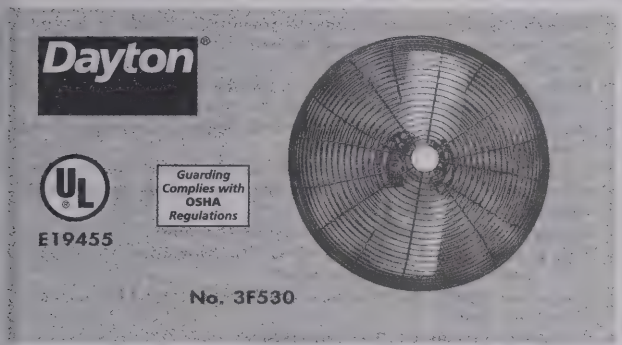
## ASSEMBLED INDUSTRIAL DUTY AIR CIRCULATOR HEADS

All industrial air circulator head motors are totally enclosed and suitable for use in dirty and humid environments such as factories, warehouses, manufacturing facilities, garages, and similar applications.



- Fans come completely assembled—saves labor, and ensures proper assembly and safe operation
- 115V, 60 Hz totally enclosed motors have pull chain switch and automatic reset thermal protection
- Guards comply with OSHA Standard 1910.212, 1/2" maximum opening requirement
- Circulator head secures to mounting with two bolts which provide a locking tilt adjustment
- Factory wired 10 ft., 3-conductor cord with grounded molded plug
- Oscillating fans adjust to cover areas from 0 to 90° arc
- Comply with UL 507 for stability with mountings listed on following page
- See Velocity Profiles on pages 3578-3582

Replacement Parts Available
1-800-323-0620

# ASSEMBLED COMMERCIAL DUTY AIR CIRCULATOR HEADS

Non-oscillating circulator heads are suitable for air circulation and cooling in clean environments such as schools, auditoriums, hospitals, large offices, and similar applications.

- **Use in clean, dry environments**
- **Single or 2-speed open dripproof motors are 115V, 60 Hz, with automatic thermal protection**
- **Factory wired 10 ft. 3 conductor cord with grounding type molded plug**
- **Stamped aluminum 2- and 3-blade propellers**
- **Polyester powder coated wire guards comply with OSHA Standard 1910.212, 1/2" maximum opening requirement**
- **Use with adjustable floor pedestal, wall/ceiling bracket, I-beam or suspension bracket mountings listed below**
- **See velocity profiles on pages 3578-3582**

## ASSEMBLED COMMERCIAL DUTY AIR CIRCULATOR HEADS ORDERING DATA

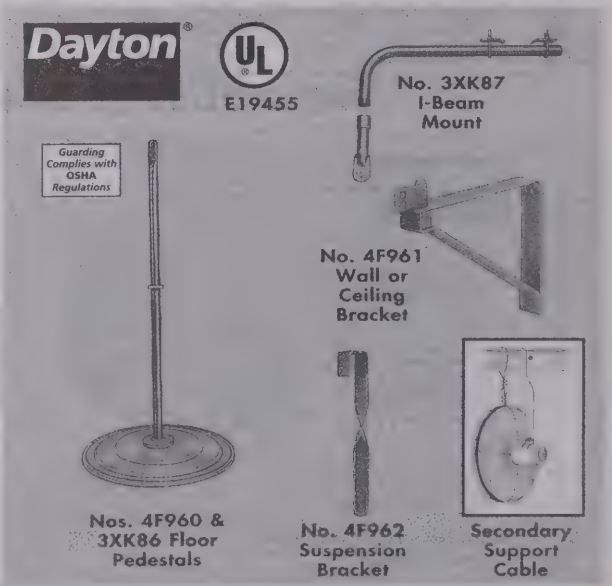
# AIR CIRCULATOR MOUNTING DEVICES

All mountings are UL Listed only with Dayton Air Circulators. Fit all Dayton, Fasco, Patton, and Airmaster brands of circulators; 3/8" and 1/4" diameter mounting holes accommodate all yoke mounted motors. For use with assembled head air circulators listed above and on page 3509



**GRAY FLOOR PEDESTAL No. 4F960.** 33" Diameter base. Adjustable column has large diameter tubing (2¼" bottom, 1¾" top) with locking height adjustment collar. Column height adjustment collar allows circulator heights from 3½ ft. up to 6 ft.; column secured by tapered fit between column and base. Shipped in one carton. Gray polyester finish.

**YELLOW FLOOR PEDESTAL No. 3XK86.** 33" Diameter yellow polyester powder-coated base for use with Nos. 3XK84 and 3XK85 air circulators. Adjustable column height from 3½ ft. to 6 ft; column secured by tapered fit between column and base. Shipped in one carton.

**WALL/CEILING BRACKET No. 4F461.** Mounts to walls, posts, or ceilings. Adjustable pivot bracket allows omni-directional air circulation. Includes secondary support cable for added safety. Gray color. **NOTE: Not recommended for use with oscillating circulators when ceiling mounted.**

**SUSPENSION BRACKET No. 4F462.** Use for mounting non-oscillating circulators from ceiling beams or rafters. Includes secondary support cable for added safety. Gray color.

**I-BEAM MOUNT No. 3XK87.** Use for mounting circulators from I-beams and columns. Length can be increased by adding a piece of standard 1½" threaded pipe between the I-beam mount and yoke adapter.

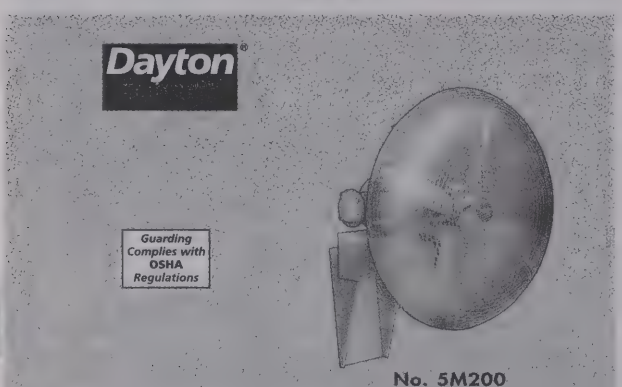
# WASHDOWN AND HAZARDOUS LOCATION AIR CIRCULATORS

## WASHDOWN AIR CIRCULATORS

- Provides both spot and general cooling in food, or beverage processing plants. Used in washdowns or other high humidity or wet environments
- Motor complies with BISSC, and NEMA definition MG1-1.26.5 Standard for waterproof motors
- Motor painting process uses both durable USDA-approved white epoxy primer and paint
- Totally enclosed air over (TEAO), single speed motor with automatic reset thermal protection and double-sealed ball bearings
- Stamped aluminum propeller resists corrosion
- Zinc plated guard comply with OSHA Standard 1910.212, 1/2" max. opening requirements
- Circulator heads feature locking tilt adjustment for directional air flow
- Circulator passes UL 507 spray test
- Mountings comply with UL 507 requirements for static load
- Supplied with wall bracket, (No. 4F961) for mounting on wall or post
- Optional suspension bracket with support cable, (No. 4F962) is available for ceiling mounting
- Both 20" and 24" units extend 22¾" from wall
- See velocity profiles on pages 3578-3582



Replacement Parts Available
1-800-323-0620

## HAZARDOUS LOCATION AIR CIRCULATORS

Replacement Parts Available
1-800-323-0620

- Provide both spot and general cooling in atmospheres containing flammable or explosive vapors, gases, or dusts as defined under article 500 of the National Electrical Code (NEC)
- Totally enclosed fan cooled (TEFC), single speed hazardous location, cap, start ball bearing motor with automatic reset thermal protection, UL Listed conduit box supplies with motor
- Motors only are UL Listed (E62643) for Class 1, Div. 1, Group D, and Class II, Div. I, Groups E, F, and G hazardous locations
- Zinc plated steel guards comply with OSHA Standard 1910.212, 1/2" max. opening requirements
- Spark-resistant cast aluminum propeller (5M200 - 4-blade propeller, 5M187 - 6 blade propeller)
- Supplied with galvanized steel wall bracket for mounting to wall or post
- Mounting brackets allow adjustment for multi-directional air flow
- Secondary support cable included for overhead mounting
- Fan not appropriate for use where paint residue can accumulate on motor or blade
- 24" unit extends 23⁷⁄₁₆" from wall; 30" unit extends 25⅛" from wall
- See velocity profiles on pages 3578-3582

# ASSEMBLED HEAD 208 & 277 VOLT AIR CIRCULATORS

Dayton

UL E19455

Guarding Complies with OSHA Regulations

Replacement Parts Available 1-800-323-0620

- Provide both spot and general cooling in warehouses, factories, machine shops, or offices
- Choice of 208 or 277 volt motor; especially convenient for wiring in conjunction with lighting systems and offers reduced amp draw. 277V can be wired into 3 phase "WYE" system
- 60 Hz, totally enclosed air over (TEAO) single speed ball bearing motor with automatic reset thermal protection
- UL Listed circulator; mountings comply with UL 507 requirements for static load
- See velocity profile on pages 3578-3582
- Steel guards comply with OSHA Standard 1910.212, 1/2" max. opening requirements
- Stamped aluminum propeller resists corrosion
- Circulator heads feature locking tilt adjustment for directional air flow
- Supplied with wall bracket, (Stock No. 4F961) for mounting on wall or post
- Optional suspension bracket with support cable, (Stock No. 4F962) is available for ceiling mounting
- 24"unit extends 23 7/16" from wall; 30" unit extends 25 7/16 from wall
- See Velocity Profiles on pages 3578-3582

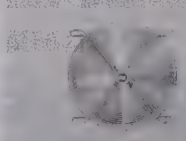
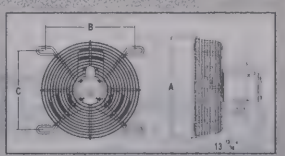
(*) Permanent split capacitor motor.



# TRANSFORMER COOLING FANS

- Provides forced cooling to reduce temperatures on oil-filled transformer radiators
- Guard Mount models feature a hot dip galvanized basket-type guard
- 16", 20" and 24" guard mount models can be replaced on most standard mounting hardware
- Tubular mount model features a 12-gauge zinc plated wire guard
- All guards are weather resistant and comply with OSHA Standard 1910.212, 1/2" max. opening requirements
- 115/230V, 60 Hz, single phase, totally enclosed air over (TEAO),permanently lubricated sealed ball bearing, permanent split capacitor motor with automatic overload protection
- Weatherproof motor designed for outdoor use; 1/2" shaft with rust inhibitor treatment and shaft-end bearing slinger to protect against dirt and moisture
- Class B insulation with Class A temperature rise for extended life
- Drain hole placed to eliminate condensation build-up inside the motor
- Includes weatherproof 8' power cord, pre-wired from factory for 230 volt operation (UL Recognized)
- Mounting kit includes mounting brackets, 19½" long threaded galvanized rods, and hardware



**No. 5M208.** Mounting Kit. Shpg. wt. 6.0 lbs. List $54.02. Each ..... **$36.15**

# INDUSTRIAL CIRCULATORS; CIRCULATOR GUARDS, MOUNTINGS, AND PROPELLERS

## GREENHOUSE CIRCULATORS

**Provide constant temperatures.** Designed for horizontal air flow that can assist with elimination of hot and cold spots throughout the building, condensation problems, and heat loss since stratification of warmer air is practically non-existent.

- **60 Hz, 115V totally enclosed motor with automatic thermal reset protection**
- **Variable speed motor for year-round air circulation**
- **White powder coated wire guard for reduced shadowing and improved corrosion resistance**
- **Guards comply with OSHA standard 1910.212, 1/2" max. opening requirement**
- **High efficiency tilted two-wing propeller**
- **Fan comes assembled with mounting chain**

### OPTIONAL VARIABLE SPEED CONTROLLER

***New* No. 4TM32.** Optional variable speed controller.. Shpg. wt. 0.5 lbs. List $30.69. Each.....**$18.38**

## AIR CIRCULATOR GUARDS

**Two-piece close mesh wire guards** for circulating fans. Front section snaps on rear section firmly and easily. Mount to motor thru-bolts on yoke mounted or rigid base motors. Cradle type motors cannot be used; see Index under Fan Parts, Motor Straps for appropriate yoke-type motor mounting straps. Rear section of guard has four mounting slots to accommodate motor thru-bolts, see diagram (right) and table below. Gray moisture resistant coating. Dayton brand.

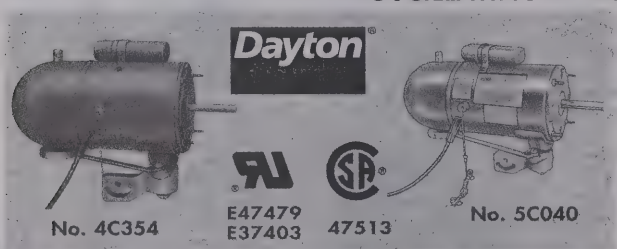
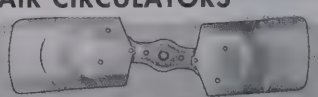
- **Easy to install; can be used to replace most open mesh guards**
- **Comply with OSHA regulations**



Dayton

**Mounting slot O.C. dimensions. See table for minimum and maximum range.**

## OSCILLATING AIR CIRCULATOR MOTORS



**Typical Uses:** No. 4C354 for use on Dayton 20 and 24" oscillating fans. No. 5C040 for use on Dayton 30" oscillating fans. **Special Features:** Hardened metal precision gearing and durable clutch assembly. Four extended studs 3⅝" OC for mounting guard. 10 ft., 3-conductor cord with grounding type molded plug. Can run 90 or 45° sweep or fixed position. Two-speed pull chain switch. **Motor Type:** PSC. **Enclosure:** TEAO. **Thermal Protection:** Auto. **Finish:** Gray enamel.

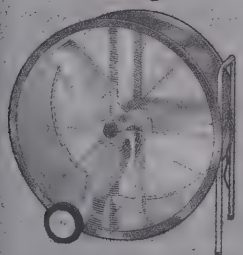
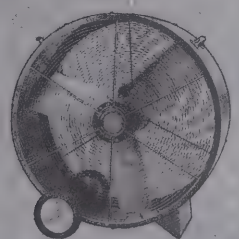
Dayton® UL® E19455

Guarding Complies with OSHA Regulations



Made in U.S.A.



No. 3C991

No. 3C187

No. 3C674

No. 3F301

Replacement Parts Available 1-800-323-0620

No. 3C995 Tilting Kit

## AGRICULTURAL DUTY 36" DIRECT-DRIVE CIRCULATOR

- 9280 CFM at 825 RPM
- UL Listed (E19455) for use in agricultural buildings
- All galvanized construction for corrosion protection
- Optional tilting kit available, Stock No. 3C995; see below

**All electrical connections** are enclosed with gaskets to resist moisture. TEAO, 1/2 HP, 115V, 6.4 amps permanent split capacitor motor with sealed and shielded ball bearings. Direct-drive eliminates pulleys or belts that need to be adjusted or replaced. Intake and exhaust guards comply with OSHA regulations. 8 ft. power cord stores in handle when not in use. Dayton brand.

**No. 3C991.** Shpg. wt. 110.0 lbs. List $772.50. Each ..... **$535.00**

## 36" AND 48" HIGH-VOLUME AIR CIRCULATORS

- Rubber casters for easy movement
- Guards comply with OSHA Standard 1910.212, 1/2" maximum opening requirement
- Two-speeds; 115V, 60 Hz open type ball bearing motors with automatic thermal protection
- See Velocity Profile charts AA and BB, page 3581

**High volume, heavy-duty 2-speed mobile air circulators** for cooling factories, warehouses, laundries, garages, and loading docks. Balanced 5-wing steel propeller and matching deep venturi assure high efficiency and quiet operation. Self-aligning, prelubricated ball bearing pillow blocks. Cast iron drive sheaves. Heavy gauge steel housing with dark gray polyester finish. Sturdy tubular steel handle stores cord and protects switch. 10 ft., 3-conductor cord with grounded molded plug. Shipped completely assembled. Made in U.S.A. UL Listed (E19455). Dayton brand.

## 36" HIGH-VOLUME DIRECT-DRIVE CIRCULATOR

- 9280 CFM at 825 RPM
- TEAO (Air Over) ball bearing motor
- 20 gauge steel housing with dark gray enamel finish; 36" diameter 3-wing red steel propeller
- Guards comply with OSHA Standard 1910.212, 1/2" maximum opening requirement
- Optional tilting kit available, Stock No. 3C995; see below
- See Velocity Profile chart CC, page 3581

**High volume, heavy-duty circulator** for use in factories, garages, warehouses, and similar buildings. Can operate in dirty environments. 1/2 HP, 115V, 60 Hz, 6.4 amp, totally enclosed motor. Direct-drive construction eliminates maintenance required with belt and pulley driven models.

**Overall dimensions:** 40½H x 39½W x 14"D. 7" dia. wheels. Tubular steel handle stores cord and protects power switch. 10 ft., 3-conductor cord has grounded molded plug. Shipped fully assembled except wheels; install with pushnuts provided. Made in U.S.A. UL Listed (E19455). Dayton brand.

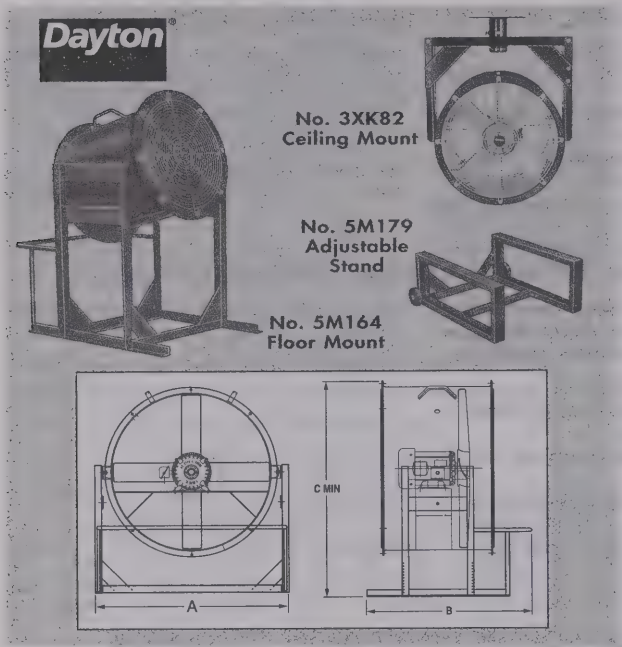
**No. 3C674.** Shpg. wt. 110.0 lbs. List $745.19. Each..... **$461.00**

## 30" ROUND MOBILE CIRCULATOR

- 5150 CFM at 825 RPM
- 1/3 HP open dripproof sleeve bearing motor with automatic reset thermal protection
- 20 Gauge steel housing with dark gray polyester finish; 3-blade aluminum propeller
- Guards comply with OSHA Standard 1910.212 1/2" maximum opening requirement
- See Velocity Profile chart DD, page 3581

**Medium volume, heavy-duty circulator** for use in factories, garages, warehouses, and similar buildings. 1/3 HP, 115V, 60 Hz, 4.5 amp, 825 RPM motor. Direct-drive construction eliminates maintenance required with belt and pulley driven models. Overall dimensions: 33H x 31W x 18"D. 7" dia. wheels. Aluminum handle. Cord storage bracket prevents cord tangling. 10 ft., 3-conductor cord has grounded molded plug. Shipped fully assembled except wheels (install with pushnuts provided). Made in U.S.A. UL Listed (E19455). Dayton brand.

**No. 3F301.** Shpg. wt. 55.0 lbs. List $586.67. Each..... **$351.50**



## MOBILE AIR CIRCULATOR TILTING KIT

**Easy to assemble kit** allows direct-drive mobile fans Stock Nos. 3C674 and 3C991 (listed above) to roll easily and tilt to any angle—provides air flow in direction desired. Creates a stable platform.

Made of 1" diameter, 16 gauge galvanized steel tubing with heavy gauge steel parts. Dayton brand.

**No. 3C995.** Shpg. wt. 18.0 lbs. List $226.89. Each ..... **$135.90**

# HIGH VOLUME, HIGH VELOCITY INDUSTRIAL FANS

- **Provide dependable service in severe operating conditions such as factories, foundries, and steel mills**
- **Guards comply with OSHA 1910.212, 1/2" maximum opening requirement**
- **Spark resistant cast aluminum propellers**
- **Ceiling mount fans tilt and swivel**
- **Optional stand (No. 5M179) with casters for added height and mobility**
- **See Velocity Profiles, pages 3581–3582**

**Fans are available in two styles—floor mount with non-tipping base or ceiling mount.** The non-tipping base allows two mounting heights—low and medium. Both fans feature welded steel drum with gray polyester finish. Drum can be tilted up and down to direct air flow. Totally enclosed, continuous standard duty, ball bearing motors. Factory wired 2 ft. long pigtail (SJOW) provided for hard wiring of fan.

**OPTIONAL ADJUSTABLE STAND.** Adds 14¾" of operating height when used with floor mount base models. Casters allow extra mobility. Stand width is adjustable to accommodate 18, 24, 30, and 36" diameter high velocity fans. Heavy gauge steel construction with powder coat finish.

**No. 5M179.** Shpg. wt. 120.0 lbs. List ..... $362.40.
Each ..... **$248.25**

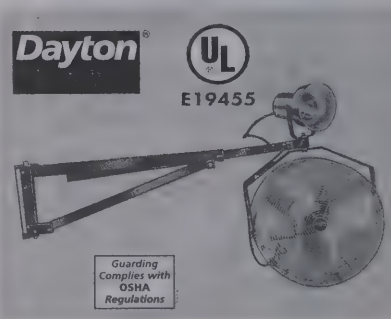
# DOCK FAN WITH LIGHT

**Designed for tough indoor use** for ventilation of personnel working in and around semi-trailer trucks and docks.

**Delivers 3150 CFM (high) and 2330 CFM (low)** air speeds. Average air velocity is 1340 FPM and 995 FPM. 20" aluminum propeller with OSHA guards. Galvanized steel housing has baked on gray polyester finish.



**Fan Motor.** 1/4 HP, two-speed, 115V, 60 Hz totally enclosed permanent split capacitor motor with ball bearings operates at 2.9 amps maximum.

**Fan Arm.** Adjustable wall mounting arm extends from 40 to 60". Self-contained outlets for the fan and light are located at arm end. Fan and light are fully adjustable–no tools or knobs needed. Vulcanized fiber friction washer keeps arm from unwanted swinging. Wall mounting bracket included.

**Light.** Safety yellow with heavy gauge aluminum shade. High temperature porcelain socket rated for 120 VAC. Requires medium screw base, type R, 300 watt maximum lamp (not included). UL Listed. Dayton brand.

**Optional Accessories.** No. 2V411, 300W lamp. No. 2V925 Lamp guard. No. 2V926 Glare Shield. See Index under Lamps, Reflector; Guards, Lamp; Shields, Glare.

**No. 6C660.** Shpg. wt. 63.0 lbs. List ..... $890.37.
Each ..... **$547.00**

*However, wherever, you need to move air, we have the fans to do it.*

# EVAPORATIVE COOLING FANS AND AIR VELOCITY PROFILES

## PORT-A-COOL EVAPORATIVE COOLING FAN

**Designed for use when air conditioning** is cost prohibitive, impractical, or unavailable. Cools in areas of manufacturing plants, mechanics' garages, military bases, and gymnasiums. Provides effective spot cooling in horse stables, dog kennels, and a variety of other locations. Effectively cools certain types of equipment such as generators and compressors. Operates by connecting to 115V power supply and water. As hot air is pulled through the water-soaked cooling pads, cold air is released through the fan. 36" housings hold 17 gallons of water, 24" housings hold 11 gallons, and 16" holds 3 gallons. Water can be supplied by garden-type water hose. Fans feature one-piece polyethylene plastic housing. Heavy-duty galvanized fan. High efficientcy rigid evaporative media. 24" and 36" fans roll on heavy-duty ball bearing casters.

### PORT-A-FILLER WATER TANK

Optional 50 gallon portable water tank to be used with all Port-A-Cool units.

| Water Tank Fits Stock No. | General Shelters Model | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|---|
| **1K547, 1K551, 1K553** | PAC-ACC-01 | **2BV52** | **$395.00** | 61.0 |

### REPLACEMENT MEDIA

**Superior evaporative cooling pads** composed of kraft paper impregnated with thermosetting resin and formed with cross-corrugated sheets. Provide even water and air flow with no sagging, gapping or fouling problems. Pads are energy efficient, and provide consistent performance over a very long life. Self-supporting, highly absorbent, and easily cleaned.

| Media Fits Stock No. | Dimensions (Inches) | General Shelters Model | Stock No. | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **1K547, 1K551, 2BV51** | 48 x 12 x 6 | PAD6048 | **1K543** | **$52.00** | 4.2 |

## PORT-A-COOL™ PORTABLE PNEUMATIC COOLING SYSTEMS

- **Welded steel support frame**
- **Durable one-piece molded polyethylene plastic housing**
- **3/4" garden hose connection supplies water**
- **Flexible capabilities for ducting**
- **Unit and water supply are both portable**

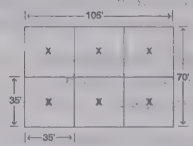
# SELECTION/PLACEMENT DATA AND ADJUSTABLE CONTROLS FOR DAYTON CEILING FANS

**Dayton Commercial/Industrial Ceiling Fans** have been independently tested for effective square foot coverages at various mounting heights. These ceiling fans can be used effectively in buildings with mounting heights up to 45 feet. Tables below and right provide data to help you choose and install Dayton fans.

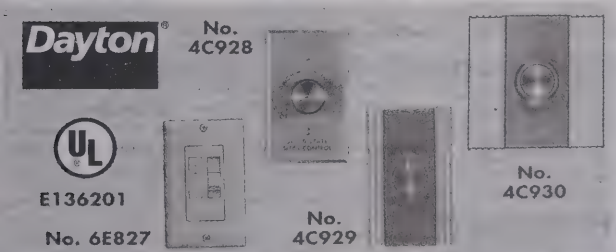


### SELECTION PROCEDURE:

Measure the total square foot area and ceiling height of the facility. Select an appropriate fan(s) by using the performance given in the tables at left and below. A practical example illustrated with a 48" fan is given below to demonstrate how the selection process works.

| Mounting Ht. From Floor To Fan Blades | COVERAGE IN SQUARE FEET 36" Fan 4C852 | 48" Fan 3C690, 4C853 | 56" Fan 3C691, 4C854 | 56" Fan 4C771 | 56" Fan 4F424, 4F425 4C855, 4C856 | 60" Fan 4C721 | 60" Fan 4F426 |
|---|---|---|---|---|---|---|---|
| 45' | — | — | — | — | 1225 | 2900 | — |
| 40 | — | — | — | 1800 | 1800 | 3600 | 3600 |
| 30 | — | — | — | 2800 | 3025 | 4000 | 4000 |
| 20 | 1600 | 2025 | 3025 | 3025 | 3800 | 5000 | 5000 |
| 10 | 1225 | 1600 | 2300 | 2300 | — | — | 3800 |
| 7'1" | 900 | 1225 | 1600 | 1600 | — | — | — |

### 48" COMMERCIAL CEILING FAN EXAMPLE:



**FAN SELECTION:** Total area of commercial facility is 7350 square feet (105 ft. x 70 ft.). Mounting height from floor to fan blade is 10 ft. Total square foot area coverage for 48" (4C853) fan at 10 ft. mounting height is 1225. To calculate total number of fans needed for this facility, divide total area of facility by square foot area coverage; 7350 sq. ft. / 1225 sq. ft. per fan = 6 fans.

**FAN PLACEMENT:** Calculate square root of total fan square foot area coverage. Square root of 1225 is 35 ft.; or a 35 ft. x 35 ft. area. Fan placement should be as close to center of squared area as possible. Example illustration (above) indicates approximate location for six fans. In a completely open building, three 56" fans or twelve 36" fans at a 10 ft. mounting height could accomplish equivalent floor coverage. Consider air flow pattern obstacles, such as stacked merchandise, office partitions, etc., which may require different fan size and fan placement.

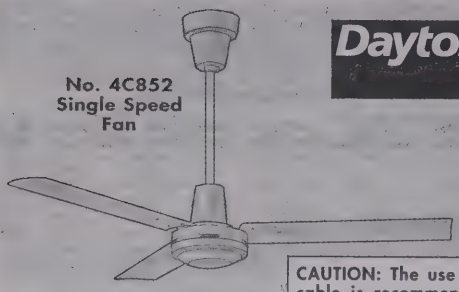
*For additional technical information and individual fan flow charts by mounting height, refer to Dayton Fan Literature 4S094.*

# ADJUSTABLE FAN CONTROLS

Use with Dayton Commercial/Industrial ceiling fans; all models fit single gang box. For single and multiple fan installations. Set speed anywhere in fan's minimum/maximum speed range. Solid state circuitry, large heavy-duty triacs, and metal heat sink plates for cool operation and long life. Hard plastic backing.

**1 amp noiseless speed control** for single fan use only. White hard plastic wall plate. Switch has "Off" and 3 preselected speed settings. For use with Nos. 4C853, 4C854, 4C855, and 4F424 only.

**3 amp controls** have finished metal strap mount with hard plastic backing to protect components and circuit board. Brushed aluminum wall plate has Off-High-Low speed settings with rotary dial.



**8 and 12 amp controls** have adjustable trim. Heavy-duty insulated tab triacs give extra protection from electrical surges and add service life. Finned aluminum heat sink plate with gold finish and black trim with rotary dial.

**NOTE: When any solid state motor speed control is used, a humming noise will be present in fan on low speed. This hum in no way affects fan operation and is acceptable in most industrial installations. All wiring should conform to the National Electrical Code and local regulations.**

| Max. Amps | Volts 50/60 Hz | Maximum Number of Fans To Be Used On Each Control 4C852 36" Fan | 4C853 48" Fan | 4C854, 4C855 56" Fan | 4F424 56" Fan | 4F425 56" Fan | 4C856 56" Fan | 4C721 60" Fan | For Use Only with Ceiling Fan Stock Nos. | Stock No. | List | Each | Shpg. Wt. |

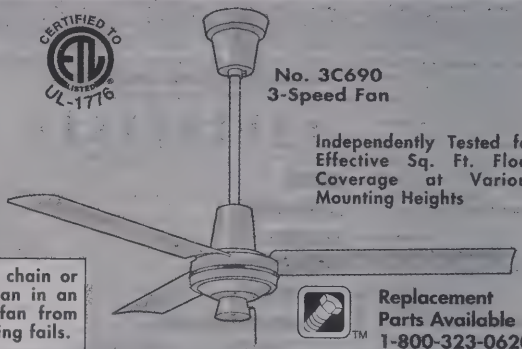
# COMMERCIAL CEILING FANS AND CEILING FAN GUARD

## 36, 48 AND 56" COMMERCIAL CEILING FANS



No. 4C852
Single Speed
Fan

Dayton®

UL® E136201

CERTIFIED TO ETL LISTED® UL-1776

ENERGY RIGHT®

No. 3C690
3-Speed Fan

Independently Tested for Effective Sq. Ft. Floor Coverage at Various Mounting Heights

**CAUTION:** The use of a secondary support chain or cable is recommended when installing a fan in an overhead location. This will prevent the fan from falling if accidentally struck or if the mounting fails.

Replacement Parts Available
1-800-323-0620

- **Produce maximum air delivery for summer cooling and winter heat destratification in large commercial areas**
- **For 7', 10', and 20' mounting heights. Shipped with secondary support cable**
- **Nos. 4C852, 4C853, and 4C854 are single speed fans**
- **Nos. 3C690 and 3C691 3-speed fans with pull chain operation. Upper and lower canopies are plastic**
- **Maximum operating temperature: 105°F**
- **Adjustable speed fan controls see page 3583 (3-Speed Fans Nos. 3C690 and 3C691 not for use with adjustable speed controls)**

**Commercial-duty fans** for use in classrooms, restaurants, hospitals, and indoor public facilities. Reclaim stratified heat from ceilings in winter and provide gentle cooling breeze in summer. **Fan blades** are balanced, contoured metal for wobble-free operation. Rolled edge blades comply with UL specifications for low ceiling applications (minimum 7 ft. blade-to-floor mounting height). White epoxy enamel finish. **Fans feature** direct-drive, 18-pole permanent split capacitor motors with permanently lubricated ball bearings and built-in self-resetting thermal overload protector. 8" and 24" long downrods of 7/8" OD steel pipe with 1/4" holes at both ends. Downrods and mounting hardware for wood or steel joist installation included. UL Listed (E136201). Dayton brand. See Selection and Placement Data on page 3583.

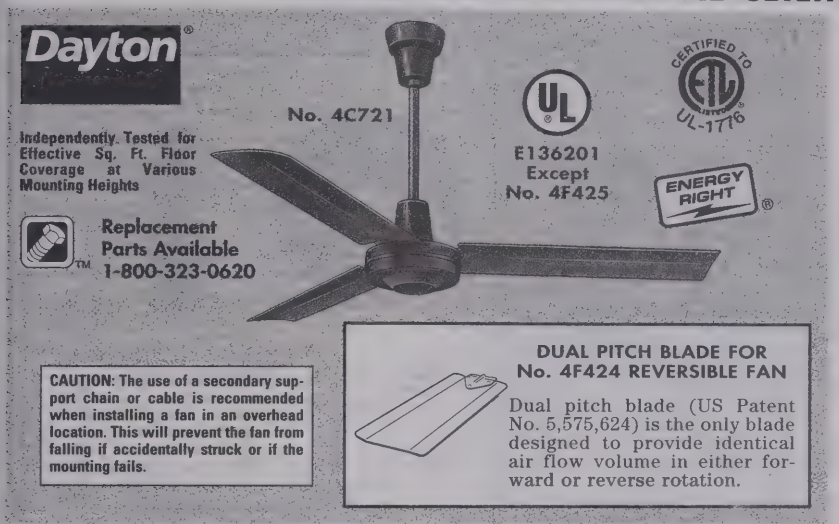
## CEILING FAN GUARD

- **Extra heavy-duty, totally enclosed ceiling fan guard for school gymnasiums, indoor arenas, and other public areas**
- **Totally enclosed for maximum fan protection**
- **Mounts directly to fan rod**
- **Easy to install**
- **Custom design prevents air flow interruptions**
- **Secondary support cable meets all proposed "secondary support" safety regulations for overhead air movement equipment**
- **Designed for use only with Dayton Industrial Ceiling Fan Stock Nos. 4C855, 4C856, 4C721, 4F424, and 4F425**

**Guard is 62" diameter** with twelve spoke cross bar construction. Spokes are 5 ga. on 3" centers. Heavy-duty two piece mounting brace is 16 ga. galvanized steel. Secondary support cable is 3/32" 7 x 7 galvanized aircraft cable with 920 lb. breaking strength. Dayton brand



**No. 3C947.** Shpg. wt. 50.0 lbs. List $330.54. Each.....**$198.00**

Dayton®

Replacement Parts Available
1-800-323-0620

# 56 AND 60" INDUSTRIAL CEILING FANS

**DUAL PITCH BLADE FOR No. 4F424 REVERSIBLE FAN**

Dual pitch blade (US Patent No. 5,575,624) is the only blade designed to provide identical air flow volume in either forward or reverse rotation.

- **For mounting heights up to 45 feet**
- **Maintenance free, permanently lubricated ball bearings**
- **Maximum operating temp.: 105°F**
- **Shipped with secondary support cable**
- **For fan controls, see page 3583**
- **For selection on Placement Data see page 3583**

**Heavy-duty fans** for industrial applications in buildings with ceilings up to 45 feet high. Reclaim stratified heat from ceiling in winter and produce gentle cooling breezes in summer. **NOTE: Fans are not designed for continuous operation where high heat and high voltage are present.** Use appropriate speed control. 56 and 60" diameter metal fan blades are aerodynamically contoured and balanced for maximum air delivery and wobble-free operation.

**Single speed, direct drive.** 18 pole permanent split capacitor motor, permanently lubricated ball bearings, built-in self-resetting thermal overload protector. 277V fans for 480V, 3-phase, 4-wire WYE connected electrical service. Eliminate need to install step-down transformers. No. 4F424 is reversible. Has 15 amp reversing switch. For applications requiring reverse destratification, exhaust fan supplementing, or ridge vent exhausting. For ceiling heights not exceeding 40 ft. in backward position; 45 ft. in forward position.

**Heavy-duty plastic upper and lower canopies.** 24" downrod of 7/8" OD steel pipe with 1/4" holes at both ends. Mounting hardware for installions in buildings with wood or steel joists included (Minimum 10 ft. blade-to-floor mounting height). White epoxy enamel finish. UL Listed (E136201, except No. 4F425, which is ETL Listed). Dayton brand.

# 56 AND 60" MOISTURE-RESISTANT CEILING FANS

For use in food processing plants, exposed shipping areas, indoor swimming pools, mills, rubber processing, and abrasives manufacturing areas. Use in environments having a high content of dirt, dust, contaminants, and moisture. Max. operatiing temperature: 105°F. Balanced, contoured metal fan blades for wobble-free performance. Both fans have rolled edge blades.No. 4C771 complies with UL specifications; minimum 7 ft. blade-to-floor mounting height.

**Single speed, direct drive.** 18-pole permanent split capacitor motor, totally enclosed neoprene sealed ball bearings and built-in, self-resetting thermal overload protector. 120V, 50/60 Hz. Motor and blades have corrosion resistant oxyplast epoxy powder paint electrostatically applied undercoat. White Ipcokote epoxy paint finish coat. Neoprene shielded upper and lower canopies and downrod seals. 18" long 18/3 SJT cord and molded plug. Pre-assembled on 12" long downrod of 7/8" OD steel pipe with 1/4" holes at both ends. UL Listed (E136201). Dayton brand.

- **Helps control moisture, mildew, smog, and fumes as well as temperature**
- **Epoxy paint finish and neoprene seals protect against moisture and corrosion**
- **For mounting heights 7 to 40 feet**
- **Shipped with secondary support cable**

**See Selection and Placement Data on page 3583**

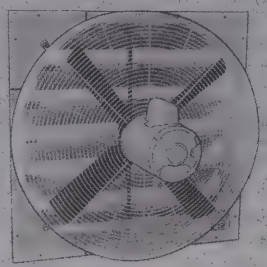
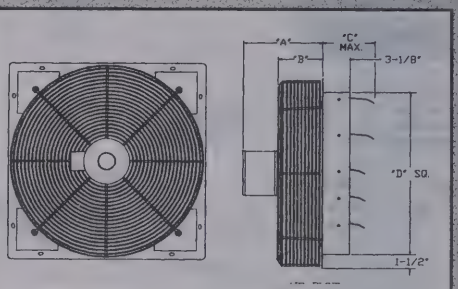
# CORROSION RESISTANT SHUTTER FANS AND HAZARDOUS LOCATION EXHAUST FANS



## CORROSION RESISTANT SHUTTER FANS

- **Industrial grade fans designed for use in corrosive atmospheres found in chemical plants, manufacturing facilities, poultry operations, and swine confinement operations**
- **Fiberglass shutter and fiberglass reinforced polypropylene fan blades resist fumes from ammonia, carbon dioxide, and hydrogen sulfide**
- **Stainless steel pivots and fan hardware**
- **Epoxy coated wire guards comply with OSHA regulations**
- **115V, totally enclosed, epoxy coated motors (not speed controllable)**
- **Air deliveries based on AMCA test codes**
- **Shipped completely assembled and ready to install**



Corrosion resistant shutter fans can handle many applications containing non-explosive or non-hazardous concentrations of acetic acid, ammonia, carbon tetrachloride, detergent, dimenthyl formamide, hydrochloric acid, methylene chloride, mineral oil, nitric acid, phosphoric acid, sodium chloride, sodium hydroxide, and sulfuric acid. Not designed for laboratory hood exhausts. Not speed controllable.

## HAZARDOUS LOCATION EXHAUST FANS

Dayton®

No. 4C369

- **For heavy duty ventilation of atmospheres containing flammable or explosive vapors, gases, or dusts (per NEC 500).**
- **Motors are 115 VAC, 60 HZ (4C371& 3C772: 115/230 VAC, single-phase I, group D and class II, groups E, F, & G applications.**
- **Spark resistant cast aluminum fan blades**
- **Fans have a heavy steel circular frame with ample mounting holes & a fixed position motor base attached to rigid tubular supports.**
- **Air deliveries are based on AMCA test standards for exhaust systems.**
- **All units have 4-blade propellers except 3C772: 6-blade**
- **Note: Consult local ventilation or fire inspector for local code requirements**
- **Note: Units are not for use where motor or blades will accumulate paint residue**
- **Note: OSHA complying guards are strongly recommended when fan blades are exposed and within reach of Personnel.**

### CONDUIT BOX for HAZARDOUS LOCATION FAN MOTORS

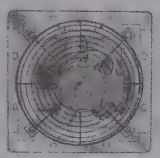
For use on Dayton brand hazardous location fan motors above. Has hole for self-tapping grounding screw. Easily installed. UL Listed. Gray finish.

**No. 4X788.** Shpg. wt. 1.6 lbs. List.....$34.00. Each.....**$29.90**

*However, wherever, you need to move air, we have the fans to do it.*

# SHUTTER-MOUNTED EXHAUST FANS

- **Efficient, easy-to-install exhaust fans with automatic shutters**
- **7 to 24" diameter fans have aluminum propellers; 30 and 36" fans have galvanized steel propellers**
- **Two-speed units require No. 2X605 two-speed switch (not included) All other units not speed controllable**
- **Air deliveries based on AMCA test standards**
- **All models have wire guards to comply with OSHA regulations**
- **Totally enclosed, sleeve or ball bearing 115V, 60 Hz motors**
- **Shipped completely assembled**
- **See page 3583 for sizing assistance**



**These fans are widely used** for ventilating stores, offices, factories, shops, and farm buildings.

**Heavy-duty guards** have gray metallic vinyl polyester coating to resist corrosion. Mounting holes in shutter frame allow easier installation.

# HEAVY-DUTY, MEDIUM-DUTY, AND GUARD-MOUNTED EXHAUST FANS

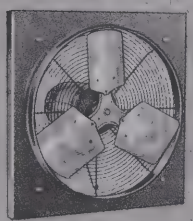
## 16 TO 24" HEAVY-DUTY EXHAUST FANS

Dayton®

Guarding Complies with OSHA Regulations

No. 4C163

Replacement Parts Available 1-800-323-0620™



- For general ventilation in dusty, dirty, grease or moisture laden environments
- For medium pressure application up to 0.5 in static pressure
- Totally enclosed, 1725 RPM, 115 V, 60 Hz, split phase motor
- Cast aluminum blade propeller for corrosion resistance
- Steel wire intake guards comply with OSHA regulations
- Wire guard and venturi panel have baked-on gray polyester finish to help resist corrosion
- Air deliveries based on AMCA test standards
- Shipped completely assembled

## CAST ALUMINUM HAZARDOUS LOCATION PANEL FANS

- For heavy duty ventilation in atmospheres containing flammable or explosive vapors, gases, or dusts. (per nec 500)
- Motors only are UL Listed (E 62643) 115 VAC, 60 Hz, single-phase hazardous location for class I, group D and class II, groups E, F, & G applications.
- Note: Units are not recommended where motor or blades will accumulate paint.
- Note: Consult local ventilation or fire inspector for code requirements.

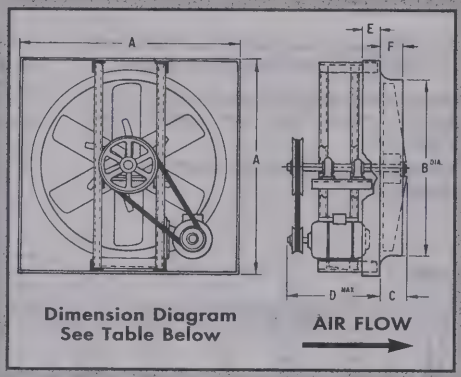
(*) Electrically ground all components in a hazardous location system. Hazardous location conduit box: No. 4X788, see page 3586.



**NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE**

Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# MEDIUM VOLUME INDUSTRIAL DUTY BELT DRIVE EXHAUST FANS

No. 3C705

Replacement Parts Available
1-800-323-0620

**Medium-volume fans** exhaust up to 55,636 CFM. For industrial exhaust ventilating systems in factories, warehouses, foundries, laundries, and cooling towers.

**Available with a variety of motors** up to 10 horsepower. Efficient in duct installations with up to 1/2" static pressure. Horizontal or vertical mounting. Self-aligning prelubricated ball-bearing pillow blocks.

**Heavy-duty statically balanced** fabricated steel propellers are safety locked to shaft. Heavy-gauge painted steel panel has welded corners, and 1¾" dia. vertical tubular steel members uni-welded for rigidity. No. 5C193 has 4 blades, all others have 6 blades.

**Predrilled motor base** accommodates standard NEMA motor frames of horsepower ratings specified. Heavy-duty ball-bearing motor, cast iron sheaves, bushings, and belts packed separately.

**WARNING!** OSHA complying guards are required when a fan is installed within 7 ft. of floor, working level, or within reach of personnel. Review OSHA Codes. See Index under Guards, Fan.

## CERTIFIED RATINGS FOR AIR AND SOUND

Dayton Mfg. Co., certifies that the fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program. Performance shown is without ducts.

Sound ratings shown are loudness values in fan sones @ 5 ft.-0" (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type A: free inlet fan sone levels. Power ratings (BHP) does not include drive losses. Performance shown is for installation Type A: Free Inlet, Free Outlet. Performance ratings do not include the effects of appurtenances in the airstream.

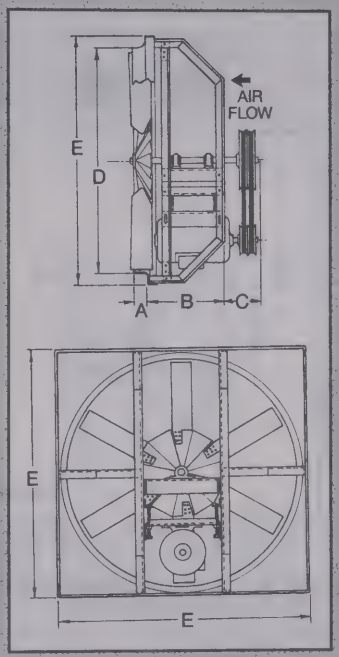
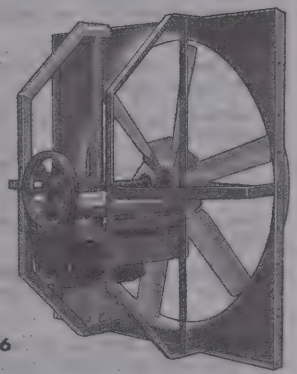
(*) BHP does not include drive losses.

*However, wherever, you need to move air, we have the fans to do it.*

# HIGH VOLUME INDUSTRIAL DUTY BELT-DRIVE EXHAUST FANS



- **Horizontal or vertical wall mounting**
- **6-Blade aluminum propeller**
- **Prelubricated ball bearing pillow blocks**
- **Steel angle frame construction with 14-gauge venturi panel**
- **Durable gray enamel finish**
- **Cast iron sheaves, bushings, and belts packed separately**



**Widely used in factories, warehouses, foundries,** laundries, cooling towers. Efficiently used in duct installations up to 1½" static pressure.

Dayton Mfg. Co. certifies that the fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

Sound ratings shown are loudness values in fan sones @ 5 ft.-0" (1.5m) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type A: free inlet fan sone levels. Power ratings (BHP) does not include drive losses. Performance shown is for installation Type A: Free Inlet, Free Outlet. Performance ratings do not include the effects of appurtenances in the airstream.

# INDUSTRIAL/COMMERCIAL EXHAUST FANS

- Designed for light to medium duty applications
- For vertical mount air exhaust applications. Can be used for horizontal mount air intake
- Computer designed five-blade steel propeller
- Deep drawn steel venturi frame for maximum performance
- 1" ball bearings, self-aligning and prelubricated
- 1" shaft is stepped down to 7/8" to match fan blade and sheaves
- Tubular steel supports designed for rigid construction
- Adjustable motor mounts permit easy assembly with a variety of motor types
- 1725 RPM ball bearing motors and cast iron pulleys packed separately when fan is ordered complete

**WARNING!** OSHA complying guards are required when fan is installed within 7' of floor, working level, or within reach or personnel. Review OSHA Codes. See index under Guards, Fan.

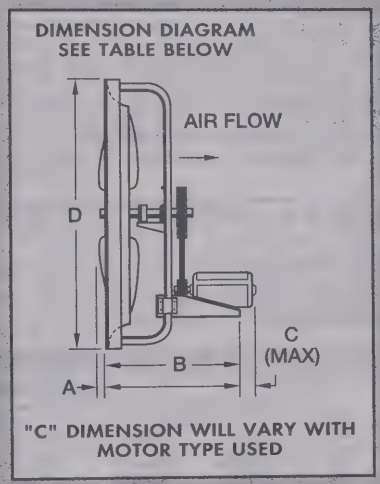
Performance shown is for installation Type A: Free Inlet, Free Outlet. Power rating (BHP) does not include drive losses. Performance ratings do not include the effects of appurtenances in the airstream.

*However, wherever, you need to move air, we have the fans to do it.*



# INDUSTRIAL/COMMERCIAL SUPPLY FANS

No. 7CC01

**Not Suitable for Penthouse Installation**

Dayton®

- Designed for light to medium duty applications
- Vertical mount air supply, but can be used for horizontal mount air exhaust
- Computer designed five-blade steel propeller
- Deep drawn steel venturi frame for maximum performance
- 1" ball bearings, self-aligning and prelubricated
- 1" shaft is stepped down to 7/8" to match fan blade and sheaves
- Tubular steel supports designed for rigid construction
- Adjustable motor mounts permit easy assembly with a variety of motor types
- 1725 RPM, ball bearing motors and cast iron pulleys packed separately when fan is ordered complete

**WARNING!** OSHA complying guards are required when fan is installed within 7 ft. of floor, working level, or within reach of personnel. Review OSHA Codes. See Index under Guards, Fan.

# EXHAUST/SUPPLY FANS

## 36" BELT DRIVE EXHAUST/SUPPLY FANS

- **Specially designed fan blade delivers a high volume of air for intake or exhaust applications**
- **For factories, foundries, and farm buildings**
- **Up to 10,080 CFM at 0.500" SP intake or exhaust with motor reversing switch**

**Special fan blade** delivers high volume of air for intake or exhaust. Self-aligning, heavy-duty, pre-lubricated ball bearing pillow blocks permit mounting in wall, air duct, ceiling or roof. Reversible feature is specially useful for farm buildings, foundries, laundries, and factories. One unit takes care of fresh air intake and exhaust requirements as needed. (Motor reversing switch included when fan is ordered complete with motor and drive.) Operates satisfactorily in duct systems up to 1/2" SP.

**36" diameter, 8-blade, statically balanced, steel propeller** has split taper bushing. Four blades pull in outside air when operated in intake direction. Four blades expel inside air when operated in exhaust direction. 7/8" dia. fan blade shaft. Heavy-duty, 18-gauge venturi panel. Adjustable motor base pre-drilled for standard NEMA frame motors of horsepower specified on chart below. Motors are heavy-duty, ball bearing, single or 3-phase. Motor and drive packed separately when ordered complete with fan. 40 x 40 x 19½"D. **Not suitable for penthouse, equipment room installation.**

**No. 3CC78.** Shpg. wt. 56.0 lbs. List.....$628.57. Each.....**$384.00**

**WARNING!** OSHA complying guards are required when fan is installed within 7 ft. of floor, working level, or within reach of personnel. Review OSHA Codes. See Index under Guards, Fan.

## DIRECT DRIVE EXHAUST/SUPPLY FANS

No. 5M188

Dayton

Replacement Parts Available 1-800-323-0620

- **Versatile fans for exhaust or intake ventilating applications**
- **Fans have 115V, 1-1725 rpm, 60 Hz, totally enclosed, thermally protected, ball bearing motors on resilient mounts**
- **Wall mounted rigid steel frames have deep venturi and 1" wide flanges. Frames have charcoal gray polyester finish**
- **Reversing switch for remote mounting included**
- **Stamped aluminum propeller**

**WARNING:** Review OSHA codes. OSHA complying guards are strongly recommended when fan is installed within 7 ft. of floor, working level, or within reach of personnel. Review OSHA codes. See Index under Guards, Fan.

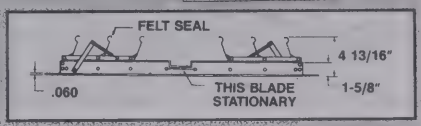
# CEILING SHUTTERS AND ADJUSTABLE FRAME INTAKE LOUVERS

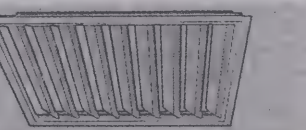


## CEILING TRUSS SHUTTERS FOR 24 TO 36" FANS

**Attractively styled shutters.** Easy installation with no ceiling joist cutting or framing required. Fit flush in ceiling opening below whole house ventilation fans. White polyester enamel finish blends with white painted ceilings. Felted edges on blades overlap adjacent blade for improved sealing and quiet operation. Tie rods at each side of shutter assure uniform opening when fan is operating. Stationary center blade covers ceiling joist. Extruded aluminum shutter frame and shutter blades. Frame has 3/16" diameter mounting holes. Dayton brand.

- For horizontally mounted fans
- Fast, simple installation

No. 3C510



| Fits Fan Dia. (In.) | Overall L x W (In.) | Ceiling Opening Required (In.) | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **24** | 26 x 32 | 24 x 30 | **3C510** | $69.05 | **$41.35** | 6.5 |

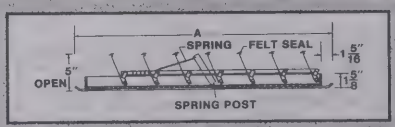
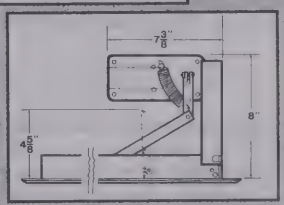
## PREMIUM CEILING SHUTTERS FOR 24 TO 48" EXHAUST FANS



- **For horizontally mounted fans**
- **Can be motorized for uniform operation**

**Attractive shutters** install flush in ceiling opening below whole house ventilating fan. White polyester enamel finish blends with white ceiling finish. Aluminum blades have felted edges for effective sealing. Tie rod on each side of shutter assures uniform blade opening when fan is on. Blades have anti-friction pivot pins for fast, minimum-load opening and closing action. Extruded aluminum shutter frame with 3/16" diameter mounting holes.



**Optional shutter motor**—Relieves starting load on fan motor by automatically opening and closing shutter. Assures uniform opening and closing. Motor housing is 6⅛H x 3½W x 2¾"D. 6"L leads, ground wire included, plus junction box for easy wiring. 60 Hz. Dual voltage motor fits 120 or 240 volt applications.

No. 4C225

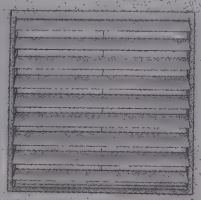
## ADJUSTABLE FRAME INTAKE LOUVERS

No. 4F421

Replacement Parts Available 1-800-323-0620

- **Adjustable frame, fixed blade louvers offer installation flexibility**
- **Use multiple sections when larger sizes are needed**
- **Galvanized bird screen; 1/2" square mesh**
- **Blades set at 45° angle with 4" blade spacing**
- **Ratings determined in an AMCA certified laboratory**
- **Recommended intake velocity not to exceed 350 FPM; exhaust velocity not to exceed 500 FPM**

**GALVANIZED STEEL LOUVERS.** For many intake applications where moderate corrosion resistance is desired. 20-gauge galvanized steel with 1½" face flange.



**PREMIUM ALUMINUM LOUVERS.** For extra corrosion resistance in problem environments.

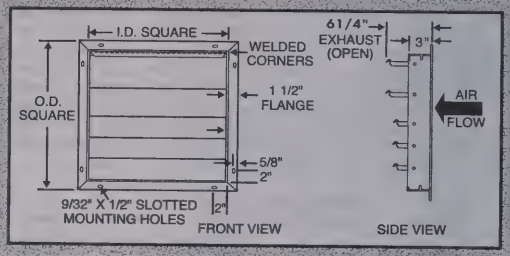
# ALUMINUM AND STEEL DAMPERS AND SINGLE AND DOUBLE PANEL EXHAUST SHUTTERS

## FIBERGLASS SINGLE AND DOUBLE PANEL EXHAUST SHUTTERS



Dayton

No. 5C217
Single Panel

No. 5C220
Double Panel

- Sturdy shutters for direct or belt-driven exhaust fans
- Blades open when fan comes on, close when air flow stops
- Tie-rod is attached to blades on fan side
- 9/32" x 1/2" oblong mounting holes
- For vertical mounting only
- Single panel shutters for use with 10 to 36" diameter fans
- Double panel shutters for use with larger diameter exhaust fans.
- 2500 FPM maximum velocity.
- Optional shutter motors available, see page 3599

**HEAVY-DUTY FIBERGLASS SHUTTERS. 5-Year warranty.** For use in areas where corrosion is a known problem such as chemical plants, poultry and swine confinement operations, and anywhere a rugged, noncorrosive shutter is required. Heavy-duty fiberglass frame and blades with stainless steel pins and bearings at pivot points. 3" deep frame and 12-ga. stainless steel tie rod.

**Replacement Parts Available**
**1-800-323-0620**

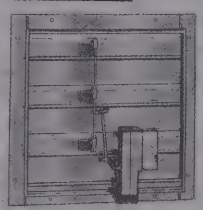
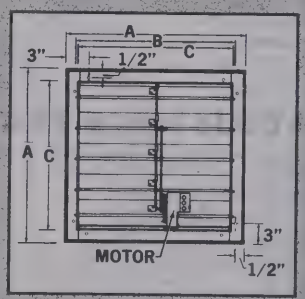
## 16 TO 60" MOTORIZED DAMPERS



- Welded Corner Construction
- For fan diameters 16 to 60"
- Horizontal or vertical mount
- For intake and exhaust applications
- Up to 3500 FPM maximum velocity

**Tie rod linkage** is attached to the blades on the side of the fan, assuring dependable service. Frames are 2"D. Ample 9/32" x 1/2" oblong mounting holes. 16 to 48" units are single panel; 54 and 60" units are double panel. Dayton brand.



**Extruded aluminum dampers.** Heavy-duty dampers have extruded aluminum frame and blades. Power On to open; spring return to close.

**Galvanized steel dampers.** For normal applications. Galvanized steel frame and blades.

(†) From damper frame to end of bracket. (#) Double panel damper. (‡) 120 / 240V dampers for single or 3-phase power.

*However, wherever, you need to move air, we have the fans to do it.*

# GALVANIZED STEEL AND ALUMINUM SINGLE AND DOUBLE PANEL EXHAUST SHUTTERS

- Sturdy shutters for direct or belt-driven exhaust fans
- Blades open when fan comes on, close when air flow stops
- Steel reinforced blades felted for quiet operation, tight closure
- Tie-rod is attached to blades on fan side
- 9/32" x 1/2" oblong mounting holes
- For vertical mounting only
- Single panel shutters for use with 10 to 36" diameter fans
- Double panel shutters for use with larger diameter exhaust fans. 54 and 60" models have two additional tie rods on discharge side for uniform operation
- 2500 FPM maximum velocity

**GALVANIZED STEEL FRAME SHUTTERS.** For normal applications. Mill finish aluminum blades with stainless steel rivets. 19-gauge welded steel frame, 3" deep with 1⅝" flange.

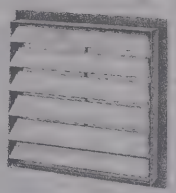
**ALUMINUM SHUTTERS.** For a decorative look in areas where corrosion may be a problem. Aluminum blades have white enamel finish and stainless steel rivets. 16-gauge extruded aluminum frame, 3" deep with 1½" flange.

## OPTIONAL SHUTTER MOTORS

**For Single Panel Shutters.** For exhaust installations on single panel shutters only. Vertical mount only. Relieves starting load on fan motor. Motor housing: 6⅛H x 3½W x 2¾"D. 6" leads with junction box. 120/240V, 0.20/0.12 amps, 60 Hz.

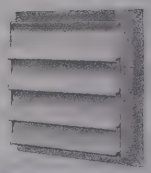
**No. 2C831.** Shpg. wt. 4.5 lbs. List.....$90.59.
Each.....**$54.25**

**For Double Panel Shutters.** For exhaust installations on double panel shutters only. 120/240V, 0.20/0.15 amps, 60 Hz.



**For 36 to 48" diameter fans.** Motor housing: 6⅛H x 3½W x 2¾"D. 6" leads with junction box.

**No. 2C832.** Shpg. wt. 7.5 lbs. List.....$118.57.
Each.....**$71.00**



**For 54 and 60" diameter fans.** Vertical mount only. Motor housing: 4¼H x 3W x 4"D. 115/230V, 0.28/0.15 amps, 60 Hz.

**No. 4C885.** Shpg. wt. 10.0 lbs. List.....$149.13
Each.....**$89.30**

*However, wherever, you need to move air, we have the fans to do it.*

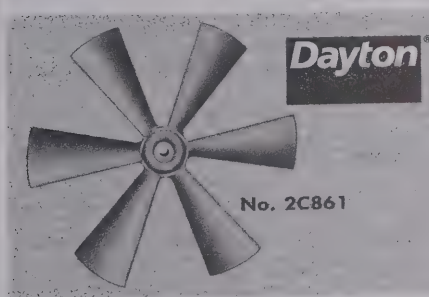
# CAST ALUMINUM FAN BLADES

## 12 TO 30" HEAVY-DUTY FAN BLADES



- Spark-resistant for use in spray booths and other industrial applications including foundries, factories, and farm buildings
- Propellers are statically balanced
- 12 and 30" models are one-piece castings
- 16 through 24" units are multi-piece construction
- Clockwise rotation facing discharge
- 5/8" bore has 3/16"W and 3/32"D keyway
- 1/2" bore has no keyway
- Hub on intake side with 2 set screws
- Maximum temperature is 200°F
- Performance tested in accordance with AMCA Standards

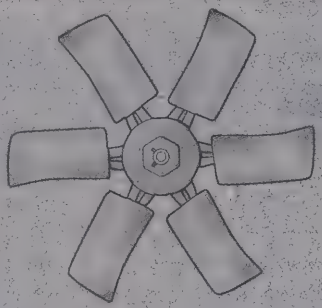
## 12 TO 42" SPRAY BOOTH FAN BLADES



- Replacement propellers for Dayton spray booth fans; will also fit other spray booth fans of similar design used for combustion materials, vapors, and grain products
- Cast aluminum with air foil blades
- Spark-resistant
- Propellers are statically balanced
- Clockwise rotation facing discharge
- Maximum temperature: 200°F

# 24 TO 60" AXIAL FAN BLADES

No. 4C372 6-Blade

Dayton®

- For use as factory replacement blades in Dayton industrial/commercial exhaust fans
- Steel construction, statically balanced
- Hub is on discharge side of vertical models; intake side of horizontal models
- 6-Blades have fixed bore with two locking set screws
- 8-Blade has split taper bushing
- Blades rotates clockwise facing discharge
- Red enamel finish

No. 3C029 8-Blade

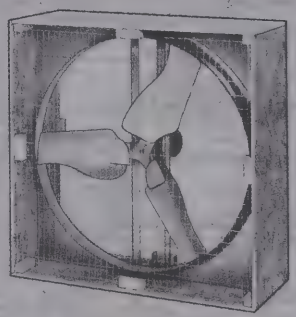
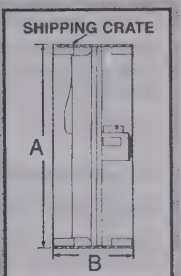
# DIRECT-DRIVE POULTRY FANS AND CORROSION RESISTANT AGRICULTURAL DUTY EXHAUST FANS



## ASSEMBLED VERTICAL DIRECT-DRIVE POULTRY FANS

- **No pulleys or belt to adjust or replace. Shipped completely assembled, ready to install in OSB crate mounting frame**
- **1 x 2" wire mesh intake/discharge screens (No. 5C962 has 3 x 3" mesh)**
- **No. 6B001 has 21"W crate. Provides 7" gap between propeller and screen**
- **1/2 HP, TENV, sealed ball bearing permanent split capacitor motor (switchless) features automatic reset thermal protection, anti-rust shaft protection, and shaft-end bearing with cup-shaped slinger to protect against dirt and moisture; wire leads for fast installation**



**WARNING!** OSHA complying guards are required when fan is installed within 7 feet of floor, working level, or within reach of personnel. Review OSHA Codes. See Index under Guards, Fan.

Dayton®

Dayton Electric Mfg. Co. certifies that the poultry fans shown here are licensed to bear the AMCA seal. The ratings given are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

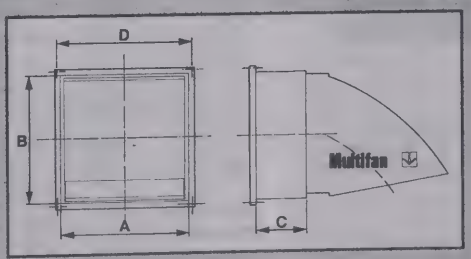
(*) Performance shown is for installation Type A; Free Inlet, Free Outlet. Speed (RPM) shown is nominal. Performance is based on actual speed of test. Performance ratings do not include the effects of appurtenances in the airstream. (‡) CFM/Watt ratings are in accordance with the AMCA recommended method of publishing CFM/Watt ratings and are not derived using motor efficiency values supplied by the motor manufacturers. The AMCA Certified Ratings Seal does not apply to the CFM/Watt ratings. (#) 3-Phase motor. All others permanent split capacitor motors.

## AGRICULTURAL DUTY ADJUSTABLE SPEED EXHAUST FANS



Multifan

LR51189

E121246

No. 3C948

- **Adjustable speed axial fan with PVC shutter, polyethylene hood, polypropylene fan blade, and removable winterization seal**
- **Aerodynamically designed, energy efficient fans; engineered for continuous duty**
- **One-step installation**
- **Air deliveries based on Bess Lab Tests at University of Illinois**
- **Speed controls listed on page 3612.**

**Complete fan system** installs with just four bolts. Preassembled for added time savings. Snap-in, snap-out fan and shutter simplifies repair and maintenance. Winterization seal for added insulation. Operate under adverse conditions of dust, humidity, and corrosive fumes in agricultural applications. Provide ventilation in commercial and industrial applications for buildings, factories, and plants under most environmental conditions including dust, smoke, dampness, grease, and moisture

**Totally enclosed, waterproof, dustproof motors** are 220V, 60 Hz, with automatic thermal protection and permanently lubricated ball bearings, cast aluminum housing. Venturi frames of corrosion resistant die cast aluminum. Drilled with four 3/16" diameter mounting holes. Durable, easy-to-clean polypropylene propeller. CSA Certified and UL Listed.

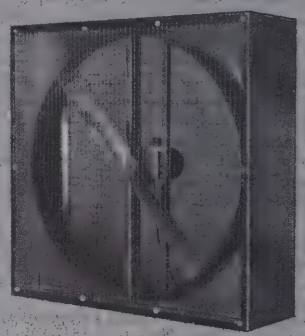
# GALVANIZED STRAIGHT-WALL FANS AND ADJUSTABLE SPEED FANS

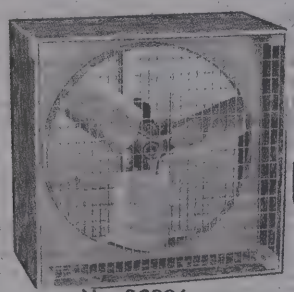


## 36 AND 48" GALVANIZED DIRECT-DRIVE STRAIGHT-WALL FANS

- Galvanized steel housing
- Nos. 4B046 and 4B047 have hanging slots incorporated into the housing sides
- Motor has 8 ft. cords for easier installation
- Shipped completely assembled
- No pulleys or belt to adjust or replace
- Galvanized steel venturi panel and 2 or 3-wing fan blade
- Galvanized 1 x 2" wire mesh grid intake and discharge screens
- TENV, sealed ball bearing, permanent split capacitor motor (switchless) with automatic reset thermal protection, anti-rust shaft protection, and shaft-end bearing with cup-shaped slinger to protect against dirt and moisture

Dayton®

Replacement Parts Available 1-800-323-0620



No. 4B046

## 24" ADJUSTABLE SPEED DIRECT-DRIVE AGRICULTURAL DUTY FANS

No. 3C996

Dayton®

Replacement Parts Available 1-800-323-0620

- Speed adjustable when used with No. 3C960 or 3C961 controller; automatically maintains minimum winter ventilation requirements and house temperature
- No pulleys or belt to adjust or replace
- Galvanized steel venturi panel and 3-wing fan blade
- Shipped completely assembled, ready to install in OSB crate mounting frame
- Galvanized 1 x 2" wire mesh grid intake and discharge screens
- Motor has wire leads for easier installation
- TENV, sealed ball bearing, permanent split capacitor motor (switchless) with automatic reset thermal protection, anti-rust shaft protection, and shaft-end bearing with cup-shaped slinger to protect against dirt and moisture

Optional Accessory. No. 3C960 or 3C961 Modulating Temperature and Speed Control. See listing on page 3612.

Dayton®

## V-BELT TENSIONER FOR POULTRY FANS

- Easy to install belt tensioner is designed for use with Dayton belt drive poultry and livestock fans
- Heavy gauge galvanized hinge assembly and heavy-duty tensioning spring

NOTE: Use of tensioner changes the recommended belt length. If the motor is mounted below the fan shaft, a shorter belt should be used. If motor is mounted above the fan shaft, a longer belt should be used. For best results, a 3" change of length is recommended.

CAUTION: To ensure proper fan speed and air delivery, new belts must be the same cross section as the belt originally provided with the fan.

**No. 3C997.** Shpg. wt. 1.8 lbs. List.....$27.81. Each.....**$16.66**

*However, wherever, you need to move air, we have the fans to do it.*

## LIGHT TRAP APPLICATION REQUIREMENTS

**A light trap will introduce a load factor** affecting the performance of fans used in the poultry house. This load factor must be considered in order to avoid certain problems associated with overloading the fan(s):

a. Overheating Motor/Nuisance Tripping

b. Insufficient Air Flow (CFM)

c. Excessive Negative Pressure in Building

**The following method should be used to avoid these problems:**

1. A typical maximum rating on poultry house ventilating fans is 0.15 (in., w.g.) static pressure. In order to stay within this limit, use the following formula to determine the total area of light traps required. Use the Total Free-Air CFM rating of your fans for this calculation. The result will be the total area of light traps needed.

TOTAL AREA OF LIGHT TRAPS NEEDED=(TOTAL FREE-AIR CFM x 0.004) –25.

**EXAMPLE: You are planning to use eight fans which are rated at 20,160 CFM (Free-Air).**

TOTAL FREE AIR CFM=20,160 x 8 fans=161,280 CFM

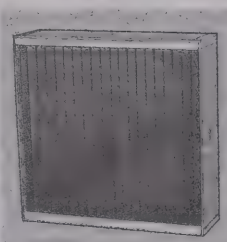
TOTAL AREA OF LIGHT TRAPS NEEDED=(161,280 x 0.004)–25=620 sq. ft.

2. Calculate the number of light traps required at the fan end by taking 55% of the total area of light traps needed. The remaining area of 45% of the total will be required at the intake end of the building.

AREA OF LIGHT TRAPS AT FAN END=620 sq. ft. x 55 percent=341 sq. ft.

AREA OF LIGHT TRAPS AT INTAKE END=620 sq. ft. x 45 percent=279 sq. ft.

3. Calculate the required number of 54" light traps for the fan end using the following area:



No. 3F529, 54" Light Trap: 19.4 sq. ft.

Calculate number of 54" light traps required.

341 ÷ 19.4=17.6 units

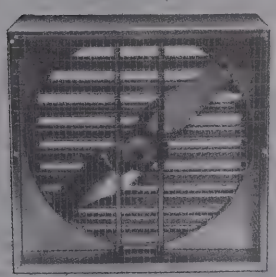
Round up to (18) 54" No. 3F529 light traps.

4. Calculate the required light traps for the intake end in a similar manner.

Dayton®

New

No. 3F529



Replacement Parts Available 1-800-323-0620™

- **Fully assembled light trap works with agricultural building fans to maintain good ventilation and keep unwanted sunlight out**
- **100,000 to 1 light reduction**
- **No enhancer required**
- **1" wide drain along full width of bottom**
- **Durable weather-resistant black high impact polystyrene plastic blades**

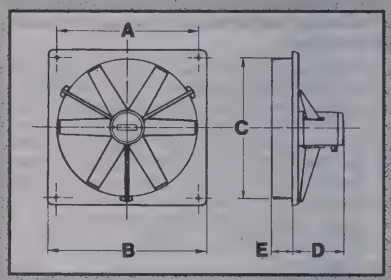
# CORROSION RESISTANT FANS



- 8 to 24" Adjustable speed exhaust fans with high efficiency, water resistant motors
- Engineered for continuous operation in highly corrosive environments
- 120 or 240V, 60 Hz, totally enclosed motors with die cast aluminum housing, automatic thermal protection and heat resistance to 311°F, Class F insulation
- Zinc-plated intake guard meets OSHA regulations
- Balanced polypropylene impeller reduces power costs and extends bearing life
- Specially sealed bearings—high performance lubricant withstands temperatures up to 311°F
- Unique locking design of motor housing and impeller keeps moisture out
- Solid cast aluminum frame; non-corrosive, fine threaded fasteners, non-combustible motor cap, sound-absorbing, anti-vibration cast aluminum supports
- Operate in horizontal or vertical mounting position
- UL Listed and CSA Certified
- Speed of units can be controlled with thermostats, transformers, or electric regulating equipment—not included; No. 3C966 is constant speed only. See speed controls on page 3612.

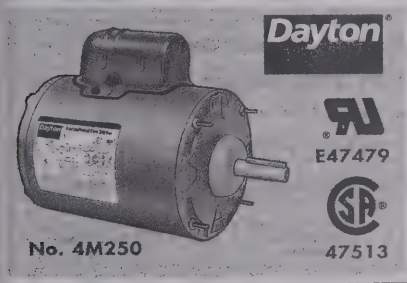
# POULTRY FAN MOTORS

## SINGLE SPEED SPLIT PHASE

- **Gasketed conduit boxes and shaft slinger help protect against water and dirt**
- **Dual voltage ratings and reversible rotation provide added interchangeability in a variety of fan applications**
- **All copper windings**
- **No. 6K791 has extended fan bolts for fan guard mounting**



**Typical Uses:** Exhaust fans operating in poultry and livestock houses. Also used for other fan and blower applications in locations with a dusty, dirty, **noncombustible** environment.

**Bearings:** Double shielded ball
**Enclosure:** TEAO
**Thermal Protection:** Auto
**Insulation Class:** B **Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray **Brand:** Dayton

**CAUTION: Not for fans in unattended areas.**
**Refer to page 6 for UL507 Standard, proper thermal protection and other motor selection information.**

## SINGLE SPEED PERMANENT SPLIT CAPACITOR

**Typical Uses:** Direct-drive exhaust and ventilation fans in poultry and livestock houses.
**Special Features:** Cup-shaped shaft slinger. Fully gasketed. Corrosion resistant bearing caps.
**HP:** 1/2 **Type:** PSC
**Nameplate RPM:** 850 **Volts:** 115/230, 60 Hz
**Full-Load Amps @ Nameplate Volts:** 6.0/3.0.
**NEMA Frame:** 48YZ
**Bearings:** Sealed ball
**Mounting:** Stud **Enclosure:** TEAO
**Shaft Dimensions:** 5/8D x 2⅝"L
**Windings:** Copper
**Service Factor:** 1.25
**Thermal Protection:** None
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW facing shaft
**Finish:** Gray enamel **Brand:** Dayton
**No. 4M250.** Shpg. wt. 22.0 lbs. List ..... $204.00.
Each ..... $134.65

## HIGH EFFICIENCY, SPLIT PHASE-START AND CAPACITOR-RUN

- **High efficiency performance for use in poultry and livestock fans**
- **Gasketed capacitor cover and conduit box provide added protection against dirt and moisture**
- **Can be used to drive fans and blowers in other dusty/dirty noncombustible environments**
- **Dayton brand has all copper windings**

**Bearings:** Dayton-double shielded ball; GE-ball
**Enclosure:** TEAO (No. 3K051 is TENV)
**Thermal protection:** Auto
**Insulation Class:** B
**Ambient:** 40°C
**Duty:** Continuous air-over
**Rotation:** CW/CCW
**Finish:** Gray **Brand:** Dayton and GE

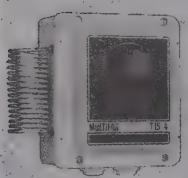
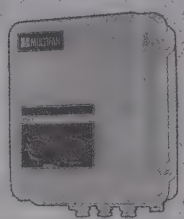
# THERMOSTATS AND ELECTRONIC SPEED CONTROLLERS

## SINGLE-SPEED, TWO-SPEED, & MANUAL CONTROL THERMOSTATS

Multifan



No. 3C952
Single-Speed
Thermostat



No. 3C953
Two-Speed
Thermostat

No. 3C954
Manually
Operated
Transformer
Speed Control

No. 3C957
Thermostat and
Automatic
Transformer
Speed Control

Accurate, trouble-free thermostats provide precise, accurate monitoring of air flow and temperatures within a confined area.

Fully enclosed units are sealed to minimize corrosion and resist damage from dust and moisture.

### Single Speed Thermostat

- Simple, reliable thermostat for trouble-free temperature control
- Adjustment range: 32 to 105°F
- Single-pole double throw contact
- 10 amp, 120/240V
- Multifan brand (T15 WD)

**No. 3C952.** Shpg. wt. 1.0 lbs. List.....$64.63.
Each.....**$38.70**

### Two-Speed Thermostat

- Dependable and accurate
- Adjustment range: 32 to 105°F
- 2 single-pole double throw contacts
- Adjusts separately for minimum and maximum temperature difference
- 10 amp, 240V
- Multifan brand (T15-2)

**No. 3C953.** Shpg. wt. 1.3 lbs. List .$178.74.
Each.....**$107.05**

### Manually Operated Transformer Speed Controls

- Maximum accuracy, minimum care hand-operated fan control
- Six speed step transformer
- Easy to read manual dial
- Resists power surges and lightning
- 110/220V • Multifan brand

| Amps | Multifan Model | Stock No. | List | Each | Shpg Wt. |
|---|---|---|---|---|---|
| 3 | STW-3 | **3C954** | $247.50 | **$148.25** | 9.7 |

| 7 | STW-7 | **3C956** | 342.13 | **205.00** | 18.0 |

### Thermostat and Automatic Transformer Speed Controls

- Thermostat (T15-4) and transformer must be used together
- Resist power surges and lightning
- 5 steps with minimum settings on positions 0, 1, 2 (right hand switch)
- On automatic setting, fan speed automatically increases as temperature rises to maintain precise temperature control
- Manual setting in case of thermostat failure
- Totally sealed, anti-corrosion casing
- Includes pilot lamp
- 110/220V • Multifan brand
- 3 settings available on right hand switch: 0: stop operation, A: Automatic operation, 1–5: Manual operation

| Manual Speed Position | % of Total Speed 3 to 7 Amp |
|---|---|
| 1 | 48 |
| 2 | 58 |

## MODULATING TEMPERATURE CONTROL

PHASON

- ABS non-corrosive, fire retardant enclosure
- 6°F differential
- Fused, overload and transient protected
- Low speed or OFF setting
- Digital temperature display
- Easily accessible automatic and manual settings
- Sensor may be extended for remote settings, 500 ft. maximum
- 120–240V AC, 60 Hz, 10 amps
- 99°F maximum temperature
- CSA file #LR61791
- Phason brand (MTC-4C)

**No. 3C960.** Shpg. wt. 2.0 lbs. List.....$222.05.
Each.....**$120.00**

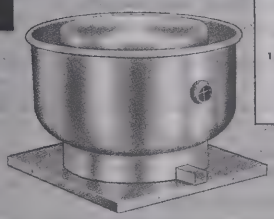
## VARIABLE TEMPERATURE CONTROL

PHASON

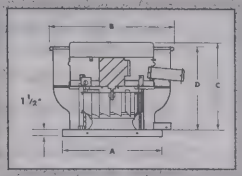
Digitally controlled temperature sensing motor speed controller, automatically regulates fan speed and temperature of industrial buildings and livestock barns.

- ABS non-corrosive enclosure
- Fully adjustable temperature differential (1 to 20°F)
- Fused, overload, transient protected
- Low speed or OFF setting
- Digital temperature display
- Minimum speed from 0–99%
- 120/240V AC, 50/60 Hz, 10 amp
- 99°F maximum temperature
- CSA file #LR61791
- Phason brand (VTC-1D)

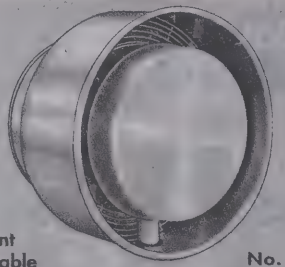
**No. 3C961.** Shpg. wt. 3.0 lbs. List.....$315.05.
Each.....**$184.25**

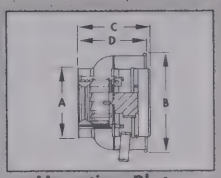


*However, wherever, you need to move air, we have the fans to do it.*



# DIRECT-DRIVE UPBLAST CENTRIFUGAL ROOF AND WALL VENTILATORS





Dayton®

E53236
MH12596

Mounting Plate Included.

Replacement Parts Available
1-800-323-0620

No. 4HZ34 Wall Mount

Exhaust foul air in industrial and commercial buildings. All units are UL Listed Power Ventilators Subject 705. 10.5 through 18.25" units are UL Listed Restaurant Exhaust Appliances (YZHW) Subject 762. See page 3616 for NFPA required accessories. 8" units are UL Listed Power Ventilators Subject 705 only. A continuous venturi to windband weld provides for a virtually leakproof connection. Fully rolled windband bead for increased stability and ease of transport. Backward incline wheel design. The motor compartment is cooled by outside air drawn through an external tube. Spun aluminum construction with galvanized steel support braces. 115V (or 115/230V) 60Hz motors feature ball bearing construction and Class B insulation, and are fully speed controllable. See listing below. **WARNING! DO NOT USE A SPEED CONTROL IN ANY KITCHEN EXHAUST APPLICATION.** Birdscreens available separately. See listing on page 3616. Damper available separately. See listing below. **WARNING: DO NOT USE A DAMPER IN ANY KITCHEN EXHAUST APPLICATION.** NEMA 1 and NEMA 4 disconnect switches available separately. NOTE: Disconnect junction box suitable for NEMA 1 switch factory premounted under motor enclosure. NEMA 3 weatherproof disconnect junction box available separately. See listing on page 3625. Fixed and adjustable ventilated mounting curbs available separately. See listing below and on page 3616. For information on UL 705, UL 762 and NFPA 96, contact a local-licensed contractor or building inspector.

amca CERTIFIED RATINGS SOUND PERFORMANCE AIR MOVEMENT AND CONTROL ASSOCIATION, INC.

Dayton Electric Mfg. Co. certifies that the direct-drive ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and 311 comply with the requirements of the AMCA Certified Ratings Program.

The Sound Ratings shown are loudness values in fan sones at five (5) feet in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators listed are for: Installation Type A: Free inlet fan sones.

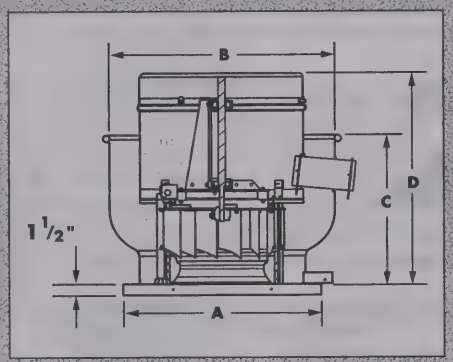
(†) Speed (RPM) shown is nominal and performance shown is based on actual speed of test. Performance ratings do not include the effect of appurtenances in the airstream. Performance shown is for Installation Type A: Free Inlet, Free Outlet.

# BELT-DRIVE UPBLAST CENTRIFUGAL ROOF AND WALL VENTILATORS



E53236
MH12596

LR111012

Replacement Parts Available
1-800-323-0620

No. 4HX95

- Exhaust foul air in industrial and commercial applications where the discharge must be thrown into the atmosphere away from the roof or wall surface
- All units are UL Listed Power Ventilators Subject 705
- Spun aluminum construction with galvanized steel support-braces
- Fully rolled windband bead for increased stability and ease of transport
- A continuous venturi to windband weld provides a virtually leakproof connection
- Backward incline wheel design
- 10½-24½ units have permanently lubricated, maintenance-free bearings
- 30 & 36½ units have regreasable pillowblock bearings and are ROOF MOUNT ONLY
- Motor and drives are packed separately when ordering the 7-Combo numbers
- Nema 1 junction box located in motor enclosure
- Nema 1, 3R, & 4 switchgear: see page 3625
- Non-Kitchen dampers listed below & page 3617
- Roof curbs listed on pages 3615, 3616 and 3617
- Birdscreens: see page 3616
- For more information on UL 705, UL 762, and NFPA 96, contact a local licensed contractor or building inspector

## RESTAURANT APPLICATONS

- 10½-36½" units are UL listed Restaurant Exhaust Equipment Subject 762 (YZHW). See page 3616 for NFPA 96 accessories
- DO NOT USE A DAMPER IN A NFPA 96 INSTALLATION
- NFPA 96 REQUIRES VENTILATED ROOF CURB: see page 3616

## HAZARDOUS LOCATION APPLICATION‡

- 13½-36½" units are available in Hazardous Location configuration complete with motor and drive: see page 3615 for 7-Combo number. Note: Haz Loc base ventilator less motor and drive are not available
- 10½ & 12¼" units are NOT for Haz Loc applications
- Non-Haz Loc ventilators are NOT interchangeable with Haz Loc Ventilators
- Note: Haz Loc units have different height dimension "D". See table below

**Consult with your local Ventilation or Fire Inspector for all code requirements.**

amca CERTIFIED RATINGS SOUND AIR PERFORMANCE AIR MOVEMENT AND CONTROL ASSOCIATION, INC.

Dayton Electric Mfg. Co. certifies that the belt-drive ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and 311 comply with the requirements of the AMCA Certified Ratings Program.

The Sound Ratings shown are loudness values in fan sones at five (5) feet in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators listed are for Installation Type A: Free Inlet fan sones.

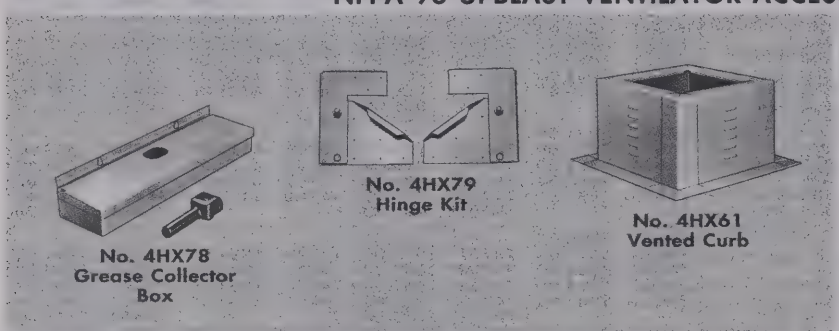
# POWER ROOF VENTILATORS

# GENERAL VENTILATION & COMMERCIAL KITCHEN CERTIFICATIONS

## UL 705 AND UL 762 REQUIREMENTS

### UL 705



**Direct and belt-drive Centrifugal Upblast and Downblast Ventilators** are UL Listed Power Ventilators, Subject 705 when purchased complete with specified Dayton motor and drives and for general ventilation.

### UL 762

**10½ through 36½" Direct and Belt-drive Centrifugal Upblast Ventilators only** are UL Listed Restaurant Exhaust Appliances (YZHW), Subject 762 when purchased complete with specified Dayton motor and drive.

Installation of UL 762 ventilators should meet the requirements of NFPA 96, Edition 1994, Standard for Ventilation Control and Fire Protection of Commercial Cooking Operations, as well as local codes.

## NFPA 96 UPBLAST VENTILATOR ACCESSORIES

**GREASE COLLECTOR BOX.** Fastens to ventilator base. Easy to remove for cleaning. Diverts and traps heavy residual grease while protecting roof surface.

**No. 4HX78.** Shpg. wt. 13.0 lbs. List $109.80 Each ..... **$65.75**

**HINGE KITS.** Allow entire fan to swing away for access to the wheel and ductwork.

**No. 4HX79.** for 10½-18¼" units. Shpg. wt. 3.5 lbs. List $101.36. Each..... **$60.70**

**No. 4HZ74.** for 20- 36½" units. Shpg. wt. 5.0 lbs. List $341.51. Each..... **$204.50**

**NEMA 4 NON-REVERSING MANUAL DISCONNECT SWITCHES.** Nos. 1H408, 1H409 and 2BW06 provide manual On/Off control of single or 3-phase AC motors where overload protection is not required or is provided separately. See page 453 for listing.

### NFPA 96 UPBLAST VENTED CURB

- **16 gauge galvanized steel ventilated curb for use in commercial kitchen applications**
- **Self-flashing. Flat mounting flange fastens directly to roof deck**
- **Stamped louvers on curb sides ventilate hot exhaust ducts to protect building and roof members**
- **Top flange surface is 1½"W; base mounting surface flange is 3½"W**

Allows for quick ventilator installation and uniformity throughout the entire job. Most curbs accept several ventilator sizes.

### BIRDSCREENS

- **Nickel-chrome plated for durability**
- **Successfully passed twenty-four hour salt spray test**
- **Concentric ring birdscreen precisely sized to eliminate any rattling.**

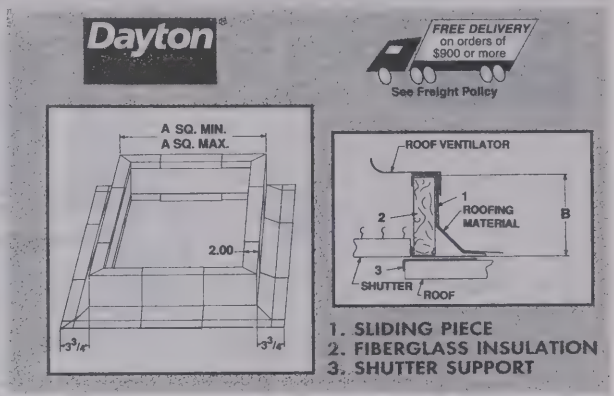
*Exhaust it, filter it, exchange it — we have the ventilators to get it done.*



# 6 AND 12" ADJUSTABLE CURBS FOR ROOF VENTILATORS

**Speeds ventilator installation** while providing uniformity throughout entire job. Each curb accepts several ventilator sizes.

**Four corners** of 22-ga. galvanized steel with four 24-ga. galvanized center supports. Canted surface accommodates roofing material up the side and over the top of curb for leakproof installation. Allow clearance between all sides of curb and ventilator base for roofing material. Fiberglass insulation deadens sound and minimizes heat loss. Shutter flanges included. Heavy steel. 2 x 2" wood nailers (not included) easily field adapted. Curbs shipped unassembled. **Not intended for rubber roof installations. Warning! Not for use with any NFPA 96 installation.**

# POWER ROOF VENTILATOR ACCESSORIES

### BACKDRAFT DAMPERS

**For direct or belt-drive centrifugal roof and wall ventilators.**

**Roof mount units** have 19 gauge galvanized steel frame, 2" deep with 1" flange. Aluminum blades have felted edges for quiet operation. Prepunched conduit hole knock-out. **Wall mount units** have 16 gauge extruded aluminum frame, 1½" deep with 1⅜" flange. Wall mount blades are aluminum with felted edges.

**WARNING! NOT FOR USE WITH ANY KITCHEN EXHAUST APPLICATION.**

### FIXED ROOF CURBS

Heavy gauge galvanized steel construction with welded corners. Canted surface accommodates roofing material up side and over the top of curb for leakproof installation. Fiberglass insulation deadens sound and minimizes heat loss. Shutter flanges included.

**Warning! Not for use with any NFPA 96 Installation.**

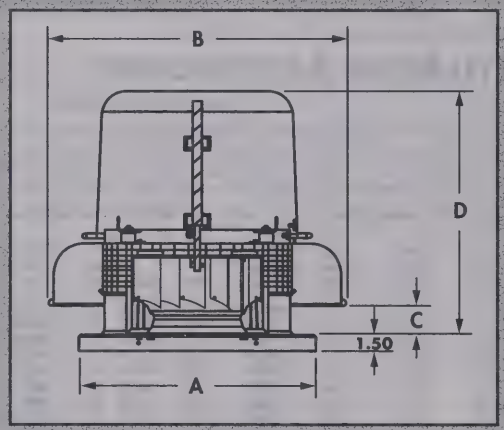
# BELT-DRIVE DOWNBLAST CENTRIFUGAL ROOF VENTILATORS



Dayton®

E53236

Replacement Parts Available 1-800-323-0620

No. 4HX84

## COMMON FEATURES

- Exhaust foul air in industrial and commercial applications which have extensive duct systems or require relatively quiet operation
- Maximum inlet temperature: 170°F
- All units are UL Listed Power Ventilators Subject 705
- Spun aluminum construction with galvanized steel support braces
- Fully rolled windband bead for increased stability and ease of transport
- Backward incline wheel design
- 10½ - 24½" units have permanently lubricated, maintenance-free bearings
- 30 - 49" units have regreasable pillowblock bearings
- Motor and drive components are packed separately when ordering the 7-Combo numbers
- NEMA 1 junction box located under motor enclosure
- NEMA 1, 3R, & 4 switchgear: see page 3625
- Backdraft dampers listed below & page 3617
- Roof curbs listed on the following page & page 3617
- For information on UL 705: contact a local licensed contractor or building inspector

## HAZARDOUS LOCATION APPLICATIONS†

- 13½ - 49" units are available in Hazardous Location configuration complete with motor and drive: see page 3619 for 7-Combo numbers. Note: Haz Loc base ventilator less motor and drive is not available
- 10½ & 12¼" units are NOT for Haz Loc applications
- Non-Haz Loc ventilators are NOT interchangable with Haz Loc ventilators
- Note: Haz Loc units have different height dimension "D". See table below

Consult with your local Ventilation or Fire Inspector for other code requirements.

amca CERTIFIED RATINGS — SOUND AIR PERFORMANCE — AIR MOVEMENT AND CONTROL ASSOCIATION, INC.

Dayton Mfg. Co. certifies that the belt-drive ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The Sound Ratings shown are loudness values in fan sones at five (5) feet in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators are for Installation Type A: Free Inlet fan sones.

(†) Power ratings (BHP) do not include drive losses. Performance shown is for Installation Type A: Free Inlet, Free Outlet. Performance ratings do not include the effects of appurtenances in the airstream. **(*) Motors are UL listed for Class I, Division 1, Group D, and for Class II, Division 1, Groups F and G. See page (133 in catalog #390) for definitions. Ventilators meet the AMCA Type C Classification for Spark Resistant Construction.**

POWER ROOF VENTILATORS

# BELT-DRIVE AXIAL UPBLAST VENTILATORS

- For exhaust applications in industrial/commercial buildings, foundries, laboratories, machine shops, and warehouses
- High exhaust velocity opens butterfly damper
- The butterfly dampers feature a magnetic seal and rolled edges to reduce entrance of weather into facility when the ventilator is not in operation
- Housing, windband, and base are galvanized metal construction
- Statically balanced steel propeller
- Permanently lubricated, maintenance-free bearings factory installed on sizes 24 - 48"
- Regreasable, pillow-block bearings factory installed on sizes 54-60"
- Single or three phase 1725 RPM ball bearing motors and drives packed separately when ordered with ventilator
- Curbs available separately. See listing below and on page 3617

**NOTE: Ventilator is not 100% weatherproof, therefore not recommended for use over areas that may be damaged by dripping water.**

**NOTE: Ventilator and motor do NOT feature spark resistant construction. Do not use in explosive atmospheres.**

amca CERTIFIED RATINGS — SOUND AND AIR PERFORMANCE — AIR MOVEMENT AND CONTROL ASSOCIATION, INC.

Dayton Electric Mfg. Co. certifies that the belt-drive ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and 311 comply with the requirements of the AMCA Certified Ratings Program.

The Sound Ratings shown are loudness values in fan sones at five (5) feet in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators listed are for: Installation Type A: Free Inlet fan sone levels

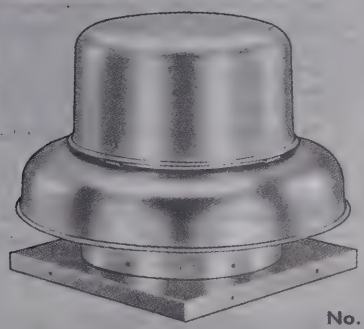
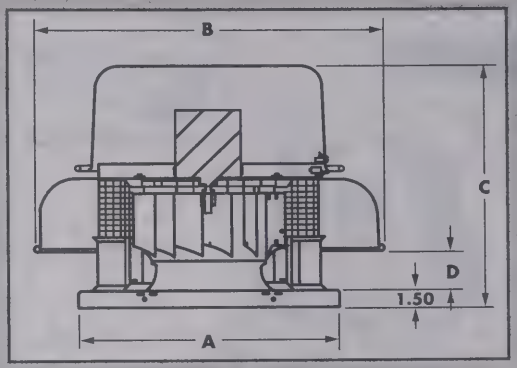
(*) Peak break horsepower over catalog range. Motors are sized on the basis of internal temperature rise—rather than nameplate horsepower. (**) Not available - Fabricate locally



*Exhaust it, filter it, exchange it — we have the ventilators to get it done.*

# DIRECT-DRIVE DOWN BLAST CENTRIFUGAL ROOF VENTILATORS



**POWER ROOF VENTILATORS**

Dayton®

Replacement Parts Available 1-800-323-0620

No. 4HZ24

UL E53236

CSP

Dayton Electric Mfg. Co. certifies that the direct-drive ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The Sound Ratings shown are loudness values in fan sones at five (5) feet in a hemispherical free field calculated per AMCA Standard 301. Values shown for ventilators listed are for Installation Type A: Free inlet fan sones.

- Exhaust foul air in industrial and commercial buildings
- All units are UL Listed Power Ventilators Subject 705
- Backward incline wheel design
- Fully rolled windband bead for increased stability and ease of transport
- The motor compartment is cooled by outside air
- Spun aluminum construction with galvanized steel support braces
- 115V (or 115/230V) 60Hz motors feature ball bearing construction, Class B insulation, and are fully speed controllable. See listing below
- Maximum inlet temperature is 170° Fahrenheit
- Damper available separately. See listing below
- NEMA 1 disconnect switches available separately
- Note: Disconnect junction box suitable for NEMA 1 switch factory premounted under motor enclosure
- Fixed mounting curbs available separately. See listing below

For an explanation of UL 705, contact a local licensed contractor or building inspector.

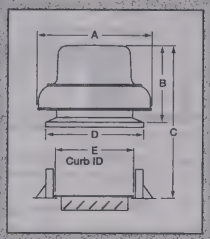
(†) Speed (RPM) shown is nominal and performance shown is based on actual speed of test. Performance ratings do not include the effect of appurtenances in the airstream.
Performance shown is for Installation Type A: Free Inlet, Free Outlet



# BELT AND DIRECT DRIVE AXIAL EXHAUST VENTILATORS

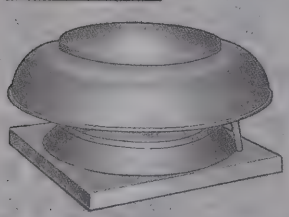
Dayton®

E53236

Dayton Electric Mfg. Co. certifies that the Models 5M149, 5M150, 5M151, and 5M152 ventilators shown hereon are licensed to bear the AMCA seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

Replacement Parts Available 1-800-323-0620

## BELT-DRIVE EXHAUST



- The motor compartment is cooled by outside air
- Spun aluminum housing and galvanized steel base, stamped steel blade
- Motor and drive located outside discharge air stream
- Ball bearing motor and drives are packed separately when ordered with ventilators as 7-combo
- Permanently lubricated maintenance free bearings factory installed
- Maximum inlet temperature is 104°F
- All units are UL Listed Power Ventilators Subject 705
- Backdraft damper - sold separately

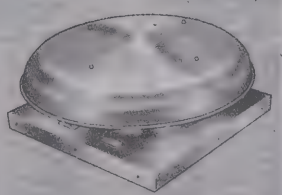
**Roof mounted units** provide controlled mechanical supply of filtered air to commercial and industrial buildings, commercial kitchens, and restaurants. Replace stale air and fumes removed by exhaust fans. Can be incorporated into heating and cooling systems. Replacement air reduces negative pressure in buildings that can make doors difficult to open and reduce exhaust fan capacity. Help prevent dust, dirt, and insects from entering building. Reduce drafts coming from open doors and windows. Filter arrestance approx. 60%.



**Predrilled and slotted panels** for quick assembly; all hardware included; no special equipment required to raise components to roof. Galvanized steel construction; die-formed louvered side panels; 1" thick washable aluminum filters. Belt-drive, double width double inlet, forward curve blowers with housing supports, duct adapter, motor brackets, and permanently lubricated ball bearing blowers and motors. Panel assembly, blower motor, and drives shipped in separate cartons.

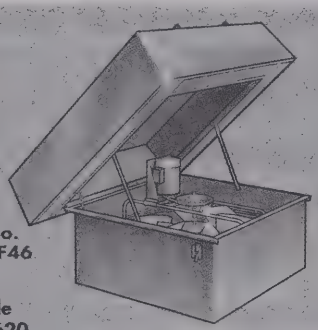
# DIRECT-DRIVE AXIAL SUPPLY VENTILATOR

UL E53236

AMCA CERTIFIED RATINGS PROGRAM

No. 3C405

Dayton®



- **Provide outdoor air to commercial and industrial buildings**
- **Supplies replacement air to minimize negative pressures**
- **Used in factories, restaurants, offices, foundries, and boiler rooms**
- **Factory wired safety disconnect switch**
- **Maximum inlet temperature is 120°F**
- **Roof curbs - All units: 6⅜"H - 4C454; 12⅜"H - 3C437**

Dayton Electric Mfg. Co. certifies that the ventilators shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

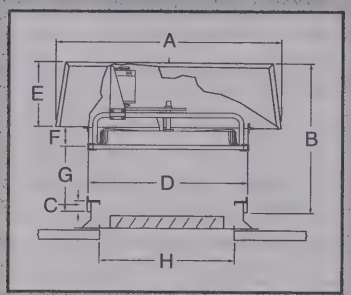
Performance shown is for installation Type A: Free Inlet, Free Outlet. Performance ratings do not include the effects of appurtenances in the airstream.



# VENTILATORS FOR EXHAUST, SUPPLY, AND REVERSIBLE OPERATION

No. 7CF46

Replacement Parts Available 1-800-323-0620

Shown In Service Position

Illustrated Completely Assembled; Shipped as Separate Components. Shutter, Damper or Curb Not Included. See Index for Listing.

- Roof mounted ventilators for factories, warehouses, laundries, etc.
- Galvanized steel hood and side panels
- Steel blades are statically balanced - 5 blades on exhaust or supply models, 8 on exhaust/supply models
- Easy to assemble - Side panels bolt together. Fan mounts on heavy gauge flanges on inside of side panels. Adjustable motor mount for ease of belt tensioning. Pre-assembled top including birdscreen hinges to side panels
- Unit is weathertight when fully assembled and latched (latches have provisions for locks)
- Air deliveries up to 22,575 CFM at 1/8" SP. Maximum inlet temperature: 120 degrees Fahrenheit
- Heavy-duty, 1725 RPM, ball bearing motors feature an easy to access motor terminal box
- Some exhaust/supply models feature electrically reversible motors
- Housing, fan, and motors are shipped separately
- Fans feature self-aligning pillow-block bearings and cast iron pulleys
- Ceiling shutters available separately, see page 3597
- Motorized damper available separately, see page 3598
- Adjustable curbs available separately, see page 3617

## UL LISTING AND CSA CERTIFICATION

When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

# AXIAL FANS AND PORTABLE BLOWER

## AXIAL FANS

- Provide ventilation and spot cooling where space is limited
- Axial fans are used in computers, copy machines, office equipment, industrial control equipment, audio/visual equipment, vending machines, telephone equipment, light projectors, TV cameras, and other electrical equipment
- 22 to 550 CFM
- Operating temperature ranges from -28°C to +70°C
- Two-pole, shaded pole induction motors, IEEE Class 130 insulation, impedance protected, 100% dielectric tested at 1800 VAC/1 Sec./500 microamps maximum leakage
- UL Component Recognized, CSA Certified,
- Nos. 5N466, 5N472, and 5N473 TUV Certified; Nos. 5N474 and 5N476 VDE Certified
- See Axial Fan Accessories listed on page 3629

## PORTABLE BLOWER

Dayton®

UL E19455

Replacement Parts Available 1-800-323-0620™

- Easy-to-see yellow housing; helps identify potential physical hazards (such as falling or tripping) as recommended by ANSI Standard Z53.1
- Totally enclosed, 2-speed motor designed for indoor/outdoor use
- For added protection, blower guards comply with OSHA standards

Used for carpet drying, floor drying, exhausting foul air, ventilating, and spot cooling. High density polyethylene housing has a built-in power cord wrap for easy cord storage and handling. Cord connected ground fault interrupt helps protect user from possible hazardous shock. 20-Ft. 18/3, SJTW-A water resistant power cord.

Power Cat® Portable Blowers are also available, see page 3645.

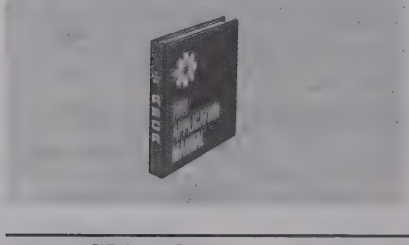
## AC AND DC AXIAL FANS

For spot cooling and ventilating office machines, computers, and other electrical equipment. Impedance protected shaded pole motors have sleeve bearings. Designed for vertical mount only.

Fan blade is polybytylene terephthalate (PBT) plastic, flame rated UL 94V-O. Maximum ambient temperatures is 149°F (65°C) for all models. Fans are compatible with Dayton fan guards and cord sets. Black painted finish. Sunon brand.

**Brushless DC Fans.** Fans 3⅛" and smaller have PBT plastic housing. 4 11/16" fans have aluminum housings. 12" long leads. Polarity protected motor. Voltage range for nominal 12 VDC fan is 6 to 16 VDC; for nominal 24 VDC fan it is 12 to 30 VDC.

**AC Fans.** Cast aluminum housing. Class B insulation. Nos. 4C914 through 4C917 require cord set No. 4C552. No. 4C913 has 12" leads. UL Recognized and CSA Certified. 50/60 Hz.



No. 4C909

## AMCA FAN APPLICATION MANUAL

Heavily illustrated manual contains four separate technical publications in one binder: **Air Systems (#200-95)** provides basic information needed to design effective, energy efficient air systems. Includes information on System Pressure Losses, Fan Performance and System Effect. **Fans and Systems (#201-90)** discusses effects of fan system and its relationship to fan's performance. **Troubleshooting (#202-88)** is intended to help identify and correct problems with performance and operation for air moving systems after fan is installed. **Field Performance Measurement of Fan Systems (#203-90)** reviews field measurements and calculations needed to determine actual performance of fan and system.

8½ x 11 x 2" thick binder. 278 pages. AMCA (#B200-3).

**No. 3CC67.** Shpg. wt. 4.3 lbs. List.....$98.50. Each.....**$59.00▲**

*Exhaust it, filter it, exchange it — we have the ventilators to get it done.*

# AXIAL FAN ACCESSORIES

**Cord Sets.** Type SPT-1, 18/2 AWG, plugs into terminals of all terminal base axial fans. For use with 115V or 230V, 50/60 Hz power. Use of these cordsets with 230V requires running a ground wire (not included) between fan grounding lug and ground wire on circuit. UL Component Recognized. CSA Certified. 24 and 36" long cords are blunt cut. 72" cord has NEMA 1-15P wall plug on opposite end. Fan plug heads are either 45 or 90° angle. Available individually or in bulk pack of 100.

**Wire Fan Guards.** Wire formed guards fit all standard 2⅜, 3⅛, 4$^{11}/_{16}$, 6, and 10" fans*. Nickel chrome plated. Guards comply with safety recommendations for 1/4" spacing.

**Plastic Fan Guards.** Fit all standard 2⅜, 3⅛, 4$^{11}/_{16}$, and 6" fans*. Made from UL Listed 94-VO material and meet UL 1/4" plug gauge test for added protection. Countersunk mounting holes. Withstand high impact.

**Plastic Fan Guards with Media Filter.** Fit all standard 2⅜, 3⅛, and 4$^{11}/_{16}$, and 6" fans*. Consists of fan guard, filter media, and retainer. Guard and retainer only, made of UL Listed 94-VO material. Polyurethane foam media filter has 30 pores/inch to remove dust and contaminating particles. Media is washable with a mild soap solution. Snap-off retainer allows media to be cleaned or replaced without disturbing fan guard.

# 12 TO 320 CFM SHADED POLE BLOWERS

(†) Q Dim. No. 4C015, 5 11/16"; No. 2C069, 7 3/4".

Dayton

- Shaded pole blowers provide economical air delivery for heating, ventilating, exhausting, or cooling components
- Forward curved wheels driven by dependable Dayton motors with all position mounting sleeve bearings and Class B insulation (except No. 2C782)
- Open dripproof motors rated for continuous duty
- Adjustable air inlet dampers available on Nos. 2C914, and 4C440
- Maximum ambient temperature 104°F (40°C)
- Baked gray enamel finish

**All shaded pole blowers** listed in this catalog except No. 2C646 are equipped with motors that are recognized by UL under the Motor Component Recognition Program for construction, File E47479; for thermal protection, File E37403; for impedance protection, File E40077; for Class B insulation, File E61921, CSA listing No. LR36496 for blowers with free air RPM greater than 2800 and LR6319 for those with RPM of less than 2800.

**NOTE: Not for use with speed controllers.**

**Replacement Parts Available**
**1-800-323-0620**

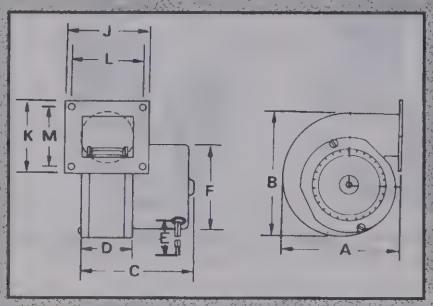
- Provide economical air delivery for larger applications in heating, ventilating, exhausting, and cooling
- Forward curved wheels driven by Dayton motors rated for continuous duty with all-position mount sleeve bearings
- Baked on gray enamel finish



No. 4C448, 4C565, 5C507, 5C508

No. 2C335 Housing Support

No. 2C946, 4C054, 4C668, 4C830, 4C831

Replacement Parts Available 1-800-323-0620

**Maximum ambient temperature** 104°F (40°C). Capacitors included on all energy efficient PSC blowers. Two-speed blowers require No. 2X605 two-speed switch (not included, see Index under Motor Parts and Accessories, Relays.)

**Open dripproof motors** recognized by UL under Motor Component Recognition Program; for construction, File E47479; for thermal protection, File E37403. Blowers without outlet flange can use No. 2C335 housing support for mounting, (see listing below.) Dayton brand.

**NOTE: Not for use with speed controllers.**

**PRE-PUNCHED METAL HOUSING SUPPORT.** Enables base mounting No. 2C962, 2C946, 4C054, 4C668, 4C830, and 4C831 blowers for bottom horizontal, top horizontal, and upblast discharges. 12¾" long. Gray finish. Sold in pairs.

**No. 2C335.** Shpg. wt. 1.5 lbs. List .....$15.17. Each .....**$9.08**

**Low profile blower housings** are double width, double inlet design. Provide a wide air flow pattern to cool or ventilate equipment where mounting space is limited. Forward curved centrifugal wheels located within the twin housings are capable of operating against higher static pressures than transflow type blowers.

**Used in fireplace inserts,** wood burning stoves, kitchen range hoods, heat transfer equipment, electronic cooling units, medical equipment, and air cleaners.

**Blowers are mounted on six rubber isolators** to absorb vibration and noise. Shaded pole open dripproof Class B insulated motors are UL Recognized under the Motor Component Recognition Program. Continuous duty, automatic thermally protected motors are built to pass the UL half wave test.

**Maximum ambient temperature** 104°F (40°C). Baked-on gloss black enamel finish. Blowers have 16" long leads. CSA Certified. Dayton brand.

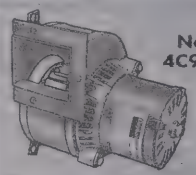
# HIGH TEMPERATURE BLOWERS, BLOWER WHEELS AND PLASTIC BLOWERS

## HIGH TEMPERATURE BLOWERS



**Industrial grade blowers** handle air temperatures up to 450°F at blower inlet with a maximum motor ambient temperature of 104°F.

**Used as draft inducers,** flue gas exhausters, and warm air circulators in remote locations where motor relubrication is not practical.

**All models** have sealed ball bearings and a three sided mounting flange (No. 4C723 has high temperature sleeve bearings and no mounting flange).

**Externally mounted cooling fan** between motor and housing helps cool bearings and is protected by cast aluminum finger guard. Continuous duty 50/60 Hz Open Dripproof motors with Class B insulation and automatic reset thermal protection.

**Blower housings** have side mounting tabs for easy installation. High temperature resistant flat black enamel finish. Dayton brand.

## DIRECT-DRIVE BLOWER WHEELS

- **Dynamically balanced**
- **Clockwise rotation facing hub**
- **Double inlet forward curved wheels**
- **Used as original equipment or replacements in industrial and commercial direct drive blowers**

**Wheels used for furnace,** ventilation system, and solar system applications.

**All steel wheels have** highly corrosive resistant finish and are carefully trued and dynamically balanced.

**Wheels have 1/2" bore** and square head set screw in hub. 1650 RPM maximum. Wheel sizes are interchangeable with major wheel manufacturers (see cross reference table below right). Wheels are individually cartoned for greater protection. Lau brand. For cross reference information, see page opposite inside back cover.

## FLANGE MOUNT PLASTIC BLOWERS

**Reinforced plastic blowers** provide economical air deliveries at higher static pressures for heating, ventilating, exhausting, and cooling application

**DC models** are designed for noncontinuous duty applications such as emergency or back-up ventilation, portable equipment, marine, motor, or recreational vehicles.

**Plastic housing and wheel** are dimensionally stable to stay in balance with no bent blades to rattle or corrode. Maximum ambient temperature at inlet: 130°F.

**DC blowers** meet applicable sections of the US Coast Guard Electrical Regulations (Title 33, Chapter I, Part 183, Subpact1), and are listed as National Marine Manufacturers Association (NMMA) Type accepted. ITT Jabsco brand .

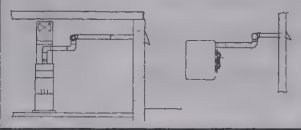
# HIGH TEMP. SIDEWALL POWER VENTERS AND VENT TERMINATION HOOD

TJERNLUND PRODUCTS INC.

No. 4C726



Replacement Parts Available 1-800-323-0620

UL Except No. 4C729

MH13682

**Typical Installation**

Floor Set Heater or Boiler — Suspended Unit Heater

- **Vent flue gases from furnaces, boilers, pool heaters, water heaters, and unit heaters**
- **Exhaust flue gases directly through sidewall (gas systems only); not for use in oil burning applications**

Used for electric to gas conversions, renovations, new construction and for replacing chimneys. Eliminate roof penetrations. All models feature prewired diaphragm proving switch, 24/115 VAC switching relay, color coded control leads. Easy field wiring interlocks power venter with appliance so venter operation is proven before burner operation.

**Corrosion resistant aluminized steel** housing, blower wheel, and motor heat shield. Vibration isolation mount and adjustable damper. **Nos. 4C726, 4C727, and 4C728 only** are listed under UL Standard 378 for use on appliances with flue gas temperatures not exceeding 600°F at blower inlet. Tjernlund brand vent hood No. 4C845 is recommended for Nos. 4C726 and 4C727.

| | 700 | 21 | 100 | — | | | | | | | | | | | | | | | | | |

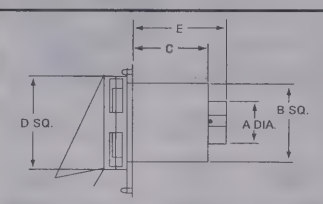
Given the following data, determine which venter model to use for the application:

Btu/Hr. input = 150,000 Btu/Hr.
Pipe length = 15 ft.
Pipe diameter = 4 inches
Pipe fittings required = 1 -90° elbow
Vent cap required = 1
Flue gas temperature = 400°F

**BLOWER SELECTION EXAMPLE**

**SOLUTION**

**Step 1:** Calculate Equivalent Pipe Length



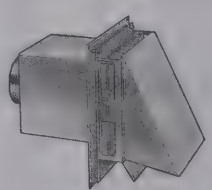
| | |
|---|---|
| Pipe length to sidewall | = 15 ft. |
| Vent cap equivalent pipe length | = 10 |
| 90° elbow equivalent pipe length | = 10 |
| Total Equivalent Pipe Length | 35 ft. |

**Useful Conversion Factors**

90° Elbow = 10 ft. Straight vent pipe
45° Elbow = 5 ft. Straight vent pipe
Vent Cap = 10 ft. Straight vent pipe

**Step 2:** Refer to table above for appropriate BTU/Hr. input and pipe diameter. Read maximum pipe length under appropriate stack temperature column. Example: 60 ft.

**Step 3:** The equivalent pipe length of 35 ft. must not exceed the maximum pipe length found in the table (60 feet). The No. 4C727 is the correct selection for this example. If the desired pipe length is greater than the maximum pipe length recommended in the table, use the next larger pipe diameter or next larger venter.



**VENT HOOD DIMENSIONS, (In Inches)**

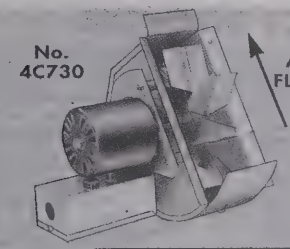
| A Dia. | B Sq. | C | D Sq. | E | Rough-in Dimensions |
|---|---|---|---|---|---|
| 4 | 7½ | 7⅛ | 9 | 8⅞ | 8 |

## HIGH TEMPERATURE VENT HOOD

TJERNLUND PRODUCTS INC.

Replacement Parts Available 1-800-323-0620

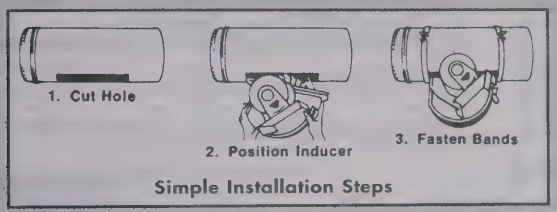
Designed to efficiently terminate 4" horizontal vent runs handling flue gases from furnaces, unit heaters, and boilers. Can be used with Nos. 4C726 and 4C727 side wall vents.



18-gauge corrosion resistant aluminum alloy. Has flow-thru baffles to deflect exhaust gases away from buildings and prevents back-drafts caused by the wind. Built-in heat shield provides a clearance from combustible material contained in walls. Tjernlund brand. (VH-1-4).

**No. 4C845.** Shpg. wt. 6.3 lbs. List.....$126.00.
Each.....**$71.60**

*Exhaust it, filter it, exchange it — we have the ventilators to get it done.*



# IN-LINE DRAFT INDUCERS

LR23078
Nos. 4C730
& 4C731

TJERNLUND PRODUCTS INC.

Replacement Parts Available
1-800-323-0620

Simple Installation Steps

- **Provides positive draft for smokepipe to aid proper exhaust of combustion gases**
- **Use with oil, gas or coal fired systems in commercial and industrial applications**
- **Not for sidewall venting**
- **Not for wood burning applications**

**Draft inducer** is mounted to vertical, horizontal or inclined breeching between a barometric draft control (if installed) and as near a chimney as possible when vent system terminates through roof. Useful when restricted boilers and furnaces, poor chimneys or negative pressures in the building prevent proper exhaust of combustion gases. **Aluminized steel housing** and wheel, motor heat shield, oversized conduit box. Variable draft control permits adjustments to individual application requirements. 115V, 60 Hz.

**Optional fan proving switch,** No. 4C725 (see below), is designed to monitor the fan housing pressure. When installed, the burner fires after draft inducer operation is proved. A motor or wheel failure will shut down the system. Tjernlund brand.

## IN-LINE DRAFT INDUCER SPECIFICATION DATA

| Stock No. | Dimensions (In.) Height | Width | Depth | Cut-out Required, (In.) | HP | RPM | Watts | Amps |

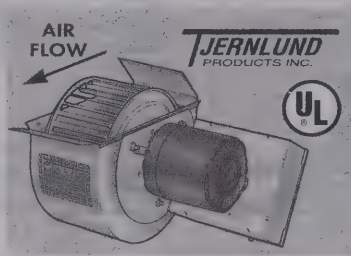
(*) Screw Attachment Only—No Fastening Bands

The performance table shows typical capacities for inducers when mounted on pipe sizes shown, where moderate amounts of mechanical draft induction is needed. For more severe applications requiring higher static pressures, a reduction in pipe size or a larger inducer may be required. Heating capacities shown are for 1000 BTU per cu. ft. of natural gas and for 139,000 BTU per gallon #2 fuel oil.

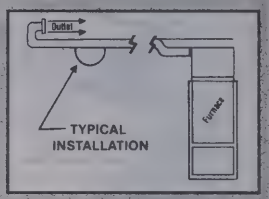
**EXAMPLE JOB CONDITIONS:**

- **900,000 BTU input gas fired boiler with draft hood**
- **8" Diameter smokepipe from draft hood**
- **Draft problem—smoke entering boiler room due to undersized chimney**

Under the gas firing with draft hood column, 900,000 BTU input with an 8" pipe will provide an input of 590 CFM at 0.125" SP. No. 4C732 would be the correct selection to handle the job example.



**Fan Proving Switch.** Rated for 125 VA pilot duty at 24 VAC, 300 VA pilot duty up to 277 VAC. 15A non-inductive to 277 VAC. Tjernlund brand (PS 1505).



**No. 4C725.** Shpg. wt. 2.0 lbs. List $93.00. Each ..... $51.05

# AIR DUCT BOOSTERS AND WATER HEATER VENT PACKAGE

## AIR DUCT BOOSTER

- **Increases air flow in existing heating/cooling ductwork; useful in hard-to-heat or hard-to-cool rooms**
- **Eliminates need for auxiliary heating and cooling units and unnecessary thermostat adjustments to compensate for temperature imbalances**
- **Maximum operating air temperature is 200°F; not for use with combustion exhaust**
- **Can be mounted on bottom of horizontal or side of vertical duct. Motor shaft should remain horizontal to the floor.**

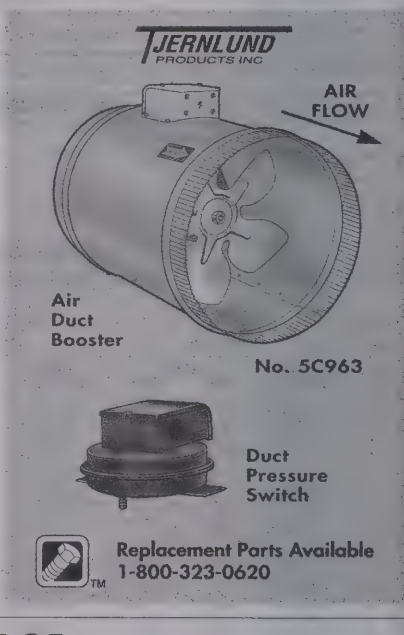
**Booster fits in round, square, or flat ducts** as shallow as 3¼" deep. A 4 x 7" cutout is required. Unit attaches to ductwork with four sheet metal screws. Can be wired in parallel with furnace/air conditioner blower to operate when blower is running or wired to a thermostatic control (not included).

**Steel housing and wheel.** 1/70 HP, 1550 RPM, 115V, 60 Hz permanently lubricated motor is positioned out of the air stream. UL Listed (E67265). Tjernlund brand (DB-2).

**No. 4C724.** Shpg. wt. 6.5 lbs. List $108.00. Each.....**$56.00**

| Static Pressure | .040 | .045 | .050 |
|---|---|---|---|
| CFM* | 200 | 180 | 100 |

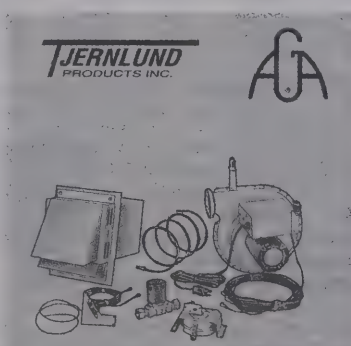
(*) Air moving through 8" diameter pipe. Air flow will increase slightly with larger diameter pipe and decrease with smaller pipe.



## AIR DUCT BOOSTERS

- **Used for powered air intake and exhaust systems to boost air flow in hard-to-heat or cool areas**
- **Easy to install in metal and flex duct**
- **Galvanized steel housing with built-in duct stop on the inlet and crimped edge on the outlet**
- **External junction box for easy wiring**
- **Maximum operating temperature is 150°F**
- **Optional speed control No. 5C203 can be used on 6, 8, and 10" units only.**

**Duct Pressure Switch.** Senses positive air pressure in a duct to activate a duct booster fan, electronic air cleaner or humidifier. Diaphragm switch is normally open. Operates between 24 and 277 VAC, 15 amp rating. Tjernlund brand (PS1503).



**No. 5C968.** Shpg. wt. 1.4 lbs. List .....$72.00. Each .....**$36.05**

## WATER HEATER VENT PACKAGE

- **Vent gas water heaters through building wall with minimum installation time and maximum safety and performance**
- **Used for upgrading water heaters from electric to gas, in renovations or new construction where no chimney exists**
- **Vent space and pool heaters up to 60,000 BTU input.**

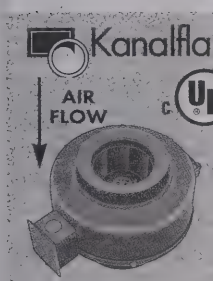
**Includes all components needed for installation:** fan with 3" inlet and outlet, factory wired with 24V control relay; 24V solenoid valve for 100% gas shut-off in response to power outage or fan malfunction; post-purge timer keeps unit operating at end of burner cycle; gas diaphragm switch with aluminum tube connection to turn unit on and off with gas flow to water heater; and heavy duty vent hood to cap 3" exhaust pipe (exhaust pipe not included, order locally as needed).

**Unit compatible** with any gas water heater up to 60,000 BTU. Vent package allows venting up to 75 feet away from a side wall. Fan motor is 115V, 60 Hz, 1 amp. Six-foot power cord with plug included. AGA Design Certified. Tjernlund brand (VP-2).

**No. 5C083.** Shpg. wt. 19.0 lbs. List $555.00. Each .....**$291.75**

# CENTRIFUGAL IN-LINE FANS AND ACCESSORIES

## PLASTIC CENTRIFUGAL IN-LINE DUCT FANS



- For use in commercial and residential outdoor and wet location applications such as spa and hot tub venting.
- Fans are caulked at motor screws, wiring cables, and along seams; suitable for radon gas mitigation
- Remote mounted fans have lower sound levels than comparable surface mounted fans
- UL Listed (E128817) for outdoor use/wet locations and in conditioned airstreams of up to 140°F
- Housing of high impact GE Noryl plastic is UL Recognized and UV protected
- Totally enclosed, 115V, 60 Hz, ball bearing motor
- Mounting bracket and duct clamps included; vertical or horizontal mounting
- External wiring box with waterproof gasket keeps wiring compartment dry
- Speed controllable; see No. 5C203 speed control listed below
- Fans not for use in corrosive environments

**5-YEAR FANTECH LIMITED WARRANTY**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## CENTRIFUGAL IN-LINE DUCT FANS

**3-YEAR KANALFLAKT LIMITED WARRANTY**
Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

Kanalflakt certifies that the in-line duct fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

- Externally mounted terminal box, 1¾" deep
- Direct-drive in-line fans for industrial, commercial or residential use for heating, ventilating and cooling applications
- Galvanized steel housing with powder coated, baked enamel finish
- Totally enclosed, 115V, 60 Hz, ball bearing, class B motor
- Maximum operating temperature: 140°F
- Prewired fans include mounting bracket
- Remote mounted fans have lower sound levels than comparable surface mounted fans
- Speed control available, 5C110-113: 5C203; 4TM77: 5C205; 4TM78: 5C204
- Horizontal or vertical mounting
- UL Listed for residential range hoods

# UNASSEMBLED 9½ AND 10⅝" DOUBLE INLET DIRECT-DRIVE BLOWERS

No. 4C589

Dayton®

Replacement Parts Available 1-800-323-0620

Motor Mounting Brackets

- Widely used in new and replacement installations for heating, air-conditioning, and ventilating systems
- Interchangeable with most other unassembled direct-drive blowers
- Blowers shipped unassembled
- Blower housings are heavy gauge steel with gray enamel finish. Steel wheels have corrosive resistant finish
- Blowers may be ordered separately or in combination with a motor listed below
- Maximum operating temperture 104°F

**Components include** the blower housing, wheel, housing support with resilient pads, adjustable motor mounting bracket with hardware and assembly instructions.

**Motors** are 1/5 through 3/4 HP, 115V, and 230V, 60 Hz. Motor housing bracket for 9½" units is adjustable to fit blower motors 3½ to 6⅛" long. Bracket included with 10⅝" unit adjusts to fit blower motors 3 13/16 to 6⅝" long.

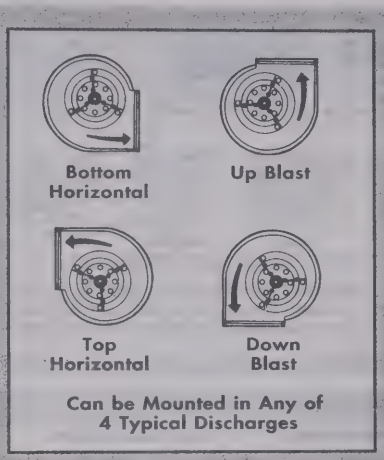
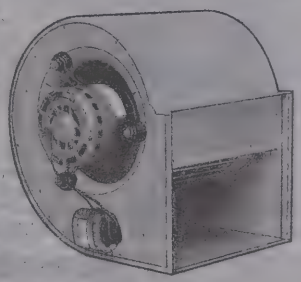
(*) Motor overload will result if blower is operated at static pressures below performance shown.
(†) Includes capacitor with permanent split capacitor motor. 1075 RPM is highest speed.

*Exhaust it, filter it, exchange it — we have the ventilators to get it done.*

# ASSEMBLED 9½, 10⅝, AND 12⅝" DOUBLE INLET DIRECT-DRIVE BLOWERS



- **For original equipment and replacement use in heating, air conditioning, and ventilating systems**
- **Interchangeable with most direct-drive blowers having same horsepower ratings**
- **Reinforced blower wheel provides long, trouble-free service**
- **Steel housing has a gray enamel finish**



**All blowers** feature a welded ring motor mounting system to reduce vibration.

**Permanent split-capacitor motors** come with appropriate capacitor attached with metal capacitor strap. 1 HP motors are 3-speed, ball bearing.

**Replacement Parts Available**
**1-800-323-0620**

# 3/4 WIDTH DOUBLE INLET BELT-DRIVE BLOWERS

Dayton Wattrimmer

Dayton

ENERGY RIGHT®

**4 TYPICAL DISCHARGE POSITIONS**

Mounting supports and blower sides are pre-punched in proper areas for quick assembly for above discharges. Motor mount and hardware included.

Replacement Parts Available 1-800-323-0620

**Economical, double inlet,** 3/4 width blowers used for heating, ventilating, and cooling systems with limited cabinet space.

**For standard heating** or ventilating systems, use blowers listed at free air to 3/8" static pressure. For heating and air conditioning systems and air moving applications where higher static pressures are present. Maximum operating temperature is 104°F.

**Heavy gauge, die-stamped steel housing.** 9½ to 18⅛" double-inlet, three-quarter width wheels. Preslock® wheels assure positive locking. Ground and burnished shaft. Sealed sleeve bearings.

**Continuous duty,** 40°C rise, resilient mounted, automatic-reset thermal protected Dayton blower motor. Motor and appropriate drives for bottom horizontal discharge packed separately when ordered. Longer or shorter belt may be required for other discharges.

### HIGH EFFICIENCY BLOWERS

Identical to blowers listed above but have Dayton 1/4, 1/3, 1/2, and 3/4 HP, 1725 RPM, 115V, 60 Hz Wattrimmer motors. Provide substantial energy savings and lower operating costs. Motors UL Recognized Component and CSA Certified. Refer to Dayton Wattrimmer Motor listings for typical energy and cost savings.

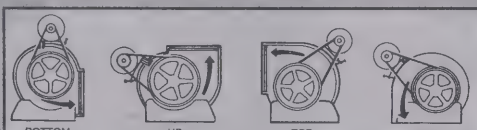
# FULL-WIDTH DOUBLE INLET BELT-DRIVE BLOWERS

**Suitable for 80 to 90%** of normal blower applications for residential heating, and heating and cooling systems. Widely used for commercial heating, ventilation, cooling, and similar air-moving systems.

**For standard heating** or ventilation systems, use blowers listed at free air to 3/8" static pressure. For systems with higher static pressures, use blowers listed from 1/2 to 3/4" static pressure.

**Heavy gauge, double inlet steel housing.** 9½ to 18⅛" double width blower wheels. Ground and burnished shaft. Sealed sleeve bearings. Max. operating temp. 104°F.

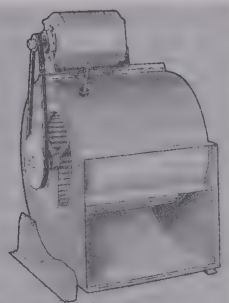
**Continuous duty 115/230V or 230/460V,** resilient mounted, automatic reset thermal protected motors. Motor and appropriate drives for bottom horizontal discharge packed separately when ordered. A longer or shorter belt may be required with other discharge positions.



## HIGH EFFICIENCY BLOWERS

Identical to blowers listed above but have Dayton 1/4, 1/3, 1/2, and 3/4 HP, 1725 RPM, 115V, 60 Hz Wattrimmer motors. Provide substantial energy savings and lower operating costs. Motors UL Recognized Component and CSA Certified. Refer to Dayton Wattrimmer Motor listings for typical energy and cost savings.

Dayton Wattrimmer



Dayton

ENERGY RIGHT®

**4 TYPICAL DISCHARGE POSITIONS**

Mounting supports and blower sides pre-punched in proper areas for quick assembly for above discharges. Motor mount and hardware included.

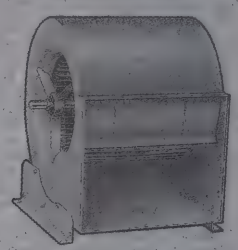
# FULL-WIDTH INDUSTRIAL BLOWERS AND SHAFTS AND BEARINGS



- Used in heating, ventilating, exhausting, and cooling systems in commercial and industrial applications
- Forward curved, double-inlet blowers
- Die-stamped steel housing with mounting supports suitable for four discharge positions
- Blowers have precision ground shaft with keyway, prelubricated ball bearings with rubber isolators and dynamically balanced wheel
- All blowers include a motor mounting bracket built for 1½ HP maximum. 1/4 to 1½ HP motor and drives for bottom horizontal discharge packed separately when ordered complete. Longer or shorter belt may be required for other discharge positions
- 2 to 5 HP motors are floor mount only. Cast iron motor mounting rails included when ordered with motor and drives. Drive package compatible with any discharge position
- Max. blower operating temperature: 250°F. Max. motor operating temperature: 104°F

1/4 to 1½ HP

Dayton®

**Unique, multifunctional, compact portable blower** package for ventilating, cooling, heating, fume exhausting, and drying applications. Additional electrical outlets provided for power tools and appliances. Smaller units have a work area light.

**120V, 60 Hz motor;** inlet and outlet screens; rotatable housings to direct air flow; and a 25 foot SJTW-A weather and water resistant grounded power cord. Units operate independently or with optional attachments listed below. With attachments, a complete system can be designed to remove fumes and smoke generated by welding or brazing, and foul air.

**Blowers can also supply fresh air** to work stations, manholes, crawl spaces, and attics. Used by tradesmen, maintenance departments, utility companies, automotive repair shops, fire departments, commercial businesses, homeowners, and on construction sites. All models UL Listed (E13100). Power Cat® brand.

Dayton Portable Blower also available, see page 3626.

## POWER CAT No. 4C926 AND ATTACHMENTS

A **Lightweight, single-speed blower** produces 300 CFM of air to cool, ventilate, dry damp surfaces, and remove fumes or smoke. Rugged steel and molded plastic frame features 90° adjustable air flow, duplex grounded receptacles, 40 watt flood lamp, and heavy-duty rocker switches for independent control of floodlight and blower. Motor draws 2.0 amps. 12¾ x 8W x 11¾"H. Molded handle has cord wrap for power cord. (DA300). Can be used with Intake Duct. No. 4C782, Duct Extension No. 4C812, and Fume Exhaust Nozzle No. 4C783. (See Attachments for Power Cat No. 4C734).

**No. 4C926.** Shpg. wt. 12.0 lbs. List $201.90. Each.....**$134.60**

D **Exhaust Duct Assembly.** Attaches to blower outlet to direct air away from the blower. 10 ft. x 6" diameter flexible reinforced PVC duct and steel adapter. (300 DA).

**No. 4C927.** Shpg. wt. 5.0 lbs. List $105.52. Each.....**$70.35**

## POWER CAT No. 4C734 AND ATTACHMENTS

B **Powerful, two-speed blower** produces 359/300 CFM air stream for exhausting, cooling, and drying. Durable steel housing rotates 90° from horizontal to direct air flow. 50 watt floodlight adjusts vertically. Motor draws 2.58 amps at hi-speed. 15 amp duplex weather resistant grounded receptacle. Safety interlock circuit for use with heater unit listed at right. 13½L x 9⅛W x 11"H. Black and gray powder coat finish. (D400 XLH).

**No. 4C734.** Shpg. wt. 21.0 lbs. List $338.62. Each.....**$225.75**

D **Exhaust Duct Assembly.** Attaches to blower outlet to direct air away from blower. 10 ft. x 6" diameter flexible reinforced PVC duct and steel adapter. (D-400DA).

**No. 4C735.** Shpg. wt. 6.5 lbs. List $114.90. Each.....**$76.60**

E **Intake Duct Assembly.** Attaches to blower inlet to direct air into the blower from another location. 10 ft. x 6" diameter flexible reinforced PVC duct and steel adapter ring. (D-400IA).

**No. 4C782.** Shpg. wt. 6.5 lbs. List $115.80. Each.....**$77.20**

F **Duct Extension.** Extends intake or exhaust assemblies in 10 foot increments. 10 ft. x 6" flexible reinforced PVC duct with connecting sleeve and clamp. (D-400EXT).

**No. 4C812.** Shpg. wt. 5.0 lbs. List $80.92. Each.....**$53.95**

G **Heater Unit.** Converts Power Cat into portable heater. 5120 BtuH heater with 1500W element attaches and plugs into No. 4C734 blower with quick connect buckle clamps. Steel armored heating element and fins. Cannot be attached to hose. (D-400HA).

**No. 2E776.** Shpg. wt. 6.0 lbs. List $103.72. Each.....**$69.15**

## SUPER CAT No. 4C778 AND ATTACHMENTS

C **Industrial grade two-speed blower** for bigger cooling/ventilating applications. Produces 1120 CFM at high speed, 877 CFM at low speed. Effectively cools or ventilates confined areas. Exhausts fumes from machinery or eliminates toxic fumes and smoke from welding operations. Airstream can be directed from vertical through 110° arc; held in place with friction-held device on housing. Rugged steel housing has wooden grip handle. Motor draws 4.5 amps on high speed. Duplex 15 amp weather resistant grounded receptacles provide electrical outlets for tools, lighting and other appliances. 17½L x 11⁵⁄₁₆W x 20⅛"H. Black and gray powder coat finish. (1200 XL).

**No. 4C778.** Shpg. wt. 50.0 lbs. List $623.25. Each.....**$415.50**

D **Exhaust Duct Assembly.** Attaches to blower outlet to direct air away from blower. 10 ft. x 8" diameter flexible reinforced PVC duct and steel adapter. (D-1200DA).

**No. 4C781.** Shpg. wt. 13.0 lbs. List $200.92. Each.....**$133.95**

E **Intake Duct Assembly.** Attaches to blower inlet to direct air into the blower from another location. 10 ft. x 8" diameter flexible reinforced PVC duct and steel adapter ring. (D-1200IA).

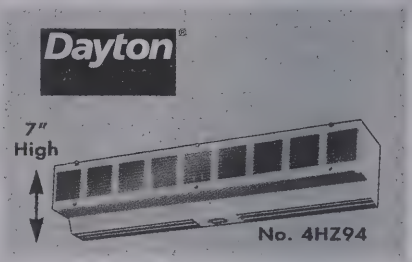
**No. 4C779.** Shpg. wt. 13.0 lbs. List $158.92. Each.....**$105.95**

F **Duct Extension.** Extends intake or exhaust assemblies in 10 foot increments. 10 ft. x 8" diameter flexible PVC duct with quick-connect clamps. Requires No. 1A970 duct connector. (1200 FE).

**No. 4C832.** Shpg. wt. 11.0 lbs. List $138.82. Each.....**$92.55**

H **Steel Insert Connector.** Required when adding duct extension No. 4C832 to intake or exhaust assemblies for 8" duct. (1200 DC).

**No. 1A970.** Shpg. wt. 1.5 lbs. List $20.06. Each.....**$13.38**



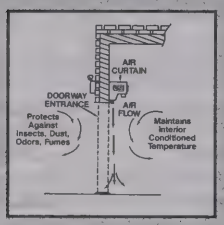
# COMPACT AND COMMERCIAL INDUSTRIAL-DUTY AIR CURTAINS

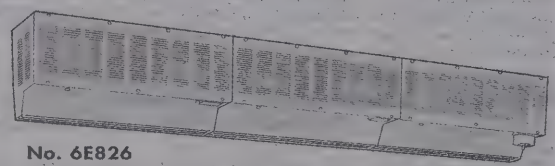
## COMPACT AIR CURTAINS

- **Compact design requires only 7½" over doors for mounting**

**Low profile,** only 7" high, designed to fit existing door transoms at entrances. Also for use in pass-through food service windows and walk-in coolers/freezers.

Operate as an environmental thermal barrier in retail stores, hospitals, airports, post offices, and schools. 2-Speed 120V/220V motor. Cabinets are 7"H x 6½"D x 36" or 48"W. NOTE: For longer widths, up to three cabinets can be used in series.





### COMPACT AIR CURTAINS

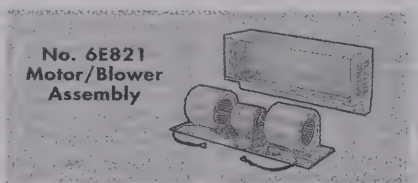
## COMMERCIAL/INDUSTRIAL-DUTY AIR CURTAINS

Dayton® E19455 CERTIFIED TO ETL UL-1776 USDA COMPLIANCE FDA COMPLIANCE

No. 6E826

Replacement Parts Available
1-800-323-0620



**For use as a thermal barrier** or fly and insect control. Prevent entry of hot or cold air, insects, dust, fumes, and odors. For use in restaurants, food service and processing plants, coolers and freezers, warehouses, shopping malls, hotels, hospitals, supermarkets, schools, airports, retail stores, and other public establishments. Modular design allows construction of sag free units in any possible width desired from 3 through 12 ft. in width. For example: a 108" wide door would use a combination of three 36" wide air curtains. UL Listed, ETL Listed, FDA and USDA Compliance. 6 and 9 KW heated models available.

**Motor Options:**

- **120V, single-phase, two-speed totally enclosed motor, switch included**
- **208-230/460 volt, 3-phase, single-speed totally enclosed motor**

### INTERCHANGEABLE MOTOR/BLOWER ASSEMBLIES FOR AIR CURTAIN CABINETS SHOWN ABOVE

All motor/blower assemblies are designed and engineered to fit all cabinets listed at right using no tools. Simple use of wing nuts and quick disconnect wire connectors allow fast, easy installation. Suitable for multiple use with up to three cabinets in a series. For proper motor/blower selection refer to the Air Curtain Selection chart on 3647.

### AIR CURTAIN CABINET ONLY LESS MOTOR/BLOWER ASSEMBLY

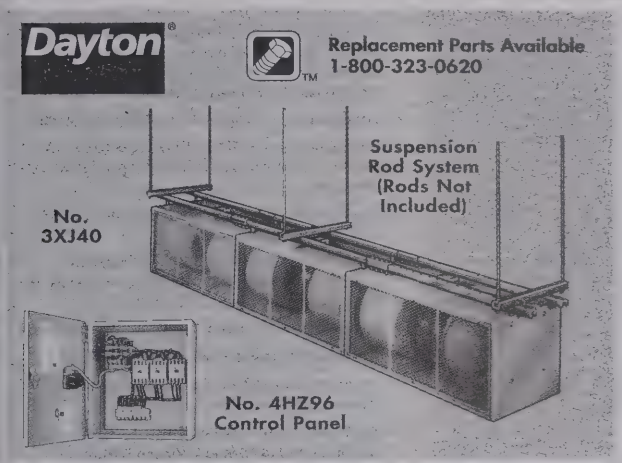
### OPTIONAL HEATER KIT FOR DOORWAYS TO 8 FT. HIGH (USE WITH 1/4 HP MOTORS ONLY)



Treat incoming cold air at customer entrance areas. Used over front door entrances to supplement existing heat and to prevent infiltration of colder outside air. Not recommended for areas subject to high winds. Install easily to any size 1/4 HP air curtain cabinet shown above only. For single unit installation only—for wider door multiple unit installations, leave 3" space between cabinet units.

# FREIGHT DOOR HIGH VOLUME AIR CURTAINS AND AIR CURTAIN ACCESSORIES

Dayton Electric Mfg., Co. certifies that the 3XJ40 and 3XJ41 Air Curtains shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and comply with the requirements of the AMCA Certified Ratings Program.

For use as thermal barriers over freight doors and between interior doorways in factories and warehouses—12 to 18 ft. high. Powered by 3-ph. single-speed, direct-drive motors. Heavy-duty galvanized steel cabinet with epoxy coated beige finish. Directional louvers. Modular construction. Three 48"W cabinets bolt together and mount on exclusive continuing channel system for use with suspension rod installation. (NOTE: suspension rods not included). 21⅜"H x 23"D x 144"L (3 x 48") total width. Optional wall mounting brackets available. For instant On/Off, optional 3-ph. motor control panel is necessary (see below).

### AIR CURTAIN ACCESSORIES

Motor Control Panels for Automatic On/Off Operation: for use with Nos. 3XJ40 and 3XJ41 air curtains. Specify voltage when ordering. Requires 120V instant On/Off plunger switch, Stock No. 2W938 (see page 530). Activates on opening of door when control panel switch is in automatic position. For manual operation, use appropriate 3-phase motor starter. (16"H x 12"W x 6"D). Wall Brackets: for alternative mounting over roll-up doors where suspension rod installation cannot be used. Set of 3 brackets.

# AIR CURTAIN SELECTION GUIDE

**Use chart below** to assist in selecting the proper air curtain/motor blower closest to your application. Select air curtains by width of doorway and mounting height (air discharge to ground). For proper HP, determine the wind condition closest to your application. For gusty wind conditions or extreme conditions (fly/insect control), using the next larger horsepower model is recommended. For food processing operations, a freight door high volume air curtain mounted less than 12 ft. high may be required. After selecting the correct motor/blower assembly for your application, refer to listings above and on previous page for overall selection. All cabinets are modular construction. Any cabinet size combination will accommodate your door width. Air curtain overlap of door openings is acceptable.

### Wind Conditions are Classified as Follows:

● GENTLE = 1-5 MPH ■ LIGHT = 5-8 MPH ▲ MODERATE = 8-12 MPH ◆ STRONG = 12-15 MPH

**NOTE: Guide selection does not include negative pressure or wind tunnel conditions.**
**Wind resistance values are for normal applications. Interior applications are considered as Gentle.**

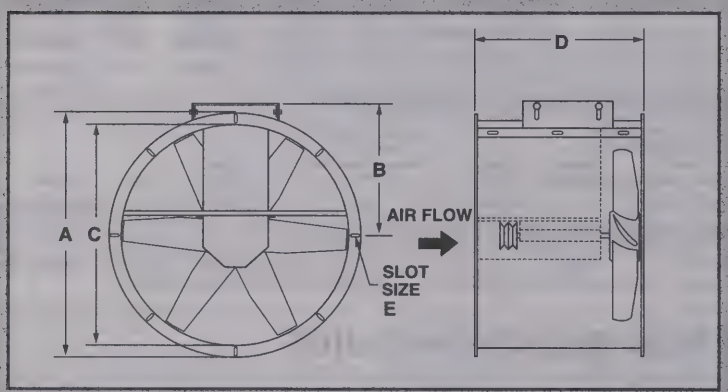
# 12 TO 48" BELT-DRIVE TUBEAXIAL FANS WITH ALUMINUM SPARK-RESISTANT BLADES

Dayton



No. 7F960

Dayton Electric Mfg. Co. certifies that the tubeaxial fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The sound power lever ratings shown in decibels referred to $10^{-12}$ watt calculated per AMCA Standard 301. The A weighted sound ratings shown have been calculated per AMCA Standard 301. Values shown for tubeaxial fans are for (inlet Lwi) sound power levels for: Installation Type B: Free Inlet, Ducted Outlet. Ratings do not include the effects of duct end corrections.

- Tubeaxial fans designed for use in industrial ventilation systems to exhaust paint spray booths, cleaning tanks and mixing rooms
- Designed to operate in any position
- Streamlined belt tunnel isolates the motor, drives, and bearings from air stream
- Precision balanced spark-resistant aluminum fan blades
- Steel housing is iron phosphate processed for rust protection with an acrylic epoxy paint finish
- Permanently lubricated ball bearings
- Maximum inlet temperature 200°F
- Factory installed cast iron sheave assembled on fan shaft
- Ball bearing motor and drives packed separately when fan is ordered complete as 7-Combo
- Belt guard included
- Companion flanges listed on page 3651
- Optional hazardous location accessories are available: No. 4X788 Conduit Box

**WARNING:**
- Review OSHA codes. OSHA-complying guards are required when fan blades are exposed and within reach of personnel
- Use a hazardous location motor where flammable vapors are involved

Replacement Parts Available
1-800-323-0620

## CONVERSION FACTORS NECESSARY TO COMPUTE SOUND PRESSURE LEVELS [dB(A)] FROM SOUND POWER LEVELS (LwA)

Use table to determine approximate sound pressure level [dB(A)] for Dayton tubeaxial fans (listed on facing page) installed in your plant using sound power levels (LwA) given on facing page.

To calculate the sound pressure level, subtract the appropriate conversion factor from the sound power level for your fan. The conversion factors shown are based on open areas of factory construction with 20-foot high ceilings. Areas larger than those shown will have a relatively minor effect on sound pressure level. Judgment must be used because details of specific installations will vary considerably. Sound produced by other nearby equipment or machinery is not included in this calculation.

| Floor Area Square Feet | Distance to Work Station from Fan (Ft.) 5 | 10 | 15 | 20 |
|---|---|---|---|---|
| 1000 | 5 | 6 | 7 | 7 |
| 10000 | 9 | 12 | 13 | 13 |
| 20000 | 10 | 13 | 14 | 15 |
| 40000 | 10 | 15 | 16 | 17 |

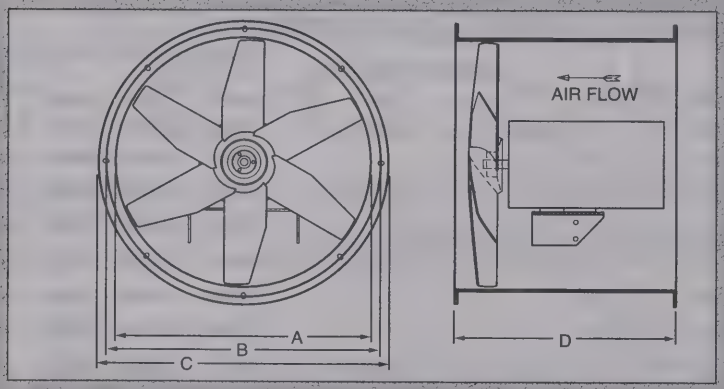
# 12 TO 30" DIRECT DRIVE TUBEAXIAL FANS



New

Dayton®

UL MH12596

- Direct-drive tubeaxial fan for air moving in medium lengths of duct work
- Totally enclosed ball bearing motors
- 2 speed motors are standard in sizes 12" through 21"
- No. 2X605 2-speed control available on page 475
- Motor, blades and housing are shipped assembled
- Designed to operate in any position
- Precision balanced aluminum blades
- Steel housing is coated with acrylic epoxy finish
- Optional companion flanges available; see page 3648,3651 (21" companion flange available through GPO)
- Maximum inlet air temperature is 104°F

amca CERTIFIED RATINGS — AIR MOVEMENT AND CONTROL ASSOCIATION, INC.

Dayton Electric Mfg. Co. certifies that the blowers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The sound power ratings shown are in decibels referred to $10^{-13}$ watt calculated per AMCA Standard 301. The A weighted sound ratings shown have been calculated per AMCA Standard 301. Values shown for blowers are for (inlet Lwi) sound levels for: Installation Type B: free inlet, ducted outlet. Ratings do not include the effects of duct end correction.

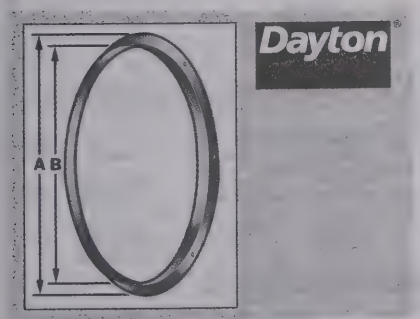
# BLADES FOR TUBEAXIAL FANS

- **12 to 48" spark-resistant aluminum fan blades**

Fan blades are used as direct factory replacements for Dayton Belt-drive tubeaxial fans. Blades are attached to shaft by a drift pin on the discharge side and/or two set screws on the intake side.



See Index under Belt-drive Tubeaxial Fans for complete performance and sound data. Dayton brand.

**Replacement Parts Available**
**1-800-323-0620**

# DUCT FANS FOR 10 to 14" DUCTS

No. 2C222

**CAUTION:** Duct fans are not suitable for installation in unattended areas.

**Boost air flow** in heating and central air conditioning ducts. Fans install easily in round ducts.

**Motor and fan blades** fit 7⅞" long galvanized steel housing compatible with standard ventilation duct work. Choice of three models deliver from 300 to 660 CFM at 0.0" SP. **All motors** are Dayton 1550 RPM, 115V, 60 Hz, shaded pole type with 12" long leads.

**Not recommended for use with speed control.**

## DUCT FAN ORDERING DATA

| Duct Dia. (In.) | CFM @ 0.0" SP | Motor HP | Motor RPM | Full-Load Amps | Motor Enclosure | Stock No. | List | Each | Shpg Wt. |

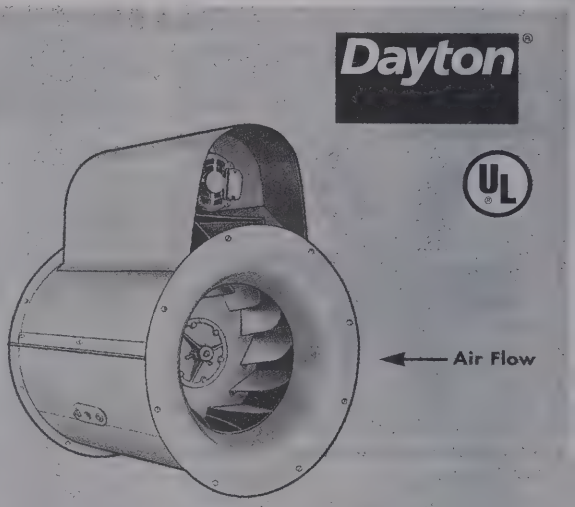
# CENTRIFUGAL IN-LINE DUCT BLOWERS

**Combine centrifugal blower performance** with compactness and straight-thru flow characteristics of a vaneaxial fan. Used in many types of air supply and exhaust systems as boosters or where conventional blower installation is impractical. Designed for vertical or horizontal mounting.

**Direct-drive blowers** have ball bearing motors. Belt-drive blowers have motor cover; ball bearing motor and drive packed separately when blower is ordered complete. All blowers have aerodynamic air straightening vanes and deep-spun, low turbulence inlet cone. Extruded aluminum airfoil wheels.



**Side angle supports** provided for suspension mounting. Removable plate allows access to all moving parts. Housing flanges not supplied.

**Aluminum construction** for light weight and structural strength. Air deliveries are based on standard test codes of AMCA.

**The Centrifugal In-Line blowers listed here have four mounting points and we recommend 4 hanger mounted vibration isolators. Blowers No. 4C258 thru 3C280 should have 4 No. 4C878 isolators; blower No. 3C281, 4 No. 4C879 isolators. For detailed description of hanger isolators, see Index under Isolators.**

Dayton Electric Mfg. Co. certifies that the blowers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The sound power ratings shown are in decibels referred to $10^{-13}$ watt calculated per AMCA Standard 301. The A weighted sound ratings shown have been calculated per AMCA Standard 301. Values shown for blowers are for (inlet Lwi) sound levels for: Installation Type B: free inlet, ducted outlet. Ratings do not include the effects of duct end correction.

# CENTRIFUGAL IN-LINE DUCT FANS

No. 3C755

Air Flow

Replacement Parts Available 1-800-323-0620

- Fans are designed for installation within horizontal or vertical duct systems where space is limited
- Used as a primary fan to exhaust foul air or supply fresh air in duct systems
- Also used as an air duct booster to the primary fan in the system
- Backward incline non-overloading aluminum wheel
- Zinc coated steel housing
- Motor and drive weather cover included
- Two gasketed removable access panels
- All position mounting, side angle supports for suspension or floor mounting
- Ball bearing pillow block bearings
- Maximum inlet temperature 160°F

Dayton Mfg. Co. certifies that the in-line duct fans shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

Sound ratings shown are loudness values in fan sones at 5 ft (1.5M) in a hemispherical free field per AMCA Standard 301. Values shown are for installation Type A: free inlet fan sone levels. Power ratings (BHP) do not include drive losses. Performance shown is for installation Type A: Free Inlet, Free Outlet. Performance ratings do not include the effects of appurtenances in the airstream.

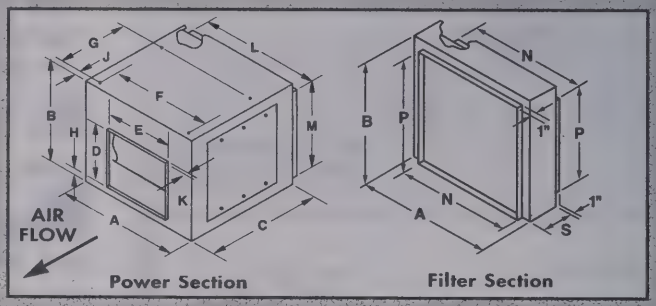
# IN-LINE DUCT BLOWERS AND FILTERS



- An economical and efficient all-purpose inline duct blower for indoor use with clean air heating, cooling, and ventilating systems
- 1/2" Internal fiberglass insulation to help isolate noise and overcome condensation on cabinet when used in cooling applications
- Quiet forward curved, ball-bearing, double inlet blowers
- All position mounting, except sizes 15¼ and 18³⁄₁₆ which are horizontal mount only
- Access panel for convenient motor and drive installation and servicing from either side
- Ball bearing motors are rated for continuous duty and 40°C maximum ambient temperature
- Filter section with quick access, washable 1" thick aluminum mesh filter panel
- Up to 25% blower speed and CFM reduction using variable pitch motor sheaves when ordered with motor and drives

No. 3F531

DELHI INDUSTRIES INC.

Replacement Parts Available 1-800-323-0620

# SINGLE-INLET DUCT BLOWERS

Replacement Parts Available
1-800-323-0620

**Blower** for general duct ventilation, exhausting, air conditioning, processing, and industrial use.

**Inlet is unobstructed.** Comes with bottom horizontal discharge. Blower can be altered in the field to any required discharge position by drilling new holes and rotating blower housing on base and bolting in position.

**Adjustable top motor mount** quickly changed from top to rear mounting. Rugged construction of heavy gauge steel. Forward curve wheels. Very quiet belt drive. High volume at low velocity. Oversized ball bearings. Gray baked-on epoxy finish.

**Air deliveries** are based on standard test codes of AMCA. Maximum operating temperature is 180°F (82.2°C).

**Continuous duty,** 40°C ambient, resilient-mounted, automatic reset thermal protected motor. Motor and drive packed separately when blower is ordered complete. Maximum inlet temperature is 180°F.

**WARNING: Review OSHA Codes. OSHA complying guards are required when fan blades are exposed and within reach of personnel.**

# HIGH VOLUME AND PRESSURE BLOWERS

Replacement Parts Available
1-800-323-0620

**Direct-drive blowers** provide high air volume at medium to high pressures by combining characteristics of high volume and high-pressure type blowers. Use with carbon monoxide systems, electronic cooling, and industrial systems. Also used for high pressure work where higher noise levels are not objectionable.

**16-gauge steel housing.** Welded, air-tight joints. Housing can be adapted to any of eight different discharge directions. Heavy steel wheel, 7/8" bore. Gray baked-on epoxy finish.

**Air deliveries** are based on standard test codes of AMCA. Motors packed separately when blowers are ordered complete. For appropriate integral HP motor control, see Index under Controls. Maximum inlet temperature is 180°F.

**CAUTION: Blowers must not be used where static pressure is less than shown in table below. Severe motor overload will result. Motor overload protection is highly recommended.**

**WARNING: Review OSHA codes. OSHA complying guards are required when fan blades are exposed and within reach of personnel.**

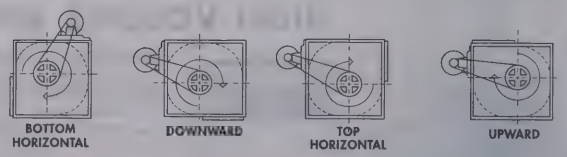
No. 2C986

CW Rotation Shown

Dayton®

See Facing Page for Ordering Information for Blowers



- 9½" to 22" diameter single width wheels
- For general ventilation, exhausting, air conditioning, and industrial air-moving applications
- Single inlet for quiet, efficient performance
- Adaptable to any of 4 standard discharge positions
- Precision, balanced forward curved steel wheels
- Die stamped steel housing
- Single phase motors have automatic reset thermal protection
- Maximum motor temperature 104°F
- Maximum inlet temperature 200°F (121.1°C)
- Gray finish
- Motors & drives packed separately when blower ordered complete as 7-Combo

**DON'T FORGET THE BACK OF THE BOOK!**
**MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER**

Besides complete National Brand and Product Indexes, the back section of this Catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

# 6350 TO 30,700 CFM INDUSTRIAL BLOWERS

No. 3C428

Replacement Parts Available
1-800-323-0620

- Meets full Class 1 performance for use in heating, ventilation, exhausting, cooling, humidifying, drying, and similar applications
- Double width, double inlet design
- Heavy gauge steel housing with steel corner angles for rigid support
- Blower mounts in any of four standard discharge positions (pictured at left)

**High volume, low velocity blowers** have dynamically balanced, forward curve steel wheels, and permanently lubricated, cast iron pillow block ball bearings.

**Floor mounted motor, drive, and motor mounting rails** are packed separately when blower is ordered complete as 7-Combo.

**Maximum operating temperature** 200°F (93.3°C). Gray enamel finish. Dayton brand. Maximum motor ambient temperature: 104°F

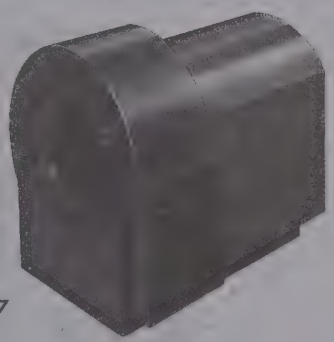
# FORWARD-CURVE BLOWERS

- For ventilating, air conditioning, processing, drying and exhaust systems
- High volume, extra-quiet performance
- Sturdy arc-welded housing and frame
- V-belt drive
- Weatherproof Drive Cover included
- Quiet, Efficient Forward Curve Wheel
- Clockwise Rotation as Viewed From the Drive Side



**Features include** dynamically balanced, clockwise rotating steel wheel, and bottom horizontal discharge, as shown.

**Discharge easily changed** to any one of 7 standard discharge positions. Air deliveries based on standard test codes of AMCA. Ball bearing construction. Gray baked-on epoxy finish.

**Single and three phase 1725 RPM motor** and drive packed separately when blower is ordered complete.

Dayton®

Replacement Parts Available
1-800-323-0620™

No. 2C797

**WARNING:** Review OSHA Codes. OSHA complying guards are required when fan blades are exposed and within reach of personnel.

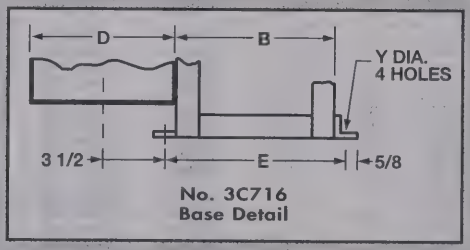
(#) Overloaded — not recommended for operation at this SP with specified HP. (†) Values shown are estimated sound pressure levels.



**The forward curve blowers listed above have 6 mounting points. We recommend 6 floor mounted vibration isolators *only* if the blower wheel speed is higher than 600 RPM. No. 2C797 and 2C798 require No. 4C950 or 4C954 isolators. Blower No. 2C799 requires No 4C952 or 4C955 isolators. Blower No. 3C010 may not require isolators. For detailed description of isolators, see Index under Isolators.**

# BACKWARD INCLINE BLOWERS

No. 7H123

No. 3C716
Base Detail

- All blowers come complete with weatherproof drive cover
- Sizes 10½ thru 24½" feature flat blade wheel; 27 thru 36½" sizes have air-foil wheel. Both wheel styles provide full Class 1 performance range
- Nonoverloading wheels; motor cannot be overloaded at any given RPM and horsepower regardless of static pressure applied to the system
- Application: widely used for HVAC systems in industrial, commercial, and public buildings
- Clockwise rotation viewed from drive side
- Blowers shipped in bottom horizontal discharge. Discharge position can be changed in the field to seven additional standard discharge positions
- Welded steel housing and dynamically balanced wheel; ball bearing pillow block construction
- Gray baked-on epoxy finish
- Motor and drives packed separately as 7-Combo. Sizes 10½ thru 20" have variable-pitch sheaves, larger sizes have fixed sheave drive

**WARNING:** Review OSHA Codes. OSHA complying guards are required where fan blades are exposed and within reach of personnel.

**ORDERING HAS NEVER BEEN EASIER!**

Whether you phone, fax, write or stop by your local branch to place an order, Grainger can tailor sales terms to meet your needs. Ask about establishing an open line of credit or pay with your VISA, MasterCard, or American Express card.

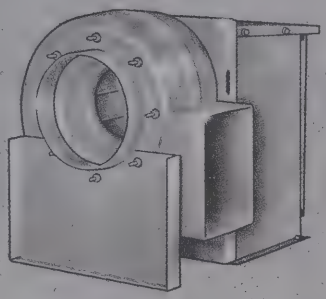
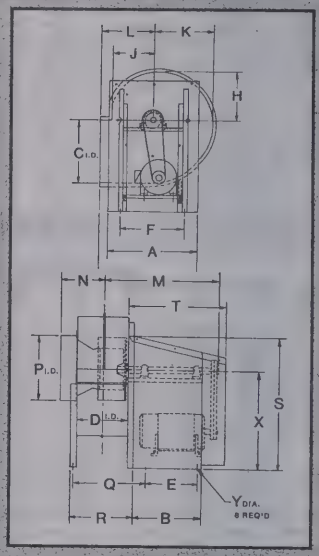
# 12¼ to 24⅝" BACKWARD INCLINE FIBERGLASS INDUSTRIAL BLOWERS



## FIBERGLASS INDUSTRIAL BLOWERS

- **Solid one-piece Fiberglass, non-overloading backward curved, single thickness airfoil wheel.**
- **2-Piece Fiberglass housing, with steel epoxy coated base**
- **Steel alpha coated weatherproof drive cover**
- **Furnished in clockwise rotation viewed from the drive side, bottom horizontal discharge can be field rotated to other positions**
- **Maximum inlet temperature is 200°F**



**Used in process ventilation** for controlled or contained movement of contaminated air. Suitable for many applications where fumes or vapors are corrosive to steel or aluminum. Ball bearing pillow block construction.

**Ball bearing motors** and variable pitch drives are packed separately when blower is ordered complete.

**Replacement Parts Available**
**1-800-323-0620**

No. 6D606

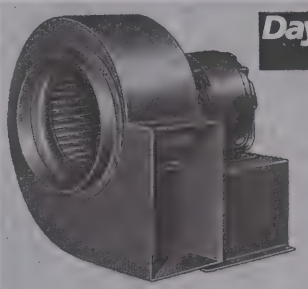
**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**



# HIGH VOLUME DIRECT-DRIVE BLOWERS

**Direct-drive, single-inlet, high volume blowers** are used for general ventilation when duct systems are required. Applications include exhausting foul air, blowing cool air, forcing air through washers and blasters, for air furnaces, dryers, and gas ovens.

**Welded steel construction.** Dynamically balanced wheels. May be assembled to discharge at any of eight equally spaced positions.

**Air deliveries** based on standard test codes of AMCA. Gray baked-on epoxy finish. Motor packed separately when blowers ordered complete. Maximum inlet temperature is 180°F.

**WARNING: Review OSHA Codes. OSHA complying guards are required where fan blades are exposed and within reach of personnel.**

No. 1C791

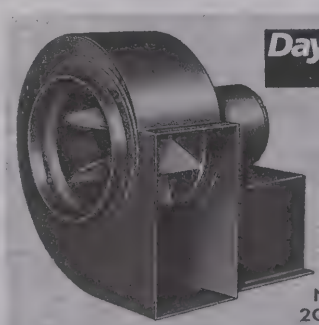
(*) Blowers No. 2C938 and 2C939 supplied with No. 3CC03, rubber motor mount for extra quiet operation. (†) Values shown are estimated sound pressure levels.

# RADIAL BLADE 7¾ TO 13½" WHEEL BLOWERS



**Used in exhaust systems** where air contains dirt, lint, dust, and other lightweight foreign material. Wheel is self-cleaning design, so blowers are also used for conveying stringy or straw-like material.

**Wheels are cast aluminum,** dynamically balanced and self-cleaning to eliminate unbalance or reduced air flow. Not intended for use where flammable or explosive gases, vapors, or dust is present.

**Air deliveries** are based on standard test codes of AMCA.

**Standard units** are built for CW rotation and bottom horizontal discharge. Housing and base made of 16 ga. steel with continuous arc-welded joints. Housing can be rotated to eight discharge positions. Maximum inlet temperature is 180°F. Gray baked-on epoxy finish. **Motors** packed separately when blowers are ordered complete.

**WARNING: Review OSHA Codes. OSHA complying guards are required where fan blades are exposed and within reach of personnel.**

(†) Values shown are estimated sound pressure levels.

Nos. 2C862 thru 2C864 have 4 mounting points, and we recommend 4 No. 4C950 or 4C954 floor mounted vibrations isolators. Nos. 4C217 and 4C121 have 6 mounting points, and we recommend 6 isolators, Nos. 4C950 or 4C954.

# HIGH PRESSURE DIRECT-DRIVE BLOWERS

- 7¾ to 13½" diameter self-cleaning, radial blade wheels
- For small ducted dust exhaust systems and for supplying high pressure air for conveying and cooling
- Used where dust collection bags are necessary
- Welded 16-gauge steel housings
- Balanced, self-cleaning, paddle-type, precision die-cast aluminum wheels. Not intended for use where flammable or explosive gases, vapors, or dust is present
- Clockwise rotation, bottom horizontal discharge
- Adapts to seven other discharge directions
- Air deliveries based on standard test codes of AMCA
- Gray baked-on epoxy finish
- Maximum inlet temperature is 180°F
- Motor packed separately when ordered

**WARNING:** Review OSHA Codes. OSHA complying guards are required when fan blades are exposed and within reach of personnel.

**Replacement Parts Available**
**1-800-323-0620**

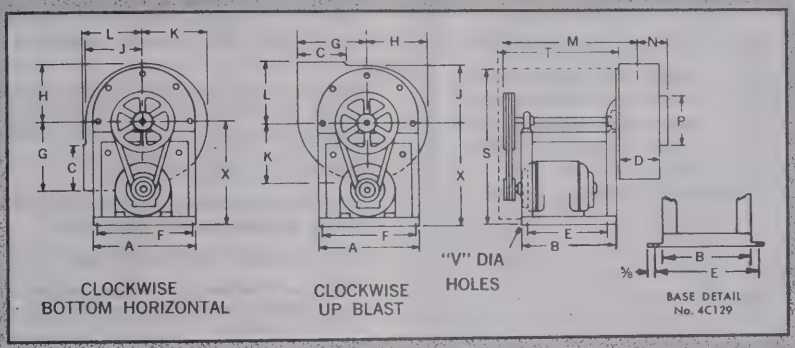
(#) Values shown are estimated sound pressure levels. (‡) Motor overload will result if blower is operated at static pressure below performance shown. (*) 115V motor only.

**The High Pressure Blowers listed above, Nos. 2C940 thru 4C329, have 4 mounting points, and we recommend 4 No. 4C950 floor mount vibration isolators. Blower No. 4C330 has 6 mounting points, and we recommend 6 No. 4C950 isolators for proper mounting. For detailed description of isolators, see Index under Isolators.**

# HIGH PRESSURE BELT-DRIVE BLOWERS



No. 7C192

Replacement Parts Available 1-800-323-0620

Dayton®

**WARNING:** Review OSHA Codes. OSHA complying guards are required where fan blades are exposed and within reach of personnel.

- Blowers come complete with weatherproof drive cover
- 10⁹⁄₁₆ to 13½" diameter, self-cleaning, radial blade wheel
- For industrial air moving applications where clean or light dust loading conditions exist
- Air deliveries based on standard test codes of AMCA
- Dynamically balanced, self-cleaning, heavy-duty die-cast aluminum wheels. Not intended for use where flammable or explosive gases, vapors or dust is present
- Steel housing and self-aligning ball bearing pillow blocks
- Clockwise or counter-clockwise rotation
- Bottom horizontal discharge, but can be changed to seven other discharge directions
- Maximum operating temperature is 180°F (82.2°C)
- Motor and variable pitch drive packed separately when ordered
- Gray baked-on epoxy finish

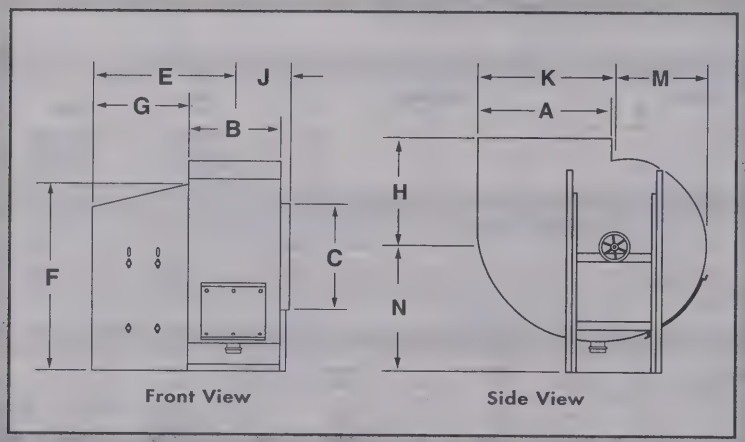
**The High Pressure Belt-Drive Blowers listed above have 4 mounting points, and we recommend 4 No. 4C950 floor mounted vibration isolators. For detailed description of isolators, see Index under Isolators.**

# 13 11/16 to 24 1/2" DIAMETER SPARK RESISTANT BLOWERS W/ALUMINUM AIR FOIL WHEEL

No. 3C494



Dayton®

UL MH12596

**WARNING:**
- Review OSHA codes, OSHA-complying guards are required when fan blades are exposed and within reach of personnel
- Use a hazardous location motor where flammable vapors are involved

Replacement Parts Available 1-800-323-0620

- UL Listed in fire protection equipment directory under "Power Ventilators For Restaurant Applications (YZHW)", Subject 762
- Aluminum wheel and shaft collar at shaft hole of housing meet AMCA Type B spark resistant specifications
- Widely used where flammable or explosive gases, vapor, or dust is present
- For kitchen exhaust, paint storage, petroleum or chemical exhaust, grain storage, and other similar hazardous locations; recommended that kitchen installations be made per NFPA 96 specifications
- Blowers come complete with weather-proof drive covers and access door; steel housing has access door in the scroll opposite the discharge for inspection and maintenance
- Backward incline aluminum air foil wheel is dynamically balanced
- 1½" diameter drain with cap
- Built for clockwise rotation, upblast discharge—can be field adjusted in 45° increments
- Ball bearing construction; baked on gray acrylic epoxy finish
- Motor and variable pitch drive packed separately when blower is ordered complete
- Hazardous location motors offered meet National Electrical Code (NEC) Class 1, Group D, and Class II, Groups E, F, and G

amca CERTIFIED RATINGS — SOUND AIR PERFORMANCE — AIR MOVEMENT AND CONTROL ASSOCIATION, INC.

Dayton Electric Mfg. Co. certifies that the blowers shown herein are licensed to bear the AMCA Seal. The ratings shown are based on tests and procedures performed in accordance with AMCA Publication 211 and AMCA Publication 311 and comply with the requirements of the AMCA Certified Ratings Program.

The sound power ratings shown are in decibels referred to $10^{-13}$ watt calculated per AMCA Standard 301. The A weighted sound ratings shown have been calculated per AMCA Standard 301. Values shown for blowers are for (inlet Lwi) sound levels for: Installation Type B: free inlet, ducted outlet. Ratings do not include the effects of duct end correction.

# 12¼ TO 26⅛" RADIAL BLADE INDUSTRIAL BELT-DRIVE BLOWERS

Dayton®

BLOWERS COME COMPLETE WITH WEATHERPROOF DRIVE COVERS

Replacement Parts Available 1-800-323-0620

- 12¼" blower only handles stringy material
- 15⅝, to 26⅛" blowers only handle grain, sawdust, granular material, particle laden air or non-explosive gases
- Clockwise or Counter-Clockwise Rotation
- Operate close to maximum efficiency over a wide range of static pressure
- Air deliveries based on standard test codes of AMCA
- Heavy gauge, continuous arc welded steel construction

Blowers are assembled for clockwise rotation, bottom horizontal discharge. Can be changed in the field to any of seven other standard discharge directions as well as counter-clockwise rotation.

Model 3C539 is designed to handle all types of long fibers or stringy material and dust. (Not suitable for continuous paper trim applications.)

V-belt drive with heavy-duty, self-aligning ball bearing pillow blocks. Radial blade wheels are continuously welded steel plate and dynamically balanced. Blower housing has gray baked-on epoxy finish.

Maximum operating temperature is 250°F (121.0°C). The optional heat slinger, listed below, increases operating temperatures up to 450°F.

**WARNING:** Review OSHA Codes. OSHA complying guards are required when fan blades are exposed and within reach of personnel.

## HEAT SLINGER—For Radial Blade Blowers Listed Above

No. 4C784

**Split type aluminum slinger** mounts on blower shaft between housing and bearing. Cools bearing allowing blower to handle inlet temperatures up to 450°F. When used with heat shield between motor and housing, blower can operate in temperatures up to 500°F. Peerless brand.

### HEAT SLINGER ORDERING DATA

The Radial Blade Industrial blowers listed above have 6 mounting points, and we recommend 6 floor mount vibration isolators as follows: blower No. 3C539 requires No. 4C951 or 4C875 isolators; blower No. 3C106 requires No. 1C952 or 1C955 isolators; blower Nos. 3C107 and 3C108 require No. 4C953 or 4C876 isolators; and blower No. 3C540 requires No. 4C957 or 4C961 isolators

# FLOOR MOUNTED VIBRATION ISOLATORS

Install between equipment and stationary support. For top load applications only. Absorb shock, noise, and limit transmission of vibration. Single and double deflection isolators have steel top plate, and threaded insert and steel base both totally imbedded in oil resistant neoprene. Mounting bolts serve as leveling devices. Used on air handling units, air conditioners, machine tools, motor generators, transformers, business machines, pumps. Vibration Mounting & Controls brand.

## FLOOR MOUNT SPRING VIBRATION ISOLATORS

Absorb vibration from air handling units, air conditioners, chillers, compressors, fans, pumps, and heating and ventilating equipment. For critical applications and when required static deflections exceed 0.40". Cast telescoping housing contains color-coded steel spring designed for static deflections up to 1.3". Available with load ranges from 50 to 2600 pounds. Non-skid neoprene acoustical pad attached to base plate. Built-in leveling bolt. Vibration Mounting and Controls brand.

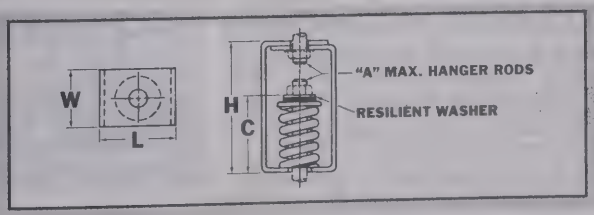
*Exhaust it, filter it, exchange it — we have the ventilators to get it done.*

# HANGER MOUNTED VIBRATION ISOLATORS

No. 4C962



Mount between ceiling and vibrating equipment to limit transmission of vibration. Isolators consist of a rectangular steel frame with permanently attached oil-resistant single or double deflection neoprene element. Mounting holes provided for hanger rod for ceiling installation. Used for in-line or tubeaxial fans and blowers, lighting fixtures, duct work, piping, sprinkler systems, unit heaters, and suspended ceilings. Vibration Mounting and Controls brand.

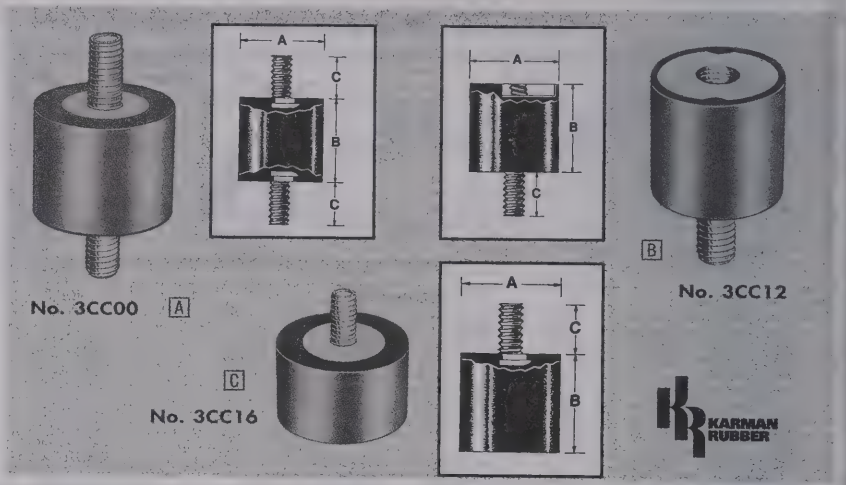
# HANGER MOUNTED SPRING ISOLATORS

No. 5C141



For isolating vibrations, absorbing shock, and reducing noise in critical locations. Hangers mount between ceiling and vibrating equipment. Consist of rectangular steel housing with color coded steel spring in series with a neoprene isolation washer. For critical applications and when required static deflection exceed 0.40". Isolators available with load ranges from 60 to 1300 pounds and static deflections up to 1.3". Vibration Mounting and Controls brand.

| Max. Load Each in Lbs. | Deflection (In.) | Dimensions (In.) A | C | H | L | W | VM&C Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |

# CYLINDRICAL VIBRATION ISOLATORS

- Absorb transmission of noise, shock, and vibration for general industrial applications
- Use for fans, blowers, air conditioning and refrigeration systems, pumps, compressors, business machines, motors, generators, appliances, and machinery
- Natural rubber isolators are chemically bonded to steel
- All isolators are compression mount with 50 durometer hardness
- Zinc-plated threaded studs
- Not suitable for excess exposure to oil, grease, and solvents or temperatures over 150°F
- Not designed for wall or ceiling suspended installations
- Nos. 3CC15 and 3CC17 are cone-shaped foot mount

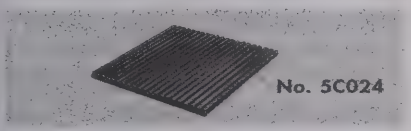
(*) Nos. 3CC15 and 3CC17 are cone-shaped foot mount. (‡) No. 3CC09 has female threads at each end.

# EXPANDABLE/FLEXIBLE ALUMINUM DUCTWORK

**Expands to six times its 2½ ft. length.** Thread through open web trusses and around obstacles. Strong lightweight aluminum alloy can be bent by hand. Attaches to discharge ducts with two stainless steel screw clamps (included).

**UL Air Duct Listed #MH12720.** Ductwork complies with NFPA Standards 90A and 90B for Class "O" fire hazard classifications. Internal temp. range up to 200°F. Continuous external temperature range up to 435°F.

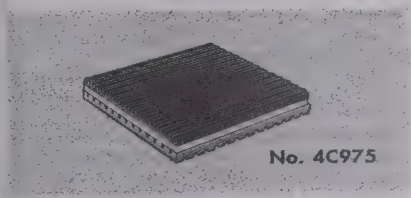


**Fits all Broan and Dayton brand** bathroom ventilators with 3, 4, or 6" dia. discharge duct. Stretchflex brand by Westaflex.

| Ductwork Dia. (In.) | Size Compressed | Full Length (Ft.) | StretchFlex Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **3** | 3" x 2½ feet | 15 | 2501 | **3C590** | $17.75 | **$11.84** | 1.9 |
| **4** | 4" x 2½ feet | 15 | 2505 | **3C591** | 22.00 | **14.72** | 2.2 |
| **6** | 6" x 2½ feet | 15 | 2513 | **5C201** | 35.00 | **24.45** | 3.0 |

## UL LISTING AND CSA CERTIFICATION

When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.

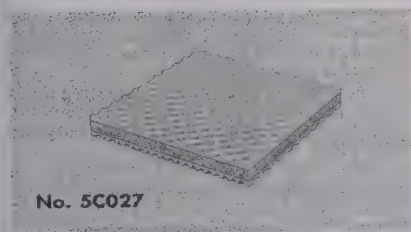


## NEOPRENE MOUNTING PADS

Resilient cross-ribbed pad of oil resistant neoprene. Alternating raised ribs provide effective vibration isolation over entire load range. Deflection at 40 PSI is 0.06 in. Most installations do not require bolting or cementing. 3/8" thick sheets can be cut with shears or knife to fit leg or bearing plate of machine. May be used in multiple layers to increase deflection. Vibration Mounting and Controls brand.

| Size (In.) | Thickness (In.) | Load Range | VM&C Model Shear-Flex- | Stock No. | List | Each | Lot 4 | Shpg Wt. |
|---|---|---|---|---|---|---|---|---|
| **2 x 2** | 3/8 | 10 to 50 PSI | Black 2 x 2 | **5C024** | $1.54 | **$0.92** | **$0.83** | 0.1 |
| **3 x 3** | 3/8 | 10 to 50 | 3 x 3 | **5C023** | 2.87 | **1.72** | **1.55** | 0.1 |
| **4 x 4** | 3/8 | 10 to 50 | 4 x 4 | **4C973** | 5.26 | **3.15** | **2.84** | 0.2 |
| **6 x 6** | 3/8 | 10 to 50 | 6 x 6 | **5C022** | 11.30 | **6.77** | **6.10** | 0.5 |
| **18 x18** | 3/8 | 10 to 50 | 18 x 18 | **4C972** | 73.24 | **43.90** | **39.47** | 4.5 |
| **18 x 36** | 3/8 | 10 to 50 | 18 x 36 | **5C021** | 144.28 | **86.45** | **77.75** | 2.5 |

## NEOPRENE AND STEEL VIBRATION PADS



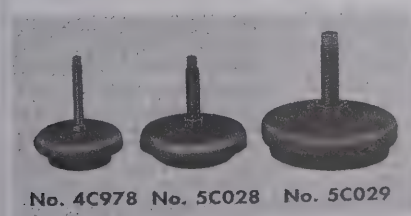
For use under concentrated loads where machine leg has a small area or sharp edges which can cut into the floor.

**Type A** has steel plate bonded between ribbed neoprene pads.

**Type B** has an isolation washer with a 3/4" diameter hole in the center of its steel plate and ribbed neoprene pad. Vibration Mounting and Controls brand.

| Type | Maximum Load Steady | Maximum Load Impact | Dimensions (In.) Length | Width | Thickness | VM&C Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|---|---|
| A | 1680 lbs. | 1200 lbs. | 6 | 4 | 7/8 | A-24 | **4C975** | $39.23 | **$23.50** | **$21.15** | 2.1 |
| B | 1680 | 1200 | 6 | 4 | 5/8 | B-24 | **4C974** | 39.23 | **23.50** | **21.15** | 2.0 |

## NEOPRENE AND CORK VIBRATION PADS



Laminated pad consists of 1/2" thick close-grain cork core bonded between two 1/4" thick layers of cross-ribbed neoprene. Pad is 1" thick overall. Combines resiliency of neoprene with acoustical efficiency of cork.

Criss-crossed skid resistant ribs on top and bottom. No bolting or cementing required. Pad can be cut to size with knife

| Size (In.) | Thickness (In.) | Load Range | VM&C Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **2 x 2** | 1 | 10 to 60 PSI | Cork-Rib Pad 2 x 2 | **5C027** | $2.48 | **$1.49** | **$1.34** | 0.1 |
| **3 x 3** | 1 | 10 to 60 | Cork-Rib Pad 3 x 3 | **4C976** | 5.94 | **3.56** | **3.20** | 0.2 |
| **4 x 4** | 1 | 10 to 60 | Cork-Rib Pad 4 x 4 | **4C977** | 9.94 | **5.95** | **5.36** | 0.5 |
| **12 x 12** | 1 | 10 to 60 | Cork-Rib Pad 12 x 12 | **5C026** | 74.68 | **44.75** | **40.25** | 4.0 |
| **18 x 18** | 1 | 10 to 60 | Cork-Rib Pad 18 x 18 | **5C025** | 154.72 | **92.70** | **83.39** | 7.7 |

## LEVELING MOUNTS

Built-in leveling feature provides height adjustment to compensate for unequal mounting deflection or floor irregularities. Utilizes oil resistant neoprene to provide effective shock and vibration control.

Non-skid ribbed surface. No bolting required. Neoprene pad is bonded to a corrosion resistant housing. Zinc plated hardware. Vibration Mounting and Controls brand.

| Load Capacity in Pounds | Size (In.) | Width Dia. (In.) | Base Ht. (In) | Leveling Bolt (In.) | Bolt Lgth. (In.) | VM&C Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |

# ELECTRIC MOTOR TERMINOLOGY

**Ambient (Amb.)**—The temperature of the space around the motor. Most motors are designed to operate in an ambient not over 40°C (104°F). Note: A rating of 40°C Ambient is not the same as a rating of 40°C Rise; see Temperature Rise.

**Air-Over**—Motors intended for fan and blower service. Must be located in the air stream to provide motor cooling.

**Capacitors**—Capacitor ratings to HP ratings vary between different brands and applications. Capacitor value and performance is essential to proper motor operation. To ensure maximum performance and motor life, always use the correct capacitor as specified on the motor nameplate.

**Efficiency**—The ratio of output power divided by input power; usually expressed as a percentage. A measure of how well the electrical energy input to a motor is converted into mechanical energy at the output shaft. The higher the efficiency, the better the conversion process and lower the operating costs.

**Enclosure (Encl.)**—The motor's housing. Types:

**Open Dripproof (OPDP)**—Ventilation openings in end shields & shell placed so drops of liquid falling within an angle of 15° from vertical will not affect performance. Usually used indoors, in fairly clean locations.

**Totally Enclosed (TE)**—No ventilation openings in motor housing (but not airtight or waterproof). Used in locations which are dirty, damp, oily, etc.

*Totally Enclosed, Fan-Cooled (TEFC)*—Includes an external fan, in a protective shroud, to blow cooling air over the motor.

*Totally Enclosed, Nonventilated (TENV)*—Not equipped with an external cooling fan. Depends on convection air for cooling.

*Totally Enclosed, Air-Over (TEAO)*—Air flow from driven or external device provides cooling air flow over the motor.

*Hazardous Location (Explosion-Proof)*—A totally enclosed motor designed to withstand an internal explosion of specified gases or vapors, and not allow the internal flame or explosion to escape.

**Full-Load Amps (FLA)**—Line current (amperage) drawn by a motor when operating at rated HP and voltage. Shown on motor nameplate. Important for proper wire size selection and motor starter heater selection.

**Frame**—Usually refers to the NEMA system of standardized motor mounting dimensions, which facilitates interchangeability.

**Bearings (Brgs.)**—Basic types:

**Sleeve (Slv.)**—Preferred where low noise level is important, as on fan and blower motors. Unless otherwise stated, sleeve bearing motors listed herein can be mounted in any position, including shaft-up or shaft-down (all-position mounting).

**Ball**—Used where higher load capacity is required or periodic lubrication is impractical. Two means used to keep out dirt:

*Shields*—Metal rings with close running clearance on one side (single-shielded) or both sides (double-shielded) of bearing.

*Seals*—Similar to shields, except have rubber lips that press against inner race, more effectively excluding dirt, etc.

**Unit**—Motors are constructed with a long, single sleeve bearing. For fan duty only. All-position mounting unless otherwise stated.

**Hertz (Hz)**—Frequency, in cycles per second, of AC power; usually 60 Hz in USA, 50 Hz overseas.

**Horsepower**—Check nameplate data if replacing old motor. On new equipment follow the manufacturer's recommendations. In general, both motor price and physical size increase as HP increases.

**Insulation (Ins.)**—In motors, usually classified by maximum allowable operating temperatures: Class A-105°C (221°F), Class B-130°C (266°F), Class F-155°C (311°F), Class H-180°C (356°F).

**Motor Speeds:**

**Synchronous**—The theoretical maximum speed at which an induction-type motor can operate. Synchronous speed is determined by the power line frequency and motor design (number of poles), and calculated by the formula

$$\text{Syn. RPM} = \frac{\text{Power Supply Hz} \times 120}{\text{No. of Poles}}$$

**Full-Load**—The nominal speed at which an induction motor operates under rated HP conditions. This will always be less than the synchronous speed and will vary depending on the rating and characteristics of the particular motor. For example, four pole 60 Hz fractional horsepower motors have a *synchronous* speed of 1800 RPM, a *nominal* full load speed (as shown on the nameplate) of 1725 RPM, and an *actual* full load speed ranging from 1715 to 1745 RPM.

**Motor Types**—Classified by operating characteristics and/or type of power required;

**Induction motors for AC operation**—Most common type. Speed remains relatively constant as load changes. There are several types:

**Single Phase**—Available in these types:

*Shaded pole*—low starting torque, low cost. Usually used in direct-drive fans and blowers, and in small gearmotors.

*Permanent split capacitor (PSC)*—performance and applications similar to shaded pole but more efficient, with lower line current and higher horsepower capabilities.

*Split-phase start—induction run* (or simply split phase)—moderate starting torque, high breakdown torque. Used on easy-starting equipment, such as belt-driven fans and blowers, grinders, centrifugal pumps, gearmotors, etc.

*Split-phase start—capacitor run*—same performance as induction run, except higher efficiency. Often used on Wattrimmer® fan/blower motors.

*Capacitor-start, induction-run* (or simply, capacitor start)—high starting and break-down torque, medium starting current. Used on hard-starting applications; compressors, positive displacement pumps, farm equipment, etc.

*Capacitor-start, capacitor-run*—similar to capacitor-start, induction-run, except have higher efficiency. Generally used in higher HP single phase ratings.

**Three Phase**—Operate on 3-phase power only. High starting and breakdown torque, high efficiency, medium starting current, simple, rugged design, long life. For industrial uses.

**Direct Current (DC)**—Usable only if DC available. Use with a DC/SCR control enables adjustable-speed applications.

**AC/DC (AC series or universal)**—Operate on AC (60 or 50 Hz) or DC power. High speed, usually 5000 RPM or more. Brush type. Speed drops rapidly as load increases. Useful for drills, saws, etc., where high RPM and small size are desired and speed characteristic and limited life (primarily of brushes) is acceptable.

**Mounting (Mtg.)**—Basic types:

**Bolted**—Motor is attached to frame with removable bolts.

**Rigid**—Motor solidly fastened to equipment through metal base that is welded to or cast into motor shell.

**Cradle/Resilient (Res.)**—Motor shell isolated from base by vibration-absorbing material, such as rubber rings on the end shields, to reduce transmission of vibration to the driven equipment.

**C-Face or flange**—Shaft end has a flat mounting surface, machined to standard dimensions, with holes to allow easy, secure mounting to driven equipment. Commonly used on jet pumps, oil burners and gear reducers.

**Stud**—Motor has bolts extending from front or rear, by which it is mounted. Often used on small, direct drive fans and blowers.

**Yoke**—Tabs or ears are welded to motor shell, to allow bolting motor to a fan column or bracket.

**Power**—The energy used to do work. Also the rate at which work is done. Measured in watts, horsepower, etc.

**Power Factor**—The ratio of real power (watts) divided by apparent power (volt-amperes). Do not confuse power factor with efficiency. A measure of the extent to which power transmission or distribution systems are fully utilized.

**Power supply**—Single-phase power is the most readily available power supply. Single-phase motors of correct voltage can operate from a three-phase system when properly connected to any one of the three phases. However, three-phase motors cannot be connected to single phase power. A three-phase motor is less expensive and more durable than the same size single-phase motor, but the extra cost of installing three-phase lines must be considered.

**Rotation (Rot.)**—Direction in which shaft rotates: CW = clockwise; CCW = counterclockwise; Rev (CW/CCW)= reversible, rotation can be changed. Unless stated otherwise, rotation specified in this catalog is viewed facing shaft end of motor; for double-shafted motor, view is from the lead end.

CONTINUED ON NEXT PAGE

# ELECTRIC MOTOR TERMINOLOGY

**Service Factor (SF)**—A measure of the reserve margin built into a motor. Motors rated over 1.0 SF have more than normal margin, and are used where unusual conditions such as occasional high or low voltage, momentary overloads, etc. are likely to occur.

**Severe Duty**—A totally enclosed motor with extra protection (shaft slinger, gasketed terminal box) to resist entry of contaminants. Used in extra dirty, damp or other non-hazardous contaminated environments.

**Temperature Rise**—The amount by which a motor, operating under rated conditions, is hotter than its surroundings. On most motors, manufacturers have replaced the Rise rating on the motor nameplate with a listing of the Ambient temperature rating, insulation class and service factor.

**Thermal Protector**—A temperature sensing device built into the motor that shuts off the motor if the temperature becomes excessive due to failure-to-start or overloading. Especially important for motors that start automatically, are located remotely, unattended, or out-of-sight of operator. Basic types:

**Automatic-Reset (Auto)**—After motor cools, thermal protector automatically restores power. Should not be used where unexpected restarting would be hazardous.

**Manual-Reset (Man.)**—An external button must be pushed to restore power to motor. Preferred where unexpected restarting would be hazardous, as on saws, conveyors, compressors, etc.

**Impedance (Imp.) or Impedance Protected**—Motor is designed so that it will not burn out in less than 15 days under locked rotor (stalled) conditions, in accordance with UL standard, No. 519.

**Torque**—Twist, or turning ability, as applied to a shaft. Measured in foot-pounds (ft.-lbs.), inch-pounds (in.-lbs.), ounce-feet (oz.-ft.) or ounce-inches (oz.-in.). In motors the torque values are:

**Locked Rotor Torque, or Starting Torque**—The maximum torque produced at initial start.

**Breakdown Torque**—The maximum torque a motor will produce while running, without an abrupt drop in speed and power.

**Voltage**—The pressure in an electrical system. The force pushing the electric current through the circuit, like pressure in a water system.

## ABBREVIATIONS USED IN MOTOR LISTINGS

| | |
|---|---|
| **AC** | Alternating Current |
| **Amb.** | Ambient |
| **Amps** | Amperes |
| **Auto.** | Automatic |
| **AWG** | American Wire Gauge |
| **C** | Centigrade |
| **Cap.** | Capacitor |
| **CCW** | Counterclockwise |
| **Cond.** | Conductor |
| **CSA** | Canadian Standards Association |
| **CW** | Clockwise |
| **CW/CCW** | Reversible |
| **DC** | Direct Current |
| **Dia.** | Diameter |
| **Encl.** | Enclosure |
| **F/L** | Full-Load |
| **Ft.-Lb.** | Foot-Pound |
| **H, Ht.** | Height |
| **HP** | Horsepower |
| **Hz** | Hertz |
| **Imp.** | Impedance |
| **In.** | Inch, Inches |
| **In.-Lb.** | Inch-Pound |
| **L, Lgth.** | Length, Long |
| **Lbs.** | Pounds |
| **Man.** | Manual |
| **Max.** | Maximum |
| **Mfd.** | Microfarad |
| **Min.** | Minimum |
| **Mtg.** | Mounting |
| **NEC** | National Electrical Code |
| **NEMA** | National Electrical Manufacturers' Association |
| **No.** | Number |
| **Nom.** | Nominal |
| **OC** | On Center |
| **OPAO** | Open, Air Over |
| **Prot.** | Protection |
| **PSC** | Permanent Split Capacitor |
| **Resil.** | Resilient |
| **Rev.** | Reversible |
| **RPM** | Revolutions per Minute |
| **Shpg.** | Shipping |
| **Slv.** | Sleeve |
| **Spd.** | Speed |
| **Syn.** | Synchronous |
| **TEAO** | Totally Enclosed, Air Over |
| **TEFC** | Totally Enclosed Fan-Cooled |
| **TENV** | Totally Enclosed Non-Ventilated |
| **UL** | Underwriters Laboratories, Inc. |
| **V** | Volts, Voltage |
| **W** | Width, Watts |

## NATIONAL ELECTRICAL CODE EXPLOSIVE ATMOSPHERE CLASSIFICATIONS

Certain locations are hazardous because the atmosphere does or may contain gas, vapor or dust in explosive quantities. The National Electrical Code (NEC) divides these locations into Classes and Groups according to the type of explosive agent which may be present. Listed are some of the agents in each classification. For complete list, see NFPA (National Fire Protection Association) publication 497M.

Underwriters' Laboratories tests motors and other devices for safety in explosive atmospheres, and publishes a list of those meeting its standards for each Class and Group.

Use of UL Listed devices does not necessarily make an installation conform to the NEC or local codes. Consult Chapter 5 of the NEC, local building codes, OSHA requirements, and insurance inspectors for detailed data as to proper procedures. This Catalog does not contain any motors designed for Class I, Groups A, B, and C atmospheres.

### CLASS I

**Group A:** Acetylene

**Group B:** Butadiene, ethylene oxide, hydrogen, propylene oxide, manufactured gases containing more than 30% hydrogen by volume.

**Group C:** Acetaldehyde, cyclopropane, diethyl ether, ethylene.

**Group D:** Acetone, acrylonitrile, ammonia, benzene, butane, ethanol, ethylene dichloride, gasoline, hexane, isoprene, methane (natural gas), methanol, naphtha, propane, propylene, styrene, toluene, vinyl acetate, vinyl chloride, xylene.

### CLASS II

**Group E:** Aluminum, magnesium, and other metal dusts with similar characteristics

**Group F:** Carbon black, coke, or coal dust

**Group G:** Flour, starch, or grain dust

### CLASS III

Easily ignitable fibers, such as rayon, cotton, sisal, hemp, cocoa fiber, oakum, excelsior, and other materials of similar nature.

## TEMPERATURE CODE

In addition to the identification of the class, group, and division, it is necessary as well to obtain the temperature code or maximum surface temperature for the hazardous location motor. This code or temperature indicates the maximum surface temperature for all conditions including burnout, overload, single phasing, and locked rotor. The maximum surface temperature or "T" code must be identified on the nameplate.

**TEMPERATURE IDENTIFICATION NUMBERS**

| "T" Number (T-Code On Nameplate) | Maximum Temperature (For All Conditions) | | "T" Number (T-Code On Nameplate) | Maximum Temperature (For All Conditions) | |
|---|---|---|---|---|---|
| T1 | 450°C | 842°F | T3A | 180°C | 356°F |
| T2 | 300 | 572 | T3B | 165 | 329 |
| T2A | 280 | 536 | T3C | 160 | 320 |
| T2B | 260 | 500 | T4 | 135 | 275 |
| T2C | 230 | 446 | T4A | 120 | 248 |
| T2D | 215 | 419 | T5 | 100 | 212 |
| T3 | 200 | 392 | T6 | 85 | 185 |

# POWER TRANSMISSION TERMINOLOGY

**Acceleration Time**—When a motor is used to accelerate a rotating load, acceleration time is the response time of the motor to bring the load from zero to normal running speed.

**Actual Torque**—The actual torque required to drive a machine. It is the torque measured at the input shaft of a machine being driven.

**AGMA**—American Gear Manufacturers Association. Composed of member companies who manufacture speed reducers, enclosed gear drives, open gearing, and gear type shaft couplings. They establish standards for the design and application of gear products. The combined experience of company members and technical members assures gear users that products will perform satisfactorily when built, selected, and tested in accordance with AGMA standards.

**Ambient Temperature**—The temperature of the air around the power transmission equipment in operation.

**Auxiliary Drive**—Belt, chain, or gear drive used with a gearmotor or speed reducer to provide additional speed reduction and/or torque multiplication.

**Axial Thrust Load**—The external loading or force acting lengthwise along a shaft.

**Back Drive**—A condition in which the drive (or prime mover) is driven by the load rather than driving the load. An example might be when a high inertia load, such as a flywheel, is decelerating to slower speed or complete stop.

**Backlash**—The amount by which the width of a tooth space exceeds the thickness of the engaging tooth.

**Center Distance**—When applied to speed reducers, it is the distance between the centerlines of the input (high speed) shaft and the output (low speed) shaft. Shaft centerlines may be parallel or at right angles to each other. Center distance is often used to designate a single reduction worm gear speed reducer, such as 1.33", 1.75".

**Double Reduction**—A multiple reduction unit containing two stages of gear reduction housed in a single enclosure. The overall speed reduction (ratio) is the product of the gear ratios provided by the individual stages.

**Duty Cycle**—The relationship between operating and rest time. When applied to gear reducers, duty cycle is usually referred to as continuous or intermittent duty.

*Continuous Duty*—The ability of a geared unit to operate continuously within its rated capacity without exceeding the temperature limits of its lubricating system.

*Intermittent Duty*—A geared unit which has a specific operating time limit (min./hr.) to prevent exceeding the temperature limits of its lubricating system. This limit is often specified as a percentage. (A 25% duty cycle indicates a maximum total operating time of 15 minutes each hour.)

**Efficiency**—An expression of the amount of power delivered at the output of a power transmission system as a percentage of the amount of power supplied to the system's input side.

**Gears**—Machined elements that transmit motion and power by means of successively engaging teeth. Most common gear types available are helical, spur, and worm gears.

*Helical Gears*—Gears that are cylindrical in form and mesh between parallel centerlines. Their teeth are cut at an angle, called the helix angle, across the face of the gear.

*Spur Gears*—Gears that are cylindrical in form and mesh between parallel centerlines with teeth cut straight across gear face.

*Worm Gears*—Gears that consist of a screw like worm and its mating gear. Both are cylindrical in form and mesh at right angles to each other. The WORM is the driving component and is identified by one or more teeth in the form of screw threads wrapped around a cylinder (similar to barber pole stripes). The WORMGEAR, also called Worm-Wheel, is the driven component and has teeth similar to those of a helical gear with the top of its teeth curved inward to mesh with the worm.

**Gear Ratio**—Described below for helical, spur, and worm gears. Gear ratio is normally expressed as (X):1.

*Helical and Spur Gears*—Ratio of number of gear teeth on driven gear divided by number of gear teeth on driving gear (pinion).

*Worm Gears*—The ratio of the number of teeth on the Wormgear (Worm-Wheel) divided by the number of threads or "starts" on the worm.

**Hand of Drive**—The location of the output shaft of a reducer relative to its input shaft, generally expressed as left-hand (F1) or right-hand (F2). Some reducer manufacturers use codes or symbols to designate shaft arrangement.

**Horsepower (HP)**—A measure of the ability to do work. It can be applied to either linear (straight-line) or rotary (circular) motion.

**Inertia (WR)**—A measure of the resistance of an object to accelerate or decelerate.

**Inertial Load**—A load, such as a flywheel or other heavy rotating object, which tends to oppose acceleration up to rated speed or deceleration to stop.

**Input Horsepower**—The amount of power applied to the input shaft of a reducer by the prime mover. The input horsepower rating assigned to a reducer represents the maximum amount of power the reducer is capable of handling.

**Load**—The burden imposed on a drive system by the equipment or machine being driven. There are three types.

*Constant Torque*—The load torque remains constant over the speed range, while the horsepower required varies directly with speed. This type of load is usually the result of friction related to sliding or rolling motion. Industrial equipment of this type include conveyors, hoists, and similar general machinery.

*Variable Torque*—The load torque and horsepower both vary as speed is changed; as speed increases, torque and horsepower both increase in some related manner. Examples include some types of mixers, positive displacement and centrifugal pumps, air moving fans, and blowers.

*Constant Horsepower*—The load horsepower remains constant over the speed range, while the torque required decreases as speed increases. Constant horsepower loads commonly are found on metal cutting or removing equipment such as saws, lathes, and milling machines.

**Load Classifications**—Loads can be classified by the degree of shock or impact they impose on the drive system. There are two main classifications.

*Uniform Steady Load*—Loads that are essentially smooth, shock or impact free. Equipment that normally exhibit this type of load include can filling and bottling machinery, uniformly loaded or fed conveyors, and printing presses.

*Shock Loads*—Loads that transmit shock or abrupt peak loads back to the driver (power source—motor, gearmotor, or reducer) and often repeat on a regular or cyclical basis. Shock loads may be categorized as light, moderate, or heavy. Equipment that exhibits this type of load are conveyors not uniformly fed, agitators for liquids and solids, tumblers, and variable density mixers.

**Mechanical Rating**—The maximum power or torque that a speed reducer can transmit, based on the strength and durability of its components.

**NEMA**—National Electrical Manufacturers Association. Organization that sets standards of performance and dimensions for the motor industry.

**Overall Drive Ratio**—The ratio of input speed (RPM) to output speed (RPM). Overall drive ratio is normally expressed as (X):1.

**Overdrive**—An interchangeable term for back drive.

**Overhung Load**—The side or radial force applied at right angles to a drive motor, gearmotor, or reducer shaft. This force results from a gear, pulley, or sprocket that the drive's bearing and shaft must support without damage while transmitting power.

**Pinion**—The input or driving gear that meshes with an output or driven gear.

**Prime Mover**—The machine that provides input power to a drive. The most frequently encountered prime movers include electric motors, internal combustion engines, hydraulic and air motors.

CONTINUED ON NEXT PAGE

CONTINUED FROM PREVIOUS PAGE

**Radial Load**—An interchangeable term for overhung load.

**Rating Tables**—Tables that define the capacity of a given size or type of reducer when operating under a given set of conditions.

**Reducers**—The basic types are described below.

*C-Face Reducer*—Allows for direct coupling to a motor. Motor shaft fits into a hollow input shaft on the reducer. Motor face bolts to the flange on the reducer. Both reducer flange and motor face are designed to NEMA standard dimensions.

*Indirect Drive Reducer (Open Shaft Reducer)*—Allows for the prime mover to be mounted away from the reducer. It contains an input shaft extension which accommodates the use of pulleys or flexible couplings.

*Parallel-Shaft Reducer*—A speed reducer (C-Face or Open-Shaft) having an input shaft and output shaft parallel to each other. These reducers contain spur and/or helical gearing.

*Right Angle Reducer*—A speed reducer (C-Face or Open-Shaft) having an input shaft and output shaft at right angles to each other. Worm gear reducers are the most common right angle reducers.

**Self-Locking**—A condition commonly associated to worm gear speed reducers. A worm gear reducer is said to be self-locking when its output wormgear cannot drive the worm. Note: none of our listed worm gear (right angle) speed reducers offer this feature.

**Service Factor**—When applied to speed reducers, service factor is a number (multiplier) that redefines basic torque requirement of a load. It adjusts basic torque requirement to a service rating for the reducer by compensating for load classification, duty cycle, and type of prime mover.

**Single Reduction**—A unit containing a single stage of gear reduction housed in an enclosure, such as a worm gear reducer.

**Speed Ratio**—The ratio or relationship of input speed divided by output speed. Speed ratio is normally expressed as (X):1.

**Thermal Rating**—For speed reducers, this is a rating indicating the maximum input horsepower that can be supplied to drive a reducer and the output torque that can be transmitted continuously without exceeding the temperature limits of the gear lubricant.

**Thrust**—The force acting lengthwise along the axis of a shaft either towards or away from it.

**Torque**—Twisting force that tends to cause rotation. For explanations of *Running (Full Load) Torque* and *Starting Torque* as it pertains to gearmotors, see GEARMOTOR SELECTION GUIDE at the beginning of the POWER TRANSMISSION section.

**Triple Reduction**—A multiple reduction unit containing three stages of gear reduction housed in a single enclosure. Follows the same principles of the double reduction unit except it has an additional stage of gearing.

**Worm "Start"**—Beginning of thread on a worm pinion as seen from the end of the worm shaft.

**Worm Thread**—The tooth of the worm that winds around the shaft to give it a screw-like appearance (similar to barber pole stripes). The worm can have one or multiple threads.

# VIBRATOR SELECTION

Below are two easy steps to select the proper vibrator for your application on a bin, a vibrating screen or consolidating concrete, see pages 255-259 for product listing.

## (1) Calculate needed vibrator force for:

### A. Bins and Hoppers:

To move the material in a bin or hopper, the friction between the material and the bin skin has to be broken. Once this is done, the material cannot cling to the bin sides and it will flow out through the discharge. The vibrator force needed is calculated as follows:

Calculate the weight of the material in the transition or sloping part of the bin. Normally this is the only place where the friction between the material and the bin sides has to be broken. Do not calculate the total weight, only what is in the transitional part.

For conical bins, calculate as follows: 0.261 x dia.$^2$ x height x material density in lbs./cu. ft.

For rectangular bins, length x width x height x 1/3 x material density in lbs./cu. ft.

When the weight has been calculated, divide by 10—this is the force or impact needed for your vibrator: _____ lbs. For example, the conical part of a 25 ton bin contains 9000 lbs. Divide 9000 by 10, you need a vibrator with 900 lbs. of centrifugal force. See pages 255-259 for product listings.

### B. Vibrating Tables

Packing material. Dense materials respond best to high frequency vibration (3600 rpm or more) while light, fluffy or flaky materials respond best to low frequency vibration (1800 rpm or less). For packing or settling materials, use a vibrator with an impact force of 1.5 to 2 times larger than the weight of the material plus container.

### C. Vibrating Screens

For self-cleaning screen, use a vibrator with a centrifugal force (impact) four times the weight of the materials plus the weight of the screen. Note: Coarse and lumpy materials respond best to high frequency vibrations (3600 rpm), powdery and dry materials respond best to low frequency vibration (1800 rpm), sticky and wet materials, over 3600 rpm.

### D. Consolidating Concrete

For 3" slump concrete, use a vibrator with the same force (impact) as the weight of concrete and form. For 1-2" slump concrete, an additional 30-50% impact is needed. For dry mixes (0 slump) add 100-200% impact.

## (2) Select Electric vs. Pneumatic Vibrator

In general, electric vibrators are initially higher in cost than pneumatic vibrators; however, the operation cost is considerably less and in the difference in price and installation cost is recaptured in a few months of operation. The electric units have the lowest noise reading, 60-70 dB, no more sound than an electric motor. The life expectancy is 2-3 times that of an air operated unit. The life of an air operated unit is to great extent, determined by the cleanness of the compressed air and the operating pressure. Maximum operating pressure is 80 PSI, above 80 PSI the life of the pneumatic vibrator diminishes rapidly. The turbine vibrator has a dB reading of 60-80.

# KENNAMETAL TURNING GRADES FOR CUTTING MATERIAL

The Kennametal grade system consists of four basic groups of materials: tungsten carbide, cermet, ceramic, and polycrystalline. Each group contains a variety of cutting grades to accommodate various metalcutting needs.

### Tungsten Carbide

This group consists of uncoated, chemical vapor deposition (CVD) coated and physical vapor deposition (PVD) coated materials. Each coated grade consists of various substrates of unalloyed (straight WC/Co), and alloyed (WC/TaC/TiC/NbC/Co) compositions.

### Ceramic

The ceramic cutting tools can be divided into two basic families: alumina-base (aluminum oxide) ceramics, and silicon nitride-base (sialon) ceramics.

## TUNGSTEN CARBIDE GRADES

| Grades | Composition And Application | ISO |
|---|---|---|
| | **CVD Ceramic ($Al_2O_3$) Coated Carbide Grades** | |
| **KC9025** | **composition:** Coated with aluminum-oxide, this patented Kennametal grade has a tough deformation-resistant substrate, and cobalt-enriched periphery. It's a general purpose cutting grade that incorporates toughness and excellent wear resistance.<br>**application:** This general purpose grade machines all types of steels and stainless steels. | K15-K25<br>M15-M25<br>P15-P35 |
| | **CVD Tri-Phase Coated Carbide Grades** | |
| **KC850** | **composition:** A TiC/TiCN/TiN coating on an extra-strong, cobalt-enriched substrate.<br>**application:** For your toughest jobs on a wide variety of materials. Used for interrupted cuts and heavy to moderate roughing of carbon and alloy steels, tool steels, stainless steels, alloy cast irons, and ductile irons. Excellent thermal and mechanical shock resistance makes grade KC850 ideally suited for applications requiring maximum edge strength. | M25-M45<br>P25-P45 |
| | **PVD TiN (Titanium Nitride) Coated Carbide Grades** | |
| **KC720** | **composition:** A tough, durable PVD coated carbide grade.<br>**application:** Developed for cutting high-temperature alloys, stainless steels, and low-carbon steels at low to moderate speeds. Its unique mechanical and thermal shock resistant properties and resistance to edge buildup enable grade KC720 to deliver superior performance and reliability on difficult operations like cutoff operations, and milling of high-temperature alloys with coolant. | M25-M40<br>S15-S30 |
| **KC730** | **composition:** A PVD coated carbide grade.<br>**application:** For machining high-temperature alloys, aerospace materials, refractory metals, and 200 or 300 series stainless steels. The substrate offers superior thermal deformation resistance, depth of cut notch resistance, and edge strength. The uniformly dense PVD coating increases wear resistance, reduces problems with edge buildup, and provides an unusually good combination of properties for machining difficult-to-machine materials and aluminum. | M05-M20<br>S15-S25 |
| | **Uncoated Carbide Grades** | |
| **K68** | **composition:** A general purpose WC/Co unalloyed grade.<br>**application:** Grade K68 has excellent edge wear resistance for machining stainless steels, cast irons, nonferrous metals, nonmetals, and most high-temperature alloys. | K05-K15<br>M10-M20 |
| **K420** | **composition:** A tough WC/TaC/TiC/Co alloyed steel cutting grade.<br>**application:** Grade K420 has superior edge strength and thermal shock resistance for milling or turning through severe interruptions at high chip loads. Also used for heavy roughing and semi-finishing of all soft to moderately hard steels. | M15-M30<br>P20-P30 |
| | **CERAMIC GRADES** | |
| | **Silicon Nitride-Base Ceramics** | |
| **Kyon 3000** | **composition:** An advanced silicon nitride (sialon) grade.<br>**application:** Having excellent abrasion resistance combined with good toughness and thermal shock resistance. It is used for high productivity milling and turning of gray cast irons at high speeds (800-4000 sfm). | K05-K20 |

You can order directly from Grainger, call your local branch and place your order. To find the branch nearest you, check the white pages in your local telephone directory under "Grainger." You can pick your order up or we'll ship it today.

# KENNAMETAL MILLING GRADES FOR CUTTING MATERIALS

The Kennametal grade system consists of one basic group of materials: tungsten carbide. This group contains a variety of cutting grades to accommodate various metalcutting needs.

### Tungsten Carbide

This group consists of chemical vapor deposition (CVD) coated and physical vapor deposition (PVD) coated materials. Each coated grade consists of various substrates of unalloyed (straight WC/Co), and alloyed (WC/TaC/TiC/NbC/Co) compositions.

**Kennametal offers a wide selection of carbide grades, both coated and uncoated** in a variety of insert shapes for milling all types of material.

## TUNGSTEN CARBIDE GRADES

| Grades | Composition And Application | ISO |
|---|---|---|
| | **Coated—Alumina CVD** | |
| **KC992M** | **composition:** A patented multi-layered TiCN/AI2O3 CVD coated carbide.<br>**application:** Designed to mill gray cast iron, with or without coolant, at medium speeds and feed rates with honed geometry inserts. Nodular irons with machinability index of 68-78 and BHN below 300 can also be machined up to 600 sfm and equivalent chiploads with T-land versions of insert geometries. | K10-K25 |
| | **Coated—Titanium Nitrides PVD** | |
| **KC710** | **composition:** A PVD TiN coated carbide grade that has good toughness and thermal shock resistance with good crater wear resistance and resistance to buildup on the cutting edge.<br>**application:** Greatly improved productivity when cutting a variety of steels and tool steels over a broad range of feeds at moderate to high speeds. | M1-M25<br>P15-P25 |
| **KC720** | **composition:** A tough, durable PVD TiN coated carbide grade.<br>**application:** Developed for cutting high-temperature alloys, stainless steels, and low-carbon steels at low to moderate speeds. Its unique mechanical and thermal shock resistant properties, and resistance to edge buildup, enable KC720 to deliver superior performance and reliability on difficult operations, with severe interrupted cuts, and when milling high-temperature alloys with coolant. | K25-K35<br>M30-M40<br>P25-P45 |
| **KC725M** | **composition:** A patented, multi-layer, PVD TiN/TiCN/TiN coated carbide.<br>**application:** A new milling grade engineered for high productivity wet and dry milling of carbon, alloy, and austenitic stainless steels. The high thermal shock resistance of the tough carbide substrate combined with the patented multi-layer coating provides long and reliable tool life in aggressive milling operations with or without coolant. It is the higher speed companion to KC720 in wet steel milling. | M15-M35<br>P20-P35 |
| **KC730** | **composition:** A PVD TiN coated carbide grade.<br>**application:** For milling cast and ductile irons, high-temperature alloys, aerospace materials, refractory metals, and 200 and 300 series stainless steels. The substrate offers superior thermal deformation resistance, depth of cut notch resistance, and edge strength. The uniformly dense PVD coating increases wear resistance, reduces problems with edge buildup, and provides an unusually good combination of properties for machining difficult-to-machine materials and aluminum. | K05-K15<br>M05-M15 |
| **KC792M** | **composition:** A PVD-CVD coated carbide grade.<br>**application:** Developed for milling of steels with higher speeds. Its unique substrate design with cobalt-enriched periphery provide maximum wear resistance combined with the chipping resistance needed for high speed milling operations. The patented PVD over CVD coating allows thicker coatings than possible with other CVD coatings, as well as desirable compressive stresses in the coatings to counteract thermal crack propagation. KC792M is the higher speed companion to KC710 for dry steel milling. | M25-M30<br>P30 |

# LIQUID PUMP TERMINOLOGY

**Flow**—The measure of the liquid volume capacity of a pump. Given in gallons per hour (GPH) or gallons per minute (GPM). To convert GPH to GPM, divide by 60.

**Pressure**—The force exerted on the walls of a container (tank, pipe, etc.) by the liquid. Measured in pounds per square inch (PSI).

**Head**—Another measure of pressure; expressed in feet. Usually applies to centrifugal pumps. Indicates the height of a column of water being lifted by the pump, neglecting friction losses in piping. For water, divide head in feet by 2.31 to get pressure in pounds per sq. inch (PSI).

**Flooded Suction**—Liquid source is higher than pump, and liquid flows to the pump by gravity. Preferable for centrifugal pump installations.

**Lift (Suction Lift)**—Liquid source is lower than the pump. Pumping action creates a partial vacuum and atmospheric pressure forces liquid up to pump. Theoretical limit of suction lift is 34 feet; practical limit is 25 feet or less, depending on pump type and elevation above sea level.

**Static Discharge Head**—Vertical distance (in feet) from pump to point of discharge.

**Total Head**—The sum of discharge head, suction lift and friction losses.

**Prime**—A charge of liquid required to begin pumping action of centrifugal pumps when liquid source is lower than pump. May be held in pump by a foot valve on the intake line or a valve or chamber within the pump.

**Specific Gravity**—The ratio of the weight of a given volume of a liquid to the same volume of pure water. Unless stated otherwise, power requirements of all pumps listed herein are based on pumping water. Pumping heavier liquids (specific gravity greater than 1.0) will require more drive horsepower. See Index under Rotary Gear Pumps for additional information.

**Viscosity**—The "thickness" of a liquid, or, its ability to flow. Temperature must be stated when specifying viscosity, since most liquids flow more easily as they get warmer. The more viscous the liquid, the slower the pump speed required. See Index under Rotary Gear Pumps for additional information.

**Seal**—A device mounted in the pump housing and/or on the pump shaft, to prevent leakage of liquid from the pump. Two types:

**Mechanical:** Has a rotating part and a stationary part with highly polished touching surfaces. Has excellent sealing capability and life, but can be damaged by dirt or grit in the liquid.

**Lip:** A flexible ring (usually rubber or similar material), with the inner edge held closely against the rotating shaft by a spring.

**Seal-less (Magnetic Drive)**—No seal is used; power is transmitted from motor to pump impeller by magnetic force, through a wall that completely separates motor from impeller.

**Relief Valve**—Usually used at the discharge of a positive displacement pump. An adjustable, spring-loaded valve opens, or "relieves," when a preset pressure is reached. Used to prevent excessive pressure and pump or motor damage if discharge line is closed off.

**Unloader Valve**—Similar to relief valve.

**Check Valve**—Allows liquid to flow in one direction only. Generally used in discharge line to prevent reverse flow.

**Foot Valve**—A type of check valve with a built-in strainer. Used at point of liquid intake to retain liquid in system, preventing loss of prime when liquid source is lower than pump.

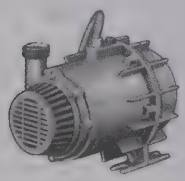
**Centrifugal Pump**—A fan-shaped impeller rotating in a circular housing, pushing liquid towards a discharge opening. Simple design; only wearing parts are the shaft seal and bearings (if so equipped). Usually used where large flow of liquid at relatively low pressure (head, lift) is desired. Self-priming centrifugals have same features as straight centrifugals but will self-prime without a foot valve to lifts indicated for the particular model after an initial filling of the pump casing. Non self-priming centrifugals work best with the liquid source higher than the pump (flooded suction/gravity feed). As the discharge pressure (head) increases, flow and drive power requirements decrease. Maximum flow and motor loading usually occur at minimum head.

**Positive Displacement Pump**—Pumping action created by moving chambers or pistons. The flow rate of this pump is almost the same at any pressure level. Generally self-priming. Should never be operated dry, because of internal wearing of rubber parts. As discharge flow is restricted (higher pressure or head) drive horsepower requirement increases. A relief device should be provided on the discharge line to prevent overpressure and damage to pump or motor if discharge line is closed off or severely restricted. The most common positive displacement pump types are:

**Diaphragm:** Consists of a flexible diaphragm which moves up and down in a chamber, creating suction and pressure. As the diaphragm is moved up, it creates a vacuum which opens the suction valve and draws fluid into the chamber. When the diaphragm is forced down, fluid is forced out through the discharge valve. Diaphragm pumps handle fluid mixtures with a much greater percentage of solids (e.g., silt, mud, sludge and waste).

**Gear:** Consisting of two meshed spur gears in a housing. As gears rotate, fluid is carried in the space between the teeth. Will not handle abrasives because of close running tolerances of gears. Suited for pumping more viscous liquids, at slower speeds.

**Flexible Impeller:** A flexible, vaned member, usually rubber, rotating in an eccentric housing. The volume of the spaces between the vanes changes as the pump rotates, creating pumping action.



**Rotary Screw:** A screw-shaped rotor, turning within a flexible stator, usually of rubber. Progressing cavities between screw and stator carry the fluid. Can handle abrasive mixtures or slurries, at slower speeds.

**Roller or Vane:** Rollers or vanes in a rotor, rotating in an eccentric housing like a flexible impeller pump.

**Piston:** Fluid is drawn in and forced out by pistons moving within cylinders.

**Jet Pump**—A type of centrifugal pump utilizing water flow through a narrow opening or nozzle (jet, ejector) to bring water from a well. As water is forced through the nozzle, an area of low pressure is created, and atmospheric pressure forces additional water from the well into the system. In shallow well systems (up to 25 ft. lift), the jet is located at the pump. In deep well systems, it is located at the bottom of the well.

**Deep Well Submersible Pump**—A centrifugal pump in which a number of impeller assemblies, in a housing, are mounted on a shaft directly coupled to a submersible motor. Entire assembly is located at the bottom of the well. Power is brought to the motor by a waterproof cable.

## A COMPLETE LINE OF PUMPS AVAILABLE

**See Index Under Appropriate Heading.**

# CODES AND STANDARDS FOR PLUMBING PRODUCTS

All products and devices installed in the plumbing system are under the jurisdiction of local or state adopted model codes which mandate that they meet the minimum requirements of the appropriate national consensus standard and are installed properly to assure a safe and mechanical system. These standards address specific design and performance requirements which are seen to be critical in protection of public health and safety.

Manufacturers must be able to supply proof of this compliance through third-party test reports from legitimate certified laboratories in addition to any other listing/certifying requirements of local or state regulatory bodies. It is very important that sellers and buyers are aware of this need of product compliance to standards.

Appropriate Plumbing Standards are as follows with the latest edition always applicable:

| Feature | Standard |
|---|---|
| **Finished Fixture Fittings (Faucets, Supplies, Supply Stops, Valves)** | ASME/ANSI A12.18.1 CSA B125 |
| **Vitreous China Plumbing Fixtures (Sinks, Lavs, Toilets, Urinals)** | ASME/ANSI A12.19.2/6 CSA B45 |
| **Pressure Balance / Thermostatic Control Valves** | ANSI/ASSE 1016 |
| **Diverter Type Faucets with Hose Spray** | ANSI/ASSE 1025 |
| **Plastic Components and Materials** | ANSI/NSF 14 |
| **Handicap** | ANSI A117 and ADA |
| **Copper Water Tubing** | ASTM B88 |
| **Water Heaters** | ANSI Z21.10.1/3 |
| **Hose Connected Vacuum Breakers** | ANSI/ASSE 1011 |
| **Water Pressure Reducing Valves** | ANSI/ASSE 1003 |
| **Reduced Pressure Principle Backflow Device** | ANSI/ASSE 1013; AWWA C511 |
| **Double Check Valve Assembly** | ANSI/ASSE 1015; AWWA C510 |

**Anti-Scald Valves.** All of the model codes have recognized the necessity of protecting the public from the dangers of thermal shock and scalding. Accordingly, they have all mandated as of this date that each tub/shower unit shall be protected with either a master thermostatic mixing valve or individually controlled pressure balance or thermostatic mixing valves. It is very important that the handle position stops on these valves are adjusted at the time of installation and seasonally to assure proper outlet temperature control.

**Water Conservation.** Many states have adopted or are working towards adoption of water conservation legislation which legally makes it unlawful to sell or install fixtures and finish fixture fittings which use more than the allowable water flows and volumes. Most are using the flow rates and volumes from the current ANSI/ ASME standard but many are requiring lower rates. The ANSI/ASME requirements are as follows:

Sink/Lav.....2.2 gpm

Showerhead.....2.5 gpm

Watercloset.....1.6 gal.

**Handicap Accessibility.** With the enactment of the Americans with Disabilities Act and the revision of ANSI A117, all occupancies will be required to comply with accessibility requirements for handicapped individuals. Appropriate fixtures and fixture fittings must be installed in at least one bathroom in any public building as defined by the building code. This will also require that existing buildings be brought up to minimum requirements of both ADA and ANSI. In general, besides access and height and reach requirements, the primary concern is an activating force of no more than 5 lbs. without twisting or pulling.

**Chemical Extraction.** With the development of ANSI/NSF 61, all products in the plumbing system must be certified as safe with regard to leaching contaminants into the potable water system. Currently, ANSI/ NSF 14 addresses specifically plastics with all other materials falling under 61.

**Backflow Protection.** All of the model codes regulate for the proper protection of the potable water system. It is virtually important to install the correct means of backflow protection for each application. Each model code should be reviewed for the requirements for each local area. However, some general rules that comply with all the codes are as follows:

| | Degree of Hazard | | | |
|---|---|---|---|---|
| | Pollution (Low) | | Contamination (High) | |
| | Back-Siphonage | Back-Pressure | Back-Siphonage | Back-Pressure |
| Air gap | X | | X | |
| Atmospheric Vacuum Breaker | X | | X | |
| Double Check Valve Preventor | X | X | | |
| Pressure Type Vacuum Breaker | X | | X | |
| Reduced Pressure Principle Assembly | X | X | X | X |

## CODE BODIES & LISTING AGENCIES

Jurisdictionally, the following code bodies and listing agencies must be complied with to show conformance to local codes and appropriate standards:

### IAPMO

International Association of Plumbing and Mechanical Officials. Publishers of the Uniform Plumbing Code (UPC) which is recognized and adopted by the fourteen western states and Minnesota, Maine and the major cities in the state of Texas. IAPMO also offers a third-party certification and mark showing compliance with appropriate standard and the UPC.

### BOCA

Building Officials and Code Administrators International, Inc. Publishers of the BOCA codes which are recognized and adopted by Kansas, Oklahoma, Missouri, Illinois, Wisconsin, Michigan, Indiana, Ohio, Kentucky, Virginia, West Virginia, Vermont, New Hampshire, Connecticut, Rhode Island and parts of Pennsylvania. BOCA issues compliance reports which are recognized in BOCA jurisdictions to show conformance with appropriate standards and BOCA code.

### SBCCI

Southern Building Code Congress International. Inc. Publishers of the Standard Plumbing Code which is recognized and adopted in the southeastern part of the United States: Arkansas, Louisiana, Mississippi, Alabama, Tennessee, Georgia, Florida, North Carolina, South Carolina and smaller towns in the state of Texas. They also offer the service of compliance reports to show compliance with appropriate standards and the Standard code.

### NSPC

National Standard Plumbing Code. Published by the National Association of Plumbing, Heating and Cooling Contractors. The code is recognized and adopted by the states of New Jersey, Maryland, Long Island, and parts of Pennsylvania.

### ICBO

International Conference of Building Officials. Publishers of the Uniform Building Code and cosponsor of the Uniform Mechanical Code with IAPMO. Jurisdictions are the same as IAPMO.

### CSA

Canadian Standards Association. Develops standards through consensus and are publishers of all Canadian Standards for plumbing products. They are a recognized internationally certified third-party test laboratory and certifying agency. All products installed and sold in Canada must be certified/listed as conforming to the appropriate CSA standard(s).

# AIR CONDITIONING, REFRIGERATION, AND HEATING TERMINOLOGY

**ABSOLUTE HUMIDITY**—Amount of moisture in the air, indicated in grains per cu. ft.

**ACCA**—Air Conditioning Contractors of America.

**ACCUMULATOR**—Storage tank which receives liquid refrigerant from evaporator and prevents it from flowing into suction line before vaporizing.

**ACR TUBING**—Tubing used in air conditioning and refrigeration. Ends are sealed to keep tubing clean and dry. Measured in outside diameter.

**AGA**—American Gas Association.

**AIR**—Atmospheric air is composed of approximately 78% Nitrogen, 21% Oxygen and 1% rare gases including Carbon Dioxide, Krypton, Neon, Argon, Ozone, Helium and Ammonia. Over the sea traces of salt are present, and over land traces of sulphates. Dust and micro-organisms are also present.

**AIR CHANGE.** The amount of air required to completely replace the air in a room or building; not to be confused with recirculated air.

**AIR CIRCULATION**—Natural or forced movement of air.

**AIR CLEANER**—A mechanical electrical or chemical device (usually a filter) for removing dust, gas, vapor, fumes, smoke and other impurities from the air.

**AIR CONDITIONING SYSTEM**—Controls the temperature, humidity, air movement and cleaning of air in a confined space.

**AIR DIFFUSER**—Air distribution outlet or grille designed to direct airflow into desired patterns.

**AIR HANDLER**—Fan-blower, filter and housing parts of a system.

**AIR, RECIRCULATED**—Air drawn from a space and passed through the conditioner discharged again into the conditioned space.

**AIR STANDARD CONDITIONS**—Conditions at which Btu ratings for summer air conditioning equipment is rated. 95°F dry bulb, 75°F wet bulb at the condenser inlet and 80°F dry bulb, 67°F wet bulb at the evaporator inlet.

**AIR, VENTILATION**—The quantity of supply air drawn from outdoors needed to maintain the desired amount of oxygen and the quality of air within a designated space.

**AMBIENT TEMPERATURE**—Temperature of fluid (usually air) which surrounds object on all sides.

**ANEMOMETER**—An instrument for measuring the velocity of air.

**ARI**—Air Conditioning & Refrigeration Institute.

**ASME BOILER CODE**—Standard specifications issued by the American Society of Mechanical Engineers for the construction of boilers.

**ATMOSPHERIC PRESSURE**—The weight of one square inch column of the earth's atmosphere. At sea level this pressure is 14.696 pounds per square inch.

**AUTOMATIC DEFROST**—System of removing ice and frost from evaporators automatically.

**AUTOMATIC EXPANSION VALVE (AEV)**—Pressure-controlled valve which reduces high pressure liquid refrigerant to low pressure liquid refrigerant.

**AUTOMATIC GAS VALVE**— Automatic or semi-automatic device consisting of a valve and an operator that controls gas supply to the burner assemblies of a gas fired furnace.

**AZEOTROPES:** Refrigerant blends which evaporate and condense exactly like a pure component at some temperature and pressure. Azeotropes may not behave this way at all temperatures and pressures, but they will be close.

**BAFFLE**—A surface used to deflect or direct air flow. Usually a plate or wall.

**BALANCE POINT**—The point at which the heating capacity of the heat pump, plus electric heaters is equal to the heat loss of the conditioned space.

**BIMETAL**—Two metals with different rates of expansion fastened together. When heated or cooled they will warp and can be made to open or close a switch or valve.

**BIMETAL STRIP**—Temperature regulating or indicating device which works on principle that two dissimilar metals with unequal expansion rates, welded together, will bend as temperatures change.

**BLOW (THROW)**—In air distribution, the distance an air stream travels from an outlet to a point where air motion is reduced to a specific flow measured in feet per minute (terminal velocity).

**BLOWER (FAN)**—An air handling device for moving air in a distribution system.

**Btu (BRITISH THERMAL UNIT)**— Quantity of heat required to raise temperature of one pound of water one degree Fahrenheit.

**CAPILLARY TUBE**—A refrigerant control consisting of a small diameter tube which controls flow by restriction. They are carefully sized by inside diameter and length for each particular application.

**CARBON MONOXIDE**—Colorless, odorless and poisonous gas (CO) produced when carbon or carbonaceous fuels are burned with too little air. Extremely toxic gas.

**CELSIUS TEMPERATURE SCALE**—Temperature scale used in metric system. Freezing point of water is 0; boiling point is 100.

**CFC:** A chlorofluorocarbon molecule consisting of chlorine, fluorine and carbon atoms.

**CHANGE OF AIR**—Introduction of new air to a conditioned space, measured by the number of complete enclosed space changes per unit time. Usually per hour.

**CHANGE OF STATE**—Condition in which a substance changes from a solid to a liquid or a liquid to a gas caused by the addition of heat. Or the reverse, in which a substance changes from a gas to a liquid, or a liquid to a solid, caused by the removal of heat.

**CHARGE**—Amount of refrigerant placed in a refrigerating unit.

**CHARGING MANIFOLD**—Specifically designed for technicians use of charging refrigerant and oil in air conditioning and refrigeration systems.

**CHIMNEY EFFECT**—The tendency of air or gas to rise in a duct or other vertical passage when heated.

**CHOKE TUBE**—Throttling device used to maintain correct pressure difference between high-side and low-side in refrigerating mechanism. Capillary tubes are sometimes called choke tubes.

**COEFFICIENT OF PERFORMANCE (COP)**—Ratio of work performed or accomplished as compared with the energy used.

**COMBUSTION**—The rapid oxidation of fuel accompanied by the release of energy as heat and light.

**COMFORT ZONE**—The range of temperatures, humidities and air velocities at which the greatest percentage of people feel comfortable.

**COMPRESSION**—The reduction of volume of a vapor or gas by mechanical means.

**COMPRESSOR**—Pump of a refrigerating mechanism which draws a low pressure on cooling side of refrigerant cycle and squeezes or compresses the gas into the high pressure or condensing side of the cycle.

**COMPRESSOR, HERMETIC**—Compressor in which the driving motor is sealed in the same dome or housing as the compressor.

**CONDENSATE**—The liquid formed by the condensation of a vapor, e.g. moisture on cold window glass, or dew.

**CONDENSATION**—The process whereby a vapor is changed to a liquid by removal of heat after its dew point (condensation temperature) is reached.

**CONDENSER**—The part of refrigeration mechanism which receives hot, high pressure refrigerant gas from compressor and cools gaseous refrigerant until it returns to its liquid state.

**CONDENSER FAN**—Forced air device used to move air through air-cooled condenser.

**CONDENSING GAS FURNACE**—A furnace in which gases are recirculated through a secondary heat exchanger, thereby maximizing unit efficiency. $H_2O$, as a by-product of combustion, is condensed from this exhaust air and so requires the use of a drain system.

**CONDENSING UNIT**—Part of a refrigerating mechanism which pumps vaporized refrigerant from the evaporator, compresses it, liquefies it in the condenser and returns it to the refrigerant control.

**CONDUCTION**—The transfer of heat from molecule to molecule within a substance.

**CONTACTOR**—An electromagnetic actuated relay. Usually used to refer to the relay which closes the circuit to a compressor.

**CONTROL**—A device for regulating a system, or part of a system, in normal operation. Such a device can be either manually operated or automatic.

**CONVECTION**—Transfer of heat by means of movement or flow of a fluid or gas.

**CONVECTION LOSS**—Heat lost through the walls and roof of a building, through movement of heated air.

**COOL ANTICIPATOR**—A resistance heater (usually not adjustable) in parallel with the cooling circuit. It is "on" with the circuit; "off" adding heat to shorten the off cycle.

CONTINUED ON NEXT PAGE

**COUNTERFLOW**—A furnace or heater which draws air in from the top through the heat exchanger and out the bottom.

**CUBIC FEET PER MINUTE (CFM)**—A measure of air volume through an air handling device.

**CUBIC FOOT OF GAS**—Amount of gas that has a volume of 1 cu.-ft. at 60°F under a pressure of 30 inches of mercury.

**CYCLE**—The complete course of operation of a refrigerant back to a selected starting point in a system. Also used to describe alternating current through 360 space degrees.

**DAMPER**—Device for controlling airflow.

**DAMPER, FIRE**—A damper placed in a duct or at an outlet to prevent or retard the emission of smoke and/or heat into a room or space during a fire. Such devices are also designed to prevent or retard the spread of fire throughout the structure, thus confining it to a specific area.

**DEFROST TIMER**—Device connected into electrical circuit which shuts unit off long enough to permit ice and frost accumulation on evaporator to melt.

**DEGREE-DAY**—Unit that represents one degree of difference from inside temperature and the average outdoor temperature for one day and is often used in estimating fuel requirements for a building.

**DEHUMIDIFICATION**—The reduction of water vapor in air by cooling the air below the dew point; removal of water vapor from air by chemical means, refrigeration, etc.

**DENSITY**—Mass or weight per unit of volume, i.e.: Standard air 0.075 pounds per cubic foot.

**DEW POINT**—The temperature at which water vapor turns to liquid.

**DIAPHRAGM VALVE**—A control valve which opens and closes according to gas pressure on a flexible diaphragm.

**DIFFERENTIAL**—The temperature or pressure difference between cut-in and cut-out temperature or pressure of a control.

**DIRECT FIRED HEATER**—A heater where both heated air and combustion products are put into the space to be heated.

**DIRECT SPARK IGNITION**—System in which two high voltage electrodes create a continuous spark to ignite a main burner without the use of an intermediate pilot.

**DISCHARGE PRESSURE**—The pressure read at the compressor outlet. Also called head pressure or high pressure.

**DOE**—Department Of Energy (Federal)

**DRAFT**—A current caused by the removal of air from an area of high pressure to an area of low pressure; usually considered objectionable.

**DRAFT HOOD (DRAFT DIVERTER)**—A device built into a heater or vent designed to ensure the escape of combustion products.

**DRIER**—Substance or device used to remove moisture from a refrigeration system.

**DRY BULB TEMPERATURE**—Air temperature as indicated by an ordinary thermometer.

**DUCT**—A pipe or closed conduit made of sheet metal of other suitable material used for conducting air to and from an air handling unit.

**EER (ENERGY EFFICIENCY RATIO)**—A ratio calculated by dividing the cooling in Btu's per hour (BtuH) by the power input in watts at any given set of rating conditions, expressed in BtuH per watt (BtuH/watt). Expressed formula:

$$EER = \frac{\text{BtuH (cooling) Output}}{\text{Power Input (watts)}}$$

**ELEMENT**—A heat conductive material which carries and transfers heat from its source (electrical, resistant, air, fluid) to an ambient medium.

**ENERGY CUT-OFF DEVICE (ECO)**—A thermostatic element in the safety control which shuts off gas supply when a malfunction occurs.

**EVACUATION**—Removal of air (gas) and moisture from a refrigeration or air conditioning system.

**EVAPORATIVE COOLING**—The cooling effect of vaporization of a liquid in a moving air system.

**EVAPORATOR**—Part of a refrigerating mechanism in which the refrigerant vaporizes and adsorbs heat.

**EVAPORATOR FAN**—Fan which increases airflow over the heat exchange surface of evaporators.

**EVAPORATOR SUPERHEAT**—The actual temperature of the refrigerant vapor at the evaporator exit as compared to the saturated vapor temperature indicated by the suction pressure.

**EXFILTRATION**—Air flow outward from an enclosed space through a wall, leak, membrane, etc.

**EXHAUST OPENING**—An opening through which air is exhausted from a room which is being cooled, heated, or ventilated.

**EXTERNAL EQUALIZER**—Tube connected to low pressure side of a thermostatic expansion valve diaphragm and to exit end of evaporator.

**FAHRENHEIT SCALE**—On a Fahrenheit thermometer, under standard atmospheric pressure, boiling point of water is 212 degrees and freezing point is 32 degrees above zero.

**FAN & LIMIT CONTROL**—Usually a combination control and safety device that turns a heater fan or blower on and off according to preset temperatures; and shuts off main burner gas in case a malfunction causes combustion or chamber temperature to rise above a preset limit.

**FILTER**—A device for removing dust particles from air or unwanted elements from liquids.

**FLARE FITTING**—Tapered end of tubing for use with fitting designed to grip the flare for a vapor tight seal.

**FLASHBACK**—An undesirable condition in which flames travel backward into a burner and combustion continues to occur there.

**FLUE**—Gas or air passage which usually depends on natural convection to cause the combustion gases to flow through it. Forced convection may sometimes be used.

**FURNACE**—That part of an environmental system which converts gas, oil, electricity or other fuel into heat for distribution within a structure.

**FUSIBLE LINK**—A non-resettable electrical device which opens an electrical circuit should a higher than acceptable ambient temperature exist. Also called one-shot thermal fuse.

**FUSIBLE PLUG**—Plug or fitting made with a metal of a known low melting temperature. Used as safety device to release pressures in case of fire.

**GAMA**—Gas Appliance Manufacturers Association.

**GLIDE:** The difference between the starting and ending temperatures of a phase-change process by a refrigerant within a component of a refrigeration system, excluding any subcooling or superheating. Usually used to describe condensation or evaporation of a zeotrope.

**GRILLE**—A covering for an opening through which air passes.

**HCFC:** A hydrochlorofluorocarbon molecule composed of hydrogen, chlorine, fluorine and carbon atoms. Much less potential to deplete the ozone because of the present hydrogen atom that provides stability to the molecule.

**HEAD PRESSURE**—Pressure which exists in condensing side of refrigerating system.

**HEAD PRESSURE CONTROL**—Pressure operated control which opens electrical circuit if high side pressure becomes too high.

**HEAT**—Energy causing the agitation of molecules within a substance.

**HEAT ANTICIPATOR**—A thermostat compensating adjustment that prevents temperature overshoot or underheating.

**HEAT EXCHANGER**—Device used to transfer heat from a warm or hot surface to a cold or cooler surface. (Evaporators and condensers are heat exchangers.)

**HEAT, LATENT**—Heat energy which changes the form of a substance (e.g. ice/water) without changing its temperature.

**HEAT OF COMPRESSION**—The heat added to a vapor by the work done on it during compression.

**HEAT GAIN**—The amount of heat gained, measured in BTU's, for a space to be conditioned, at the local summer outdoor design temperature and a specified indoor design condition.

**HEAT LOSS**—The amount of heat lost, measured in BTU's, from a space to be conditioned, at the local winter outdoor design temperature and a specified indoor design condition.

**HEAT PUMP**—Compression cycle system used to supply heat to a temperature-controlled space. Same system can also remove heat from the same space.

**HEAT, SENSIBLE**—Heat which changes the temperature of a substance without changing its form.

**HEAT SYSTEM, WARM AIR**—A heating system whereby warm air is delivered from a heating unit through ducts and discharged into a room from diffusers or grilles.

CONTINUED ON NEXT PAGE

# AIR CONDITIONING, REFRIGERATION AND HEATING TERMINOLOGY

**HEAT TRANSMISSION**—Any time-rate flow of heat; usually refers to conduction, convection and radiation.

**HERMETIC COMPRESSOR**—Compressor which has the driving motor sealed inside the compressor housing. The motor operates in an atmosphere of the refrigerant.

**HFC:** A hydrofluorocarbon molecule composed of hydrogen, fluorine and carbon atoms. A non-ozone depleting molecule.

**HIGH SIDE**—Parts of a refrigerating system which are under condensing or high side pressure.

**HORIZONTAL FLOW**—A system with return air from one side flowing horizontally thru a heat exchanger and out the other side as supply air.

**HOT SURFACE IGNITION (HSI)**—A gas burner ignition system in which a resistive element is used as a heat source to ignite the gas.

**HOT WATER HEATING SYSTEM**—System in which water is circulated through heating coils.

**HSPF (HEATING SEASONAL PERFORMANCE FACTOR)**—The total heating output of a heat pump during its normal annual usage period for heating divided by the total electric power input in watt-hours during the same period.

**HUMIDIFIER**—A device that adds moisture to warm air being circulated or directed into a space.

**HUMIDISTAT**—A device designed to regulate humidity input by reacting to changes in the moisture content of the air.

**HVAC**—Acronym for Heating, Ventilating, and Air Conditioning.

**HYDROCARBONS**—Chemical compounds composed of carbon and hydrogen.

**HYDRONIC**—Heating system which circulates a heated fluid, usually water, through baseboard coils by means of a circulating pump which is controlled by a thermostat.

**IGNITION**—The starting of combustion.

**INCHES OF MERCURY**—Atmospheric pressure is equal to 29.92 inches of mercury.

**INCHES OF WATER COLUMN**—One inch of water column equals 0.036 PSI, commonly used to measure pressure levels of gas or static pressures.

**INDIRECT FIRED HEATER**—Heating system in which by-products of combustion are kept separate from heated room air through the use of a heat exchanger.

**INDUCTION**—The entrainment of room air into an air stream from an air outlet.

**INFILTRATION**—Air flow inward into a space through walls, leaks around doors and windows or through the building material used in the structure.

**INFRARED (RADIANT) BURNER**—A burner that provides heat from a hot, glowing surface that radiates infrared energy.

**INTERMITTENT PILOT IGNITION**—Gas burner ignition system in which ignition of a pilot flame occurs only at the beginning of a cycle.

**INTERNAL EQUALIZER**—Used with thermostatic expansion valve to compensate for any pressure drop through the evaporator while the compressor is operating to provide better control. Also external types.

**LIFTING**—An unstable burner flame condition in which flames lift or blow off the burner ports, usually caused by too little combustion air or excessive manifold pressure.

**LIQUID LINE**—Tube which carries liquid refrigerant from the condenser or liquid receiver to the refrigerant control mechanism.

**LIQUID RECEIVER**—Cylinder (container) connected to condenser outlet for storage of liquid refrigerant in a system.

**LOUVER**—A series of vanes that permit directional adjustment of air flow. They are usually installed on outside grilles or intake openings to impede water entry into ducts, elbows, and to minimize turbulence; they may also include indoor grilles to eliminate light penetration.

**LOW SIDE**—That portion of a refrigerating system which is below evaporating pressure.

**LPG (PROPANE)**—Liquified Petroleum Gas.

**MAIN (TRUNK LINE)**—Pipe or duct for distributing fluids such as air, water, or steam to various branch ducts and collecting fluids from various branches.

**MAKE-UP AIR**—Air introduced into an area to provide an adequate source for burners and/or ventilation systems.

**MAKE-UP AIR UNIT**—Unitary equipment which introduces outside air into space and conditions it to offset air exhausted from that space.

**MANOMETER**—Instrument for measuring pressure of gases and vapors.

**MBH**—Thousands of British Thermal Units (82 MBH=82,000 Btu).

**METHANE**—A hydrocarbon gas with the formula $CH_4$, the principle component of natural gases.

**MICRON**—A unit used to measure high vacuums. One micron equals 1/25,000 of one inch mercury.

**MOISTURE INDICATOR**—Instrument used to measure moisture content of a refrigerant.

**NATURAL GAS**—Fuel gas found in the earth as opposed to gases that are manufactured.

**OIL, REFRIGERATION**—Specially prepared oil used in refrigerator mechanism which circulates, to some extent, with refrigerant.

**OIL SEPARATOR**—Device used to remove oil from gaseous refrigerant.

**ORIFICE**—Accurate size opening for controlling fluid flow.

**PILOT**—A small flame for igniting the gas at the main burner.

**PILOT SAFETY VALVE**—A valve which will close when pilot flame failure occurs, shutting off the gas supply to the main and pilot burner. Usually integral to the gas valve.

**PLENUM**—Open area to which runners or ducts are connected for either the collection or distribution of an air supply.

**PLENUM CHAMBER**—An air compartment connecting one or more ducts with the heating or cooling unit. An enlarged section within an air duct with several duct, grille or diffuser connections.

**POLYOL ESTER / POLYALKYL / GLYCOL:** Synthetic oils that provide the same lubrication but add a resistance to chemical breakdown because they are not derived from a natural resource such as crude oil.

**POTENTIAL RELAY**—Electrical switch which opens on high voltage and closes on low voltage.

**PRESSURE DROP**—The decrease in pressure due to friction of a fluid or vapor as it passes through a tube, duct, or orifice.

**PRESSURE REGULATOR**—A device for controlling and maintaining a uniform outlet gas pressure.

**PRESSURE, STATIC**—Force (per unit area) expended against the walls of a container such as an air duct. Commonly, force is measured in heating and air conditioning in pounds per sq.in., or inches of water pressure.

**PRESSURE SWITCH**—Switch operated by a rise or drop in pressure.

**PRESSURE, TEMPERATURE RELATIONSHIP**—The change effected in temperature when pressure is changed or vice versa. Only used at saturated conditions. An increase in pressure results in a temperature increase. A decrease in temperature results in a pressure decrease.

**PRESSURE, TOTAL**—A combination of both static and velocity pressures.

**PRESSURE, VELOCITY**—Force of air as it moves in an air duct.

**PRIMARY AIR**—Air mixed with the fuel prior to initial combustion.

**PROCESS TUBE**—Length of tubing fastened to hermetic unit dome, used in manufacturing unit.

**PSYCHROMETRIC CHART**—Chart that shows relationship between the temperature, pressure and moisture content of the air.

**QUICK-CONNECT COUPLING**—A device which permits easy and fast connecting of two fluid lines.

**RADIATION**—The transfer of heat without an intervening medium. It is absorbed on contact with a solid surface.

**RADIANT HEATING**—Heating system in which warm or hot surfaces are used to radiate heat into the space to be conditioned.

CONTINUED ON NEXT PAGE

**RECLAIM**—To remove refrigerant in any condition from an air conditioning or refrigeration system and then transport the recovered refrigerant to a dedicated refrigerant reclamation center to be reprocessed to new specifications, which may include distillation. Reclamation requires that the reprocessed refrigerant be certified through a chemical analysis.

**RECOVER**—To remove refrigerant in any condition from an air conditioning or refrigeration system and store it in a Department of Transportation (DOT) rated or other approved external container. **RECOVERY DOES NOT PROVIDE FOR ANY CLEANING OR FILTRATION OF THAT REFRIGERANT.**

**RECYCLE**—To remove refrigerant in any condition from an air conditioning or refrigeration system and then reduce contaminants through oil separation, filtration, and other methods. This term usually applies to procedures implemented at the job site or at a local service shop. **RECYCLED REFRIGERANT MAY OR MAY NOT BE SUITABLE FOR REUSE.**

**REFRIGERANT**—Substance used in refrigerating mechanism. It absorbs heat in evaporator by change of state from a liquid to a gas, and releases its heat in a condenser as the substance returns from the gaseous state back to a liquid state.

**REFRIGERANT CONTROL**—Device which meters flow of refrigerant between two areas of a refrigerating system. It also maintains pressure difference between high pressure and low pressure side of the mechanical refrigerating system while unit is running.

**REFRIGERATION**—The transfer of heat from a place where it is not wanted to a place where its presence is not undesirable.

**REGISTER**—Combination grille and damper assembly covering an air opening or end of an air duct.

**RELATIVE HUMIDITY**—The percentage of water vapor present in a given amount of air compared to the amount it can hold at its temperature.

**RELAY**—An electromagnet mechanism moved by a small electrical current in a control circuit. It operates a valve or switch in an operating circuit.

**RELIEF VALVE**—Safety device on a sealed system. It opens to release fluids before dangerous pressure is reached.

**RETURN AIR**—Air drawn into a heating unit after having been circulated from the heater's output supply to a room.

**REVERSE CYCLE DEFROST**—Method of heating evaporator for defrosting. Valves move hot gas from compressor into evaporator.

**REVERSING VALVE**—Device used to reverse direction of the refrigerant flow depending upon whether heating or cooling is desired.

**SAE FLARE FITTING**—Tube flared to society of automotive engineer (SAE) Standards.

**SATURATED VAPOR**—Vapor in contact with a liquid.

**SATURATION**—A condition which occurs when air contains all the moisture that it can possibly hold at a given temperature.

**SCHRADER VALVE**—Spring-loaded device which permits fluid flow in one direction when a center pin is depressed; in other direction when a pressure difference exists.

**SECONDARY AIR**—Combustion air externally supplied to a burner flame at the point of combustion.

**SEER (SEASONAL ENERGY EFFICIENCY RATIO)**—The total cooling of a central unitary air conditioner or unitary heat pump in Btu's during its normal annual usage period for cooling divided by the total electric energy input in watt-hours during the same period.

SEER Expressed formula:

$$\frac{\text{Sum of BtuH (cooling) Outputs at All Test Conditions}}{\text{Sum of All Watt-hour Inputs at All Test Conditions}}$$

**SEMIHERMETIC COMPRESSOR**—Serviceable hermetic compressor with service valves.

**SENSIBLE HEAT**—Heat which causes a change in temperature of a substance.

**SENSOR**—The component of a control or measuring system that detects or measures the level of a controlled variable.

**SERIES-LOOP**—A type of piping arrangement used in a hydronic heating system where all heating units are connected to one another in a continuous loop with boiler.

**SETPOINT**—The temperature to which a thermostat is set to result in a desired conditioned space temperature.

**SIGHT GLASS**—Glass tube or glass window in refrigerating mechanism. It shows amount of refrigerant or oil in system and indicates presence of gas bubbles in liquid line.

**SLUGGING**—Condition in which mass of liquid enters compressor causing hammering.

**SOLENOID**—A wire-wound coil that creates a magnetic field when energized. The magnetic field will pull a movable iron core within the coil.

**SOLENOID VALVE**—A valve actuated by a solenoid.

**SOOT**—A black substance mostly made up of carbon particles which is the result of incomplete combustion.

**SPECIFIC VOLUME**—The volume of a substance per unit of mass. i.e.: Standard air 13.33 cu.-ft. per pound. The reciprocal of density.

**SPILLAGE**—Combustion products flowing from the appliance air openings or draft hood relief openings due to a manfunction of the venting system.

**SPLIT SYSTEM**—Refrigeration or air conditioning installation which places condensing unit outside or away from evaporator. Also applicable to heat pump installations.

**STANDARD AIR DENSITY**—0.075 pounds per cubic foot. Equivalent to dry air at 70°F and at sea level pressure.

**STANDING PILOT**—Gas burner ignition system in which a pilot flame remains lit between cycles of on/off burner operation.

**STATIC PRESSURE**—Pressure which is exerted against the walls of an airway that is created by friction and impact of air as it moves.

**STRATIFICATION OF AIR**—Condition in which there is little or no air movement in room; air lies in temperature layers.

**SUB-COOLING**—Cooling of liquid refrigerant below its condensing temperature.

**SUBLIMATION**—Condition where a substance changes from a solid to a gas without becoming a liquid.

**SUCTION LINE**—Tube or pipe used to carry refrigerant gas from evaporator to compressor.

**SUN EFFECT**—Heat transmitted into space through glass and building materials exposed to the sun.

**SUCTION PRESSURE**—The pressure read at the inlet side of a compressor. Also called back pressure or low side pressure.

**SUPERHEAT**—1) Temperature of vapor above its boiling temperature as a liquid at that pressure. 2) Difference between temperature at the evaporator outlet and the lower temperature of the refrigerant evaporating in the evaporator.

**SWAGING**—Enlarging one tube end so end of other tube of same size will fit within.

**SWAMP COOLER**—Evaporative type cooler in which air is drawn through porous mats soaked with water.

**SYSTEM, DUCT**—A series of tubular or rectangular sections, elbows and connectors fabricated as a channel to carry air from one point to another.

**TEMPERATURE DROP**—A measurement of the difference in heat between two points of a system, such as at the furnace plenum and at the outlet grille.

**THERM**—A unit of heat energy equal to 100,000 BTU's.

**THERMOCOUPLE**—A device consisting of two dissimilar metals which produce a DC voltage when heat is applied to them. Used to operate pilot safety valves, they have an output in the range of 30 millivolts.

**THERMOSTAT**—A temperature sensitive switch for controlling the operation of a heater, furnace, fan or air conditioner.

**THERMOSTAT SUBBASE**—When installed with a thermostat it permits selection of function for heating, cooling, automatic changeover and blower cycling or continuous operation.

**THERMOSTATIC EXPANSION VALVE**—Control valve operated by temperature and pressure within evaporator. It controls flow of refrigerant. Control bulb is attached to outlet of evaporator.

**THROW**—The horizontal or vertical distance that an air stream travels after leaving an air supply outlet before its force is reduced to a specified terminal velocity.

**TON OF REFRIGERATION**—Refrigerating effect equal to the melting of 1 ton of ice in 24 hours. This may be expressed as follows: 288,000 Btu/24 hr., 12,000 Btu/1 hr., 200 Btu/min.

**TOTAL HEAT**—Sum of both the sensible and latent heat.

**TRANSFORMER**—An electrical device for changing AC electricity from one voltage to another voltage.

CONTINUED ON NEXT PAGE

# AIR CONDITIONING, REFRIGERATION AND HEATING TERMINOLOGY

**UNIT HEATER**—Heater primarily designed for industrial and commercial applications; designed as one unitized assembly and usually suspended.

**UNIVERSAL ORIFICE**—Orifice designed for use with both LPG or Natural Gas.

**UPFLOW**—Type of furnace with a blower in the bottom which draws in cool air, moves it through the heat exchanger and then out the top to heated air ducts.

**VACUUM**—Pressure lower than atmospheric pressure.

**V-BELT**—Type of belt commonly used in refrigeration work. It has a contact surface with the pulley in the shape of the letter V.

**VALVE, EXPANSION**—Type of refrigerant control which maintains constant pressure in the low side of refrigerating mechanism. Valve is caused to operate by pressure in low or suction side. Often referred to as an automatic expansion valve or AEV.

**VAPOR BARRIER**—Thin plastic or metal foil sheet used in air conditioned structures to prevent water vapor from penetrating insulating material.

**VENT DAMPER**—Device which closes off a heater's flue during off cycles of operation to prevent loss of heat energy.

**VENTILATION**—The process of supplying or removing air to or from a room or space either by natural or mechanical means.

**VENTURI**—A section of pipe or burner body that narrows down and then flares out again to increase gas velocity and create negative pressure.

**WATER-COOLED CONDENSER**—Condensing unit cooled through use of water flow.

**WET BULB DEPRESSION**—The difference between dry bulb and wet bulb temperature.

**WET BULB TEMPERATURE**—The temperature of the air in a space or outdoors as measured by a thermometer whose bulb is covered with a wet tubular wick or cloth.

**YELLOW TIPPING**—Yellow flicks in the tip of an otherwise blue flame; a symptom of the need for additional primary air.

**ZEOTROPES:** Show some amount of temperature glide when evaporating or condensing. Some may act like azeotropes (glide is not noticeable in normal operation, less than 3°F). Zeotropes with glides greater than 3°F will have one end of the evaporator warmer than the other. This may impact system performance.

**ZONE**—Term used to describe any one loop in a multi-loop hydronic or air heating system.

# DETERMINING HEAT LOSS FOR DAYTON UNIT HEATERS

This short method will estimate heat requirements in a building based on cu. ft. volume of building, and design. This is for preliminary estimates, NOT final sizing or BTUH loss computation of any heating equipment. Finite figures can only be determined through use of an ASHRAE heat loss study. Failure to use long form method or computer heat loss program may result in improperly sized heating equipment.

| | 3 Story | 2.8 | 3.0 | 3.2 | 1.8 | 2.0 | 2.1 |
| | 4 Story | 2.7 | 2.9 | 3.1 | — | — | — |
| | 5 Story | 2.6 | 2.8 | 3.0 | — | — | — |

Values in chart at left are expressed in BTU for each cubic foot of building volume. Once volume in cubic feet is determined, multiply cubic volume by one factor listed. Then, multiply that answer by the following correction factors:

| Correct For Outdoor Design Temperature | Multiplier | Correct For "R" Factor (Steel Wall) "R" Factor | Multiplier |
|---|---|---|---|
| +50 | .23 | 8 | 1.00 |
| +40 | .36 | 10 | .97 |
| +30 | .53 | 12 | .95 |
| +20 | .69 | 14 | .93 |
| +10 | .84 | 16 | .92 |
| + 0 | 1.00 | 19 | .91 |
| -10 | 1.15 | | |
| -20 | 1.20 | | |
| -30 | 1.46 | | |

| GEOGRAPHIC OUTDOOR DESIGN TEMP (°F) | | | |
|---|---|---|---|
| City | Outdoor Design °F | City | Outdoor Design °F |
| Chicago, IL | -10 | Los Angeles, CA | +35 |
| Dallas, TX | +10 | Minneapolis, MN | -20 |
| Denver, CO | -10 | New York, NY | 0 |
| Jacksonville, FL | +30 | Seattle, WA | -10 |

**Considerations Used For Above Values:**

1—0°F Outdoor Design (See Corrections)
2—Slab Construction—If basement is involved multiply final BTUH by 1.7
3—Flat Roof
4—Window Area is 5% of Wall Area
5—Air Change is .5 Per Hour.

# TEMPERATURE CONTROL TERMINOLOGY

**Control Point**—Temperature to be maintained for a system.

**Differential**—Temperature difference between the temperature at which the controller turns heat off and the temperature at which the heat is turned back on (expressed in degrees). Refers to On/Off controllers.

**Hysteresis (dead band)**—Temperature band between the On and Off of an output in the On/Off control action. No heating or cooling takes place. Band occurs between the times when the heat is turned off upon rising temperature and turned on upon falling temperature.

**On/Off Control Action**—A control action with two controlled states.

**Proportional Band**—Range of temperature in which a manipulated variable is proportionate to any deviation from the set point.

**Proportional Control Action (P)**—A control action in which a manipulated variable is proportionate to any deviation from the set point.

**Proportioning Control plus Derivative Function (PD)**—A time-proportioning controller that has a derivative function. The derivative function monitors the rate at which a system's temperature is either increasing or decreasing and adjusts the cycle time of the controller to minimize overshoot or undershoot.

**Proportioning Control with Integral and Derivative Functions (PID)**—A time-proportioning controller that has integral and derivative functions. The integral function automatically raises the stabilized system temperature to match the set point temperature to eliminate the difference caused by the time-proportioning function. The derivative function monitors the rate of rise or fall of the system temperature and automatically adjusts the cycle time of the controller to minimize overshoot or undershoot.

**Range**—The area between low and high limits within which a quantity is measured.

**Rate Action (D)**—The controller senses the rate of change of temperature and provides an immediate change of output to minimize the eventual deviation.

**Set Point**—The value set on the temperature controller to control a system.

# RESIDENTIAL HEATING EQUIPMENT SIZING GUIDE (SHORT FORM)

This short method will estimate heat requirements for a typically constructed residential home. This is for preliminary estimates. Due to the difference in construction and climate, it is recommended that a qualified heating professional perform a heat load study at the job site. Because of these variables, W. W. GRAINGER, INC. cannot assume the responsibility for personal injury and/or property damage to customers or other persons using this "Heat Equipment Sizing Guide".

| Steps for Calculations | Calculations | Step-Totals | TOTAL |
|---|---|---|---|
| **1. Windows:** Total square footage of all windows (including glass doors) multiply by 39 = Btu heat loss | | | |
| Total square footage of windows ____ x 39 = Btus required | | _____ | |
| **2.Doors:** square footage of all doors multiplied by 47 = Btu heat loss. | | | |
| Total square footage of door ____ x 47 = Btus required | | _____ | |
| **3.Outside Walls:** Total of all walls (Wall length x Wall height, in feet), minus total door and window square footage from steps #2 and #3 above = Total wall area. Total wall area x multiplier (from one of the wall descriptions described below) equals Btus required. | | | |
| **WALL DESCRIPTIONS** | | | |
| **Above Ground Construction:** | | | |
| **A) Wood with siding** - The heat loss multiplier is 6. | | | |
| **Wall area minus door ____ and window ____ area = Total wall area** | _____ | | |
| **Total wall area _____ x 6 = Btus required.** | _____ | | |
| **B) Brick** - The heat loss multiplier is 5.7. | | | |
| **Wall area minus (door _____ and window _____ area)= Total wall area** | _____ | | |
| **Total wall area _____ x 5.7 = Btus required.** | _____ | | |
| **Below Ground Construction (Basement for example)** | | | |
| **C) Without insulation** - The heat loss multiplier is 8. | | | |
| **Total wall area _____ x 8 = Btus required.** | _____ | | |
| **D) With insulation** - The heat loss multiplier is 4. | | | |
| **Total wall area _____ x 4 = Btus required.** | _____ | | |
| **Total heat loss through the walls ____, ____, ____ & _____ = (a+b+c+d) Total Btus required.** | | _____ | |
| **4)Floors:** Total square feet (length x width) times one of the heat loss multipliers described below. Note, in 2 story construction use only the main floor for size and description. | | | |
| **FLOOR DESCRIPTIONS** | | | |
| **A) Over crawlspace without insulation** the multiplier is 8. | | | |
| **Total square feet of floor area ____ x 8 = Btus required.** | _____ | | |
| **B) Over crawlspace with insulation** the multiplier is 3. | | | |
| **Total square feet of floor area ____ x 3 = Btus required.** | _____ | | |
| **C) Over garage without insulation** the multiplier is 15. | | | |
| **Total square feet of floor area ____ x 15 = Btus required.** | _____ | | |
| **D) Over garage with insulation** the multiplier is 5. | | | |
| **Total square feet of floor area ____ x 5 = Btus required.** | _____ | | |
| **E) Over basement** the multiplier is 2. | | | |
| **Total square feet of floor area ____ x 2 = Btus required.** | _____ | | |
| **F) On concrete slab** the multiplier is 29. | | | |
| **Total square feet of floor area ____ x 29 = Btus required.** | _____ | | |
| **Total heat loss through the floor** | | | |
| **____, ____, ____ & ____ = (a, b, c, d, e & f) Total Btus required.** | | | |

# RESIDENTIAL HEAT EQUIPMENT SIZING GUIDE (SHORT FORM)

**Steps for Calculations** | Calculations | Step-Totals | TOTAL

**5. Ceilings:** Length times width of building multiplied by 4. Note, in 2 story construction use ceiling measurements nearest to roof.

**Length _____ x width _____ of building x 4 = Btus required.** _____

**6. Sum up Btus** required from each step:

**Step 1 _____ Btus required.** _____

**Step 2 _____ Btus required.** _____

**Step 3 _____ Btus required.** _____

**Step 4 _____ Btus required.** _____

**Step 5 _____ Btus required.** _____

**SUM OF BTUs REQUIRED = _____** _____

**7. Add in miscellaneous** heat losses:

**A) Skylights add 47 Btus per square foot.**

**(Length _____ x Width _____ of skylight) _____ x 47 = Btus to add in.** _____

**B) Fireplaces add 5000 Btus for each fireplace.**

**Total number of fireplaces _____ x 5000 = Btus to add in.** _____

**Total of add in miscellaneous heat losses ____ & ___** _____

**8. Subtotal of Btus** = Add the Btus from Step 6 and Step 7. Multiply by 1.7 (short form correction factor).

**Btus from Step 6 _____ & Step 7_____ x 1.7 = Subtotal of Btus** _____

**9. TOTAL OUTPUT BTUs REQUIRED FOR THE EQUIPMENT TO HEAT YOUR HOME:**

Using the charts below multiply the Subtotal of Btus by the outdoor temperature and building construction correction factors.

**BUILDING CONSTRUCTION FACTORS:**

**A) For tight construction (1.2 winter air changes/hr) multiply subtotal Btus by .76.**
**B) For average construction (2.2 winter air changes/hr) multiply subtotal Btus by 1.0.** _____
**C) For loose construction (3.0 winter air changes/hr) multiply subtotal Btus by 1.2.** _____
**D) Subtotal of Btus (from step 8).** _____

**_____ x _____(Building construction factor) = Construction Factor Btus**
**(A, B or C)**

_____

**Correction factor for outdoor temperature design:** Multiply total Btus by outdoor correction factor

| Outdoor Temperature | -20 | -15 | -10 | -5 | 0 | 5 | 10 | 15 | 20 | 25 | 30 | 35 | 40 |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| Correction Factor | 1.29 | 1.22 | 1.15 | 1.08 | 1.0 | .93 | .86 | .79 | .72 | .65 | .58 | .5 | .43 |

**E) Btus from step 9 D times outdoor temperature factor.**

**_____ X _____ (outdoor temperature correction factor)**

**TOTAL OUTPUT BTUs REQUIRED** _____

**Additional Considerations:**

1. For residences with cathedral ceilings, use of ceiling fans to keep the heat down will lower overall heating expenses (see fan section of catalog).

# SIZING GUIDE FOR WALK-IN COOLERS AND FREEZERS

## HOW TO USE SIZING GUIDE

### Walk-In Cooler Box Load Parameters

1. 95°F ambient air temperature surrounding box
2. 4" Styrene (R = 16.7, K = .24) walls/ceiling, 6" concrete slab floor
3. Average product load with 5°F pulldown in 24 hours
4. BtuH load based on 16-18 hour compressor run time for 35°F box (timer recommended) + 20 hrs. for 30°F box
5. See Table C for adjustment to box load for glass doors
6. For 80°F ambient temp. surrounding box deduct 12% from BtuH
7. For 4" Urethane walls + ceiling, 6" concrete slab floor deduct 12% from BtuH
8. For 10 ft. ceiling height add 10% from BtuH
9. For additional BtuH load for product cooling see Table A

### Walk-In Freezer Box Load Parameters

1. 95°F ambient air temperature surrounding box
2. 4" Urethane (R + 25, K = .16) walls, ceiling + floor
3. Average product load with 10 degrees pulldown in 24 hours
4. BtuH load based on 18 hour compressor run time
5. See Table C for adjustment to box load for glass doors
6. For 80°F ambient air temp. surrounding box deduct 12%
7. For 20 hour compressor run time (light frost load) in lieu of 18 hour run time, deduct 11%
8. For 10 ft. ceiling height add 10%
9. For additional BtuH load for product freezing, see to Table D

### TABLE A

**Product Cooling Loads for Walk-In Coolers**
**(24 Hour pulldown/18 hour compressor operation) 24% safety factor added to loads to allow for service.**

| Product | Specific Heat Above Freezing | 10 Degree Pulldown BtuH Load for Indicated lbs. of Product per 24 Hours | | | | | |
|---|---|---|---|---|---|---|---|
| | | 500 | 1000 | 1500 | 2000 | 3000 | 5000 |
| Beef | .72 | 240 | 480 | 720 | 960 | 1440 | 2400 |
| Pork | .53 | 177 | 353 | 530 | 706 | 1060 | 1767 |
| Veal & Lamb | .76 | 253 | 506 | 760 | 1012 | 1520 | 2533 |
| Poultry | .79 | 263 | 526 | 790 | 1053 | 1580 | 2633 |
| Seafood | .80 | 267 | 533 | 800 | 1066 | 1600 | 2667 |
| Vegetables | .92 | 307 | 613 | 920 | 1226 | 1840 | 3067 |
| Bakery Foods | .74 | 247 | 494 | 740 | 988 | 1480 | 2467 |
| Beer | 1.00 | 333 | 666 | 1000 | 1333 | 2000 | 3333 |

For product pulldown greater than 10 degrees, divide pulldown temperature by 10. Multiply this number by the BtuH shown on table A, than add to box load.

### TABLE B

**Meat Cutting/Prep Room Load (BtuH/hr./sq. ft. of floor area)**

| Floor Sq. Ft. | Approx. 65% R.H. Room Temperature | |
|---|---|---|
| | 55°F | 50°F |
| 100 | 93 | 105 |
| 200 | 88 | 99 |
| 300 | 85 | 95 |
| 400 | 81 | 90 |
| 500 | 78 | 87 |
| 600 | 75 | 85 |
| 700 | 72 | 81 |
| 800 | 69 | 78 |
| 900 | 67 | 75 |
| 1000 | 65 | 73 |
| 1200 | 62 | 69 |

Room loads based on continuous operation and includes allowance for average number of personnel, processing equipment, etc., with glass panel in one wall and walls and ceilings insulated with 3" of styrene with box located in air conditioned area. Evaporator should be low outlet velocity type to avoid drafts and should be selected for continuous operation and not less than 30°F evap. temperature.

### TABLE C

**Glass Door Loads***

| Box Temperature | BtuH per Door |
|---|---|
| +35 | 1060 |
| +30 | 960 |
| 0 | 1730 |
| -10 | 1730 |
| -20 | 1730 |

(*) Adjusted for run time load. Multiply number of doors times door load above and add to box load.

### TABLE D

**Product Freezing Loads for Walk-In Freezers**

| Product | Spec. Heat BtuH/lb./Deg. F 32 - | 32 + | Latent Heat BtuH/lb | Freezer Temp. (F) | -10°F Freezer Temperature BtuH for Indicated lbs. Prod/Day 100 | 300 | 750 | 1000 | 1500 | 3000 |
|---|---|---|---|---|---|---|---|---|---|---|
| Beef | .72 | .40 | 95 | 29 | 790 | 2370 | 5925 | 7900 | 11850 | 23700 |
| Pork | .53 | .32 | 60 | 28 | 523 | 1571 | 3926 | 5235 | 7853 | 15710 |
| Veal & Lamb | .76 | .45 | 100 | 28 | 841 | 2524 | 6311 | 8414 | 12621 | 25240 |
| Poultry | .79 | .42 | 106 | 27 | 878 | 2636 | 6590 | 8787 | 13181 | 26360 |
| Seafood | .80 | .43 | 110 | 28 | 906 | 2719 | 6797 | 9063 | 13595 | 27190 |
| Vegetables | .92 | .47 | 130 | 30 | 1053 | 3159 | 7898 | 10530 | 15795 | 31590 |
| Bakery Foods | .74 | .34 | 53 | 20 | 520 | 1560 | 3900 | 5200 | 7800 | 15600 |

Freezing loads based on product entering at 40°F maximum. For a specific pulldown time, the product load BtuH may be adjusted by multiplying the above loads by 24 and dividing by the specified pulldown time in hours. To adjust for 0°F freezer temperature, multiply the above loads by 0.97, and for -20 F freezer, multiply by 1.04.

(*) Heavy usage is defined as two times the average air change. Average air changes determined by ASHRAE based on box size for 24 hour period.

## KNOW THE STOCK NUMBER, BUT STILL CAN'T FIND WHAT PAGE IT'S ON?

Use the "Stock Number/Page Number Cross Reference Guide" at the back of the Catalog. Stock numbers are listed alphabetically with the current page numbers.

# AIR MOVING TERMINOLOGY

**AMCA** (Air Movement and Control Association, Inc.)—A nationally recognized association which establishes standards, tests and certifies the performance of air moving devices.

**A-Weighted**— A term which refers to the single number logarithmic summation of the 8 octave bands which have been adjusted to account for response of human ear to sound pressure level.

**BHP** (Brake Horsepower)—Fan horsepower required.

**Btu** (British Thermal Unit)—The amount of energy or heat required to raise the temperature of one pound of water one degree Fahrenheit.

**BtuH**—One Btu per hour.

**CFM** (Cubic Feet Per Minute)—A measure of volume flow rate, or air moving capability, of an air moving device. Volume of air moved per minute.

**dB** (Decibel)—A measure of the sound produced by an air moving device.

**dB(A)**—Sound level reading on the A-weighted scale of a sound meter. This A-weighting adjusts response of the meter to approximate that of the human ear.

**Free Air Delivery**—The conditions existing when there are no effective restrictions to air flow (no static pressure) at the inlet or outlet of an air moving device.

**HP** (Horsepower)—The power required to drive an air moving device. HP required varies with system conditions—See Basic Laws below.

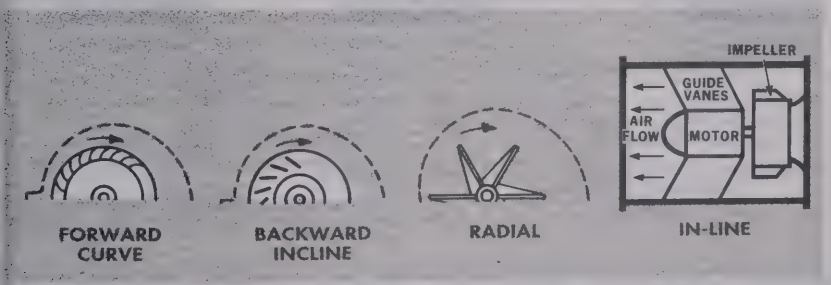
**LwA**—A value representing the logarithmic summation of all 8 octave band values, adjusted to represent the effect of the "A" weighted network. This single number rating provides a useful number for comparison.

**Octave Bands**—The range of sound frequency that can be heard is divided into 8 octave bands.

**Plenum Chamber**—An air compartment maintained under pressure to serve one or more distributing ducts.

**RPM** (Revolutions Per Minute)—Speed at which the shaft of an air moving device is rotating.

**Sone**—An internationally recognized unit of loudness. Sones signify, in a single number, the total sound output of the unit being tested. One sone is approximately equal to the sound of a modern refrigerator in a kitchen. A 3-sone fan, for example, sounds twice as quiet to the human ear as a 6-sone fan.



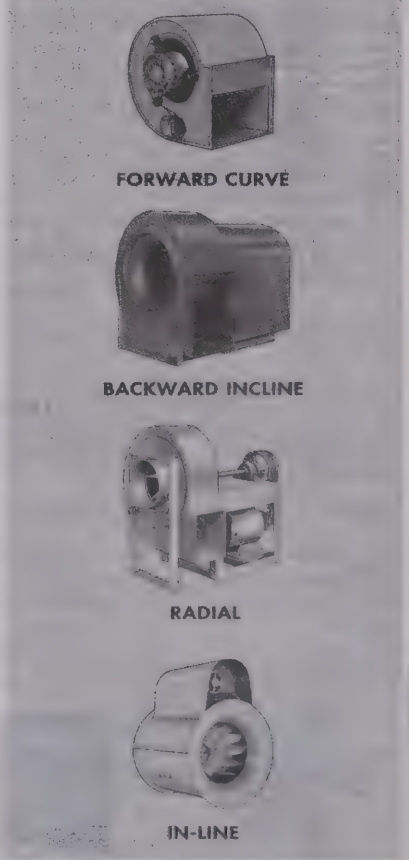
**Sound Power Level**—The acoustic power radiating from a sound source, expressed in decibels.

**SP** (Static Pressure)—A measure of the resistance to movement of forced air through a system or installation, caused by ductwork, inlets, louvers, etc. Measured in inches of water gage (W.G.); the height, in inches, to which the pressure will lift a column of water. For a given system, static pressure varies as the square of the flow rate. Thus, if flow rate is doubled, system resistance or static pressure is increased four times.

**Venturi**—A ring or panel, surrounding the blades on a propeller type fan, which improves fan performance.

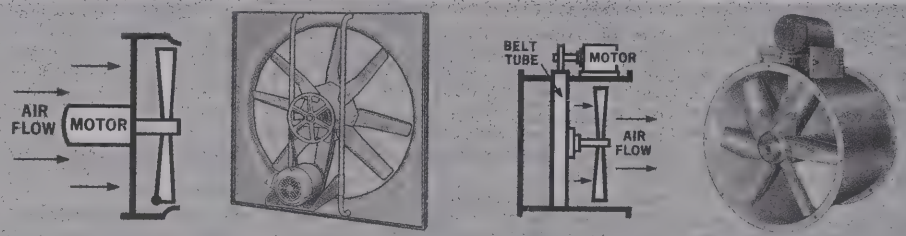
## CENTRIFUGAL BLOWERS

Centrifugal blowers are air moving devices in which the air flow is perpendicular to the shaft on which the wheel is mounted. The wheel is mounted in a scroll-type housing which is necessary to develop rated pressures. The four classes of centrifugal blowers are determined by wheel blade position with respect to the direction of rotation. As SP is increased, HP and CFM decrease.



**FORWARD CURVE** (FC)—The tips of the blades are inclined in the direction of rotation; the most common type of centrifugal blower. Normally used in residential heating and air conditioning systems and light duty exhaust systems where maximum air delivery and low noise levels are required. Capable of pressures up to approximately 1½" SP.

**BACKWARD INCLINE** (BI)—The tips of the blades are inclined away from the direction of rotation. Used in commercial/industrial, heavy duty heating/cooling systems which require heavy duty construction, non-overloading characteristics and stable air delivery. These blowers operate at higher efficiencies than forward curved blowers. Not as quiet as forward curve blowers because they operate at higher speeds. Can be used in systems up to 3" static pressure. Smaller diameter wheels are supplied with flat blades; larger diameter wheels are supplied with air foil blades to improve efficiency.



**RADIAL BLADE**—Has straight blades which are, to a large extent, self-cleaning, making them suitable for various kinds of material handling and particle-and-grease-laden air. Wheels are of simple construction and have relatively narrow blades. They can withstand the high speeds required to operate at higher static pressures (up to 12") but usually are noisier than FC or BI blowers.

**IN-LINE** (Tubular Centifugal Fan)—Air flow is developed as in a centrifugal blower, but after leaving the impeller the air is contained in a tubular housing and, by means of turning vanes, is discharged in an axial direction. Employs single-inlet centrifugal wheels, usually with backward inclined blades. The tubular centrifugal fan has performance characteristics similar to a centrifugal blower and the compact physical configuration of the tubeaxial fan. Can be vertically or horizontally mounted, thus providing a simpler installation by minimizing need for duct turns and transitions.

# AIR MOVING TERMINOLOGY

## PROPELLER FANS AND DUCT FANS

PROPELLER FAN (Axial) DUCT FAN (Tubeaxial)

**PROPELLER FAN** (Axial Fan)—An air moving device in which the air flow is parallel or axial to the shaft on which the propeller is mounted. These fans have good efficiency near free air delivery and are used primarily in low static pressure, high volume applications. As SP is increased, HP increases and CFM decreases. Usually mounted in a venturi, ring, or other housing featuring simple construction and low cost.

**DUCT FAN** (Tubeaxial)—An air moving device in which the air flow is parallel or axial to the shaft on which the propeller is mounted. The propeller is housed in a cylindrical tube or duct. This design enables duct fans to operate at higher static pressures than propeller fans. Commonly used in spray booth and other ducted exhaust systems. As SP is increased, HP increases and CFM decreases.

## BASIC LAWS FOR AIR MOVING EQUIPMENT

The performance of all fans and blowers is governed by certain rules of physics known as Fan Laws. CFM, RPM, SP and HP are all related to each other in a known manner and when one changes, all others change. For example, when CFM is changed, RPM, SP and HP will also change. CFM is the variable most commonly changed in an air moving system, therefore the following example of fan law application is based on a change from an existing CFM to a new CFM.

1. To determine performance at a new CFM, first calculate the ratio of the new CFM to existing CFM (new CFM divided by existing CFM):

$$\text{Ratio} = \frac{\text{CFM new}}{\text{CFM existing}}$$

2. To determine new RPM, multiply ratio of step No. 1 times existing RPM:

$$\text{RPM new} = \frac{\text{CFM new}}{\text{CFM exisiting}} \times \text{RPM existing}$$

3. To determine new SP, multiply ratio of step No. 1 times itself, times existing SP:

$$\text{SP new} = \left(\frac{\text{CFM new}}{\text{CFM existing}}\right)^2 \times \text{SP existing}$$

4. To determine new HP required, multiply ratio of stop No. 1 times itself twice, and then times existing HP:

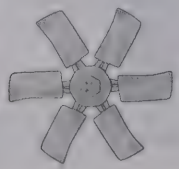
$$\text{HP new} = \left(\frac{\text{CFM new}}{\text{CFM existing}}\right)^3 \times \text{HP existing}$$

### SAMPLE CALCULATIONS

Existing conditions are 5000 CFM, 1000 RPM, 0.5" SP, 0.5 HP motor.

New CFM desired is 6000.

$$\text{Ratio} = \frac{6000}{5000} = 1.2$$

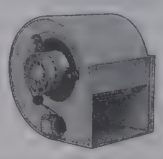


2. Calculate new RPM: $\frac{6000}{5000} = 1.2$, therefore new RPM = 1000 x 1.2 = 1200 RPM.
3. Calculate new SP: $\left(\frac{6000}{5000}\right)^2 = (1.2)^2 = 1.44$, therefore new SP = 0.5 x 1.44 = 0.72" SP.
4. Calculate new HP: $\left(\frac{6000}{5000}\right)^3 = (1.2)^3 = 1.73$, therefore new HP = 0.5 x 1.73 = 0.86 HP.

New conditions: 6000 CFM (up 20%), 1200 RPM (up 20%), 0.72" SP (up 44%), 0.86 HP (up 73%).

## AIR CHANGES RECOMMENDED FOR VARIOUS AREAS

To determine the required fan capacity, calculate the volume of the area to be ventilated in cubic feet and divide by the minutes per change. Result will be cubic feet per minute, corresponding to fan ratings. One or more fans may be used to obtain desired cubic feet per minute.



| Ventilated Area | Minutes Per Change | Ventilated Area | Minutes Per Change | Ventilated Area | Minutes Per Change | Ventilated Area | Minutes Per Change |
|---|---|---|---|---|---|---|---|
| Assembly Halls | 3-10 | Factories | 4-10 | Offices | 5-12 | Shops | 5-10 |
| Bakeries | 1-3 | Foundries | 2-8 | Packing Houses | 3-5 | Stores | 5-10 |
| Boiler Rooms | 1-3 | Garages | 5-10 | Plating Rooms | 1-5 | Theaters | 3-8 |
| Cafeterias | 3-5 | Kitchens | 1-5 | Printing Shops | 5-10 | Toilets | 2-5 |
| Churches | 2-4 | Laundries | 1-3 | Restaurants | 3-10 | Transformer Rooms | 1-5 |
| Clubs | 5-7 | Libraries | 2-4 | Rest Rooms | 5-10 | Warehouses | 5-10 |
| Dormitories | 5-8 | Locker Rooms | 4-15 | Sales Rooms | 2-10 | | |
| Engine Rooms | 2-5 | Mills | 5-8 | Schools | 5-10 | | |

## TYPICAL AIR MOVING DEVICES

## ERGONOMICS: GENERAL INFORMATION

Ergonomics is the science of adapting workstations, tools, equipment and job techniques to be compatible with human bodies. Ergonomics fits the job to the worker rather than fitting the worker to the job. Ergonomic products and programs are designed to reduce the risk of injury and maximize productivity in situations where the physical requirements stress a person's body.

The types of injuries that ergonomic products and programs aim to reduce are called Cumulative Trauma Disorders or CTDs. These injuries occur over a period of time as a result of repeated trauma or exposure to a specific body part such as the back, hand, wrist or forearm. CTDs differ from simple muscle fatigue in that they don't go away after a short period of rest. CTDs are also referred to as Repetitive Strain Injuries (RSIs), Repetitive Motion Disorders, Overuse Syndrome, Musculoskeletal Disorders and Work-Related Disorders.

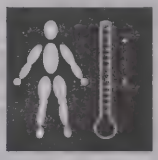
## RISK FACTORS

Some of the risk factors directly linked to the occurrence of CTDs include:

**Repetition:** Is the same motion performed every few seconds for more than two hours a day?

**Awkward Posture:** Is the body bent or twisted for more than two hours a day?

**Force:** Do body parts generate excessive contact for more than a total of two hours a day?



**Static Posture:** Is the body held in the same position for more than two hours a day?

**Mechanical Stress:** Is the body part in contact or resting on a hard surface for more than two hours a day?

**Vibration:** Is the body part in contact with a vibrating surface for more than two hours a day?

**Temperature:** Is the body part exposed to excessive temperature for more than two hours a day?

## INCURRED COSTS TO BUSINESS AND INDUSTRY

U.S. industry and business currently loses over $50 billion each year due to ergonomics-related problems. These costs in combination with an incident rate of CTDs that has increased at an annual rate of about 26% since 1983 provide cause for concern in the following areas:

**Worker Health:** 63% of all recordable occupational illnesses are due to repetitive stress or CTDs, affecting more than 700,000 workers each year. (Source: U.S. Dept. of Labor)

**Worker's Compensation Costs:** OSHA estimates that by the year 2000, 50 cents of every dollar spent on worker's compensation will be for CTDs.

**Injury Costs:** The average cost per upper extremity CTD worker's compensation claim was $8,070-nearly twice the cost of the average claim for other injuries. (Source: Journal of Occupational Medicine). The average back injury cost $9,000 without surgery and $30,000 to $40,000 with surgery. (Source: Occupational Health & Safety).

## RECOMMENDED ERGONOMIC PROGRAM

Almost everyone is at risk of being exposed to a CTD. A person's occupation, lifestyle and personal characteristics can increase that risk. Unfortunately, CTD injuries cannot be completely prevented; however, the risk factors contributing to such injuries can be reduced through ergonomic programs and products.

An effective ergonomic program should include the following:

- **Worksite analysis to determine ergonomic hazards and job functions that are high risk**
- **Engineering controls, such as the design or redesign of the job environment and procedures**
- **Administrative controls, including job rotation, rest periods and decreasing the number of repetitions per worker**
- **Medical management, including taking past work illness and injury histories, monitoring work situations and providing education materials and seminars on leading a healthy lifestyle, such as proper nutrition, adequate rest, regular exercise and stress relief, and the role these have in reducing injuries**
- **Training and education on job procedures; causes, risk factors and symptoms of CTDs, and the health effect of exposure; and reporting procedures at all levels**
- **Personal Protective Equipment is used as a supplement to engineering and administrative controls.**

# GLOSSARY OF HAZARD COMMUNICATION TERMS

## GLOSSARY OF TERMS COMMONLY USED IN HAZARD COMMUNICATION

### A

**Acute Effect**—an adverse effect on a human or animal body with symptoms that develop rapidly, generally as a result of overexposure or sensitivity to a hazardous material or physical agent. Also see "Chronic."

**Acute Toxicity**—the adverse acute effects resulting from a single dose of, or exposure to, a substance. Ordinarily used to denote effects in experimental animals.

**ACGIH** (American Conference of Governmental Industrial Hygienists)—an organization devoted to the administrative and technical aspects of occupational and environmental health. The conference is a professional society, not a governmental agency. Their most outstanding publication is titled **Threshold Limit Values for Chemical Substances and Physical Agents and Biological Exposure Indices.** This is a listing of recommended levels of exposure for employees which is updated annually. It contains recommended limits that are lower for most substances than OSHA standards.

**Asphyxiant**—a vapor or gas which can cause unconsciousness or death by suffocation (lack of oxygen). Most simple asphyxiants, such as nitrogen and carbon dioxide, are harmful to the body only when they become so concentrated that they reduce oxygen in the air (normally about 21 percent) to dangerous levels (18 percent or lower). Chemical asphyxiants, such as carbon monoxide, produce a chemical reaction in the body's ability to use available oxygen.

**Autoignition Temperature**—the minimum temperature required to initiate or cause self-contained combustion in any substance in the absence of flame or spark.

### B

**Boiling Point**—the temperature at which a liquid changes to a vapor state, at a given pressure: usually expressed in degrees Fahrenheit at sea level pressure (760 mm Hg, or one atmosphere). For mixtures, the initial boiling point or the **boiling range** may be given. Flammable materials with low boiling points generally present special fire hazards. Some approximate boiling points are:

| | | |
|---|---|---|
| Propane | -44°F | (-41°C) |
| Anhydrous Ammonia | -28°F | (-33°C) |
| Butane | 31°F | (-0.5°C) |
| Gasoline | 100°F | (38°C) |
| Allyl Chloride | 113°F | (45°C) |
| Ethylene Glycol | 387°F | (197°C) |

### C

**"C", or Ceiling**—the maximum allowable human exposure limit for an airborne substance, not to be exceeded even momentarily. Also see "PEL" and "TLV."

**CAA** (Clean Air Act)—federal law enacted to regulate and reduce air pollution. Administered by the EPA.

**Carcinogen**—a substance or agent capable of causing or producing cancer.

**C.A.S.** (Chemical Abstracts Service)—a Columbus, Ohio, organization which indexes information published in **Chemical Abstracts** by the American Chemical Society and provides index guides by which information about particular substances may be located in the "Abstracts" when needed. Each chemical substance has a distinct "C.A.S. Number."

**cc** (Cubic Centimeter)—a volume measurement in the metric system, equal in capacity to one milliliter (ml). One quart is about 946 cubic centimeters.

**Chemical Family**—a group of single elements or compounds with a common general name. Example: acetone, methyl ethel ketone (MEK), and methyl isobutyl ketone (MIBK), are of the "ketone" family; acrolein, furfural and acetaldehyde are of the "aldehyde" family.

**Chemical Manufacturer**—under the federal Hazard Communication Standard, this means an employer in SIC codes 20 through 39 where chemical(s) are produced for use or distribution. Individual states may have an expanded definition of this term.

**Chemical Name**—the scientific designation of a chemical in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry (IUPAC) of the Chemical Abstracts Service (CAS).

**CHEMTREC**—(Chemical Transportation Emergency Center)—a national center established by the Chemical Manufacturers Association (CMA) in Washington, D.C., in 1970, to relay pertinent emergency information concerning specific chemicals on request. CHEMTREC has a 24-hour toll free telephone number [(800)-424-9300], intended primarily for use by those who respond to chemical transportation emergencies.

**Chronic Effect**—an adverse effect on a human or animal body, with symptoms which develop slowly over a long period of time or which recur frequently. This effect is generally the result of an overexposure or sensitivity to a hazardous material or agent. Also see "Acute Effect."

**Chronic Toxicity**—adverse (chronic) effects resulting from repeated doses of a substance, or repeated exposure over a relatively prolonged time period. Ordinarily used to denote effects in experimental animals.

**CWA** (Clean Water Act)—federal law enacted to regulate and reduce water pollution. Administered by the EPA.

**CO** (Carbon Monoxide)—a colorless, odorless, flammable, and very toxic gas produced by incomplete combustion; also a by-product of many chemical processes. CO is a chemical asphyxiant. See "Asphyxiant."

**$CO_2$** (Carbon Dioxide)—a colorless gas, produced by the combustion and decomposition of organic substances and as aby-product of many chemical processes. $CO_2$ will not burn, and is relatively non-toxic (although high concentrations, especially in confined spaces, can create hazardous oxygen deficient environments.) $CO_2$ is a simple asphyxiant. See "Asphyxiants."

**COC** (Cleveland Open Cup)—a flash point test method.

**Combustible**—a term used by NFPA, DOT, OSHA and others to classify certain liquids that will burn, on the basis of flash points. NFPA, DOT and OSHA generally define "combustible liquids" as having a flash point above 100°F (37.8°C) and below 200°F (93.3°C). Also see "Flammable." Non-liquid substances such as wood and paper are classified as "ordinary combustibles" by the NFPA.

**Common Name**—any designation or identification such as code name, code number, trade name, brand name, or generic name used to identify a chemical other than by its chemical name.

**Concentration**—the relative amount of a substance when combined or mixed with other substances. Examples: **2ppm** hydrogen sulfide in air, 50 **percent** caustic, or **5mg/m³** iron oxide fume or dust.

**Corrosive**—as identified by OSHA, a corrosive material is a chemical that causes visible destruction or irreversible alterations in human skin tissue at the site of contact. A solid or liquid waste, which exhibits a "characteristic of corrosivity", as defined by RCRA, may be regulated (by EPA) as a hazardous waste. A liquid that has a severe corrosion rate on steel may be regulated by DOT.

**Cutaneous Toxicity**—see "Dermal Toxicity."

### D

**Decomposition**—breakdown of a material or substance (by heat, chemical reaction, electrolysis, decay or other processes) into parts, elements or simpler compounds.

**Dermal**—used on or applied to the skin.

**Dermal Toxicity**—adverse effects resulting from skin exposure to a substance. Ordinarily used to denote effects to experimental animals.

**Distributor**—a business, other than a chemical manufacturer or importer, which supplies hazardous chemicals to other distributors or to manufacturing purchasers.

**DOT** (U.S. Department of Transportation)—regulates transportation of chemicals and other substances to aid in the protection of the public, as well as fire, law enforcement, and other emergency response personnel, particularly when transportation incidents occur involving hazardous materials. Detailed DOT classification lists specify appropriate warnings, such as Oxidizing Agency or Flammable Liquid, which must be used for various substances.

CONTINUED ON NEXT PAGE

# GLOSSARY OF HAZARD COMMUNICATION TERMS

## E

**Employee**—a worker who may be exposed to hazardous chemicals under normal operating conditions or foreseeable emergencies, including, but not limited to, production workers, line supervisors, and repair or maintenance personnel.

**Employer**—for the federal standard, a person engaged in a business within SIC codes 20 through 39, where chemicals are either used or are produced for use or distribution. Individual states may have expanded definitions of who constitutes an employer.

**Employee Representative**—an individual or labor organization to whom an employee gives written authorization to exercise his or her rights to request information under sections 8 and 9 of the OSHA Hazardous Communication Standard. A recognized or certified bargaining agent of a group of employees shall be considered to be an employee representative without the requirement of written employee authorization.

**EPA** (U.S. Environmental Protection Agency)—federal agency with environmental protection, regulatory, and enforcement authority.

**Epidemiology**—the science that deals with the study of disease in a general population. Determination of the incidence (rate of occurrence) and distribution of the particular disease (as by age, sex, or occupation) may provide information about the cause of the disease.

**Evaporation Rate**—the rate at which a particular material will vaporize (evaporate) when compared to the rate of vaporization of a known material. The evaporation rate can be useful in evaluating the potential health and fire hazards of a material. The known material is usually normal butyl acetate (NBUAC or N-BuAc), with an evaporation rate designated as 1.0. Evaporation rates of other solvents or materials are then classified as:

—FAST evaporating if greater than 3.0.
Examples: Methyl Ethyl Ketone (MEK) = 3.8, Acetone = 5.6, Hexane = 8.3.

—MEDIUM evaporating if 0.8 to 3.0.
Examples: 190 proof (95%) Ethyl Alcohol = 1.4, VM&P Naphtha = 1.4, MIBK = 1.6.

—SLOW evaporating if less than 0.8.
Examples: Xylene = 0.6, Isobutyl Alcohol = 0.6, Normal Butyl Alcohol = 0.4, Water = 0.3, Mineral spirits = 0.1.

**Exposure**—or "exposed" means that an employee is subjected to a hazardous chemical in the course of employment through any route of entry (inhalation, skin contact, or absorption, etc.), and includes potential (e.g., accidental or possible) exposure.

## F

**Flash Point**—the temperature at which a liquid will give off enough flammable vapor to ignite. There are several flash point test methods, and flash points may vary for the same material depending on the method used, so the test method is indicated when the flash point is given (150°F, PMCC, 200°F TOC, etc.).

**Flammable**—a "flammable liquid" is defined by OSHA as a liquid with a flash point below 100°F (37.8°C). Solids that will ignite readily or are liable to cause fires under ordinary conditions of transportation through friction or retained heat from manufacturing or processing, and which burn so vigorously and persistently as to create a serious transportation hazard, are classified by DOT as "flammable solids". The EPA defines a flammable hazardous waste as a waste material with a flash point of less than 140°F. Also see "Combustible."

**Formula**—the conventional scientific designation for a material (water is $H_2O$, Sulfuric Acid is $H_2SO_4$, Sulfur Dioxide is $SO_2$, etc.) which details the types and amount of each kind of atom present in one molecule of the material.

## G

**General Exhaust**—a system for exhausting air containing contaminants from a general work area. Also see "Local Exhaust."

**g** (Gram)—a metric unit of weight. One ounce U.S. (avoirdupois) is about 238.4 grams.

**g/kg** (Grams per kilogram)—an expression of dose used in oral and dermal toxicology testing to indicate the grams of substance dosed per kilogram of animal body weight. Also see "kg" (kilogram).

## H

**Hazardous Material**—any chemical which is a physical hazard or a health hazard. The definition of "hazardous" can vary by regulatory agency. See "Hazardous or Toxic Chemical Substance."

**Hazardous or Toxic Chemical Substance**—means any substance listed in or by:

1. 29 CFR1910.1000 to .1500 inclusive.
2. The U.S. Public Health Service Annual Report on Carcinogens. (National Toxicology Program)
3. The NIOSH Registry of Toxic Effect of Chemical Substances that are:
   i. Irritant as defined in 16 CFR1500.41 skin rat % or greater rating
   16CFR1500.42 eye rabbit 5 or greater rating
   ii. Corrosive as defined in 49 CFR 173 skin rat
   iii. Sensitizer
   iv. Toxic or highly toxic:
   $LD_{50}$ oral rat ≤ mg/kg
   $LD_{50}$ skin rabbitt ≤ 1000 mg/kg
   $LC_{50}$ rat ≤ 2000 ppm
   v. Target organ system—blood, kidney, liver, lung, skin, eye, reproductive
4. International Agency for Research on Cancer (IARC) (1, 2A-2B)
5. USEPA Clean Water Act.
6. USEPA Federal Insecticide, Rodenticide, and Fungicide Act.
7. FDA as unsafe for human consumption.
8. Listed in NIOSH Intelligence Bulletins.

This includes all mixtures in a concentration of 1% or greater. For carcinogenic compounds, this applies to mixtures of 0.1% or greater.

**Health Hazard**—as defined by OSHA, "a chemical for which there is statistically significant evidence based on at least one study conducted in accordance with the established scientific principles that acute health or chronic health effects may occur."

**Health Professional**—a safety engineer, physician, dentist, or toxicologist, registered nurse, licensed practical nurse, or industrial hygienist, employed to evaluate a hazard.

## I

**Identity**—any chemical name or common name which is indicated on the material safety data sheet (MSDS) for the chemical. The identity used shall permit cross references to be made among the required list of hazardous chemicals, the label, and the MSDS.

**IDLH** (Immediately Dangerous to Life and Health)—means any condition that poses an immediate or delayed threat to life or that would cause irreversible adverse health effects or that would interfere with an individual's ability to escape unaided from a hazardous area.

**Ignitable**—a solid, liquid, or compressed gas which exhibits a "characteristic of ignitability," as defined by RCRA. Ignitable wastes may be regulated (by EPA) as hazardous waste.

**Incompatible**—materials which could cause dangerous reactions, such as fire, explosion, or toxic gas generation from direct contact with one another are described as incompatible.

**Ingestion**—the swallowing of a substance in the form of a gas, vapor, fume, mist or dust.

**Inhibitor**—a chemical which is added to another substance to prevent an unwanted chemical change from occurring.

**Irritant**—a chemical, which is not corrosive, but which causes reversible inflammatory effects on living tissue by chemical action at the site of contact.

## K

**kg** (Kilogram)—a metric unit of weight, about 2.2 U.S. pounds. Also see "g/kg," "g," and "mg."

## L

**Label**—in the Hazard Communication standard, an adequate label is any written, printed, or graphic material displayed on or affixed to containers of hazardous chemicals that lists the identity of the material and has an adequate hazard warning.

**l** (Liter)—a metric unit of capacity. A U.S. quart is about 9/10 of a liter.

CONTINUED ON NEXT PAGE

# GLOSSARY OF HAZARD COMMUNICATION TERMS

**LC** (Lethal Concentration)—a concentration of a substance being tested that will kill a test animal.

**$LC_{50}$** (Lethal Concentration)—for acute toxicity on inhalation means that concentrations of vapor, mist, or dust which, administered by continuous inhalation for one hour to both male and female young adult albino rats, causes death within 14 days in half of the animals tested. If the material is administered to the animals as a dust or mist, more than 90 percent of the particles available for inhalation in the test must have a diameter of 20 microns or less if it is reasonably foreseeable that such concentrations could be encountered by a human during transport. The result is expressed in mg/L of air for dusts or mists or in mL/$M^3$ of air (parts per million) for vapors.

**$LD_{50}$** or $LD_{50}$ oral—for acute toxicity means that dose of the material administered to both male and female young adult albino rats which causes death within 14 days of half of the animals tested. The number of animals tested must be sufficient to give statistically valid results and be in conformity with good pharmaceutical practices. The result is expressed in mg/kg body mass.

**$LD_{50}$** dermal—for acute dermal toxicity means that dose of the material which, administered by continuous contact for 24 hours with the shaved intact skin (avoiding braiding) of an albino rabbit, causes death within 14 days in half of the animals tested. The number of animals tested must be sufficient to give statistically valid results and be in conformity with good pharmaceutical practices. The result is expressed in mg/kg body mass.

**LEL, or LFL** (Lower Exposure Limit or Lower Flammable Limit of a vapor or gas)—the lowest concentration (lowest percentage of the substance in air) that will produce a flash fire when an ignition source (heat, arc, or flame) is present. At concentrations lower than the LEL, the mixture is too "lean" to burn. Also see "UEL."

**Local Exhaust**—a system for capturing and exhausting contaminants from the air at the point where the contaminants are produced (welding, grinding, sanding, other processes or operations). Also see "General Exhaust."

## M

**$m^3$** (Cubic Meter)—a metric measure of volume, about 35.3 cubic feet or 1.3 cubic yards.

**MAC** (Maximum Allowable Concentration)—the term used by the state of Pennsylvania for occupational exposure standards. It is essentially equivalent to the OSHA PEL.

**Manufacturing Purchaser**—an employer with a workplace classified in SIC Codes 20 through 39, who purchases a hazardous chemical for use within that workplace.

**Material Safety Data Sheet (MSDS)**—Written or printed material concerning a hazardous chemical which is prepared in accordance with paragraph (g) of the OSHA standard, 29CFR, 1910.

**Melting Point**—the temperature at which a solid substance changes to a liquid state. For mixtures, the melting range may be given.

**Mixture**—any combination of two or more chemicals if the combination does not, in whole or part, result in a chemical reaction.

**Mechanical Exhaust**—a powered device, such as a motor driven fan or air/stream venturi tube, for exhausting contaminants from a workplace, vessel, or enclosure.

**mg** (Milligram)—a metric unit of weight. There are 1,000 milligrams in one gram (g) of substance.

**mg/kg** (Milligrams per kilogram)—an expression of toxicological dose. See "g/kg."

**$mg/m^3$** (Milligrams per cubic meter)—a unit for measuring concentrations of dusts, gases, or mists in the air.

**ml** (Milliliter)—a metric unit of capacity, equal in volume to one cubic centimeter (cc) or about 1/16 of a cubic inch. There are 1,000 milliliters in one liter (1).

**mmHg** [Millimeter (mm) of mercury (Hg)]—a unit of measurement for low pressures or partial vacuums.

**mppcf** (Million Particles Per Cubic Foot)—a unit for measuring particles of substance suspended in air. Exposure limits for mineral dusts (silica, graphite, Portland cement, nuisance dusts, and other), formerly expressed as mppcf, are now more commonly quoted in $mg/m^3$.

**Mutagen**—a substance or agent capable of altering the genetic material in a living cell.

## N

**NBUAC or n-BuAc** (Normal butyl acetate)—see "evaporation rate."

**NIOSH** [National Institute for Occupational Safety and Health of the Public Health Service, U.S. Department of Health and Human Services (DHHS)]—a federal agency which, among other activities, tests and certifies respiratory protective devices and air sampling detector tubes, recommends occupational exposure limits for various substances and assists OSHA and MSHA in occupational safety and health investigations and research.

**NFPA** (National Fire Protection Association)—an international voluntary membership organization to promote and improve fire protection and prevention and establish safeguards against the loss of life and property by fire. Best known on the industrial scene for the uniform **National Fire Codes**, 16 volumes of codes, standards, recommended practices, and manuals developed (and periodically updated) by NFPA technical committees. Among these is **NFPA 704M**, the code for showing hazards of materials using the familiar diamond-shaped label or placard with appropriate numbers or symbols. The brief explanation following illustrates the NFPA principle of using scales of 0 to 4 (low to high) to classify material hazards:

**Fire Hazard (Red)**

0—Will not burn

1—Will ignite if preheated

2—Will ignite at high ambient temperatures

3—Will ignite at most ambient conditions

4—Burns readily at ambient conditions

**Health Hazard (Blue)**

0—Ordinary combustible hazards in a fire

1—Slightly Hazardous

2—Hazardous

3—Extreme danger

4—Deadly

**Reactivity (Yellow)**

0—Stable & not reactive w/water

1—Unstable if heated

2—Violent chemical change

3—Shock & heat may detonate

4—May detonate

**Specific Hazard**

| | |
|---|---|
| OXY | Oxidizer |
| ACID | Acid |
| COR | Corrosive |
| W | Use no water |
| ☢ | Radiation Hazard |

**NO.** (Oxides of nitrogen)—undesirable air pollutants. NO. emissions are regulated by EPA under the Clean Air Act.

## O

**Olfactory**—relating to the sense of smell. The olfactory organ in the nasal cavity is the sensing element that detects odors and transmits information to the brain through the olfactory nerves.

**Olfactory Fatigue**—A natural body response where the nerves in the nose that sense various smells and odors become accustomed to those chemicals and no longer send a message to the brain that they detect an odor.

**Oral**—used in or taken into the body through the mouth.

**Oral Toxicity**—Adverse effects resulting from taking a substance into the body via the mouth. Ordinarily used to denote effects in experimental animals.

**OSHA** (Occupational Safety and Health Administration of the U.S. Department of Labor)—federal agency with safety and health regulatory and enforcement authority for most U.S. industries and businesses.

**Oxidation**—in a literal sense, oxidation is a reaction in which a substance combines with oxygen provided by an oxidizer or oxidizing agent (see definitions below). In a broader sense, based on modern atomic theory, science today defines oxidation as

CONTINUED ON NEXT PAGE

a reaction, brought about by an oxidizing agent, in which atoms, molecules or ions lose electrons. In this broader sense, an oxidation reaction may occur even when oxygen is not present. However it may be defined, an oxidation reaction is always accompanied by an offsetting (balancing) reduction reaction in which (1) oxygen is removed from a compound, or (2) atoms, molecules, or ions gain electrons.

**Oxidizer**—as defined by OSHA, a chemical other than a blasting agent or explosive that initiates or promotes combustion in other materials, thereby causing fire of itself or through the release of oxygen or other gases.

**Oxidizing Agent**—a chemical or substance which brings about an oxidation reaction. The agent may, (1) provide the oxygen to the substance being oxidized (in which case the agent has to be oxygen or contain oxygen); or, (2) it may receive electrons being transferred from the substance undergoing oxidation (chlorine is a good oxidizing agent for electron transfer purposes, even though it contains no oxygen).

## P

**PEL** (Permissible Exposure Limit)—an exposure limit established by OSHA regulatory authority. May be a time-weighted average (TWA) limit, STEL or a maximum concentration exposure limit. Also see "Skin." Also see "TLV."

**% Volatile** (Percent volatile by volume)—the percentage of a liquid or solid (by volume) that will evaporate at an ambient temperature of 70°F (21°C) (Unless some other temperature is stated.) Examples: butane, gasoline, and paint thinner (mineral spirits) are 100 percent volatile; their individual evaporation rates vary, but over a period of time each will evaporate completely. EPON® solutions, however, may be only 10% to 60 percent volatile; only the solvent evaporates, leaving the resin as a nonvolatile residue.

**Physical Hazard**—an OSHA term for which there is scientifically valid evidence that it is a combustible liquid, a compressed gas, explosive, flammable, an organic peroxide, an oxidizer, pyrophoric, unstable (reactive), or water-reactive.

**PMCC** (Pensky-Martens Closed Cup)—a flash point test method.

**Poison, Class A**—according to DOT this is a term for extremely dangerous poisons, that is, poisonous gases or liquids of such nature that a very small amount of the gas, or vapor of the liquid, mixed with air is dangerous to life. Some examples: phosgene, cyanogen, hydrocyanic acid and nitrogen peroxide.

**Polymerization**—a chemical reaction in which one or more small molecules of the same type combine to form larger molecules. A **hazardous polymerization** is such a reaction which takes place at a rate which releases large amounts of energy. If hazardous polymerization can occur with a given material, the MSDS usually will list the conditions which could start the reaction and, since the material usually contains polymerization inhibitor, the expected time period before the inhibitor is up.

**ppm** (Parts per Million)—a unit for measuring the concentration of a gas or vapor in air; parts (by volume) of the gas or vapor in a million parts of air. Also used to indicate the concentration of a particular substance in a liquid or solid.

**ppb** (Parts per Billion)—a unit for measuring the concentration of a gas or vapor in air; parts (by volume) of the gas or vapor in a billion parts of air. Usually used to express measurements of extremely low concentration. Also used to indicate the concentration of a liquid or solid.

**psi** (Pounds per Square inch)—for MSDS purposes, a unit for measuring the pressure a material on the walls of a confining vessel or enclosure. For technical accuracy, pressure must be expressed as **psig** (pounds per square inch gauge) or **psia** (pounds per square inch absolute; that is, the latter being gauge pressure, plus sea level atmospheric pressure, or psig, plus about 14.7 pounds per square inch). See also "mmHg."

## R

**RCRA** (Resource Conservation and Recovery Act)—federal environmental legislation, administered by the EPA, aimed at controlling the generation, treating, storage, transportation, and disposal of hazardous wastes.

**Reaction**—a chemical transformation or change; the interaction of two or more substances to form different substances.

**Reactivity**—a description of the tendency of a substance to undergo chemical reaction with the release of energy. Undesirable effects, such as pressure buildup, temperature increase, formation of noxious, toxic, or corrosive by-products, may occur because of the reactivity of a substance to heating, burning, direct contact with other materials, or other conditions in use or storage. A solid waste which exhibits a "characteristic of reactivity", as defined by the RCRA, may be regulated by the EPA as a hazardous waste.

**Reducing Agent**—in a reduction reaction (which always occurs simultaneously with an oxidation reaction) the reducing agent is the chemical or substance which (1) combines with oxygen, or (2) loses electrons to the reaction. See "Oxidation."

**Reproductive Hazard**—a chemical which is capable of affecting the fertility of the parents or offspring or the production of offspring or may cause spontaneous abortion, deformed fetuses, chromosomal damage, mutations, or other harmful side effects on fetuses.

**Route of Entry**—the means by which hazardous substances can get into the body; specifically, the respiratory system (inhalation), the digestive system (ingestion), and the skin (contact).

**RTECS** (Registry of Toxic Effects of Chemical Substances)—a NIOSH publication that list significant information on the toxic effects of chemicals.

## S

**SCBA** (Self-Contained Breathing Apparatus)—a special respirator that supplies fresh air from a compressed cylinder the wearer carries on his back.

**Sensitizer**—a substance which, on first exposure, causes little or no reaction in humans or test animals; but which, on repeated exposure, may cause a marked response, not necessarily limited to the contact site. Skin sensitization is the most common form of sensitization in the industrial setting, although respiratory sensitization to a few chemicals is also known to occur.

**SETA** (Setaflash Closed Tester)—a flash point test method.

"Skin"—a notation, sometimes used with PEL or TLV exposure data; indicates that the stated substance may be absorbed by the skin, mucous membranes and eyes, either airborne or by direct contact, and that this additional exposure must be considered part of the total exposure to avoid according to the PEL or TLV for that substance.

**"Skin Sensitizer"**—see "Sensitizer."

**Skin Toxicity**—see "Dermal Toxicity."

**Solubility in Water**—a term expressing the percentage of a material by weight that will dissolve in water at ambient temperature. Solubility information can be useful in determining spill cleanup methods and fire-extinguishing agents and methods for a material. Terms used to express solubility are:

| | |
|---|---|
| Negligible | Less than 0.1 percent |
| Slight | 0.1 to 1.0 percent |
| Moderate | 1 to 10 percent |
| Appreciable | More than 10 percent |
| Complete | Soluble an all proportion |

**$SO_x$** (Oxides of Sulphur)—undesirable air pollutants. $SO_x$ emissions are regulated by EPA under the Clean Air Act.

**Species**—a biological type; on MSDS's, species refers to the specific type of test animals used, usually rats, mice, or rabbits, which were used to obtain the toxicity test data reported.

**Specific Gravity**—the weight of a material compared to the weight of an equal volume of water; an expression of the density (or heaviness) of the material. Example: If a volume of a material weighs six pounds, and an equal volume of water weighs ten pounds, the material is said to have specific gravity of 0.6.

$$\frac{6 \text{ lbs.}}{10 \text{ lbs.}} = 0.6$$

Insoluble materials with specific gravity of less than 1.0 will float in (or on) water. Insoluble materials with a specific gravity greater than 1.0 will sink (or go to the bottom) in water. Most (but not all) flammable liquids have specific gravity less than 1.0 and, if not soluble, will float on water (an important consideration for fire suppression).

CONTINUED ON NEXT PAGE

# GLOSSARY OF HAZARD COMMUNICATION TERMS & PREFIXES AND CONVERSION FACTORS

**Stability**—an expression of the ability of a material to remain unchanged. For MSDS purposes, a material is stable if it remains in the same form under expected and reasonable condition of storage or use. Conditions which may cause instability (dangerous change) are stated. Examples: temperatures above 150°F may cause product degradation, chemical reaction with an incompatible material or the shock from dropping may cause an explosive reaction.

**STEL** (Short Term Exposure Limit)—ACGIH terminology. See "TLV STEL."

**Synonym**—another name or names by which material is known. Methyl alcohol for example, is also known as methanol, or wood alcohol.

## T

**TCC** [Tag (Tagliabue) Closed Cup]—a flash point test method.

**Teratogen**—a substance or agent to which exposure of a pregnant female can result in malformations and structural abnormalities in the fetus; variations, altered fetal growth, and change in the gestational age at delivery; postnatal parameters include growth and development; physiological deficits and delay, neurological, neurobehavioral and psychological deficits, altered sex ratio, abnormal sexual development or function, and morbidity or mortality; somatic or genetic (germ cell) mutations in the conceptus.

**TLV** (Threshold Limit Value)—a term used by the ACGIH to express the airborne concentration of a material to which **nearly** all persons can be exposed day after day, without adverse effects. ACGIH expresses TLV's in 3 ways:

**TLV-TWA:** The allowable Time Weighted Average concentration for a normal 8-hour workday or 40-hour week.

**TLV-STEL:** Short Term Exposure Limit, or maximum concentration for a continuous 15-minute exposure period (maximum for 4 such periods per day, with at least 60 minutes between exposure periods, and provided that the daily TLV-TWA is not exceeded.)

**TLV-C:** the Ceiling exposure limit: The concentration that should not be exceeded even instantaneously.

Also, see "Skin" notation.

**TOC** (TAG Open Cup)—a flash point test method.

**Toxic**—harmful to living organisms.

**Toxicity**—the sum of adverse effects resulting from exposure to a material, generally by the mouth, skin, or respiratory tract. For RCRA purposes, solid or liquid wastes which exhibit certain specified "characteristics of toxicity" may be regulated by EPA as hazardous wastes.

**Toxic Substances**—See "Hazardous or Toxic Chemical Substance."

**Trade Name**—the trademark name or commercial trade name for a material.

**Trade Secret**—any confidential formula, pattern, process, device, information, or compilation of information (including chemical name or other unique chemical identifier) that is used in an employer's business, and that give the employer an opportunity to obtain an advantage over the competitors who do not know or use it.

**TWA** (Time Weighted Average exposure)—the airborne concentration of a material to which a person is exposed, averaged over the total exposure time, generally the total workday (8 to 12 hours). Also see "TLV."

## U

**UEL or UFL** (Upper Explosive Limit or Upper Flammable Limit of a vapor or gas)—the highest concentration (highest percentage of the substance in the air) that will produce a flash of fire when an ignition source (heat, arc or flame) is present At higher concentrations, the mixture is too "rich" to burn. Also see "LEL."

**Unstable**—a material that readily undergoes decomposition or other unwanted chemical change during normal handling or storage.

## V

**Vapor Density**—the weight of a vapor or gas compared to the weight of an equal volume of air; an expression of the density of the vapor or gas. Materials lighter than air have vapor densities less than 1.0 (examples: acetylene, methane, hydrogen). Materials heavier than air (examples: propane, hydrogen sulfide, ethane, butane, chlorine, sulfur dioxide) have vapor densities greater than 1.0. All vapors and gases will mix with air, but the lighter materials will tend to rise and dissipate (unless confined). Heavier vapors and gases are likely to concentrate in low places, along or under floors, in sumps, sewers and manholes, in trenches, and ditches, where they may create fire or health hazards.

**Vapor Pressure**—the pressure exerted by a saturated vapor above its own liquid layer in a closed container. Historically, the test temperature was usually 100°F (38°C). However, on MSDS's the vapor pressure is expressed as pounds per square inch (psig or psia). The vapor pressure is reported in millimeters of mercury (mm Hg) at 68°F (20°C), unless stated otherwise.

**Ventilation**—is either a mechanical system or natural method of exchanging air within a space. Mechanical systems can include fans and blowers, as well as natural wind turbines. Natural ventilation is caused by wind pressure and infiltration through a structure. Typical ventilation rates are 2-6 air changes per hour.

# PREFIXES AND CONVERSION FACTORS

The conversion factors shown below are among those found most useful to instrument engineers. They are accurate to four or five places. Higher accuracy is almost never warranted in industrial instrumentation except in special cases.

Shown also is a set of prefixes, some of which are in common use, as in megatons, kilowatts, millivolts, and centimeters, to indicate decimal multiples and submultiples of units. These prefixes are internationally accepted.

## PREFIXES

| | | | | | |
|---|---|---|---|---|---|
| $10^{12}$ tera (T) | 10 deka (da) | $10^{-9}$ nano (n) |
| $10^{9}$ giga (G) | $10^{-1}$ deci (d) | $10^{-12}$ pico (p) |
| $10^{6}$ mega (M) | $10^{-2}$ centi (c) | $10^{-15}$ femto (f) |
| $10^{3}$ kilo (k) | $10^{-3}$ milli (m) | $10^{-18}$ atto (a) |
| $10^{2}$ hecto (h) | $10^{-6}$ micro (μ) | |

## LENGTH

**Centimeters—cm**
- x 0.394 = Inches

**Feet—ft.**
- x 30.48 = Centimeters
- x 0.3048 = Meters

**Inches—in.**
- x 2.540 = Centimeters

**Meters—m**
- x 3.281 = Feet
- x 39.37 = Inches
- x 1.094 = Yards

## VOLUME

**Cubic Centimeters—cu cm or $cm^3$**
- x 0.06102 = Cubic inches

**Cubic Feet—cu. ft.**
- x 28320 = Cubic centimeters
- x 7.481 = Gallons

**Cubic Inches—cu. in.**
- x 16.39 = Cubic centimeters

**Gallons—gal.**
- x 8.322 = Pounds of water

**Liters—l**
- x 0.2642 = Gallons

## TEMPERATURE

**Degrees Celsius—°C**
(°C x 9/5) +32=°F

**Degrees Fahrenheit—°F**
(°F −32) x 5/9=°C

## WEIGHT

**Kilograms—kg.**
- x 2.205 = Pounds

**Pounds—lb.**
- x 453.6 = Grams

## LIGHT

**Lux**
- x 0.0929 = Foot candle

**Candles/Square Meter**
- x 0.2918 = Foot lambert

# CHEMICAL RESISTANCE CHART FOR VARIOUS PUMP MATERIALS

The recommendations listed on the following pages are based upon information from material suppliers and careful examination of information and are believed to be accurate. However, since the resistance of metals, plastics, and elastomers can be affected by concentration, temperature, presence of other chemicals, and other factors, this information should be considered as a general guide rather than an unqualified guarantee. Ultimately, the consumer must determine the suitability of the pump used in various solutions.

All recommendations assume ambient temperatures unless otherwise noted. The ratings for these materials are based upon the chemical resistance only. Added consideration must be given to pump selections when the chemical is abrasive, viscous in nature, or has a specific gravity greater than 1.1.

**HOW TO USE THIS CHART:** Column at left lists chemicals in alphabetic order. Columns at right list various pump materials, and there resistance to the chemicals are rated by a letter code. (Explanation of these codes is given below). For example, acetamide has "B" chemical effect rating on 304 stainless steel, which means it has acceptable minor effect.

### CHEMICAL EFFECT RATINGS

A - No effect — Excellent
B - Minor effect — Good
C - Moderate effect — Fair
D - Severe effect — Not Recommended
(*) - No test data available

### FOOTNOTE EXPLANATION

(1) P.V.C. — Satisfactory to 72°F
(2) Polypropylene — Satisfactory to 72°F
(3) Polypropylene — Satisfactory to 120°F
(4) Buna N — Satisfactory for O-Rings
(5) Polyacetal — Satisfactory to 72°F
(6) Ceramag — Satisfactory to 72°F
